SPECIAL ANNOUNCEMENTS

ERIC CLEARINGHOUSE PRODUCTS HIGHLIGHTED

Beginning with December 1980, each issue of RIE will contain a front matter page highlighting the information analysis products and other types of publications produced by the ERIC Clearinghouses. For reasons of space, the entries have been abbreviated. The full entries (with abstract) may be consulted in their regular location within RIE.

Material for this publication was processed for printing by ORI, Inc. under contract with the National Institute of Education. Use of funds for printing approved by the Office of Management and Budget, December 1980. Contents do not necessarily reflect official National Institute of Education Policy.

ERIC Clearinghouse Publications

This page highlights the documents in this issue of RIE that are new ERIC publications prepared by the ERIC Clearinghouses. For each brief citation appearing here there is a full abstract appearing under the same ED number in the pages of RIE.

What are Information Analysis Products?

In addition to collecting the literature of education for announcement in RIE and CIJE, the ERIC Clearinghouses analyze and synthesize the literature into research reviews, annotated bibliographies, state-of-the-art studies, interpretative studies on topics of high current interest, and many similar documents designed to compress the vast amount of information available and to meet the current needs of ERIC users. These products constitute new contributions to the literature by ERIC.

Availability of Information Analysis Products

ERIC IAP's are published by the individual ERIC Clearinghouses responsible for producing them. As long as stocks last, original copies are usually available directly from the responsible Clearinghouse. In addition, IAP's are announced in RIE or CIJE, as appropriate. If announced in RIE, they are contained in all ERIC microfiche collections and may be ordered individually in microfiche or hardcopy from the ERIC Document Reproduction Service (EDRS), P.O. Box 190, Arlington, VA 22210. Special collections of these Clearinghouse products are available from EDRS as follows:

1975-77 (574 documents)	\$99.50 (including postage)
1978 (211 documents)	\$37.35 (including postage)
1979 (159 documents)	\$20.95 (including postage)

Introduction

Resources in Education (RIE) —A monthly abstract journal announcing recent report literature related to the field of education, permitting the early identification and acquisition of reports of interest to the educational community.

Sponsor: Educational Resources Information Center (ERIC)
National Institute of Education (NIE)
U.S. Department of Education
Washington, D.C. 20208

ERIC is a nationwide information network for acquiring, selecting, abstracting, indexing, storing, retrieving, and disseminating significant and timely education-related reports. It consists of a coordinating staff in Washington, D.C. and 16 Clearinghouses located at universities or with professional organizations across the country. These Clearinghouses, each responsible for a particular educational area, are an integral part of the ERIC system. The Clearinghouses are listed on the inside back cover.

Organization of Journal: *Resources in Education* is made up of resumes and indexes. The resumes provide descriptions of each document and abstracts of their content. Resumes appear in a "Document Section" and are numbered sequentially by an accession number beginning with the prefix ED (*ERIC Document*). The indexes appear in an "Index Section" and provide access to the Resumes by Subject, Personal Author, Institution, and Publication Type.

Availability of Documents: The documents cited in *Resources in Education*, except as noted, are available from the ERIC Document Reproduction Service (EDRS), in both microfiche (MF) and paper copy (PC), or microfiche only. Availability in microfiche only may be determined by the source, for proprietary or copyright reasons, or by ERIC for reasons related to legibility and reproducibility. The price per document is based on the number of pages and is subject to change over time. An ERIC Price Code Schedule permits the user to convert all price codes to actual dollar amounts. Current price information for documents, microfiche, and subscriptions to microfiche collections is to be found in the section entitled "How to Order ERIC Documents," in the most recent issue of RIE.

How to Submit Documents to ERIC: If you have documents that you would like to have considered for announcement in *Resources in Education* (RIE), you should send clean, legible copies (in duplicate, if possible) to the ERIC Processing and Reference Facility, 4833 Rugby Avenue, Bethesda, MD 20014. A reproduction release, giving ERIC permission to reproduce in Paper Copy and Microfiche (or microfiche only), and signed by the author or official representative of the source institution, is requested for all documents selected for inclusion in RIE. Standard reproduction release forms may be obtained from the ERIC Facility (A sample appears at the back of this issue of RIE).

How To Order RIE: The U.S. Government Printing Office (GPO) prints *RIE* and functions as subscription agent. The basic domestic annual subscription price is \$42.70 a year. Detailed subscription information appears on the inside front cover and on the page in the back of *RIE* entitled "How to Subscribe to *Resources in Education*."

EDRS Price MF01/PC06 Plus Postage.

Pub Type—Dissertations/Theses (040)

Descriptors—*Career Opportunities, Career Planning, Careers, *Demand Occupations, *Employment Opportunities, Females, Labor Force, Labor Market, *Manpower Needs, Occupational Aspiration, Occupational Guidance, Occupations, Vocational Counseling, *Working Women

Identifiers—Consortium of States, *National Occupational Competency Testing Institute, Illinois

Women's opportunities for employment will be directly related to their level of skill and experience but also to the labor market demands through the remainder of the decade. The number of workers needed for all major occupational categories is expected to increase by about one-fifth between 1970 and 1980, but the growth rate will vary by occupational group. Professional and technical workers are expected to have the highest predicted rate (39 percent), followed by service workers (35 percent), clerical workers (26 percent), sales workers (24 percent), craftsmen and foremen (20 percent), managers and administrators (15 percent), and operatives (11 percent). This publication contains a brief discussion and employment information concerning occupations for professional and technical workers, managers and administrators, skilled trades, sales workers, clerical workers, and service workers. In order for women to take advantage of increased labor market demands, employer attitudes toward working women need to change and women must: (1) receive better career planning and counseling, (2) change their career aspirations, and (3) fully utilize the sources of legal protection and assistance which are available to them. (SB)

Clearinghouse Accession Number.

Sponsoring Agency—agency responsible for initiating, funding, and managing the research project.

Report Number—assigned by originator.

Descriptive Note (pagination first).

Descriptors—subject terms which characterize substantive content. Only the major terms, preceded by an asterisk, are printed in the subject index.

Identifiers—additional identifying terms not found in the *Thesaurus of ERIC Descriptors*. Only the major terms, preceded by an asterisk, are printed in the subject index.

Informative Abstract.

Abstractor's Initials.

Document Resumes

The document resumes in this section are arranged in numerical order by ED number, and also alphanumerically by Clearinghouse prefix and Clearinghouse accession number.

As explained in the Introduction, each Clearinghouse focuses on a specific aspect of education. The reader who is interested in one of these major aspects (e.g., Reading) may, however, find pertinent resumes among the entries of virtually any Clearinghouse, dependent on the orientation of the document. For this reason, it is important to consult the Subject Index if a comprehensive search is desired.

The following is a list of Clearinghouse prefixes and names used in this Section, together with the page on which each Clearinghouse's entries begin:

Identifiers—*Resources in Education

Resources in Education (RIE) is a monthly abstract journal which announces (catalogs, indexes, abstracts) documents of interest to the educational community (including researchers, teachers, students, school board members, school administrators, counselors, etc.). Each issue announces approximately 1,500 documents and provides indexes by Subject, Personal Author, Institution, Publication Type, and ERIC Clearinghouse Number. This special Computer Output Microfiche (COM) edition is prepared directly from the ERIC magnetic tape data base prior to publication of the printed journal and therefore is lacking the cover and other regular introductory and advertising matter contained in the printed journal. The first accession in each issue of RIE is the issue itself. In this way, the monthly microfiche collection for each issue is immediately preceded by a microfiche index to that collection. This practice began with the RIE issue for MAY 1979. (LRS/WTB)

CE

ED 191 985 CE 023 441
Establishing Capability for Statewide Implementation of the Experience-Based Career Education Program. Final Report.

Texas Education Agency, Austin.
Pub Date—29 Jun 79

Note—83p; Not available in paper copy due to light and broken type.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—*Career Education, *Change Agents, Delivery Systems, *Diffusion, Information Dissemination, Intermediate Administrative Units, *Networks, Professional Training, State Departments of Education, *State Programs, State School District Relationship, Technology Transfer

Identifiers—*Experience Based Career Education, *Texas

The essential elements of the Texas Experience-Based Career Education (EBCE) network are described and examined to determine where Texas is in terms of institutionalizing EBCE. First described are the identification of incentives for both institutional and individual participation in the statewide effort and the plans to communicate knowledge about EBCE at three levels: state, regional, and local. Network functions of the Texas Education Agency, the education service centers, and Project CITE (Coordinating Information for Texas Educators) are each outlined. It is emphasized that the development of a cadre of EBCE trainers who transfer technical assistance from the regional educational laboratories to local education agencies (LEAs) is the most important component of the implementation plan. Their role and skills acquired for it are described: advocate EBCE as viable program, broker the concept through awareness presentations, provide program analysis and planning services, train others in the EBCE process, and evaluate student and district outcomes. Other elements of the network covered include coordination (through the diffusion project director, advisory groups, and Project CITE), the reduction or elimination of barriers to implementation, the demonstration sites, and evaluation of the diffusion project (through third-party reports and director's observation). Present status is assessed establishing a mobile, highly skilled cadre of trainers in three of the four EBCE models; with regard to institutionalization, the ground work is done but evidence of success is not all in. Identifiers—Military Curriculum Project

These curriculum materials are the first section of a four-part, secondary-postsecondary-level course in metals processing. The course is one of a number of military-developed curriculum packages selected for adaptation to vocational instruction and curriculum development in a civilian setting. Block I, Introduction to Oxyacetylene Welding, contains seven lessons covering fifty-four hours of instruction: Shop and Flight Line Safety Practices, Hand Tools, Operation and Maintenance of Welding Equipment, Bead and Lap Joints of Carbon Steel, Butt Joints of Carbon Steel, Tee Joints of Carbon Steel, and Position Welding. Block II, Oxyacetylene Welding, Cutting, Soldering, Brazing, and Hard Surfacing, contains seven lessons covering forty hours of instruction: Mechanical Drawing and Blueprint Reading, Joints of Heat and Corrosion Resistant Ferrous Alloys, Cutting Carbon Steel, Silver and Lead Soldering, Brazing Steel and Gray Iron Castings, Fusion Welding Ferrous Castings, and Hard Surfacing. Instructor materials include a course chart, detailed lesson plans, and a plan of instruction containing the units of instruction, criterion objectives, and additional materials needed. Student materials include a study guide for each block with objectives, information, review exercises, and references for each lesson; programmed text on shop safety; handout of glossary welding terms; and handout bibliographies. Suggested audiovisuals are not provided. (YLB)

These curriculum materials are the second section of a four-part, secondary-postsecondary-level course in metals processing. The course is one of a number of military-developed curriculum packages selected for adaptation to vocational instruction and curriculum development in a civilian setting. Block III, Introduction to Metallic Arc Welding, contains six lessons including fifty-eight hours of instruction: Principles of Operation and Maintenance of Arc Welding Machines, Identification and Selection of Electrodes, Stringer Beads and Building Up Worn Surfaces, Fillet Welds in the Flat and Horizontal Positions, Butt Joints of Carbon Steel Plate, and Butt Joints of Carbon Steel Sheet. Block IV, Special Metallic Arts and Resistance Welding Applications, contains six lessons covering fifty-eight hours of instruction: Fillet Welds in the Vertical Position, Fillet Welds in the Overhead Position, Pipe Joints, Heat and Corrosion Resistant Ferrous Alloys, Cast Iron, and Hard Surfacing, Cutting, and Resistance Welding. Instructor materials include a course chart, detailed lesson plans, and a plan of instruction containing the units of instruction, criterion objectives, and additional materials needed. Student materials include a study guide for each block that contains objectives, information, review exercises, and references for each lesson. Suggested audiovisuals are not provided. (YLB)

Identifiers—Military Curriculum Project
These curriculum materials are the fourth section of a four-part, secondary-postsecondary-level course in metals processing. The course is one of a number of military-developed curriculum packages selected for adaptation to vocational instruction and curriculum development in a civilian setting. Block VII deals with heat treating, hardness testing, cleaning, and electroplating. It contains six lessons covering fifty-six hours of instruction: Safety and Operation of Heat Treating Furnaces; Identification and Classification of Metals; Hardness Testing; Heat Treatment of Ferrous Metals; Heat Treatment of Heat and Corrosion Resistant Ferrous Alloys, Nickel Base Alloys, Aluminum and Aluminum Alloys, and Titanium Alloys; and Cleaning, Plating, and Corrosion Control. Instructor materials include a course chart, detailed lesson plans, and a plan of instruction containing the units of instruction, criterion objectives, and additional materials needed. Student materials include a study guide which contains objectives, information, review exercises, and references for each lesson. Suggested audiovisuals are not provided. (YLB)

Monograph for Bilingual Training.
Development Associates, Inc., Arlington, Va.
Spons Agency—Office of Education (DHEW), Washington, D.C.

Pub Date—Sep 79

Contract—300-78-0269

Note—91p.

Pub Type—Guides - Non-Classroom (055)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—Adult Vocational Education, *Bilingual Education, Data Collection, English (Second Language), Evaluation Methods, Postsecondary Education, *Program Design, Program Development, Program Effectiveness, *Program Evaluation, *Program Implementation, Secondary Education, *Second Language Instruction, Underemployment, Unemployment, *Vocational Education

This monograph addresses the task of designing, operating, and evaluating bilingual vocational instruction programs. It is intended to help administrators, program planners, evaluators, and staff responsible for providing an efficient, effective, and relevant program for adults and youth who are unemployed or underemployed having insufficient job skills and who lack sufficient English to permit them to function in an English-speaking work environment. Chapter 1 addresses organizing a bilingual vocational training program. Specific topics include six prerequisites to program planning and effective program implementation. Chapter 2 focuses on adapting English to vocational instruction by discussing making ESL (English as a Second Language) relevant to vocation, task of mastering English, oral approach to mastery of English, and strategies in adapting ESL to vocational Skills. Chapter 3 is designed as a guide to the evaluation of bilingual vocational training programs. It provides a set of basic techniques to plan and conduct an evaluation of project effectiveness. It discusses purpose and description of evaluation method, steps in the evaluation process, type of information needed by project directors and evaluators, data collection and assessment, and use of findings in program planning and operation. A model evaluation form is provided. (YLB)

Descriptors—Behavioral Objectives, *Consumer Education, Elementary Secondary Education, Food, Food Service, *Foods Instruction, *Home Economics, Learning Activities, *Nutrition Instruction, Postsecondary Education

The instructional materials contained in this guide are designed for consumer and nutrition education and have been structured in accordance with federal regulations for vocational consumer and homemaking educational programs. Instructional objectives and activities are divided into three levels: level 1 for youth in exploratory/beginning programs, level 2 for intermediate level programs, and level 3 for advanced home economics students. Each level contains an overview providing concepts to be covered, generalizations, objectives, and evaluation measures for the section. Exercises in level 1 involve the food value of seafood, differences between finfish and shellfish, and seafood snacks. Provided in level 2 are exercises and charts on nutrition, fish cuts and forms, inspection and grading, characteristics of good quality seafood, season availability, market forms, and seafood purchase, preparation, and storage. Therapeutic diets, characteristics of good quality, cleaning and filleting, sanitation, storage, processing, cost analysis, consumer information and advanced preparation are covered in level 3 activities. In addition to conventional exercises, this guide contains such supplementary activities as seafood puzzles, riddles, and scramble. Drawings, references, and resource materials are appended. (CE 025 858 is a seafood manual for school food service personnel and CE 025 859 is a seafood guide for occupational food service programs.) (MN)

Descriptors—*Ancillary School Services, *Food, *Food Service, *Food Standards, Learning Activities, *Nutrition, Nutrition Instruction, Occupational Home Economics

Seafood information pertinent to the needs of school food service personnel is presented. Each of five sections contains information considered important by school food service managers and supervisors as indicated in a national survey (1977). Provided in section one are a narrative section, graph, and chart on seafood nutritive value. The next section on seafood selection describes (1) market forms of fresh and frozen fish, (2) physical characteristics of fresh whole/filleted fish, (3) such purchase criteria as availability, market forms, quantity, and inspection, and (4) writing specifications for bidding. Storage of seafood is covered in section 3. Included in the preparation information given in section 3 are charts, illustrations, and a narrative section on thawing, cooking, and serving seafood. Suggestions on how school food programs can cooperate with classroom teachers to provide nutrition education are listed in section 5 which includes learning activities and resource agency addresses. A short bibliography is appended. (CE 025 857 is a seafood products instructional guide for home economics programs and CE 025 859 is a seafood products guide for occupational food service personnel.)

The nine lessons and supplementary activities included in this seaford food service program guide are intended for use in secondary and postsecondary occupational home economics food service programs. Material covers nutrition, therapeutic diets, harvesting methods, quality assessment, fish cuts and forms, inspection, dressing, storage, sanitation, preparation, garnishing, menu planning, cost analysis, advertising, and serving. Specific lesson objectives include (1) identification of fish types, cuts, and nutrients; (2) understanding of inspection purposes and techniques; (3) development of skills in purchasing, cleaning, storing, dressing, and preparing fish; (4) developing advertising plans to promote a seaford buffet; (5) evaluating form, taste, and recipes. Each lesson provides for actual hands-on experience in handling fish and such learning activities as exercises, games, puzzles. Tests are included at the end of each lesson, and lists of references and resources are appended. Drawings of fish types and cuts, fishing gear, and inspection seals constitute one-third of the document. Supplementary activities recommended for use with this guide include a field trip (planned in lesson 5) and the utilization of resources persons. (MN)

This handbook for vocational educators and teachers overviews concepts, methodologies, and strategies appropriate for those serving handicapped children. Chapter 1 discusses organizing and providing appropriate vocational education programs for the handicapped, including the cooperative/team approach, pre- and inservice training, and work adjustment. Chapter 2 concerns goals for vocational development. Specific topics include setting appropriate goals, goal planning with the student, skill evaluation, setting individualized course goals, and carrying out an individual instruction plan. Chapter 3 focuses on unique needs of handicapped learners and discusses social functioning, classification, equipment adaptation, and employability. Chapter 4, Vocational Assessment for Program Placement of Student, considers determining characteristics of a

vocational program, assessing worker traits, medical information, educational assessment, and vocational skills and work behaviors. Chapter 5 discusses structuring programs, including facilitating the learning process, supportive services, and modification of facilities. Chapter 6 gives suggestions on instructional techniques and methods, including selecting and obtaining materials and specialized teaching strategies. Chapter 7 briefly examines evaluation procedures and provides information on needs assessment and assigning grades. Appendixes include sample staffing reports, list of supportive services, sample instructional materials, and summary of Sections 503 and 504 of the Rehabilitation Act of 1973. (YLB)

Identifiers—Vocational Evaluation

These proceedings contain nine presentations made at a conference to introduce vocational education teachers to effective instructional strategies to serve handicapped and disadvantaged persons. The conference was conducted as an activity of the project, Sensitizing Vocational Education Teachers to Effective Instructional Strategies to Serve Disadvantaged and Handicapped Persons, which focused on the educable mentally retarded student. The first presentation is The Concept, an overview and orientation, which is followed by The Student, a synopsis of four parents' perspectives of the education for the handicapped child. The other presentations are The Implications for Special Education; Vocational Education Alternatives for the Handicapped; Task (Work) Related Competencies; Work Assessment/Work Evaluation (Work Adjustment), including a selected annotated listing of commonly identified work assessment/work evaluation systems; Teaching Strategies; and Instructional Materials. Appendixes include these project materials: an Aptitude Assessment Instrument with description of respondents and analysis of attitude assessment, workshop evaluation form (used at project workshops) with analysis of evaluation responses and conclusions, and reference and selected reading list. Identifiers—*Ontario

Results of a field survey of Canadian companies, trade unions, employer associations, educational establishments, and government agencies regarding

the extent and possibilities of employer-sponsored training for workers are compiled in this report. Concentrating on the forty-nine companies in the survey sample, with collateral data from the twenty-one other sources, the report begins in chapter 1 with a statement of the research question and an overview of the project. Chapter 2 provides details of data and methods used in the field survey—sampling, interview schedules, definitions, data gathering, and data analysis. Chapter 3 profiles the forty-nine companies in which interviews were conducted, thirty of which were engaged in employer-sponsored training. It takes into account their size, geographical location, unionization status, and use of government-sponsored training programs. Chapter 4 presents a more detailed analysis of the companies, comparing training and non-training firms on such issues as perceptions of barriers to employer-sponsored training and willingness to assume principal responsibility for training (as opposed to looking to government for training responsibility). Chapter 5 examines interview results on attitudes and experiences of the twenty-one other organizations with regard to employer-sponsored training, and identifies proposals for government action. Chapter 6 reports the principal conclusions. Appendixes contain characteristics of the organizations and interview schedules. (KC)

Identifiers—*Egypt

A study analyzed the system of vocational training in Egypt, including school-based and post-school training of different categories of workers at skilled-worker level and craft level. Special attention was given to favorable and unfavorable conditions affecting access to vocational education and training for the benefit of working classes. Systems researched were technical education, apprenticeship, quick (accelerated) training, and skill-upgrading. Desk and field research (interviews and questionnaire) collected data related to education and training of skilled workers, including size of employment and training in the institution, financing training, trainees, curricula, trainers and teachers, methods of training, follow-up, and evaluation. The study determined general educational requirements (cultural levels) required for admission to colleges, institutes, schools, and centers for vocational education; and non-cultural requirements, medical and physical fitness being the most important. It also revealed inadequacies in the technical secondary schools. Two related projects were also studied: the Vocational Graduation Project for young persons, age 12-17, and the Productive Families Project, an economic-social project that helps poor families by providing simple technical, agricultural, and commercial projects for the benefit of poor families. Training programs were found to have quantitative and qualitative shortcomings. (The questionnaire is appended.) (YLB)

Identifiers—Argentina, Botswana, Egypt, Korea
Based on responses received from Argentina, Botswana, Egypt, and the Republic of Korea, this progress report consists of analyses of the case studies and a comparative survey. Part 1 analyzes the reports of each of the four countries individually. Argentina's report is discussed in terms of its four chapters: General Background, Method of Collecting Information, Vocational Education Programmes under the State Sector, and Vocational Education Programmes under the Private Sector. Discussion of the Botswana report is by its six chapters: Introduction: Objectives and Methodology, Employment and Manual Skills Training, General Background, Vocational Training Institutions, Employers and Manual Skills Training, Trade Testing, and The Self-Employed and Manual Skills Training. Discussion of the Egypt report focuses on four chapters: Introduction and Objectives of the Study, Methods and Procedures, Findings, and Conclusions and Recommendations. The Republic of Korea's report is discussed in terms of its four parts: Problems, Status of Occupational Training, National Skill Certification System, and Suggested Direction of Vocational Education and Training. Part 2 comments on achievement of objectives by these four studies. Areas of focus include existing facilities for vocational education, apprenticeship system, upgrading courses, national certification of skills, and opinions of employers. Seven recommendations are listed. (YLB)

This report of a study to analyze the problems of access to institutional skills training of the manual work force is divided into five chapters. Chapter 1 introduces the study and explains the work plan and methodology. Chapter 2 discusses patterns of employment and overviews the provision of manual skills training in Botswana. Chapter 3 concerns the special sources of vocational training: the National Centre for Vocational Training, now the Polytechnic; the brigades (which provide training in a particular occupation to primary school-leavers) and the prisons. Specific topics dealing with brigades include entry requirements, fees, provisions of places, personal attributes affecting access, current recruitment and selection procedures, part-time skills courses, provision of new courses and expansion plans, and access to skills training. Chapter 4 examines training opportunities provided by employers and their general attitudes to training. The analysis is divided by deliverer of training: public (government) sector, mining companies, and other private sector companies and businesses. Focuses include recruitment, development of training institutions, and trade testing system. Chapter 5 lists ten recommendations arising from a survey of training institutions and nine from a survey of employers. Appendixes include a description of trade testing and annotated bibliography. Identifiers—Canada, Europe (West), United States

After a brief discussion of conference background and structure, these proceedings identify and summarize equal pay and employment policy issues discussed at a four-day working conference of sixty-five people from twelve advanced industrialized countries. Focus is on progress to date and alternative strategies for implementing policies. Strategies discussed include implementing equal employment policy (EEP) as legislation, government regulation, collective agreement, and training programs for women. Specific topics covered include facilitation of equal employment policy in work organizations by the awareness of federal laws and regulations, establishment of goals and timetables for action, development of an EEP policy, analysis of the company's utilization of women, monitoring EEP plans versus results, identification of special problem areas in utilizing women, and changes in personnel practices. Alternative arrangements of working hours, job sharing experiments, and guaranteed paid leaves are examined. The effect

CE 025 998

of the current recession on EEP and the underevaluation of women's work are treated. Issues listed as unresolved are preference for an EEP encompassing short or long-term perspectives, means for EEP implementation, and goals and priorities. The issues of the double burden of the working woman in work and family life, the unionization of working women, and the broadening of EEP goals are examined in greater depth in the conclusion. Statistics on labor force composition, wage gaps and unemployment, and current machinery for EEP implementation are appended. (MN)

The Sociological and Economic Roots of Sex

Discrimination.

Pub Date—[76]

Note—12p.; Preliminary Short Summary of the Full Paper.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Economic Development, *Economic Status, *Educational Discrimination, Enrollment, *Family Role, Females, Role Perception, Sex Bias, *Sex Discrimination, *Sex Role, Socioeconomic Influences

Identifiers—Nigeria

Past studies on economic discrimination against women have dealt with existence and effects. An examination of how origins, nature, and causes of discrimination are socially determined during the pre-industrial stage of economic development focused on the experience of Nigeria as a case study. The existence of a family-oriented system in which the family is an economic unit, the husband is responsible for supporting the family, sons perpetuate the family name, and a scarcity of resources makes boy-biased educational expenditure a rational economic behavior. As income increases this bias decreases and female enrollment increases. Tabulated statistics on sex distribution in school enrollment in Nigeria from 1950 to 1970 affirm this pattern. During a pre-industrial stage with a boy-biased educational system, the labor market only validates the family structure and social values. As an economy develops it becomes less family-oriented and family and social value changes tend to equalize responsibility among individuals regardless of sex. The reality of equal responsibility without equal opportunity means an urgent need for action at the government, employer, and individual levels. Increased availability of adequate training for women coupled with increasing realization of their economic potential is the best road to change. (MN)

Identifiers—*Indiana

A project was conducted to study impacts of vocational education research and development with special emphasis on the job placement and followup program in Indiana. The specific objectives were (1) to investigate the impact of R & D projects in vocational education and the conceptual and methodological problems in impact studies, and (2) to conduct a survey on the establishment, operation, and effectiveness of job placement and followup programs. A questionnaire form was developed to survey the status, operational problems, and effectiveness of programs. Forms were mailed to area vocational schools and postsecondary vocational and technical institutions and responses were analyzed. The highlights of the selected impact studies as summarized in this report provide insights into understanding of impacts of the R & D projects in vocational education. More intellectual efforts

CE 026 123

CE 026 121

CE 026 149

are required to solve the conceptual and methodological problems in determining the degree of impacts of R & D projects. The survey reveals the effectiveness of impacts of the placement and followup program upon students' job placement, graduates' followup, business and community, and program improvement, along with its status and operational problems. Identifiers—Indiana

A project was conducted to develop a technical assistance package to assist state and local policy agencies and schools in needs assessment and planning projects as outlined in the Indiana State Plan for vocational education. Of top priority is the development of instrumentation and a system indicating in measurable terms the job requirements specified by potential employers for which vocational education must provide training. Procedures for accomplishing these goals included development of (1) a philosophy for vocational education program planning, (2) an instruction program for assessment and planning seminars, (3) guidelines for local planning, and (4) a sample fact sheet for area data from a region profile. After consultation with local directors and information analysis in other states, guidelines were prepared, evaluated, and redesigned. Evaluation of the project was based on findings of previously conducted surveys, and procedural validity was judged by local agencies. It is recommended that material included in three appendixes (manuscript for Vocational Education Program Planning, guidelines for local planning, and a sample planning fact sheet) be distributed for statewide use to provide a uniform program development system. Sixteen instructors who teach the ninth grade career cluster programs at the Cape May County Career Center produced learning activity packets which would constitute the required career exploration and decision-making activities for ninth graders. At a forty-hour workshop conducted during the summer of 1979 they developed fifteen separate but related learning activities for each of eight career cluster programs to be offered at the County Ninth and Tenth Grade Career Center during 1979-80. (The activity learning packets are available separately as CE 026 154-155). On a pre- and post-workshop self-study 85% of the instructors also rated their abilities in curriculum development as "improved significantly." Pre- and post-course evaluations conducted after institution of the learning activity packets demonstrated students' increased career awareness. Eighty percent of the students were able to name at least ten jobs within

each occupational cluster. Students also showed a 98% increase in evaluation of themselves as decision-makers by describing the specific steps which resulted in their course selection for grade 10. At the conclusion of the students' tenth-grade year in 1980 rate of reduction in drops and transfers will be assessed. Dissemination activities and strategies to eliminate sex bias and sex role stereotyping were also part of the project. (YLB)

This first of two parts presents learning activities for four occupational clusters of a ninth-grade cluster program. It contains theory and hands-on activities that explore the occupational requirements and working environment of these areas to help students make intelligent decisions of possible career choices based on levels of interest and ability. The necessary mathematics, applied science, and English are included as related subject areas. The four occupational clusters and (at least) six basic occupational areas within each occupational field included here are (1) business and distributive occupations (accountant/bookkeeper, hotel/motel manager, business manager, retailer, data processor, secretary), (2) communications and media occupations (commercial artist, graphics worker, media technician, photographer, radio and television announcer, set manager), (3) construction occupations (cabinetmaker/carpenter, fiberglass industry worker, furniture finisher/rebuilder, mason, painter/decorator, surveyor), and (4) environmental occupations (commercial fisherman, horticulturist, environmental health technician, marine technician, forestry technician, wetlands manager). Each cluster lists goals and objectives and then is divided into the occupations. Each occupation section contains a chart listing related learning activities, student activities; tools, equipment, materials; time required; and evaluation. The learning activities follow. (YLB)

It contains theory and hands-on activities that explore the occupational requirements and working environment of these areas to help students make intelligent decisions of possible career choices based on levels of interest and ability. The necessary mathematics, applied science, and English are included as related subject areas. The four occupational clusters and (at least) six basic occupational areas within each occupational field included here are (1) health occupations (child care assistant, medical assistant, dental assistant, nurse, hospital technician, therapist/inhalation/occupational/physical), (2) mechanical occupations (air conditioning and refrigeration, plastics worker, automotive trades worker, plumber/heating worker, mechanical electrical repairer, welder/metal worker), (3) service occupations (beautician, hospitality manager, cook/baker, hotel/motel maintenance worker, dressmaker/fashion designer, upholsterer), and (4) technical occupations (automotive technician, architectural and machine draftsman, communications technician, electronics technician, computer technician, operating technician). Each cluster lists goals and objectives and then is divided into the occupations. Each occupation section contains a chart listing related learning activities; student activities; tools, equipment, materials; time required; and evaluation. The learning activities follow. (YLB)

Washington State Public Service Employment:

Training and Transition Project. Final Report.

Productivity Assoc., Vashon, Wash.

Spons Agency—Washington State Employment

Dept., Olympia. Employment and Training Div.

Pub Date—Jun 80

Note—85p; Parts of some pages may not reproduce well due to thin type.

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—Adult Vocational Education, Career Planning, *Economically Disadvantaged, *Educational Opportunities, *Education Work Relationship, Employers, Employment Potential, *Employment Programs, Evaluation, *Federal Programs, Job Skills, *Job Training, Participation, Postsecondary Education, Skill Development, Surveys, Unemployment, Vocational Education, Work Experience Programs

Identifiers—Comprehensive Employment and Training Act, *Public Service Employment, Washington

A project reviewed and assessed the scope and availability of Public Service Employment (PSE) participant training. It explored alternatives on how training resources can be utilized and best administered to maximize participant transition to unsubsidized employment. Project phases were program administrator interviews, employing agency and participant surveys, and assessment workshops. It was found that traditional resources (community college, vocational-technical schools, and continuing education programs) are valuable but not sufficient to meet training demands. Special structured training and apprenticeship programs should be developed. PSE participants need skill development training directly related to a realistic transition plan or career goal. All key people should be involved in developing an Employability Development Plan comprised of a strong skill and career assessment program leading to a training plan. The role of employing agencies in training should be expanded. The Average Annual Wage Restriction has redirected PSE as a training program serving the most needy. PSE training and work experience should be coordinated with private sector labor market needs. Difficulties exist in rural areas and in prime sponsor adjustment to regulation changes. Recommendations to policy makers were also formulated. (Appendixes, amounting to over one-half of the report, include interview and survey results and workshop discussion summary.) (YLB)

Wasydyke, Raymond G. And Others
Providing Students in Nonprofit Private Schools with Access to Publicly Supported Vocational Education Programs. Final Report.

Educational Testing Service, Princeton, N.J.
 Spons Agency—Bureau of Occupational and Adult Education (DHEW/OE), Washington, D.C.
 Bureau No.—498AH80047
 Pub Date—Apr 80
 Contract—300-78-0595
 Note—91p.

Pub Type—Reports - Research (143)
EDRS Price - MF01/PC04 Plus Postage.
 Descriptors—*Access to Education, *Change Strategies, *Cooperative Programs, Definitions, Educational Cooperation, Educational Finance, Educational Legislation, *Federal Legislation, Institutional Cooperation, *Private Schools, Program Implementation, Public Education, Statistics, *Vocational Education
 Identifiers—*Vocational Education Amendments 1976

A project was conducted to increase participation of students enrolled in nonprofit private schools in vocational programs funded under the Vocational Education Amendments of 1976 (P.L. 94-482). Objectives were (1) to identify factors facilitating private student access to vocational programs, (2) to develop and field test implementation procedures for state and local agencies, and (3) to disseminate this information to state and local vocational program administrators. Practices used to implement P.L. 94-482 were identified through field studies in nine states, classified, and used in developing a videotape presentation which was disseminated along with related materials during workshops for state and local education agency staff responsible for implementing the amendments. Research revealed that cooperative relations between private and public institutions are impeded by structural, philosophical, attitudinal, communication, and administrative barriers including the absence of accurate data bases, poor communications network among private and public institutions, state policies discouraging joint public and private programs, and traditional antipathy between public and private school administrators. Recommendations for improving private school student access to vocational programs include expanding provisions of the law to include all federally funded vocational programs, joint planning at all government levels, and development and dissemination of information about model cooperative programs. Ricci, Anthony, Jr.
A Study of the Educable Mentally Retarded in a Multi-Occupational Program.

State Univ. of New York, Utica. Coll. of Technology.
 Pub Date—[79]
 Note—58p.

Pub Type—Dissertations/Theses - Masters Theses (042) - Reports - Research (143)
EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Adolescents, Adults, *Career Awareness, Career Exploration, Career Guidance, Definitions, Federal Legislation, *Mild Mental Retardation, Needs Assessment, *Occupational Clusters, *Prevocational Education, Questionnaires, *School Role, Secondary Education, *Special Education, Special Programs, Student Characteristics, Student Needs, Youth
 Identifiers—Oneida Consolidated School District NY

Although educable mentally retarded (EMR) students exhibit deficiencies in general intellectual functioning and adaptive behavior, they, like other children, need successful school experiences and a vocation. They can develop personal and social skills necessary to obtain and hold jobs. Federal legislation has made career preparation of EMR students a concern of vocational education. The hands-on learning provided in vocational education and its relationship to the world of work make vocational education the best place for EMR students seeking job entry skill. Specific EMR student prevocational and vocational training needs must be assessed. A study sought to determine the success of the Oneida County (New York) prevocational multi-occupational training program in helping EMR students enter regular occupational programs, regular work experience programs, or full-time employment. Analysis of data from a questionnaire given to Oneida County teachers of EMR students reveals

that 89 percent of the program's seventeen students entered a regular vocational program. Questionnaire-based recommendations include better preparation of EMR students to tolerate failure, acquaintance of students with various available jobs and agencies that help with job training and placement, and an attempt to get more guidance and evaluation help from outside sources. Identifiers—*National Second Step Project, Sonoma State University CA

This manual details a research design for the longitudinal and comparative evaluation of nursing education currently being conducted by the National Second Step Project at Sonoma State University. Chapter 1 describes the purpose, background, and context and substance of the Second Step model. Chapter 2 considers the design of a multicampus evaluation research approach in terms of the survey population and sample, objectives, setting a timetable, and adopting a methodological approach. In chapter 3 the evaluation methodology is detailed with regard to sources of information and data collection tools and techniques (standardized tests, project-designed instruments, and observations and document review). Chapter 4 outlines evaluation procedures as they pertain to data collection, data processing, providing feedback to participants, and communication and decision making. The focus of chapter 5 is analysis with particular attention given to qualitative and quantitative data analysis, data validity and reliability, and data synthesis and interpretation. Chapter 6 concentrates on planning, writing, editing, and disseminating the final evaluation report. (A prospectus is appended.) (YLB)

A selection of papers presented at the Twentieth Annual Conference of the Australian College of Education, this delineates the present philosophies of education and work, and their connection, and suggests how some of these ideas are changing and must change to fit the society of the future. Part 1 presents twelve papers organized loosely under three themes: "The Changing World of Work," "The Individual and the World of Work," and "Education and the World of Work." Selected comments from group discussions and conference reviews also are presented. Part 2 examines the subthemes "From School to Work," "Post-School

Education," and "Career Education" via five papers selected from the many submitted. A list of contributors with vitae is included. (KC)

Rand, Margaret
Designing an Adult Education Program.

Pub Date—Jul 76
 Note—44p.
 Pub Type—Information Analyses (070) - Reports - General (140)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Administrator Qualifications, Adult Basic Education, *Adult Education, Adult Educators, Adult Students, Counselor Role, *Curriculum Development, Educational Objectives, High School Equivalency Programs, Learning Experience, Needs Assessment, *Program Development, Program Evaluation

Identifiers—Houle (Cyril O), Knowles (Malcolm S), Tyler (Ralph W)

Intended for planners of adult education curriculums, this literature review explains the concepts involved in designing an adult education program, provides information about the roles of the people involved in the adult education process, cites some program planning models, and applies the program planning principles to an Adult Basic Education (ABE) and a General Educational Development (GED) program. Part 1 of the report tells how to ascertain the needs and interests of adult learners, formulate educational objectives, develop a curriculum and learning experiences to meet those needs, and evaluate how the objectives have been met. Part 2 examines the people in adult education: learner characteristics, teacher training and traits, qualifications and duties of the administrator/director of adult education, and the counselor's role. With diagrams, part 3 examines four programming models: Tyler's general design for analyzing an educational curriculum; Houle's system of education specifically for adults; Knowles's concept of program development based on "andragogy" (instruction of adults rather than of children), and an English as a Second Language/Adult Basic Education needs-based model. Part 4 describes the program in Forest Lake, Minnesota, applying the needs-based model to the ABE program and Houle's model to the GED program. (KC)

Identifiers—*Bus Drivers, New York

This assistant drivers trainee study guide is designed for use by students in a school bus driver instruction program as a preclass assignment, a textbook/notebook during instruction, and a reference book after instruction. A companion instructor's guide is available separately—see Note. The guide is divided into five units: (1) Developing a Positive Attitude toward Handicapping Conditions, (2) Who are the Children with Handicapping Conditions, (3) Responsibilities of the School Bus Transportation Team, (4) Behavior Management Techniques, and (5) First Aid. Each unit contains the following: table of content, statement of objectives, complete textual outline of the necessary content material trainees must learn to accomplish the objectives, a column for trainee's notes beside the text material, and unit review questions. Descriptors—Child Development, *Children, Children's Games, *Cognitive Ability, Cognitive Development, *Competence, *Motivation, *Play, Preschool Education, Selection, *Skill Development, Skills

Identifiers—*Choice Behavior

Researchers have studied both competence levels and competence motivation in children. Competence motivation is usually assessed in terms of children's spontaneous preferences for optimal cognitive challenge, but actual spontaneous preferences in free play have seldom been used to assess motivation. In fact, competence level and competence motivation are inseparable since motivation, as it relates to spontaneous preferences, must be assessed by comparison with measures of skill (competence) level. Three experiments assessed children's preferences and demonstrated how they and skill levels could be compared: The Development of Agent Use, The Development of Social-Role Concepts, and The Development of Agent Use and Role Concepts. Results showed that as age increased preschool children showed more preferences for tasks at lower levels than their highest possible skill levels. Reasons included (1) more freedom in choice of activities and content, (2) increasing complexity of free play, (3) use of play as escape or rest from school and other demands, and (4) competence to choose when to meet a challenge and tax one's skills and when to save one's energy and not meet challenges. It was concluded that caution is needed in assuming that children's competence motivation is reflected in spontaneous preference for optional optimal cognitive challenge. (Author/YLB)

Education, Teaching Methods, *Vocational Education

Identifiers—SQ4R Method

Cosmetology Reading Strategies is one of five instructional guides in the Reading Strategies in Vocational Education Series. Developed to assist teachers working with students considered disadvantaged because of reading deficiency, the guide contains several strategies, suitable for adaptation, specifically related to cosmetology instruction. Each of six sections into which the guide is divided contains informational material and extensive examples and exercises. Section 1 concerns readability and gives procedures and guidelines for how to collect samples and how many samples to collect. Section 2 briefly describes the Cloze procedure and its usefulness as a reading test and as a teaching technique for the theory of case grammar. The following four sections each present a set of important reading skills: Basic Vocabulary Skills, Paragraph Comprehension, SQ4R (Survey, Question, Read, Record, Recite, Review), and Recognizing and Recording Complex Information. Each skill is broken down into segments requiring no more than 5-10 minutes of class time every other day. Homework utilizes text assignments normally required. Following individual skill discussions is the part, Textbook Application, where each skill is applied to the course's own textbook. Each section ends with additional suggestions for teaching the new skills. (A time frame is provided for teaching the skills.) (YLB)

This annotated bibliography is an attempt to provide a fairly extensive listing of available resource materials related to home economics. It does not attempt to include materials listed in readily available catalogs produced by commercial sources, government agencies, or other agencies which normally supply their lists to teachers. The approximately 500 entries are divided into eight sections: comprehensive, child care, clothing, consumer education, family living, foods, housing, and professional development. Each section begins with an alphabetical title breakdown. The format for each resource is as follows: title, type material, intended user, cost, catalog number, date, publisher and address, and description. Two appendices, found at the beginning, include tips for using the bibliography and instructions for ordering materials. (YLB)

Designed for both the home economics teacher as a reference in planning a science unit in the child care curriculum, and for the student of child care as a resource for planning science activities, this handbook contains six units for teaching science to preschool children. Five of the units teach through imaginative finger plays and songs, and all contain learning activities to help children explore their world through touching, tasting, observing, and investigating. Some activities provide practice in classroom skills, while others encourage creativity by the students. Topics covered include: Understanding the Body, Seasons/Weather, Animals, Plant Power, Machines and Tools, and Force and Pressure. Visuals for bulletin board or projector occur throughout the units. Appendices contain suggested science resources including records, pictures, films and filmstrips, and children's science books; a plan for a discovery center; a list of free or inexpensive science materials; suggestions for teaching science activities; a blank activity plan form; and an instructor checklist for a science presentation. A bibliography is also included. (KC)

Identifiers—*Entrepreneurs

After a summary of accomplishments of phases I and II of the Methods and Materials for Entrepreneurship Education Project (identification of entrepreneurship skills and development of curriculum materials designed to develop these skills in community college level courses), this phase III report describes field testing, revision, and publication of the curriculum materials. Revision and reorganization of the materials into three volumes on learning entrepreneurship skills, applying them, and supplementary materials are discussed. After mention of student assessment and printing and binding of the materials, contents of the volumes are discussed. Following a discussion of adaptations of the materials for use in settings other than community colleges and for purposes other than preparing people to become self-employed, procedures for establishing an approved course at Illinois community colleges are presented. Preliminary dissemination and implementation activities are outlined as a prelude to phase 4 which will include summative evaluation. The major appendix is the formative evaluation report (60 pages) describing pilot and main field tests at four Illinois colleges. Another appendix (45 pages) contains pre-designed projects for human service occupations developed by one teacher who adapted the entrepreneurship materials for training human service paraprofessionals. Identifiers—*Limited English Speaking, New Jersey (Newark)

A total person-concept program combined the development of vocational, communication (English), living, and leadership skills in persons of limited English proficiency. The program, which included vocational, English language, and leadership development classes, had as its objective providing participants with new experiences to develop career/vocational skills and upgrade social and moral values for a better psychosocial adjustment in the community. Courses in Basic Skills, English as a Second Language, High School Equivalency, and Spanish as a Second Language were offered at the Roberto Clemente Community Education program, while vocational courses were offered at the Center for Occupational Education Experimentation and Demonstration (COED). Over 400 monolingual Spanish and English and bilingual persons participated. Ages ranged from twelve to fifty-eight. Findings indicated a need for these programs in the Greater Newark area and for bilingual teachers. It was shown that the learning of a trade can be used simultaneously as a tool to teach more English. (Extensive appendices include a competency profile for vocational teachers instructing limited-English or non-English speaking students, English/Spanish glossaries of medical and automobile and automo-

bile-repair terminology, and an English/Spanish Student Career Interest Profile.) (YLB)

Descriptors—Cabinetmaking, *Carpenters, Case (Grammar), *Cloze Procedure, Content Area Reading, *Corrective Reading, Directed Reading Activity, Job Skills, Learning Activities, Learning Disabilities, Postsecondary Education, *Readability, Readability Formulas, Reading Comprehension, *Reading Difficulties, Reading Skills, Secondary Education, Teaching Methods, *Trade and Industrial Education, Vocational Education, Woodworking

Identifiers—SQ4R Method

Carpentry Reading Strategies is one of five instructional guides in the Reading Strategies in Vocational Education Series. Developed to assist teachers working with students considered disadvantaged because of reading deficiency, the guide contains several strategies, suitable for adaptation, specifically related to carpentry instruction. Each of six sections into which the guide is divided contains informational material and extensive examples and exercises. Section 1 concerns readability and gives procedures and guidelines for how many samples to collect and how to collect them. Section 2 briefly describes the Cloze procedure and its usefulness as a reading test and as a teaching technique for the theory of case grammar. The following four sections each present a set of important reading skills: Basic Vocabulary Skills, Paragraph Comprehension, SQ4R (Survey, Question, Read, Record, Recite, Review), and Recognizing and Recording Complex Information. Each skill is broken down into segments requiring no more than 5-10 minutes of class time every other day. Homework utilizes text assignments normally required. Following individual skill discussions is the part, Textbook Application, where each skill is applied to the course's own textbook. Each section ends with additional suggestions for teaching the new skills. (A time frame is provided for teaching the skills.) (YLB)

Descriptors—Administrative Policy, Administrative Principles, Administrator Responsibility, Adult Education, Adults, Management Systems, Needs Assessment, Personnel Management, Policy Formation, *Program Administration, *Program Development, Recruitment, Staff Orientation, Staff Utilization, Supervision, Training Methods, Volunteers, *Volunteer Training

Designed to help public and private agencies organize a successful volunteer program, this guide begins with a discussion of the development of successful management techniques for use in the planning, implementation, and operation of volunteer services. Elements of structuring volunteer objec-

tives, developing agency rationale for volunteer services, and establishing agency volunteer policy and program structure are outlined. Provided is a model operating policy covering (1) types of volunteer services; (2) administrative responsibility; (3) staff orientation to volunteers; (4) volunteer job development, recruiting, screening, job matching, orientation, job training, and supervision; (5) records, program monitoring, and accountability; (6) confidentiality and other rules for volunteers; and (7) guidelines and standards for staff supervising volunteers. Implementing accountability systems, orienting staff to volunteer concepts, developing volunteer tasks that meet client needs, and staffing and resource allocation are examined in greater detail. In a discussion of developing effective volunteer recruiting systems factors affecting recruiting success and specific recruiting methods are covered. Issues addressed in the next section are establishing volunteer screening, matching, orientation, and pre- and inservice job training. Development of volunteer supervisor requirements is outlined. Descriptors—*Adult Basic Education, Adult Education, *English (Second Language), *High School Equivalency Programs, *Inservice Teacher Education, *Instructional Materials, *Practicums, Program Effectiveness, Teacher Education, Teaching Methods

Identifiers—Scottsdale Adult Learning Center AZ
Objectives and program descriptions are presented for the Scottsdale Adult Learning Center (Arizona) which in 1979-80 conducted a number of practicum for adult educators on individualized techniques, Adult Basic Education (ABE), High School Equivalency (GED), and English as a Second Language (ESL). First described is a paid internship program for 113 teachers designed to familiarize them with materials and method in adult education including both classroom and individualized instruction. Described next are the ABE and GED practicum background, procedure, and evaluation. The ESL practicum background, procedures, and evaluation are then presented. Follow-up inservice workshops, agency participation, teaching packets, and plans for future services are outlined. Reproduced in an appendix constituting two-thirds of the document are the ABE, GED, and ESL packets used in the practicum. A diagnostic process for beginning readers, a scope and sequence chart for beginning reading skills, Wilson's Essential Vocabulary List, and a list of suggested ABE materials comprise the ABE packet. The GED packet contains a student record sheet, information on test-taking techniques, sample study guides, a GED math placement test, and suggested pre-GED and GED materials. The ESL packet includes an ESL teacher check list, a John Test Administration Manual, an annotated bibliography of ESL materials for individual and group use, an outline for participant use in organizing open discussion ideas, and an ESL practicum evaluation. A Comparative Analysis of the Factors Associated with Career Aspirations of Brazilian Students by Sex and Grade Level.

North Carolina Agricultural and Technical State Univ., Greensboro.

Spons Agency—Agency for International Development (Dept. of State), Washington, D.C.

Pub Date—76

Contract—AID/ta-G01453

Note—28p; Not available in paper copy due to broken type. Paper presented at the Rural Sociological Society Annual Meeting (Ithaca, NY, August 1980).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—Academic Achievement, Cultural Differences, Elementary Secondary Education, *Family Influence, Females, Foreign Countries, Grade 5, Grade 9, Males, Models, National Surveys, *Occupational Aspiration, Peer Influence, *Sex Differences, Sex Role, *Socioeconomic Status, *Student Educational Objectives, Teacher Influence

Identifiers—*Brazil, Wisconsin Model and Status Attainment

Sex-related variations in the formation of educational and occupational aspirations of fifth and ninth grade Brazilian boys and girls were assessed via comparison of their academic performance, level of occupational and educational goals, and about the influence of family, peers, and teachers in shaping these goals. Data were collected on 1,950 students in four counties representing great differences in patterns of settlement and economics. The Wisconsin Model of Status Attainment (modified by inclusion of the variables sex and parents' education level and occupation) served as a point of departure. Other variables included socioeconomic status, academic performance, and influence of others. Data indicated (1) grade level is related to occupational and educational aspiration level; (2) sex is related to occupational but not educational goal level; (3) academic performance is not related to either goal; (4) acquaintances affect educational goals positively; (5) socioeconomic level affects male occupational aspirations more than female ones. Results suggest that the Wisconsin Model does not fit Brazilian data well. Recommendations call for more accurate measures to approximate Latin American social and cultural milieu, comparative analysis of societal norms defining allocation of occupational status, improved accuracy of scholastic ability indicators, and documentation of percentages of women in higher educational and occupational positions. South Carolina Job Placement Services Effectiveness Survey. Final Technical Report.

National Evaluation Systems, Inc., Amherst, Mass.

Spons Agency—South Carolina State Dept. of Education, Columbia. Office of Vocational Education.

Pub Date—Mar 80

Note—314p; Sections may not reproduce well due to colored paper.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC13 Plus Postage.

Descriptors—Administrator Attitudes, Employment Counselors, Employment Services, *Guidance Programs, High School Students, *Job Placement, *Program Effectiveness, School Counselors, Secondary Education, Sex Bias, *Sex Fairness, Sex Role, *Sex Stereotypes, State Surveys, Student Attitudes, *Student Employment, Teacher Attitudes, Vocational Education, Vocational Education Teachers

Identifiers—South Carolina

A survey was conducted to determine the effectiveness of job placement services provided to secondary vocational students in South Carolina high schools and vocational centers, to identify characteristics of effective placement service programs,

and to identify efforts made by schools to overcome sex bias. Survey instruments consisting of a variety of question formats were designed and administered to teachers (1,000), administrators (277), students (1,000), and counselors (524). Variables considered included school size and type, vocational experience, sex, age, educational level, racial/ethnic background, and student employment status. Data summaries, frequency distributions determining the percent of respondents selecting particular question categories, and means and standard deviations calculations were performed. Respondent perceptions indicated a need for improved job placement services and revealed that vocational education programs offer limited or no job placement services to adult vocational students. Both faculty and students indicated the existence of some sex-role stereotyping. Recommendations included local and state efforts to provide goals and structures for job placement services, establishment of an advisory committee, development of model programs, development of an affirmative sex-equity program, inservice vocational education programs, and the implementation of strategies for encouraging students to pursue nontraditional careers. (Appendixes, constituting two-thirds of the document, contain survey statistics, objectives, and instruments.) (MN)

Descriptors—*Classroom Techniques, Food Service Occupations, *Instructional Improvement, *Occupational Home Economics, Postsecondary Education, School Shops, Secondary Education, Self Concept, Sex Bias, Sex Differences, Sex Discrimination, *Sex Fairness, *Student Attitudes, Teacher Improvement, Teaching Methods, *Textbook Bias, Textbook Evaluation

Identifiers—Massachusetts

This instructor's guide addresses issues of sex bias as they occur in the shop area of the Culinary Arts Program. The first part gives general background by discussing sex discrimination and schools and course enrollments by sex and the Culinary Arts shop at the Minuteman Regional Vocational Technical School, Massachusetts. A second, and much larger, part focuses on strategies (developed at Minuteman) to overcome the effects of sex bias. It describes three focuses of the plan of action: Culinary Arts instructional materials, students' self concepts and biases, and instructor's shop management. Three sections discuss activities undertaken. The first section describes procedures used to review department textbooks, reports findings, and outlines strategies to counteract bias. The second focuses on the survey of students' attitudes and sex differences and reports major findings and conclusions. The third section concerns the self-examination of instructors' actions in the shop and lists strategies for seven aspects of the curriculum. A checklist follows, which is both a summary of manual highlights and an instrument for self-monitoring. Extensive appendixes provide relevant articles and materials, including checklists for evaluating materials, analyses of textbooks, student survey, and selections from "Guidelines for Sex-Fair Vocational Education Materials." Descriptors—Administrator Attitudes, *Adult Education, *Adult Programs, Cultural Differences, Educational Assessment, Educational Needs, Educational Objectives, *Evaluation Criteria, Evaluation Methods, *Federal Aid, *Federal State Relationship, Program Administration, *Program Evaluation, Surveys

Identifiers—Adult Education Act 1969, American Samoa, Guam, *Pacific Islands, Pacific Trust Territory (Mariana Islands)

A study explored those factors in the Pacific Territories affecting the conduct and validity of assessments of their Adult Education Act State Grant Programs. Examined were islanders' opinions on whether (1) educational models developed in the United States apply in the territories, (2) our efforts in the territories are having positive or negative effects, (3) territories and the states warrant different treatment, (4) the same administration standards should be applied in both places, (5) English should be the only language skill to concern federally funded educators, (6) territories are ready for advanced educational technology, (7) neglect is the way we can best help the territories, (8) islanders need information more than observation, and (9) consolidated grants will wipe out adult education in the territories. Questionnaire responses, interviews of adult education program personnel, and author observations yielded recommendations that territories should be treated differently than the states. They should be assisted in developing advanced educational technology and language skills besides English. Cultural sensitivity and non-standard evaluation designs should be used in dealing with territories. Assessments of island progress should be made jointly by local staff and external parties in multi-year efforts. (MN)

Descriptors—*Career Choice, Career Counseling, *Correlation, *Decision Making, *Influences, *Test Validity

Identifiers—Career Factor Checklist, *O Neil Meeker Borgers Model Career Decision Making
A study was conducted to investigate the effects of the correlates and problem areas affecting career decision making and specifically to test the validity of the O'Neil, Meeker & Borgers' (1978) model. A cross-sectional sample of high school, undergraduate, and graduate students (N=1,436) responded to the Career Factor Checklist (CFC) and reported the degree to which the six general factors and twenty-two sub-factors identified by the O'Neil et al. model have affected their career decision making. Data were analyzed using factor analysis and analysis of variance procedures. The results of the factor analysis indicated that the CFC measured the career choice factors identified by the O'Neil et al. model. A significant grade main effect and significant sex by grade interactions were found for four of the six factors assessed. Results of the data analysis indicated positive support for the O'Neil et al. model and the hypothesized factors affecting the career-decision-making process. Implications were drawn for individual counseling and for preventive programming around career correlates in decision making. Future research was recommended for greater understanding of the correlates of career choice and problem areas affecting career decisions. (Author/BM)

Research on a Workshop to Sensitize Women to the Effects of Sexism and Sex Role Socialization on Their Career Planning.

Spons Agency—Kansas Univ., Lawrence. General Research Fund.

Pub Date—26 Sep 79

Note—33p.; Paper presented at the Annual Convention of the American Psychological Association (87th, New York, 1979).

Pub Type—Reports - Research (143)—Speeches/

Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Adult Education, Career Choice, *Career Planning, *Females, Higher Education, *Perception, Self Concept, *Sex Bias, *Sex Role, *Socialization, Womens Education, Workshops

Research assessed the impact of a treatment designed to sensitize college freshman and sophomore women to the effects of sexism and sex role socialization factors on their career planning and to expand their current sex role attitudes and self concepts. College women on a large midwestern campus participated in a four-week career workshop. Portions of a twenty-eight minute color videotape were presented to subjects and discussed each week in small groups. The videotape presentation was a direct application of a model depicting factors affecting both sex role socialization and career planning processes. A sample of sixty college women was divided into treatment and control groups. Treatment effects were assessed by means of five career and sex role instruments in a pretest-posttest-control group design. Results indicated that treatment subjects spent more time thinking about their career planning, described themselves as more masculine, and reported investigative, social, and enterprising careers as more appropriate career choices than control group subjects. Future research and interventions were recommended to sensitize students to the effects of sexism and past sex role socialization on career decision making. (Three data tables and an extensive reference list are appended.) (Author/YLB)

Identifiers—*Comprehensive Employment and Training Act

A study was conducted to develop and implement a procedure to describe and evaluate existing linkage programs at the local level between vocational education and CETA (Comprehensive Employment and Training Act) programs. The study had the following objectives: (1) to identify linking organizations that offered services directly or through the coordination of the training programs of other agencies; (2) to describe and evaluate current methods used by these organizations; and (3) to determine the problems experienced by linkage organizations. In addition to compiling bibliographies and surveying relevant literature and legislation, linkage organizations were identified and surveyed. Data were analyzed regarding the agencies, work sites, and client populations and their relationships with training agencies and work sites. A sample of twelve linkage systems was selected for in-depth evaluation and site visits. Based on this data, it was concluded that sites tended to operate with small staffs and low initial funding, but as sites matured, amount of funding increased along with the number of clients served. Employment counseling and information dissemination were the most frequently offered direct and coordinating services. Coordinating sites tended to work intensively with a small number of business and education agencies. (BM)

Identifiers—Missouri

A study was conducted to develop competency-based curriculum materials and a computer-based analysis system for farm business records to assist local vocational agriculture teachers of adult/young farmers in their group and individualized instructional programs. A list of thirty-five competencies in financial management were validated using responses from a random sample of ten adult/young farmer teachers, fifty adult/young farmer enrollees, and ten representatives of agricultural credit. The farm business records of thirty-nine enrollees in seventeen local schools throughout Missouri were used in the pilot project of analyzing records. Output data for each farm business included a depreciation schedule, cash flow, profit and loss statement, financial statement, enterprise analysis of each enterprise with comparative results, and a 1040F tax form. In addition, three computer programs that can be accessed with remote data terminals were developed. The curriculum materials developed in the project were comprised of ten lessons in a unit titled Establishing a Farm Accounting System. Among the lessons developed were (1) Introduction to Keeping Records, (2) Planning the Year's Cash Flow, (3) Developing Depreciation Schedules for Machinery, (4) Setting up Farm Inventories and Financial Statements, (5) Keeping Enterprise Records, and (6) Using Concept of Time Value in Planning. Descriptors—*Adult Basic Education, Adult Programs, Cultural Differences, Demography, Economically Disadvantaged, *Educationally Disadvantaged, Educational Needs, Educational Objectives, Educational Strategies, Females, Instructional Materials, Program Development, *School Role, Sex Bias, *Sex Discrimination, Sex Role, Social Influences, Teaching Methods, *Womens Education

Educationally, economically, or psychologically disadvantaged women suffer from even more social and economic injustices than do other women. Although a woman's ability to provide for herself rises with her educational level, approximately half of all American women lack a high school diploma. Family relationships, religious tradition, school practices, and blue collar attitudes foster women's feelings of fatalism and powerlessness. Interviews with three Adult Basic Education (ABE) program participants reveal that disadvantaged women feel a lack of freedom, fear of life, and lack of confidence. They resent the way they are treated as wives and are accustomed to being dependent. Four ABE objectives can alleviate these feelings: (1) to enable women to develop academic skills, (2) to help women recognize and appreciate their abilities and strengths, (3) to promote the full development of each woman's intellectual capacity, and (4) to make women aware of available life-style options. To achieve these goals teachers must be able to teach women from disadvantaged backgrounds. Personal and vocational counseling, individualized instruction, and flexible programs allowing for women's childrearing responsibilities are necessary. Widespread sexism in learning materials with respect to roles, vocational opportunities, life-styles, and general characteristics must be eliminated. (MN)

Identifiers—Bedford Hills Correctional Facility NY, California Institution for Women, Florida Correctional Institution for Women, Huron Valley Women's Facility MI, Maryland Correctional Institution for Women, Massachusetts Correctional Institution, Minnesota Correctional Institution for Women, Nebraska Center for Women, Purdy Treatment Center for Women WA

This report details a study designed to contribute to knowledge about the state of the art of vocational education programs and about the vocational needs and aspirations of adult women offenders. Section 1 is composed of four parts: Executive Summary, Introduction and Purpose of the Study, Historical Perspectives, and Methodology. The discussion in this part covers the approach used to conduct an extensive literature search, develop criteria to identify successful vocational program components, select (nine) institutions for the site survey, develop survey instruments, and collect and analyze data. The first part of section 2 is a comparative analysis of vocational education programs in nine institutions based on eleven pre-determined criteria for success. Part 2 presents results of an assessment of vocational needs and aspirations of 390 incarcerated women based on responses to an instrument covering five categories of questions: personal background, education and training before incarceration, prior employment, experiences while incarcerated, and plans and aspirations after release. Section 3 outlines recommendations concerning philosophy and goals statement, needs assessment, institutional needs, job market/community needs, resource inventory, development of a vocational plan, implementation, monitoring, and evaluation. Appendixes include a selected bibliography, the two survey instruments, and institutional profiles. (YLB)

Identifiers—Bilingual Materials, *Limited English Speaking

This handbook for the bilingual vocational curriculum specialist contains seven modules which describe the process of developing curriculum materials to be used by students of limited-English-speaking ability. Module 1 is an introduction to the handbook which discusses bilingual education in the United States and the role of the teacher in bilingual education. Module 2 concerns the general principles of curriculum development for vocational education subjects. It outlines these phases: preparatory, assemble and critique resources, pre-

pare cultural profile, develop curriculum plan, establish curriculum design, preparation of trial modules, critical review of trial modules, complete curriculum product, and reality test product. Module 3, Readability: Language and Style, describes considerations and procedures for writing materials in simplified English. Module 4 deals with translation of materials. Module 5 discusses testing minority students and constructing linguistically fair tests. Examples are given in English, French, Spanish, and Chinese. Module 6 lists resources. Appendixes (Module 7) include an article on cognitive styles and culture and a glossary. The glossary, amounting to approximately half of the handbook, is a restricted list of words suitable for writing vocational materials. The fewer than 700 words are presented in English, Spanish, French, and Chinese. (YLB)

The Community Career Education Coordinator.**Monographs on Career Education.**

Office of Career Education (DHEW/OE), Washington, D.C.

Pub Date—Sep 79

Note—32p.

Pub Type—Opinion Papers (120)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Administrator Qualifications, *Administrator Responsibility, *Administrator Role, *Career Education, Coordination, *Coordinators, Educational Cooperation, *Elementary Secondary Education, Inservice Education, Organization, Public Relations, School Community Relationship

This monograph represents one of the first systematic attempts made to discuss the concept of the "coordinator of career education" as a new kind of position in the K-12 system of American education. It reports discussions of experiences and recommendations of participants at miniconferences for local K-12 career education coordinators. The first section discusses whether a specific position entitled "career education coordinator" is essential. Recommendations made include the desirability of the position at the school district level and the necessary permanence of that position. A section on the duties and responsibilities of K-12 coordinators provides a few examples of some of the diversity in duties and responsibilities. In the next section specific examples are given of how, in several communities, persons serving as coordinators are using building level personnel as "key leaders" in carrying out career education roles and responsibilities. The fourth section follows general discussion of participant recommendations concerning coordinator responsibilities with a list of fifteen responsibilities, divided into networking, information and public relations, and professional educational and community collaboration responsibilities. In the next section six qualities to look for in a coordinator are recommended. The final section consists of thoughts and recommendations regarding placement of the coordinator in education's table of organization. (YLB)

Descriptors—Adults, Employers, *Employment Potential, Experiential Learning, *Females, *Job Skills, Occupations, *Prior Learning, Surveys, *Transfer of Training

A study sought to determine the usefulness of the learning women acquire through life experience to entry level jobs in selected occupations. Methodology included sending sixteen sets of nine questionnaires to women in women's centers displaced homemaker centers, and counseling centers in seven states (131 replies, 91 percent response). The questionnaires were designed to determine the frequency and extent of involvement of adult women in homemaking and parenting activities, volunteer work and community service, recreation

and hobbies, formal and nonformal education, and paid work. The questionnaires also asked about respondent characteristics and requested self-ratings of competency in twenty-eight skills. Questionnaires designed to identify the importance of certain skills in selecting workers for entry-level jobs in eleven occupations were sent to nine employers in each occupation. Then the self-ratings of adult women's skills were compared with employer selection ratings. (Results are shown in nine tables of skills rated necessary for each occupation and a table showing transferability of the women's self-rated skills to the skills the employers selected.) (KC)

A study sought to find out how many skills which women learn through life experience can be transferred to selected postsecondary vocational education programs. Methodology included mailing sixteen sets of nine questionnaires to women in women's centers, displaced homemaker centers, and counseling centers in seven states. Questionnaires covered the type and extent of adult women's involvement in homemaking and parenting activities, volunteer work and community service, recreation and hobbies, formal and nonformal education, and paid work, and self-ratings on twenty-eight occupationally transferable skills. Questionnaires also were sent to nine junior college vocational educators to identify the importance of skills for selecting students for vocational programs and for awarding advanced placement in nine program areas. Finally, the women's self-ratings and the vocational educators' ratings were compared to identify the skill areas with the greatest transferability for each program. It was concluded that self-ratings of adult women's life experience skills and learning have potential for use in counseling and placing women in postsecondary vocational education programs. Six tables show items rated for advanced placement or exemption from courses. A transferability analysis, based on the women's self-ratings and the vocational educators' ratings, is also included. This final report provides detailed coverage of the progress of a project to meet the need of preparing vocational teachers and curriculum specialists for delivery of effective vocational education programs to the handicapped. It begins with six quarterly reviews of project activities, the main activities being (1) training of state vocational instructional pro-

12 Document Resumes

gram supervisors and state vocational "special needs" supervisors to train appropriate local education personnel in the use of a handbook for modifying existing vocational curricula to suit handicapped individuals and (2) development of a handbook for use by local vocational teachers and curriculum specialists in modifying existing curricula. Seven sample field tests to evaluate the handbook are provided as well as a field test report, including general comments and comments on individual chapters of the handbook. Next are presented the two consultant activities used to provide "state of the art" knowledge and an example of consultant feedback. The four national dissemination workshops for state education agency personnel in the areas of vocational and special education and guidance are then reported. Participant lists and evaluations from the Boston, Madison, Salt Lake City, and Atlanta workshops are provided. (The handbook, user's guide, and annotated bibliography developed by the project are available separately—see Note.) (YLB)

To assist state vocational education administrators in the development of Methods of Administration (MOAs) describing plan for the implementation of their civil rights responsibilities, a project provided several forms of technical assistance. (March 1979 Office of Civil Rights guidelines required the formation of MOAs.) Three major activities which comprised the nine-month project were (1) development and dissemination of standards which list the required elements and provide specifications regarding MOA content, (2) delivery of technical assistance in MOA development to Georgia, Illinois, New York, Oregon, and Guam—after which the model states' MOAs were disseminated to all states, and (3) conduct of five regional workshops in February and March 1980 for all the states and outlying areas to provide information and assistance in MOA planning and preparation. Approximately 150 workshop participants included representatives from vocational education agencies as well as from national and regional federal offices. The project successfully accomplished its ultimate goal but recommendations for future projects of the same nature were made regarding technical issues, policy issues, and technical assistance to states. These include designation of a single federal contact point to which each state can turn for assistance in MOA development, expedition of the MOA approval process, provision of implementation guidelines and program review instruments, and the facilitation of communication and information dissemination at the state and federal level. Descriptors—Adults, Business, *Continuing Education, Credit Courses, *Educational Needs, Employees, *Employer Attitudes, Incentives,

*Industrial Training, Needs Assessment, On the Job Training, Publicity, School Community Relationship, State Surveys, Training Allowances, Tuition Grants

Identifiers—New Hampshire

New Hampshire employers, especially large employers, see a significant need for continuing education for their employees, according to a survey of 16,000 business, industry, and service organizations in the state. Of the 1,883 employers (12%) who responded to the mailed questionnaire and the 68 employers who were interviewed, 84 percent would like to see their employees better trained, while 77 percent were either "very interested" or "somewhat interested" in custom-made courses designed for their employees. Survey respondents preferred short-term courses and most frequently chose business administration, personnel, and accounting as the most needed academic subjects, with long range needs for employee training in computer science and technology, banking, law, video tape production, electronics, plastics technology, and basic skills in reading and writing. At least 39 percent now offer or would offer some form of tuition payment for employees taking work related courses. A large percentage (73%) of employers were having at least some difficulty in finding properly trained employees for their businesses, especially in manufacturing concerns. The survey showed a need for better information dissemination, because a majority of businesses, especially small businesses, were not aware of current educational offerings in the state. Numerous tables, the survey instrument, and interviewer's supplement are included. (KC)

Identifiers—*Emerging Occupations, Mining, United States

These proceedings contain the keynote address, four papers, and summaries of four group discussions of the Eleventh Annual Pennsylvania Conference on Postsecondary Occupational Education. The keynote presentation is by Harold "Bud" Hodgkinson, distinguished analyst of current trends and the likely future of social, economic, and political settings in which postsecondary education will be operating. His presentation discusses international trends related to the world of work, planning issues, public attitudes toward education, the effects of education in the United States, population trends, industry involvement and its benefits, and linkages of community service agencies. The other four papers concern the four issues which were focused on by the planning committee. They are entitled Retraining Programs for the Handicapped Adult, Upgrading Programs in Postsecondary Education, A Conceptual Framework for Occupational Education Community Service Programs, and New and Emerging Careers. A summary of the highlights of a group discussion on each of the issues immediately follows the respective paper. Appendixes include the conference program and notes on authors and editors. (YLB)

Descriptors—*Administrators, Federal Programs, *Females, *Local Government, Proprietary Schools, Regional Programs, *State Departments of Education, Technical Institutes, Universities, *Vocational Directors, *Vocational Education

This directory is a national listing of women administrators currently employed in vocational education. This publication is organized into eight major sections and two indexes. The major sections are categorized according to institutional affiliations: (1) state education agencies, (2) local education agencies, (3) regional education agencies, (4) universities and colleges, (5) technical institutes, (6) proprietary schools and colleges, (7) federal education agencies, and (8) other. Within each major section categorized by state where employment occurs, individual biographical sketches are listed alphabetically by surname. The indexes are presented: a program area of responsibility and an alphabetical listing. The program area of responsibility index lists individual names according to the major program areas(s) directly under their administration. Women who administer nontraditional programs are identified in this index. The alphabetical index is a combined listing in alphabetical order of all persons in the directory. The introduction includes the purpose of the project, background data, summary findings, directions for using this document, and a sample resume. The appendixes contain the survey instrument and the classification system of educational agencies and institutions. (CT)

Identifiers—*Resumes

Analysis of the search for selecting a president and a dean for a small women's college in the midwest showed how affirmative action goals, coupled with standard career expectations, damage female candidates. Reasons for failure to select a woman for either post included: (1) the tendency to compare women with women and men with men in the early stages of the search, rather than matching all candidates against the job requirements; (2) male vitae establish patterns against which female vitae appear deviant; (3) late emergence of unannounced criteria, after review of candidates' vitae, deflects search committee attention from candidates' fulfillment of announced criteria; (4) since the emergent criteria are credentials, they devalue the credentials of female finalists; and (5) the presumption that "having performed a function" means "having performed it well" operates in favor of male candidates because male credentials have become the standard. Recommendations for affirmative action include: look for evidence of "doing" rather than "being"; avoid developing last-minute criteria for the post; write job descriptions in terms of competencies, rather than "positions held"; check candidates by personal contacts; write final recommendations in terms of initial criteria; and read the research the candidates have done. Identifiers—Communicating, *Institute Research Development Occupational Ed NY, New York

Activities and programs of the Institute for Research and Development in Occupational Education (IRDOE) are reviewed in this annual report for fiscal year 1980. The report describe twenty-three contract projects, an increase from nine the preceding year. Three projects related to handicapped populations, two projects involved staff development and counselor training to promote better service to handicapped youth, and a third involved both staff and handicapped student training in interpersonal skills development. Eight projects concerned sex equity, sex-role stereotyping, and women in the work force. The remaining nine covered cooperative education, futuring health occupations education, characteristics of incoming community college students, systems development for information needs, and special staff development activity in consumer homemaking. The report notes that the IRDOE's second sex equity film, "A Man's Place," received very good reviews, and their inservice teacher training program, "Responding to the Vocational and Career Needs of Urban Youth," was named a project of national significance by the Bureau of Education for the Handicapped. The report also describes the IRDOE's in-house projects, including a demonstration of their pioneering "communicating" program in action. Appendixes contain letters, conference notices, and meeting agendas. (KC)

The objective of this module is to help develop skill in facilitating a Council of Educators' Review, which is the exit requirement of one competency-based teacher education program (Program VITAL at Temple University). Contents include three learning experiences based on two enabling objectives. A list of outside resources which supplement those contained within the module is presented. Each learning experience contains some or all of the following materials: enabling objectives; learning activity (activities); including information sheets, case studies, and self-checks with model answer (as feedback); and optional activity (activities). This module is one in a series of thirteen specifically designed to help vocational educators develop the skills needed to function as resource persons to learners enrolled in field-centered competency-based teacher preparation programs. (These learners are persons with appropriate occupational experience and competence who are being prepared as teachers on an inservice basis.) The objective of this module is to help attain skill in developing the ability of others to set up and operate a video system in order to use videofeedback to conduct self-evaluation and modify teaching behavior as needed. Contents include four learning experiences based on four enabling objectives. A list of outside resources which supplement those contained within the module is presented. Each learning experience contains some or all of the following materials: enabling objective; learning activity (activities); including information sheets, case studies, and self-checks with model answer (as feedback); and optional activity (activities). We Know Co-op Work Experiences Work-Buy Why?

Pub Date—[80]

Note—14p.; Paper presented at the Annual Co-op Employer Appreciation Dinner (Erie, PA, 1980).

Pub Type—Opinion Papers (120) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Cooperative Education, Cooperative Programs, Educational Objectives, Individual Needs, *Need Gratification, *Program Effectiveness, Psychological Needs, Secondary Education, Self Actualization, *Student Motivation, *Student Needs, Success, Work Experience Programs

Identifiers—Herzberg (Frederick), Maslow (Abraham)

An examination of why cooperative work experiences work in light of Maslow's hierarchy of needs and Herzberg's satisfaction and dissatisfaction factors can be helpful in maintaining and improving the experiences. Cooperative work experiences are successful because they satisfy two types of student needs (deficiency needs and growth needs). These experiences fulfill deficiency needs (physiological, security, belonging, and esteem needs) by enabling students to acquire the vocational skills and experience necessary to earn decent salaries and help in-

sure job security by enabling students to enjoy the recognition and rights of tradespersons and by providing tangible products and advisable skills which help students meet their esteem needs. It is only after these deficiency needs are met that students will be motivated by growth needs (aesthetics, self-actualization, and knowledge and understanding). Therefore, co-op employers and votech personnel must help students gratify their deficiency needs. Students should help their fellow students, co-op employers, and votech instructors meet their own deficiency needs as well. While meeting deficiency needs prevents student dissatisfaction, only the meeting of growth needs can provide student satisfaction. Therefore, co-op employers and votech personnel must help students meet both needs and should stress the latter. Students should also assume more responsibility in evaluating their vocation and co-op job site in light of motivational factors. (MN)

Identifiers—Comprehensive Employment and Training Act, Vocational Academy Project

This document contains four research papers of the Vocational Academy (VA) Project which researched alternative forms of vocational education to impact on CETA (Comprehensive Employment and Training Act) eligible participants. (The innovative approach developed incorporated a career ladder concept in skills training.) Preceding them are a discussion of the project, flow chart of the model program developed, and two synthesizing analyses of abstracts. Section 1 is entitled *An Alternative Method of Training for Health Career Occupations: The VA Approach*. It contains a literature review, field visit report, and recommendations for VA (sample career ladders and competency-based curriculum. Section 2 is the report, *The VA Approach to the Electronics Industry in Broward County*. It overviews electronics, reports on field visits, makes recommendations, and discusses curriculum, career ladders, and teaching approach. Appendixes include a sample career ladder, preliminary curriculum, glossary, and manual for incoming students. Section 3 is the report, *Academic Remediation for Electronics Training: A VA Perspective*. It contains a literature review, field visit report, and recommendations for VA. Section 4, *Performance Assessment of Electronics Trainees*, briefly examines two kinds of testing most relevant to the target population—(1) teacher constructed paper and pencil tests and (2) judging procedures, products, and performance. Individualized Instruction. *Learning Modules. *Material Development. *Resource Teachers. Teacher Developed Materials. Vocational Education. *Vocational Education Teachers

This paper reports a project centered around developing directed individualized materials (modules) to be used to prepare resource persons, change agents, and teachers to function in competency- and performance-based vocational education (PBVE) programs. It is organized in two parts. Part 1 centers around the development of modules for resource persons. Four project objectives are stated, the procedures followed to meet the objectives explained, and recommendations forwarded. Part 2 focuses on the modules developed for change agents and vocational teachers. It discusses the (1) analysis of existing modules to determine teacher skills needed to implement PBVE that were not addressed in these modules, (2) the target population, (3) field testing and its findings, and (4) conclusions and recommendations based on the field test. Appendixes, amounting to approximately one-half of the report, include listings of modules in the two series, resource person's feedback booklet, resource person's supervisor feedback booklet, and workshop materials from the field test at a curriculum workshop. (The modules developed are available separately—see note.) (YLB)

Descriptors—*Adult Basic Education, Data Collection, Data Processing. *Enrollment. *Information Systems. Needs Assessment. Program Development. *Program Evaluation. Records (Forms). *Student Evaluation. *Systems Development

Identifiers—Iowa

The purpose of this project was to develop a comprehensive system for recording enrollment and accomplishment information about Adult Basic Education (ABE) students for use in preparing state and federal reports. Project goals were: (1) to develop a systematic program of individualized instruments and procedures for functional data gathering on instructional programming and progress of ABE students; (2) to develop a systematic program for maintaining contact with former ABE students; and (3) to analyze the differences, impact, and ultimate benefits of the information system with the development of a hard-copy information system or a computer based information system. Project activities included the analysis of existing information systems at three schools, determination of data needed and development of data collection procedures, pilot testing, program dissemination, and evaluation. ABE directors, coordinators, instructors, and students supplied evaluative input. The Advisory Committee determined that the first two program goals were met. The third goal was partially accomplished (by development of a standard hard-copy information system). Appended are six instruments designed to facilitate ABE student assessment, ABE program assessment, and data collection necessary for local, state, and federal reports. (MN)

Identifiers—Iowa

Representatives from two- and four-year colleges, universities, business, industry, government, and religious organizations formed an advisory committee to develop guidelines and recommendations for providing professional development opportunities for persons coordinating or conducting adult programs in Iowa. After conducting several surveys and meetings the group developed seven recommendations: (1) the committee should become an advisory committee to various Iowa committees for continuing and adult education; (2) the advisory committee should identify and report on professional development needs of adult educators in Iowa; (3) full-time adult educators should demonstrate competencies in adult education and evaluation methods; (4) part-time adult educators should have development activities related to specific needs expressed by teachers and administrators in teaching and evaluation methods; (5) professional development programs should be standardized and disseminated; (6) degree credit earned for such programs should be accepted by colleges and universities without transfer requirements; and (7) professional achievements of adult educators should be publicized. The committee has endorsed these recommendations for implementation in Iowa and throughout the country on a voluntary and cooperative basis. (MN)

Descriptors—*Adult Education. Adults. Classroom Environment. *Continuing Education. Individual Characteristics. Instructional Materials. Student Characteristics. Student Needs. *Teacher Role. *Teaching Methods. *Teaching Styles

Identifiers—Andragogy

This guide for adult educators is a collection of discussions intended to initiate further inquiry as well as to offer practical suggestions on teaching adults. After a comparison of pedagogy and andragogy, a brief definition of adult education is given. A profile of the adult student is followed by outlines of the importance of guiding and counseling the mature student and suggestions for helping students organize their time and clarify their motivations. Adult development and special adult learning problems are covered. Suggestions are given to help teachers prepare themselves, select a comfortable and appropriate role, understand student needs, and make a good first impression. A section on teaching methods covers logs and such learning situations as independent, correspondence, group, and tutorial study. Listed are various learning atmospheres and areas where they are appropriate. The issues of problem solving and the assumption of a mask by an instructor are discussed. Differences between teaching adults and children and the issues of testing and evaluating adults are covered. The guide concludes with comments on the goals of adult education and such teaching materials as educational television and audiovisual aids. (MN)

Career Education and Community Education: Exploring the Relationships.

Spons Agency—Office of Career Education (DHEW/OE), Washington, D.C.

Pub Date—Jun 80

Note—70p.

Available from—Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

Pub Type—Opinion Papers (120)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—*Career Education. *Community Education. Definitions. *Delivery Systems. *Educational Change. *Educational Objectives. *Educational Philosophy

Intended to explore the relationship between career education and community education, this monograph is divided into seven chapters. The first chapter provides an overview of the background of this relationship. Chapter 2 discusses career education and community education as approaches to educational reform. Philosophical and definitional considerations of career education and community education are presented in chapter 3. Chapter 4 reviews the goal expectations, and chapter 5 discusses some reciprocal benefits of each concept. The development of a delivery system between career education and community education is described in the sixth chapter. The final chapter presents a summary and the author's conclusions. (BM)

Identifiers—Art Skills Observation Scale. Education Amendments 1974. New York (Harlem). Torrance Tests of Creative Thinking

Major goals and accomplishments are presented for the arts and career education program of the Children's Art Carnival in Harlem, New York City—a program for low income minority youth (ages 8-18) which utilizes creative and communication arts as a bridge to art careers in industry, entertainment, commercial and human services. Activities, evaluation instruments, and results related to seven pro-

gram objectives are described and discussed: (1) to expose eight- to fourteen-year-olds to career education experiences via the creative arts (sewing, printmaking, clay, poetry, photography, animation, puppetry, and painting); (2) to enable fourteen- to eighteen-year-olds to develop skills and competence in Communications Arts Productions, thereby increasing career understanding and options; (3) to provide counseling for participants in the Communications Arts production team units; (4) to provide participants with career education experiences fostering the development of responsible work habits and attitudes; (5) to develop communication skills; (6) to provide necessary assistance for participants with neurological, emotional, or other problems; and (7) to promote parent and community support of children's interests in the arts and art-related careers. Dissemination and special activities such as efforts to hire minorities and handicapped in an effort to project a variety of role models are mentioned. The conclusion is made that most objectives were reached and that this program is a model worth emulating. Appendixes constituting two-thirds of the document, contain goals, survey and testing instruments, student logs, and work samples. (MN)

Identifiers—4 H Clubs, American Red Cross Youth Services, Boys Clubs of America, Boy Scouts of America, Camp Fire Girls Inc, Future Homemakers of America, Girls Clubs of America, Girl Scouts of the USA, *National Collaboration for Youth, United Neighborhood Centers of America, Young Mens Christian Association, Young Womens Christian Association

This report presents a survey of local youth-serving agencies affiliated with the National Collaboration for Youth to determine to what degree and in what way the agencies are involved in providing employment and training activities for youth. The eleven agencies focused on are American Red Cross Youth Services; Boys' Clubs of America; Boy Scouts of America; Camp Fire Girls, Inc.; 4-H Youth Programs; Future Homemakers of America; Girl Scouts of the United States of America (USA); Girls Clubs of America; National Board of Young Men's Christian Associations; National Board of Young Women's Christian Association of the USA; and United Neighborhood Centers of America. Section 1 is an analysis of the responses of the 1,816 corporate units of the National Youth Serving Agencies which yields a national view of the Youth Employment Programs. Results are divided into data referring to youth, programs, funding, and future programs. Section 2 contains an analysis of each agency in this format: sample size and return rate, youth served, programs, program funding, and future program plans. In both sections information presented refers to youth employment programs during three periods: the past (1975-77), recent past (1978), and future. (YLB)

Identifiers—Civilian Conservation Corps, Washington (Bellingham), *Youth Community Conservation Improvement Project

This document contains (1) a monograph investigating and describing conditions under which it is cost-beneficial to operate an enriched YCCIP (Youth Community Conservation and Improvement Project) design and (2) a guidebook to work project enrichment. The first sections of the monograph focus on the attributes of an enriched YCCIP activity in Bellingham, Washington, and analyzes enrichment, its costs, risks, and consequences. Subsequent sections combine a description of a parallel, non-enriched labor-intensive comparison site with a comparative evaluation of the parallel projects. Final sections draw summary conclusions and provide a description of important, probably necessary, conditions which were present in the successfully implemented enriched project's program environment. The three-part guidebook begins with a discussion of the Civilian Conservation Corps, the first enriched labor-intensive work project. Parts 2 and 3 have as their subject the history of the successful enriched project in Bellingham-Whatcom Creek Heritage Park and Maritime Heritage Center Project. Part 2 gives a synopsis of the comparative analysis of this project and a parallel work project to ascertain relative costs and benefits of operating an enriched project design. Part 3 lists and discusses seventeen steps for the development of successful "sweat" (labor intensive) work projects. (YLB)

Identifiers—*Experience Based Career Education, Vocational Education Amendments 1968

This description of the development of the Experience-Based Career Education Program by State Fair Community College in Sedalia, Missouri, lists the objectives: (1) continuing an elementary career education program by providing resource materials to teachers; (2) implementing an in-school experience-based cluster program in high schools; (3) expanding high school skill career education training opportunities and expanding postsecondary, adult, and special education via cluster curriculum individualization; (4) pilot testing and distributing such programs; and (5) providing job and educational placement at all levels. Major accomplishments described include the integration of classroom learning and work experience through individualized projects in community settings, development of learning guides and experience sites, and increased use of employers in teaching capacities. Project problems, publicity and dissemination activities, data collection, and staff utilization and development are outlined. Conclusions are listed based on the analysis of student behavioral indicators (career tests, attitude scales, survey comments, and activity sheets) and student demographic data. The author finds that project objectives were met and student enrollment is representative of the total population. She recommends inservice teacher training and audiovisual workshops and continuation of a resource center. Lists of project materials and experience sites are appended. (MN)

A Study of Educational and Job Aspirations and Expectations of High School Seniors.

Spons Agency—Chicago Board of Education, Ill.

Pub Date—80

Note—13p.; Paper presented at the American Educational Research Association Annual Meeting (Boston, MA, 1980). Best copy available.

Pub Type—Reports - General (140) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Academic Achievement, *Academic Aspiration, College Preparation, *Expectation, Extracurricular Activities, General Education, High Schools, *High School Seniors, *Occupational Aspiration, *Occupations, Participation, Reading Tests, Vocational Education

Identifiers—Illinois (Chicago)

A comparison of the educational and occupational aspirations and expectations of 900 seniors in four Chicago high schools showed that college prep students had the highest educational and occupational aspirations and expectations. Vocational students had the greatest discrepancy between occupational aspirations and expectations, while general education students showed the least discrepancy between aspirations and expectations on either job or educational variables. Data, acquired from a student aspiration questionnaire, raw scores on a reading achievement test, and information from student records, also showed that achievement scores have very low correlations with expectations, but other achievement indices, like class rank, have higher correlations with expectations. Students with higher expectations for education and jobs are more active in extracurricular activities and take more mathematics courses. (Tables show the relationship between educational aspirations and educational expectations, occupational aspirations and expectations, correlations among variables, and reading test scores for the students from a large vocational high school, an all-black school in an economically depressed neighborhood, a school with an economically and racially diverse student body, and a white, middle class high school.) *Job Skills, Measures (Individuals), Self Concept,

Values, Vocational Adjustment, *Vocational

Maturity, *Work Attitudes

This packet of materials provides a copy of the Career and Occupational Development exercises and complete documentation about administration and scoring procedures as released by the National Assessment of Educational Progress (NAEP). NAEP, an information-gathering project, used these exercises to survey the educational attainments of nine-year-olds, thirteen-year-olds, seventeen-year-olds, and adults (ages 26-35) in the learning area of career and occupational development. Introductory materials include an outline of NAEP data collection procedures and tables over-viewing COG released exercises in terms of "assessment coverage." Table 4 gives a complete listing of the sixty-one exercises. Exercises are grouped according to five career and occupational development objectives and their nineteen subobjectives: (1) Prepare for making career decisions, (2) Improve career and occupational capabilities, (3) Possess skills that are generally useful in the world of work, (4) Practice effective work habits, and (5) Have positive attitudes toward work. A key clarifies the exercise identification systems: exercise, scoring, and administration descriptors; and administration times. Each exercise is reproduced exactly as it

Descriptors—Blacks, Children, Employed Parents, *Employed Women, Employment, Employment Patterns, *Family Characteristics, *Family Income, *Fatherless Family, Females, Hispanic Americans, Income, *Labor Force, Males, *Marital Status, Occupations, One Parent Family, Preschool Children, Race, Unemployment, Whites

The proportion of women in the labor force continued to grow during 1970-1978; more women headed families and worked despite the presence of children, according to the summary preceding the twenty-three tables which constitute the bulk of this report. Other findings summarized from the statistics are as follows. By 1978, a record 47.7 percent of all wives were working, compared with 40.8 percent in 1970, and the rate of working wives who have children under age eighteen has risen more rapidly than the rate for wives with no dependent children. Also, the proportion of wives (with preschool children) in the labor force has risen by more than the proportion of mothers with school-age children. On average, working wives contribute 25 percent of family income, a proportion that has not changed in twenty years. Unmarried women headed 8.2 million families in 1978, up 48 percent from 1970; their median family income was less than half that of husband-wife families. Since 1970, never-married men and women have made up nearly half of the 16.7 million increase in the labor force, while the number of divorced men and women in the labor force has more than doubled. (Data table statistics are also broken down by race and by Hispanic origin as well as by age, sex, presence and age of children, etc.) (KC)

Identifiers—*Nuclear Energy Occupations, Nuclear Power Plants, Nuclear Technology, *Radioactivity

This program planning guide for a two-year post-secondary radiation protection technician program is designed for use with courses 17-22 of thirty-five included in the Nuclear Technology Series. The purpose of the guide is to describe the nuclear power field and its job categories for specialists, technicians, and operators; and to assist planners, administrators, faculty, and industrial and community educational advisors in establishing and conducting relevant training programs. The guide provides a model curriculum plan and suggests methods for adapting the modular materials to curricula tailored to specific localities or employer needs. Also included is information about educational facilities, equipment, staffing, and instructional materials needed for training technicians and operators in this field. Appended material includes the technical spe-

cialty courses and module titles and descriptions; suggested workforce needs survey instrument for radiation protection technicians; equipment list with cost, quantity, and vendor data; and suggested library references and materials. (A master index to the series and other suggested program guides are available—see CE 026 856 and CE 026 640-643.) (LRA)

Descriptors—Instrumentation Technicians, Learning Activities, Learning Modules, *Measurement Equipment, *Nuclear Energy, Postsecondary Education, Quality Control, *Technical Education, Technical Occupations
Identifiers—Nuclear Energy Occupations, Nuclear Power Plants, *Nuclear Technology, *Radiation Monitors, Radioactivity

This technical specialty course is one of thirty-five courses designed for use by two-year postsecondary institutions in five nuclear technician curriculum areas: (1) radiation protection technician, (2) nuclear instrumentation and control technician, (3) nuclear materials processing technician, (4) nuclear quality-assurance/quality-control technician, and (5) nuclear reactor (plant) operator trainee. This course, Radiation Detection and Measurement, contains eight modules: Statistics of Radiation

Counting; Gas-Filled Detectors I: Ionization Detectors; Gas-Filled Detectors II: Proportional Counters; Gas-Filled Detectors III: Geiger-Mueller Counters; Scintillators, Semiconductors and Spectroscopy; External Personnel Dosimeters for Beta-Photon Monitoring; Neutron Detectors, Dosimetry and Activation Analysis; and Radiological Calibration and Standardization. Each module follows a typical format including the following sections: introduction, module prerequisites, objectives, subject matter, exercises, materials, procedures, data tables, reference materials, and tests. (A master index and suggested program planning guides are also available—see CE 026 856 and CE 026 639-643.) (LRA)

ED 192 095 CE 026 653 Nuclear Technology Series. Course 12: Reactor Physics.

Center for Occupational Research and Development, Inc., Waco, Tex.; Technical Education Research Center, Waco, Tex.
Spons Agency—Office of Education (DHEW), Washington, D.C.
Pub Date—Feb 80
Contract—300-76-0356

Identifiers—Nuclear Power Plants, Nuclear Technology

This technical specialty course is one of thirty-five courses designed for use by two-year postsecondary institutions in five nuclear technician curriculum areas: (1) radiation protection technician, (2) nuclear instrumentation and control technician, (3) nuclear materials processing technician, (4) nuclear

quality-assurance/quality-control technician, and (5) nuclear reactor (plant) operator trainee. This course, Metrology, contains eight modules: Fundamentals of Metrology; Fixed Gages, Dividers, Calipers, and Micrometers; Gage Blocks, Mechanical Comparators, and Electronic Comparators; Angle Measurement Instruments, Optical Projectors, and Surface Texture Gages; Tolerancing; Calibrations; Statistics Techniques in Metrology; and The Total Measurement System. Each module follows a typical format including the following sections: introduction, module prerequisites, objectives, subject matter, exercises, materials, procedures, data tables, reference materials, and tests. (A master index and suggested program planning guides are also available—see CE 026 856 and CE 026 639-643.) (LRA)

Strategies for Eliminating Sex Bias and Role Stereotyping.

Georgia State Dept. of Education, Atlanta. Div. of Vocational Education.

Pub Date—80

Note—21p. The final lines on each page will not reproduce well due to broken type.

Pub Type—Guides - Non-Classroom (055)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Activities, Attitude Change, Educational Planning, Educational Strategies, *Evaluation, Facilities, Faculty Development, Followup Studies, Inservice Teacher Education, Job Placement, Media Selection, *Nontraditional Occupations, *Program Improvement, Pupil Personnel Services, School Community Relationship, *Sex Bias, *Sex Fairness, Sex Role, Sex Stereotypes,

Staff Development, Teacher Attitudes, Test Bias, Textbook Bias, *Vocational Education

Identifiers—Georgia

These activities are suggestions for expanding the scope of activities undertaken to eliminate sex bias and promote nontraditional enrollment. They have primarily been compiled from local applications of vocational education policies in Georgia. Activities are first arranged according to eight major goals dealing with improvement of (1) long-range planning; (2) educational programs; (3) planning and evaluation skills; (4) staff and faculty policies, procedures, and training activities; (5) physical facilities and materials; (6) student personnel services; (7) placement and follow-up services; and (8) community relations. Within each goal activities are arranged according to the same three specific objectives: evaluation of the present status, elimination of old sex bias and sex-role stereotyping practices, and development of new plans and practices which encourage nontraditional enrollments. Descriptions of activities consist of one or two sentences. (YLB)

Descriptors—*Career Choice, Educational Discrimination, *Educational Opportunities, *Equal Opportunities (Jobs), Federal Legislation, Females, Labor Force, Salary Wage Differentials, Sex Bias, *Sex Discrimination, Sex Fairness, *Sex Role, Sex Stereotypes, Teacher Attitudes, *Vocational Education, Work Attitudes

Identifiers—Georgia

While it is not clear how much responsibility vocational education bears for the inequities in employment and earning patterns in Georgia, it is clear that men and women do not make vocational choices unencumbered by sex influences. Federal legislation provides mandates to reduce sex stereotyping and discrimination in vocational education. Sex stereotyping leads teachers to assume that males and females possess different sets of abilities, interests, values, and roles. These stereotyped expectations limit opportunities for individual development and lead females to develop unrealistic work attitudes and career plans. Stereotyping also results in increased work pressures for males. Although more women are in the labor force, wage and job segregation still exist. Vocational education programs mirror occupational choices in the labor force. Information from the 1980 Status Report of Males and Females in Vocational Education in Georgia indicates a slow growth toward integration of programs by sex. Wage disparities still exist. The predominance of vocational instructors in teaching areas traditional for their sex and the overwhelming predominance of men at higher administrative levels leads one to conclude that the state and local administration of vocational education in Georgia is almost entirely a male dominated area. Identifiers—*Materials Technology, Virginia, Woods

This instructional resource guide is intended to assist the industrial arts (IA) teacher in implementing a comprehensive materials and Processes Technology program at the technical level in Virginia

high schools. The course is designed to help students make informed educational and occupational choices and prepare them for advanced technical or vocational programs in a related cluster of occupations. Section 1 discusses Virginia IA curriculum, including mission, goals, instructional objectives, and student organization. Section 2 provides a course description, course goals, suggested outline for content/concepts and topics, and key to guide usage. Thirteen units of study comprise section 3: (1) Materials and Processes Technology, (2) Safety Procedures, (3) Industrial Technology Careers, (4) In-class IA Student Association, (5) Nature of Materials, (6) Classifications of Materials, (7) Properties of Materials, (8) Materials Processing, (9) Plastics, (10) Metals, (11) Woods, (12) Ceramics, and (13) Composites. Each unit supplies this information: tasks, topics, teacher's guide, note, student's performance guide, resources/media, equipment, and supplies. Section 4 lists the resources and supporting media used in the course. Section 5 contains over twenty experiments, activities, and projects. Sources of free or inexpensive information and materials are listed in section 6. The final section provides a Materials and Processes Technology Laboratory Design Concept and IA Education Service Approved Equipment List. (YLB)

Identifiers—Texas (Houston), *Upper Extremity Impairments

This job inventory documents thirty-seven successfully employed, upper-extremity-impaired individuals in Houston, Texas. The inventory format for each contains three sections. The client profile contains basic identifying information, medical and functional data, and vocational information. The job profile presents basic identifying job information, employment requirements, functional and physical demands of the job, and description of duties. The client's job performance by the client's supervisor or employer, client's compensatory or work modifications, wages and benefits, and client's job satisfaction level. These supplementary materials precede the inventory: introduction describing the project and need for participants, potential uses, and two indexes. (Potential uses include use by rehabilitation counselors to develop job options and placement goals, vocational educator evaluators' reference for developing more appropriate work samples, rehabilitation engineers' guide to identifying jobs to be modified or changed, and use by business and industry to determine jobs for handicapped.) One index presents the inventories in ranking order from jobs requiring the least upper extremity functional abilities and general physical demands to those requiring the most. The second categorizes clients according to bilateral or unilateral upper extremity impairments, the ranking from those with least to most functional abilities. Recording forms for the three profiles are appended. (YLB)

Identifiers—Comprehensive Employment and Training Act, Job Corps, Learning Works Program, Maryland (Baltimore), PLATO, *Youth Employment and Demonstration Projects Act, Youth Incentive Entitlement Pilot Projects

These three articles describe three programs operating under the Youth Employment and Demonstration Projects Act (YEDPA), a comprehensive endeavor to lower the high rate of joblessness among youth. The first article focuses on the Youth Incentive Entitlement Pilot Projects—popularly called Entitlement—which is an experimental and intensive program. It discusses this first large-scale effort to guarantee employment to a population segment which actively addresses itself to linking education and work. The second paper gives an account of the success of the Job Corps college program through its Advanced Career Training (ACT) program at colleges and postsecondary vocational institutions. The third article presents the story of Baltimore's Learning Works, an example of how a community benefits from a partnership formed by the government and the private sector. It discusses the use of PLATO (Programmed Logic for Automatic Teaching Operations), a teaching computer, by educationally disadvantaged clients to finish their education and learn job search skills. This comprehensive volume of innovative continuing education programs contains complete descriptions of some 750 cross-indexed projects in four general areas—human resource development, natural resource development, economic development, and community development—directed at community problems that can benefit from adult education. It brings together summaries of recent (1979) continuing education activities funded by Title I, Higher Education Act, which were implemented in all fifty states, the District of Columbia, Puerto Rico, and the Virgin Islands. A table of contents and state index facilitate selection of community service and continuing education activities by program categories, clientele, and geographic areas. Exemplary projects, as designated by the Title I State Administrators, have also been identified. The format for each abstract is as follows: project title; duration; participants; number served; project summary; methods and resources; institutionalization, spin offs, and future plans; materials developed;

project director and address; and Title I Higher Education Act State Administrator. (YLB)

Widespread and rapid changes in society, leading to knowledge and skill obsolescence, have provided impetus for the concept of lifelong education. Learning is not confined to a particular period of life or to formal educational institutions, but is a set of attitudes and skills to be used throughout life and in a wide variety of situations. As such, lifelong learning is distinct from traditional notions of adult education, or even recurrent and continuing education. Although the bulk of learning takes place outside the school, it is in the formal educational institutions that the skills and attitudes essential for effective self-directed learning are first introduced. Since social and economic pressures will continue to bring large numbers of students into the college and university system, it is important to insure that higher education is responsive to new lifelong learning needs. This is perhaps best done by working through existing university teachers and encouraging innovations that place the emphasis on student-centered learning with real life problems, as opposed to traditional, didactic instruction. Instructional developers could play a key role by encouraging research on the relationship between different learning approaches and their relevance to students' needs in the world of work. Identifiers—*Recession
The purpose of a project was to improve, through an inservice staff development program, the teaching of content reading skills in adult basic education and adult high school completion classes. The program provided methods and materials in five reading skill areas: (1) word identification, (2) vocabulary, (3) comprehension, (4) critical and interpretative reading, and (5) reading study skills, especially as these skills are applied to functional content areas. The project used texts and media currently available in classrooms. There were fifteen two-hour sessions devoted to the development of functional reading skills through the use of modeling, discussion, simulation, application, and replication by participants under the direction of the workshop consultants. A formative evaluation was conducted. It included an evaluation of the bi-weekly class, an evaluation of the individual participant's competency to teach functional reading skills to students, and each participant's evaluation of classroom materials he or she developed, along

with the results of their application. (Narrative sections of the report cover less than fifty pages. The course outline and all the materials used in the workshop instruction comprise the remainder of this report. Source and availability of material used is also cited.) (Author/YLB)

Based on data collected from a mailed survey of 2800 employers engaged in solar energy activities, a study identified the characteristics of establishments engaged in solar work and the number and occupational distribution of persons working in solar energy activities in 1978, and projected solar labor requirements through 1983. The scope of the study included all types of solar energy technologies and applications (space heating and cooling, ocean thermal conversion, photovoltaic conversion, wind conversion and biomass conversion), and all phases of work (research and development, manufacturing, marketing and distribution, and installation and maintenance). The study also identified new job specialties in the solar area, and developed a methodology for projecting short- and mid-term future employment. A mail survey of 500 employees was also conducted to determine the work requirements of their jobs, their special skills, and their education and training. Detailed findings are presented along with five recommended activities for planning for future personnel needs in the solar industry. Appendixes include (1) survey questionnaires, screening form, and cover letter; (2) notes on response rate, establishment population, and nonresponse bias; (3) detailed tabulations; and (4) description of methodology used to formulate manpower projections. Identifiers—United States

Vocational Education can play a key role in revitalizing the American economy particularly through research and development in four areas: economic development and productivity, equity and access,

youth employment, and energy. It can enhance productivity by identifying innovative vocational education programs successful in enhancing community and economic development, developing entrepreneurship training, aiding in vocational agriculture teacher preparation, developing curricula that addresses community economic development needs, and emphasizing new technologies and leadership development opportunities. Research and demonstration projects can aid in expanding vocational educational opportunities for women, minorities, and handicapped persons. Vocational education can play a key part in reducing youth unemployment by providing in-school and out-of-school programs for disadvantaged youth. It has already begun to respond to emerging industries and technologies needed for the energy crisis. The National Center for Research in Vocational Education can assist in this endeavor by improving national dissemination and utilization of research and development products focusing on the four priorities mentioned above, examining and describing critical issues confronting vocational education, assisting in strengthening the nationwide vocational education research and development system, and improving articulation among education, business, industry, labor, and economic development agencies. Descriptors—Adult Education, Career Education, Consumer Education, *Educational Planning, Foods Instruction, *Home Economics, Home Furnishings, Individual Development, Interpersonal Relationship, *Occupational Home Economics, Postsecondary Education, *Program Development, Secondary Education, Textiles Instruction

This planning guide is intended for use in selecting content from home economics subject matter areas when planning consumer and homemaking education programs for grades 7 through 12. The planning guide is divided into two major parts. The first section focuses on the suggested scope and sequence for each of five home economics subject matter areas taught in the secondary schools. These areas include (1) management and consumerism; (2) human development and interpersonal relationships; (3) housing, furnishings, and equipment; (4) food and nutrition; and (5) textiles and clothing. Also included in part I is a list of concepts that can help in teaching about careers in home economics. The second part of the guide is designed to assist teachers in gaining a fuller understanding of the use of the scope and sequence in planning. Examples are included to help teachers plan balanced programs in home economics. The questions-and-answers section explores some of the possible concerns of teachers in using the planning guide. Included also is a section that addresses implications for adult and continuing education and postsecondary education programs in home economics. (LRA)

Prospectives for Nursing: A Symposium (May 25, 1979). Nurse Planning Information Series, 15. Health Resources Administration (DHHS/PHS), Hyattsville, Md.

Report No.—HRA-80-40

Pub Date—Aug 80

Note—32p.; Prepared through the Division of Nursing

Pub Type—Collected Works - Proceedings (021)
EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Careers, Cost Effectiveness, Delivery Systems, Economics, Environment, *Ethics, Futures (of Society), *Health Services, Hospitals, Medical Services, Medicine, *Nursing, *Nursing Education, Physicians, Technology, Unions

The future of nursing is discussed in these five papers delivered at a symposium in honor of Jessie M. Scott, Director of the Division of Nursing, U.S. Department of Health and Human Services, 1964-1979. In the first article, "Old Dreams—New Vi-

sions," Virginia Cleland reviews the economics of medicine and calls for a new Surgeon General's Report to guide the development of public/professional relationships in nursing, especially the issue of reimbursing nursing services separately from the general hospital bill. The second article, "Toward 1999: Probing Ethical Dilemmas in Nursing's Future," is Milla A. Aroskar's analysis of the concept of justice and ethical issues in health care decisions. In the third paper, "Social and Economic Issues," Luther Christman warns that the level of nursing education must be drastically raised to keep nursing an equal of the other health care professions. The fourth article, "Forces for Forecasting: Biological-Environmental Issues," by Cornelius Kruse, states that environmental regulations must be based on scientific fact and subject to years of research. The final article, "Forces for Forecasting: Organizational Issues," by Dorothy J. Novello, describes the current state of the health care delivery system and poses questions for the future of the nursing profession. (KC)

An Employment Policy to Fight Recession and Inflation: A Policy Statement by The National Council on Employment Policy. National Council on Employment Policy (DOL), Washington, D.C.

Pub Date—8 Sep 80

Note—51p.; Not available in paper copy due to small, thin type.

Pub Type—Opinion Papers (120)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—Career Education, Economic Climate, *Employment, *Inflation (Economics), *Policy, Public Service Occupations, *Unemployment

Identifiers—*Recession

This publication contains An Employment Policy to Fight Recession and Inflation—the policy statement of the National Council on Employment Policy—and three background papers by individual members. The statement addresses these topics: Will the Recession End Inflation?, Which Anti-Recession Measures?, But What About Inflation?, and A Policy of Restraint Recovery. The first background paper is The Need for a Contingent Countercyclical PSE (Public Service Employment) Program. It contains a brief policy review, discusses the rationale for and merits of PSE, and lists steps that need to be taken. Employment Policy for Recessions, the second paper, addresses questions that are being neglected. It looks at the critiques employment policy in the 1973-75 recession and reaches some policy conclusions. The third paper, Getting at Fundamentals in the FY (Fiscal Year) 81 Budget, reexamines basic forces underlying the current economic situation. It considers the basic causes—inflation and unemployment—and proposes a solution involving reduced dependence on foreign energy sources, restrained total expenditures, increased productivity and production, and equitable sharing of the inevitably reduced standard of living. Descriptors—Adult Education, Adults, *Background, Educational Background, *Employee Attitudes, Employment Experience, Evaluation Criteria, Job Satisfaction, *Military Organizations, *Military Personnel, Organizational Climate, Organizational Communication, *Organizational Effectiveness, Productivity, Self Evaluation (Groups), Sex

Identifiers—*Air Force

An Air Force study examined the relationship between personnel background and several measures of organizational effectiveness. The Organizational Assessment Package (OAS) consisting of 16 background information items and 149 attitudinal items was administered to military and civilian subjects

(4,786) at five Air Force bases representing six major commands. Four factors were selected as dependent variables: general organizational climate, organizational communications climate, job related satisfaction, and perceived productivity. Factor scores were generated for each of the four variables and each subject's factor score for each factor served as the dependent variable in a series of one and two-way analyses of variance. Respondents with longer periods of service and high educational levels and whose supervisors wrote their performance report scored highest on all criteria (except for Organizational Communications Climate). Higher criterion ratings were also affected by whether supervisors used group meetings to solve problems and establish goals and by intended duration of Air Force Service. Officers and civilians scored highest in Job Related Satisfaction and Perceived Productivity. Civilians with graduate work perceived General Organizational Climate highest. Graphs and tables present more detailed analyses of responses, and tables in an appendix (two-thirds of the document) provide analyses of variance based on twenty-two separate criteria. (MN)

Identifiers—Adult Career Education Counseling Project

This handbook is part of the materials in the Skills for Adult Guidance Educators (SAGE) system, which provides instruction in a set of necessary competencies specifically designed for adult education counselors, teachers, and paraprofessionals. The materials provide a process for developing and implementing counseling and guidance programs unique to different program settings, target populations, and local conditions. Recommended for all users of the materials as an aid in getting maximum benefit from use of the total system, the handbook provides information relative to project replication procedures, understanding of SAGE materials, and usability of the training system in local educational settings. Prime emphasis is placed on the establishment and implementation of adult student personnel programs. Section I presents perspectives and orientation to the Adult Career Education Counseling Project, which developed SAGE. Section 2 explains the interrelationships among the documents comprising the system: Handbook, Twelve Packages, and Answer Key. (These materials are available separately.) Two subsections catalog information on general titles of packages, role statements, and modules. Section 3 articulates the project's training model for module development. It suggests specific steps for individual module-development activities with recommendations for program implementation and evaluation. Section 4 describes the project's conceptual model, which is based on psychological premises of life stage, life style, life space, and life planning. It discusses the project's assumptions about the dynamics of human behavior. (YLB)

This answer key is part of the materials in the Skills for Adult Guidance Educators (SAGE) system, which provides instruction in a set of necessary competencies specifically designed for adult education counselors, teachers, and paraprofessionals. The materials provide a process for developing and implementing counseling and guidance programs unique to different program settings, target populations, and local conditions. The purpose of the key is to provide answers to the pre- and/or postassessment sections of the modules found in the twelve packages. (Other materials are available separately.) There are three types of answer keys: (1) specific keys, (2) generalized suggestions or guidelines, and (3) no specific right or wrong answers. The first type of answer key has specific answers to the assessment sections. The second type contains suggested guidelines but are not technically considered right or wrong. The third type is provided for community-based modules and are designed to be adapted to local community needs. (YLB)

This package is the twelfth of twelve in the Skills for Adult Guidance Educators (SAGE) system, which provides instruction in a set of necessary competencies specifically designed for adult education counselors, teachers, and paraprofessionals. The materials provide a process for developing and implementing counseling and guidance programs unique to different target populations, program settings, and local conditions. Contents include four modules that pertain to one role statement. The role statement describes the trainee objective to demonstrate awareness of adult education terminology and proposal-writing procedures. Each module contains some or all of the following information: topic, learning objective, rationale, preassessment, learning activities, postassessment, and appended materials (supplemental activities, tape transcripts, and articles). Welch, Frederick G., Ed.
Trade and Industrial Education Course of Study for Appliance Repair.

Pennsylvania State Dept. of Education, Harrisburg. Bureau of Vocational and Technical Education; Pennsylvania State Univ., University Park. Div. of Occupational and Vocational Studies.

Pub Date—Jun 80

Note—411p.

Pub Type—Guides - Classroom - Learner (051) — Guides - Classroom - Teacher (052)

EDRS Price - MF01/PC17 Plus Postage.

Descriptors—Adult Education, Appliance Repairers, *Appliance Repairing, Course Objectives, Course Organization, Curriculum Guides, *Electrical Appliances, Hand Tools, *Home Furnishings, Job Analysis, Job Skills, Learning Activities, Postsecondary Education, *Refrigeration, Secondary Education, Skill Analysis, Skilled Workers, Task Analysis, *Trade and Industrial Education

Designed for use by instructors of appliance repair to help establish a uniform curriculum, this manual presents a basic course of study. Individual instructors can add or delete jobs or lessons to suit their particular teaching situations. Contents include the course philosophy, listing of course objectives and activities to achieve them, plan of instructional practice, listing of appliance repair reference materials, bibliography, listing of resources for visual aids, and course outline. These seven units are included: orientation, basic electricity, basic shop tools, laundry equipment, kitchen equipment, and refrigeration. Job sheets, operation sheets, information sheets, and assignment sheets are provided. Job sheets (student practice in developing skill competencies) define materials and tools needed, competence procedures/steps cross-indexed to related operation sheet(s), and method of evaluation. Operation sheets, supplementing job sheets and indicating how to perform skill competency operation necessary to complete assigned jobs, include competency, objective, and competence-procedures/steps. Information sheets supplement job sheets and provide the student with information necessary for completing the assigned jobs with the

highest possible degree of understanding. Sample assignment sheets provide the student with mental activities necessary to learn the "knowing" that accompanies the "doing" of a trade. (YLB)

Identifiers—*Microelectronics

A combination of revitalized employment policies, greater industrial democracy, and new ways of distributing both the hours of work and the fruits of technological change are essential if the benefits of the microelectronic revolution are to be equitably shared. Microelectronic technology promises an array of benefits, and the electronic age is already well under way. As it progresses during the last two decades of the twentieth century, it will lead to improvements in productivity in factories and offices, changes in the way information is processed, stored, and communicated, and alterations in the content of many jobs. Differing rates of development of the electronics industry may lead to shifting advantages of competition in the international marketplace. Like all major technological changes, the transition to microelectronics will raise difficult political issues, among which the impact on jobs and employment is the most prominent. (KC)

Identifiers—*Vocational Assessment

The purpose of this handbook is to help vocational educators and others provide appropriate vocational education for handicapped students through the modification of vocational programs. (A companion user's guide and an annotated bibliography are also available—see Note.) Possible uses include vocational instruction, administration, interagency and interprofessional cooperation, preservice education, inservice education, and research. Chapter 1 is an introduction. Chapter 2, Working with Others, examines the process for working with resource persons while teaching special needs students. It also covers potential resources located inside the school and out in the community. Chapters 3-8 deal with these specific handicapping conditions: emotional impairments of learning, learning disabilities, men-

tal retardation, visual impairments, hearing impairments, and physical impairments. Each chapter is divided into three parts: (1) recognition of handicapped students, (2) strategies to modify vocational programs and to instruct students, and (3) information on existing exemplary programs and techniques already developed in vocational classrooms. Details concerning formal and informal vocational assessment are found in chapter 9. Chapter 10 presents nine models of vocational service delivery to handicapped students. (YLB)

Designed to help state and local education administration personnel who are responsible for establishing workshops or inservice training programs on vocational education of handicapped students, this guide contains materials on coordination of the steps necessary for organizing an inservice meeting. (It accompanies the handbook, which is available as CE 026 776.) Chapter 1 relates to the planning of the inservice meeting. Guidelines on such as whom to invite, where to hold the meeting, and evaluation of the meeting are discussed. The remaining chapters provide specific ideas for presenting the materials contained in the handbook. Chapters 2-10 follow the order in which materials are discussed in the handbook: (1) working with others, (2) emotional impairments of learning, (3) learning disabilities, (4) mental retardation, (5) visual impairments, (6) hearing impairments, (7) physical impairments, (8) vocational assessment, and (9) models of service delivery. Each chapter gives suggested activities and suggestions for time scheduling and lists resources. (YLB)

This annotated bibliography contains over 450 references divided into fourteen categories dealing with modification of vocational curriculum for the handicapped. It accompanies a handbook and user's guide which are available separately (see note). Section 1 is an introduction. Sections 2-15 contain resources divided into these categories: administration, assessment, career education, curriculum modification, handicapping conditions, individualized education, inservice training, least restrictive alternative, legal issues, mainstreaming, programs, resources, school change, and supportive services. Each entry follows this format: author(s), title, place of publication and publisher, date of publication, and annotation. (YLB)

Identifiers—Nuclear Energy Occupations, *Nuclear Power Plants, *Nuclear Reactors, Nuclear Technology

This technical specialty course is one of thirty-five courses designed for use by two-year postsecondary institutions in five nuclear technician curriculum areas: (1) radiation protection technician, (2) nuclear instrumentation and control technician, (3) nuclear materials processing technician, (4) nuclear quality-assurance/quality-control technician, and (5) nuclear reactor (plant) operator trainee. This course, Introduction to Nuclear Systems, contains five modules: Basic Nuclear Reactor Components, Pressurized Water Reactors, Boiling Water Reactors, Primary Cooling Systems, Nuclear Instrumentation, and Nuclear Fuel Cycle. Each module follows a typical format including the following sections: introduction, module prerequisites, objectives, subject matter, exercises, materials, procedures, data tables, reference materials, and tests. (A master index and suggested program planning guides are also available—see CE 026 856 and CE 026 639-642.) (LRA)

Identifiers—Vocational Technical Education Consortium States

This module is one in a series of six designed to help vocational educators develop skills needed to make use of the Vocational Technical Education Consortium of States materials and to develop and manage individualized instructional programs. Recommended for use by both pre- and inservice teachers and curriculum development specialist interns, the modules should help them institutionalize performance-based vocational education. The objective of this module is to help develop skill in effectively managing individualized instruction. It helps the learner become aware of some basic management theory and how that might best be applied to the daily operation of an individualized instruction program. Contents include three learning experiences based on two enabling objectives. A list of outside resources which supplement those contained within the module is presented. Each learning experience contains some or all of the following materials: enabling objectives; learning activity (activities), including information sheets, case studies, and self-checks with model answer (as feedback); and optional activity (activities). Identifiers—Pennsylvania, Vocational Technical Education Consortium States

This module is one in a series of six designed to help vocational educators develop skills needed to make use of the Vocational Technical Education Consortium of States materials and to develop and manage individualized instructional programs. Recommended for use by both pre- and inservice teachers and curriculum development specialist interns, the modules should help them institutionalize performance-based vocational education. The objective of this module is to help develop skill in functioning in the role of change agent. Focuses are knowledge about performance-based vocational education and about change in education, the Pennsylvania plan for effecting the changes needed to institutionalize performance-based vocational education, and the role of the change agent in the plan. Contents include five learning experiences based on four enabling objectives. A list of outside resources which supplement those contained within the module is presented. Each learning experience contains some or all of the following materials: enabling objective; learning activity (activities), including information sheets, case studies, and self-checks with model answer (as feedback); and optional activity (activities). Identifiers—Pennsylvania

A study was conducted to develop and field test a greenhouse production record book and unit of instruction for growing potted chrysanthemums. Twenty high schools in Pennsylvania with horticulture departments formed the population for the study. The twenty schools were randomly assigned to four treatment levels: (1) five classes received the greenhouse record book coupled with the potted chrysanthemum units, (2) five classes received only the greenhouse record book, (3) five classes received only the potted-chrysanthemum unit, and (4) five classes received the teacher's own instructional materials. Based on mean crop quality scores and mean test scores it was concluded that the teaching unit was effective in promoting cognitive learning about potted-chrysanthemum production. The results supported the belief that the students who received the teaching unit would score higher on a cognitive test than students who did not receive the unit. The potted-chrysanthemum unit and the greenhouse record book, when used independently, were effective in helping students to grow higher quality potted chrysanthemums. (The production record book and the evaluation test are appended.) (LRA)

A study was conducted to assist two-year postsecondary educational institutions in providing technical specialty courses for preparing nuclear technicians. As a result of project activities, curricula have been developed for five categories of nuclear technicians and operators: (1) radiation protection technician, (2) nuclear instrumentation and control technician, (3) nuclear materials processing technician, (4) nuclear quality assurance/quality control technician, and (5) nuclear reactor (plant) operator trainee. The total Nuclear Technology Series consists of 236 instructional modules for 35 technical specialty courses. In addition, program planning guides were developed for each of the curriculum areas. (Appended material includes curriculum outlines, course descriptions and module objectives for Nuclear Radiation Production, Nuclear Instrumentation and Control, and Nuclear Materials Processing Technologies.) nomics, Program Development, Program Implementation, Resource Centers, School Business Relationship, *School Community Relationship, Unions, Units of Study

Identifiers—Ohio

This handbook provides specific examples of activities and procedures of labor-education collaboration within the context of the career education program. It is intended to help interested communities develop or expand labor's active involvement in the educational process. After an introduction, a section lists a number of concerns shared by organized labor and education. Other brief sections focus on career education as a vehicle for establishing communication with labor, Ohio's career development program, and labor-career education in Akron. Three sections concerning labor resources in education review the general structure and function of the various labor unions found in the community and identify areas of expertise and interests. In the next section guidelines for planning and implementing inservice labor-education programs for educators are provided. Following a section providing direction for developing integrated curriculum units on organized labor, secondary-level labor-education instructional units with sample lessons and objectives are provided. The next section gives examples of additional ways in which labor education can be incorporated into other areas of the school curriculum. A final section provides direction for developing a labor-education multimedia resource center and describes the minimum materials which should be available. A bibliography is provided. (YLB)

Identifiers—*Occupational Competence Assessment, Testing Centers

This introduction and overview is part of a seven-section report that investigates how individual competence is defined and assessed in the settings of education and work. Following background rationale, the first portion develops a definition of competence as "a characteristic of an individual that underlies effective work performance." Focus throughout is on work performance as the target of competence, rather than on the broader area of life performance that subsumes it. Overviews are provided of the individual chapters: (1) Competence Assessment and Personnel Selection; Current Practices and Trends, (2) Assessment Centers: Theory, Practice, and Implications for Education, (3) Competence Assessment for Certification in the Professions, (4) The Definitions and Measurement of Competence in Higher Education, (5) Competence Assessment and the Courts: An Overview of the State of the Law, and (6) Summary: A Synthesis of Issues. The issues identified and described briefly here are the definition of competence, the discrepancy between actual practice and ideal practice, the definition of validity, barriers to improving the state of the practice, and implications for curriculum content. Each of the six chapters is available separately—see note. (LRA)

Identifiers—*Occupational Competence Assessment

One of seven sections of a report that examines the assessment of occupational competence, this chapter presents competence assessment as it is defined in practice by selection techniques currently used by employers. The chapter begins with a discussion of the major techniques used in employee selection, focusing on the competencies employers detect and their measurement properties. The second major portion focuses on the ways in which selection techniques are used as components of selection systems within a variety of organizations. Among the questions addressed here are the following: Do employers actually select on the basis of the competencies they desire in job applicants? How do selection practices vary according to the type of job and level of skill required at entry? What biases enter into selection decisions as a function of the procedures used? To what extent do employers verify the importance of certain competencies to job performance or the effectiveness of their selection procedures? The chapter concludes with a discussion of how organizational realities and other factors affect selection practices and what educators can learn from current trends in these practices. (Other sections of the report are available separately—see note. The first is an overview; the last is a synthesis of issues.) (LRA)

Identifiers—*Occupational Competence Assessment, *Testing Centers

Focusing on assessment centers, this chapter is one of seven in a report that examines the assessment of occupational competence. Assessment centers are presented first in a historical context (their origins in personality theory), through which their evolution is traced and examined. What follows is a description of current assessment center practice, involving a broad sample of presently active assessment centers. The third major portion discusses the process and the results of the assessment center to illuminate the following key issues for the researcher and practitioner: Is the assessment center useful as a method of ascertaining the presence or absence of specified competencies? Does it measure performance potential or current ability? To what use do organizations put the data that they gather on individuals? What are the consequences of implementing assessment centers for the persons who are assessed and for the implementing organizations? The chapter concludes with an examination of the functions assessment centers serve for the organizations that use them. (Other sections of the report are available separately—see note. The first is an overview; the last is a synthesis of issues.) (LRA)

Identifiers—*Occupational Competence Assessment

One of seven sections of a report that examines the assessment of occupational competence, this chapter examines the issue of certification from the perspective of the consumer of services performed by the individual possessing the credential. To provide an understanding of the current practice of competence assessment as a component of certification, the first portion of the chapter elaborates the process of how an occupation becomes a profession. In the course of describing the purposes and function of licensing and certification, particular attention is paid to the link between specifying the credential-awarding process and setting the goals that are established for the process. Following a description of the career areas in which certification plays an active role, the definition and measurement of competence is discussed using examples from prominent current practices. Among the key issues addressed in the chapter are the following: What is the relationship between certification and competence? Does certification ascertain minimal performance standards or are there other functions it performs that are more important? And, how do certification procedures direct educational priorities, with reference to the requirements of the world of work? (Other sections of the report are available separately—see note. The first is an overview; the last is a synthesis of issues.) (LRA)

Identifiers—*Occupational Competence Assessment

Focusing on the competency based education movement (CBE), this chapter is one of seven sections of a report that examines the assessment of occupational competence. The chapter begins by reviewing the prominent CBE programs, their institutional objectives, and how competencies are identified and assessed. In particular, the degree to which institutional goals influence the identification and assessment process is examined, with traditional programs as a comparison. Some of the questions to which the chapter responds are the following: What are the distinctions between CBE and more traditional programs in the way they go about assessing competence? How does the specification of competencies shape curriculum content? How does the practice of assessment affect student learning? And how do assessment procedures limit or distort the competencies that are defined as curricular objectives? Following the review of the state of the practice, a model for competency definition is introduced. The model becomes the framework for a discussion of the practical directions that institutions of higher education can take in pursuing their goals, within some of the real-world limitations imposed by tradition, the faculty, time, and financial resources. (Other sections of the report are available separately—see note. The first is an overview; the last is a synthesis of issues.) (LRA)

Identifiers—Civil Rights Act 1964, *Occupational Competence Assessment

One of seven sections of a report that examines the assessment of occupational competence, this chapter provides a review of how the courts have responded to assessment practices. The difference in the perspectives held by the users and originators of assessment procedures and those held by the courts is developed by examining key court cases which followed upon the enactment of Title VII of the 1964 Civil Rights Act. In light of the courts' present posture, the implications of this difference in perspective are discussed for selection, licensing and certification, and educational assessment. The topics addressed include the use of the diploma or degree as a hiring requirement; the fairness of licensing and certification procedures as gateways to professions, with an emphasis on teacher certification; the use of IQ tests and other measures of general ability for classifying students; minimal competence assessment and the accountability of educational institutions; and the use of graduate school admission tests to select applicants fairly for the limited number of available places. The chapter concludes with a summary of the conditions under which the courts will tend to scrutinize competence assessment practices as well as suggestions for further legal research. (Other sections of the report are available separately—see note. The first is an overview; the last is a synthesis of issues.) (LRA)

Identifiers—*Occupational Competence Assessment

The final chapter of a seven-section report that examined the assessment of occupational competence, this chapter explores the key patterns and commonalities that have emerged from the study of occupational competence assessment. The chapter begins with a synthesis of the state of the art of competency definition and measurement under four topic headings: definition of competence (what is measured), derivations of competence variables (how hypothesized competencies are identified), the measurement of competence, and the validity of competencies defined. The synthesis is followed by an in-depth discussion of the themes which emerge from the points of view of the various components of the human resource development system: the consumer, the educational system, licensing and certification, employers, the federal government, and the research and development community. The third major portion of the chapter examines key countervailing forces which present problems for advancing the practice of defining and assessing

competence. The concluding section discusses what the actors in the human resource development system can do to improve the practice of competence assessment through economic incentives, law and regulation, dissemination, government practice, and program evaluation. (Other sections of the report are available separately—see note. The first is an overview; the last is a synthesis of issues.) (LRA)

Identifiers—*Ellis (Albert), *Piagetian Stages

Rational-Emotive Therapy (RET) is predicated on a theory of causality. According to Ellis (1962), beliefs regarding an event, and not the event itself, cause emotional reactions. Mentally healthy persons practice this rational theory of causality. Neurotic persons accept an irrational theory of causality based on coincidental or correlational data. Therapeutic change occurs when irrational theories are tested, refuted, and replaced by rational ones. The ontogenetic development of theories of causality as described by Piaget (1952, 1954, 1960) parallels therapeutic development. Young children possess irrational theories of causality. As they mature, their experiences within a natural environment refute the irrational theories and lead to the development of rational ones. The similarities between developmental and therapeutic progress suggest that rational-emotive educators must be knowledgeable in both cognitive developmental theories and the RET framework. (NRB)

This book describes "Revitalize," an arts and aging program developed for the Fine Arts Council of Florida. The rationale behind the program, research involved in its structures, the evolution of ideas, the selection of the Neighborly Center, Inc. as a partner agency, the designation of sites for the program, the choice of artists, and the intent and structure of the program are all examined in the first section. Before Implementation. The next two sections, Implementation and Orientation and Implementation Site-by-Site, present the participating artists' views of the program development and include entries from the artists' journals. The final section contains poems and stories by some of the program participants. (Author/NRB)

Descriptors—Attitude Measures, Attitudes, *Homosexuality, Individual Characteristics, *Lesbianism, *Negative Attitudes, *Psychological Patterns, *Sex Role, *Social Bias

Identifiers—*Homophobia

In recent years psychological studies of homosexuality have shifted in focus from homosexually-oriented persons to individuals manifesting homophobia, the irrational fear or intolerance of homosexuals. In a pilot study, 130 college students completed a preliminary questionnaire consisting of attitudes toward homosexuals and homosexuality. Two forms of a second questionnaire were administered to 906 college students. The lesbian target questionnaire was completed by 276 females and 161 males. The male homosexual target questionnaire was completed by 282 females and 187 males. Results indicate that, for both sexes and for both targets, a fairly unified conception of homophobia emerges: homophobia can be defined as the belief that homosexuality is sick, wrong, and disgusting; and it poses a danger to society and a threat to the individual. Data analysis offers little in explaining why people hold negative attitudes toward homosexuals. Survey statements are appended. (NRB)

Descriptors—Attitude Change, *Attitude Measures, Change Strategies, College Students, High School Students, *Lower Class Students, *Middle Class Students, *Parenthood Education, *Sex Differences, *Social Differences, Test Construction

Identifiers—*Education for Parenthood Attitude Scale

Although many education for parenthood (EP) programs have been developed and implemented, a formal systematic determination of the attitudes of the groups to be served has yet to be conducted. A 110-item Education for Parenthood Attitude Scale (EPAS) was developed to measure attitudes toward EP, and administered to a sample of high school (N=226) and college (N=452) students. Middle-class high school students had significantly more favorable attitudes toward EP than did working-class students, and high school females had significantly more favorable attitudes than males. There were no significant class or gender differences in the college sample. The results suggest that, at least among high school students, there may be more resistance to EP-type programs among members of working-class families and males. It may be that EP requires a specific orientation program for working-class groups and males to modify their attitudes in order to make them more receptive to EP. (Author)

Effect of Type of Problem and Type of Analogue on Preference for Counselor's Sex.

Pub Date—[79]

Note—30p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Attitudes, *Counselor Characteristics, *Counselor Client Relationship, Emotional Problems, *Psychological Characteristics, *Sex Differences, *Sex Role, Student Problems

Clients have preferences regarding desired counselor characteristics and these preferences may influence counseling outcome. One factor that may influence reaction to a counselor is the counselor's

gender. A combination of direct and indirect methods for eliciting preferences was used to examine preference for sex of counselor and to determine if preference is related to students' views of problems as being gender-related. Male (J=60) and female (N=60) college students were assigned to either a male or female counselor description condition. As an indirect measure, subjects read and responded to scenarios describing problems chosen as typically female, typically male, and not gender-related. As a direct measure, subjects indicated for each of 75 problems whether they would prefer to discuss it with a male counselor, female counselor, or if they had no preference. Two open-ended questions on counselor preference were also used. Results indicated that, regardless of measure used or presenting problem, subjects had no definite preference for sex of counselor except when they were forced to choose, in which case, both females and males tended to prefer a female counselor. This monograph concerns the role of the student personnel worker in counseling adult students, especially female students. Reasons why women return to college and their utilization of a student personnel department are reviewed. An analysis of admission requirements for adult students and an outline of institutional activities that promote sex equity are included. Specific recommendations are made for changes that will enhance educational opportunities for women in higher education. It is suggested that colleges must update admissions practices to eliminate barriers for women, employ women as successful role models, design special programs for women, and change existing attitudes and biases regarding the education of women. The appendix contains modules for counselor training workshops that promote sex equity. (NRB)

Group and Individual Parent Training With Child Abusers.

Pub Date—26 Mar 80

Note—7p.; Paper presented at the Annual Meeting of the Southeastern Psychological Association (26th, Washington, DC, March 26-29, 1980).

Pub Type—Reports - Research (143) - Speeches/Meeting Papers (150) - Numerical/Quantitative Data (110)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Behavior Modification, *Child Abuse, *Child Rearing, Family Counseling, Family Problems, Group Counseling, *Intervention, Parent Child Relationship, *Parent Counseling, Parent Education, *Self Control, Therapy, Training Methods

A behavioral intervention program for child abusers was evaluated using multiple outcome criteria. Families were assigned to treatment (N=8) and control (N=8) on a first-come basis. All families were supervised by protective services and none had requested help voluntarily. A treatment program involving group parent training in the clinic and competency-based training and rehearsal in the home was provided by trained clinical psychology graduate students. The results strongly suggest that training abusive parents in child management and self-control techniques leads to improvements in parent effectiveness as measured by observations of parenting skills and parent/child interactions, par-

ental report of child behavior problems, and caseworker report of family problems. Ten-week follow-up revealed that these improvements were maintained, and at one-year followup no child abuse had been reported to or suspected by caseworkers for those families completing treatment. Findings support the social learning model of child abuse and point to efficient methods by which to train abusive and "at-risk" parents in appropriate child management techniques. (Author)

Identifiers—*Advocacy Counseling

National surveys reveal that citizens of all age groups, from school age to adult, are ignorant about the law and its practical use in daily life. The advocate counseling model is an integrative approach combining the elements of legal research and therapeutic counseling in order to teach and guide individuals or groups with institutional problems to act as advocates for themselves affirmatively and assertively. Teaching clients to gain maximum control over their lives is the central goal of the model which utilizes certain aspects of therapeutic counseling, including empathy, problem-solving techniques, decision-making strategies, and provision of an atmosphere of affirmative and assertive actions. As clients develop their self-esteem through this process, they are taught the legal research aspect, i.e., the organization of facts and the documentation of incidents with institutions and their personnel who have caused them grief or injury. Assumptions from therapeutic and advocate counseling models increase, university enrollments decrease, and university principles, which are of use as higher education costs increase, university enrollments decrease, and university student legal services face the problem of meeting student legal problems with less monies and resources. Perceived Parenting Patterns and Adult Personality: Implications for Psychotherapy.

Pub Date—Mar 80

Note—29p.; Paper presented at the Annual Meeting of the Southeastern Psychological Association (26th, Washington, DC, March 26-29, 1980).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Adult Development, Adults, Behavior Patterns, *Parent Child Relationship, Parent Influence, *Perception, *Personality Development, Personality Measures, *Psychological Patterns, Psychotherapy

Identifiers—*Inner Child Inventory, *Parenting

Personality theorists have suggested the critical importance of parenting characteristics on the development of a child's personality. Mischkin's (1963) classification of parenting characteristics and their effects on the adult personality were investigated using an experimental measure, the Inner Child Inventory (ICI), to assess perceived parental characteristics and current personality. The Minnesota Multiphasic Personality Inventory (MMPI) was used as a second measure of personality functioning. Subjects were 150 clients of a university counseling center. Results yielded three clearly distinguishable parenting patterns: (1) overcoercive, perfectionistic, punitive, neglectful parenting; (2) overmissive and overindulgent parenting; and (3) mutually respectful parenting. Multivariate analyses revealed significant personality correlates in respondents associated with each perceived parenting pattern. Findings suggest that parenting patterns are identifiable and have different effects on developing personalities, and that the ICI appears to be a broad pathology indicator and measure of ego strength.

Descriptors—*Change Strategies, *Counselor Role, *Ecological Factors, Family (Sociological Unit), *Family Counseling, Family Problems, *Intervention, Models, State of the Art Reviews, *Systems Approach, Therapeutic Environment

A brief review of systems theory provides a rationale for an underlying theoretical model within which systems theory can be more completely understood. The essence of the model is that persons are the major unit of study because the available means of satisfying "basic needs" define and shape interaction patterns in the family as in other human subsets. The basis for the need systems derives from existential theory/philosophy and utilizes a substantial part of Erich Fromm's formulations. The ecological model of family therapy studies all interacting forces that influence a family such as interpersonal, intrapersonal, cultural, political, and economical. The major therapeutic technique is to develop awareness of the forces interacting in a family and assist the family to make changes through a sequential process of (1) understanding, (2) exploration of alternatives, (3) implementation of changes, (4) stabilization, and (5) establishment of support systems. Selection and Training of Paraprofessionals for Counseling and Personnel Work in Education.

Pub Date—Apr 79

Note—55p.

Pub Type—Information Analyses (070)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Counseling Effectiveness, Counseling Services, *Interprofessional Relationship, Models, *Paraprofessional Personnel, *Personnel Selection, *Program Design, State of the Art Reviews, *Supervision, *Training Methods

Paraprofessionals have been employed in a variety of functions for many years. Recently in the helping services, career employment of paraprofessionals and the rapid unfreezing of the 1960's bias toward a psychodynamic, one-to-one approach offered only by highly trained professionals have allowed paraprofessional roles to expand beyond data-handling and other entry-level activities. Those employing paraprofessionals must develop a plan of systematic training, supervision, and evaluation. A clear specification of the tasks to be performed and the skills needed to perform these tasks can lead to the development of precise criteria for selection and training. Possible training methods include role playing; supervised practice; content lectures; technical task training; human relations skills training; and sensitivity, encounter, or group counseling. Specific attention to the needs of paraprofessionals and individualized training programs can result in greater satisfaction, a stronger sense of identity with program objectives, and more favorable performance evaluations. Psychological Variables Related to Faculty Attitudes Toward Collective Bargaining.

Pub Date—Mar 80

Note—11p.; Paper presented at the Annual Meeting of the Southeastern Psychological Association (26th, Washington, DC, March 26-29, 1980).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Attitudes, *Collective Bargaining, *College Faculty, Higher Education, Individual Differences, *Job Satisfaction, Perception, *Predictor Variables, Salaries, *Sex Differences

Most research on faculty collective bargaining has focused on its extent and demographic variables such as age, salary, academic discipline, and rank.

Little has been done to investigate individual differences which correlate with attitudes toward collective bargaining. The external validity of an earlier study done by Bigoness on correlates of faculty attitudes toward collective bargaining (ACB) was investigated using data obtained from 225 faculty members and administrators at a southeastern state university. The dependent variable was the ACB scale used by Bigoness. Independent variables included two measures of job satisfaction developed by Quinn and Staines, Levenson's IPC scale, and demographic variables of academic rank, salary, time employed by the university, and age. From the simple correlations for both men and women and men alone, five of the six best predictors of ACB were attitudinal/perceptual, with salary being the exception. For females, none of the variables correlated significantly with ACB. For both the total sample and for men alone, the three statistically significant predictors were, in order, a measure of job satisfaction, a perceptual measure (Internal Orientation), and one demographic variable (salary). A National Perspective on Alienation, Involvement, and Victimization in Schools.

Pub Date—Sep 79

Note—7p.; Paper presented at the Annual Convention of the American Psychological Association (87th, New York, NY, September 1-5, 1979).

Pub Type—Information Analyses (070) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Crime, *Discipline, Elementary Secondary Education, *Fear, National Surveys, State of the Art Reviews, *Student Alienation, Student Behavior, Students, *Violence
Identifiers—*Safe School Study, *Victims

In response to a federal mandate, the National Institute of Education conducted the Safe School Study which examined victimization by violence in schools as a major dependent variable, and included alienation and involvement measures among the independent variables as well as demographic, attitudinal, school, familial, and community characteristics. The data indicated that the proportion of junior high school students reporting attacks was about twice as great as that of senior high students. The risk of serious attack was greatest in urban areas. Those students who were fearful of attack, or who had been recently attacked reported staying home from school or avoiding school areas such as restrooms and certain sites within the school grounds. Fear was much more common in junior than senior high schools. Overall, the findings suggest a need to humanize the nation's schools by providing: (1) more personalized contact among students, teachers, and administrators; (2) smaller classes; (3) more collaborative decision-making procedures; (4) firm, fair, and consistent discipline; and (5) restructure of the grade composition of schools. Descriptors—*Assertiveness, Behavior Patterns, *Building Design, College Students, *Dormitories, Higher Education, *Personal Space, *Student Behavior

Identifiers—*Crowding, *Helplessness

In recent years the college dormitory has become a popular setting for examining chronic effects of crowding and high density in humans. Possible differences between corridor- and suite-type residents were investigated to examine the degree to which corridor- and suite-design dormitories influence assertive behavior of the residents. It was hypothesized that if corridor-type residents exhibited behaviors consistent with a learned helplessness explanation, they would be less likely than suite-type residents to use assertive behaviors. Results indicated that there were no differences across demographic and biographical variables between suite and corridor residents. However, summed scores on the Rathus Assertiveness Schedule revealed that suite residents

reported being significantly more assertive across a number of settings than corridor residents. In a second controlled laboratory study, data revealed that subjects who actually engaged in assertive behavior in the laboratory reported being more assertive on the Rathus Assertiveness Schedule than subjects who did not assert themselves in the experimental condition. Corridor residents were less assertive than residents living in suite-type dormitories. (Author)

A Handbook for Comprehensive Guidance Programs. Bulletin 1979, No. 7.

Alabama State Dept. of Education, Montgomery. Spons Agency—Office of Education (DHEW), Washington, D.C. Pub Date—15 Jun 79

Note—233p.; Parts of appendix marginally legible. Pub Type—Guides - General (050) — Reports - General (140)

EDRS Price - MF01/PC10 Plus Postage.

Descriptors—Career Education, Class Activities, *Counselor Role, Counselors, Elementary Secondary Education, *Guidance Programs, *Learning Activities, Program Design, *Program Development, *Pupil Personnel Services, *Resource Materials, School Counseling
Identifiers—Alabama

This handbook is designed to assist counselors in developing a comprehensive guidance program and is based on the assumption that guidance programs should be an integral part of the total educational system, tailor-made to meet the specific goals and needs of all students. Components include: (1) the role of the counselor; (2) certification and professional development; (3) program planning, implementation, and evaluation; (4) individual and group counseling activities; (5) classroom management activities; (6) job/career placement; and (7) occupational information systems. Each activity section provides a list of activities and their purpose, target audience, learning objectives, equipment or materials, instructions, and evaluation. The appendices contain examples of needs assessment and evaluation instruments. (Author/HLM)

Descriptors—*Career Choice, College Faculty, Comparative Analysis, Higher Education, *Job Satisfaction, *Part Time Faculty, *Role Conflict, *Self Evaluation (Individuals), *Sex Differences, Surveys

Research that attempts to understand the job satisfaction of faculty in higher education has generally focused on full-time teaching faculty. Part-time faculty are responsible for a substantial portion of the total instructional production of the nation's colleges and universities, but to date have been largely unobserved. The job satisfaction and role conflict of full-time and part-time male and female faculty were investigated using the entire teaching faculty at the University of Maryland (College Park campus) as the sample group. Respondents completed the Job-Related Tension Index and a questionnaire containing job satisfaction and role conflict items. Results indicated that part-time faculty expressed greater job satisfaction and less role conflict than full-time faculty. Female faculty experienced greater job dissatisfaction and greater role conflict than male faculty. The most satisfied group was male part-time faculty and the least satisfied group was female full-time faculty. (Author/HLM)

Descriptors—*Adolescents, *Age Differences, Behavior Patterns, *Birth, Expectation, Females, *Life Style, Mother Attitudes, *Mothers, Occupational Aspiration, *Unwed Mothers

Most research on teenage parenthood is concerned with illegitimacy and its determinants such as attitudes toward sex, contraceptive knowledge and practice, family relationships, and cultural factors. Empirical studies on the consequences of illegitimacy are generally limited to problems of recidivism, school dropouts, and welfare dependency. Whether getting married when very young because of pregnancy is more socially advantageous than being an unmarried parent has never been rig-

orously demonstrated. In initial and follow-up interviews, women who had their first births when they were teenagers were compared to women in their twenties at the time of first birth to examine differences in role aspirations and behavior. Teenage mothers: (1) were less likely to plan the timing of motherhood; (2) found that the onset of childbearing responsibilities had a limiting effect on their role activities; (3) were less likely to realize their work aspirations; and (4) differed from older mothers in that a substantial proportion wanted no more than one child, and a sizeable group wanted four or more children. EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Academic Standards, Comparative Analysis, *Educational Environment, Foreign Countries, *Institutional Characteristics, *Parent Attitudes, Secondary Education, Secondary School Students, *Student Attitudes, *Student School Relationship, *Transfer Students
Identifiers—British Columbia (Vancouver)

When transferring into Vancouver secondary schools, students complete a "Choice of Schools Request Form," indicating basic demographic data and reasons for the transfer request. Comments from those who talk to transferees, however, raise questions as to the veracity of the information on the forms. Secondary school transfer applicants and their parents were surveyed to identify reasons for transferring. Both students and parents learned about different schools mainly from friends and family. Students transferred to schools to be with friends, satisfy their parents, get a "fresh start," enter particular programs, or attend schools with higher academic standards. Students transferred away because they were moving, disliked the school or classmates, or were expelled. Transferring to a school because the "discipline was more strict" was a reason given frequently by parents, but never given by students. (The appendices contain the sample questionnaires, results of the surveys, and a comparison of student and parent opinions.) (Author/HLM)

Descriptors—Adjustment (to Environment), Behavior Problems, Child Development, *Counseling Techniques, *Family Relationship, *Foster Children, *Foster Family, *Group Counseling, Leaders Guides, *Parent Role, Role Playing, Social Services

This guide presents a program for group counseling with foster parents who have had preservice training and an orientation to agency procedures. The program consists of six group sessions, each with its own objectives, thematic content, and methods. Counseling methods include group discussion, guided fantasy, and role playing. Thematically, the program is divided into two sections, the first of which focuses on the changes in family structure and dynamics that result from the addition of a foster child. Discussions center on preplacement family planning, meeting the child's developmental needs, techniques to assure adjustment of the child and siblings, and methods of establishing a loving and trusting relationship with the child. The second section is devoted to the special needs of the foster child, particularly those related to the experience of separation. The normal problems of adjustment are discussed, as are the problems of emotionally disturbed children in foster care. Foster parents also learn methods of developing a positive working relationship with the agency and their caseworker. The program organizer recommends follow-up after the program to maintain support and encouragement

for the foster parents. (Author/CS)

tion, *Interpersonal Relationship, Justice, *Per-
ception, *Rewards, *Sex Differences, *Sex Role
Lerner has proposed an equity model used in the
determination of fair allocations which suggests that
if two individuals are perceived as being similar to
and in a positive relationship with each other, there
are two possible rules that give fair allocation of
rewards. If individuals see each other as occupants
of positions the characteristics of which are in-
dependent of any individuals occupying them, and
see each other's behavior as the product of their
respective positions, the equity rule applies. If they
are perceived as persons who might occupy any po-
sition and whose behavior stems from individual
characteristics, an equality or parity rule of allocation
will be followed. A social-perception test of the
influence of personal and positional relationships on
allocations was conducted with male and female
undergraduates. Results indicated that: (1) defini-
tions of relationships are important determinants of
allocation for both sexes; (2) sex differences exist for
traditionally sex-typed individuals only when rela-
tionships are not dependent clearly either on person
or position; and (3) both sexes see allocation of re-
wards as a determinant of future interactions. (Au-

Widowed

Retirement is a major issue facing the older
American man. Not only must he give up his work,
a source of identity and self-esteem, the retiree must
also face new relationships with his spouse, chil-
dren, and peers; and he must learn to use leisure
time appropriately. Widowhood is a second major
issue. Aside from deep emotional loss, the widower
must contend with new, normally-feminine roles of
homemaking for which he is ill-prepared. Attention
from other women may be threatening and difficult
to handle. Diseases and disabilities are other threats
to a man's sense of invulnerability. Difficulty ac-
cepting the sick role may prevent older men from

using needed health facilities. Lack of defined role
and the failure to find appropriate informal roles are
additional major issues. Finally, sexuality and the
changes that occur with age often present problems.
The man who has become more androgynous
throughout his life may be better able to adapt to the
various role changes as he ages. It is the role of the
therapist to maximize interpersonal and intrap-
sychic growth that may occur during crises in aging.

Approach, Therapy

A system for describing the specific elements that
constitute any psychological intervention is pre-
sented. The system includes 39 operations or con-
trolling responses which may be administered by
the psychologist, the client, or both together. Vary-
ing the administration of the operations can provide
over 100 source/operation elements in the coding
system which can be combined in thousands of
unique associations in order to make distinctive
treatment packages. Definitions and examples of
the operations are provided. The 39 operations con-
sist of 8 setting events, 11 cues and prods, 3 primary
behaviors, and 17 consequences. The use of the cod-
ing system is illustrated and data on inter- and intra-
rater reliability are provided. (Author)

This publication of the proceedings of the Inter
Association Child Care Conference includes a de-
bate for and against professionalization in the field
of child care. A section on meeting the treatment
needs of children through educational preparation
of child care practitioners discusses background fac-
tors, levels of education for practitioners, cur-
riculum, models and designs, instructional design,
teaching methods, and evaluation methods. Several
conference workshops are described which involve
various programs and instructional techniques for
child care workers, including the use of a life chart,
nonverbal activities, transpersonal communication
skills, and techniques for dealing with emotionally
disturbed children. Other workshops cover residen-
tial programs, supervision techniques, day care staff
training, and administration issues. (NRB)

ondary School Curriculum, *Student Educa-

tional Objectives

Identifiers—*Scotland

This book is the first result of a research project
involving a study of the process by which young
people move through secondary school into work or
advanced education. The process of subject choice
which takes place at the end of the second year of
the Scottish secondary system and the students' in-
tentions for the future, at this stage, are discussed.
A presentation of recent developments affecting
schooling includes the development of comprehen-
sive education, a more varied curriculum, the raising
of the minimum school leaving age to 16 and the use
of guidance. Developments in society outside the
school are also described. The conditions of the re-
search project are presented, including sample char-
acteristics and a description of the eight schools
involved. Procedures for subject choice are outlined
for each of the schools, and tables which illustrate
subjects chosen by the students are shown. Future
expectations of the students at age 14 are described
and compared. Finally, a discussion is presented on
the significance of school assessment of student
ability, curriculum provisions for academically
disadvantaged students, significance of curriculum
choice, parent-school relationships, and the need for
student guidance services. (NRB)

Since the development of the Lubin Depression
Adjective Check Lists (DACL) in 1965, researchers
have used this instrument in many empirical and
clinical studies. Scores on the DACL have cor-
related with other measures of depression and have
also been related to personal characteristics of de-
pressed individuals. The DACL has been used in
studies to assess depression across time in relation
to physical and psychological conditions such as
insomnia, and in studies of premenstrual mood
change and mood change during pregnancy and fol-
lowing childbirth. Studies on the effects of drugs or
medical treatments have used the DACL to investi-
gate cyclic hormonal levels, response to electrocon-
vulsive shock, alcohol withdrawal, drug intake, pain
perception, and exertion. Evaluation studies of
therapy or behavioral interventions for the treat-
ment of depression often use the DACL. Theoretical
investigations of anger and learned helplessness
have also used the DACL. Ease of administration
and the benefits of matched repeated lists have
provided investigators with a simple method for as-
sessing depression across time and in relation to a
number of concomitant events. (NRB)

Descriptors—*Adolescents, *Child Abuse, Condi-
tioning, Emotional Response, Group Dynamics,
Parent-Child Relationship, *Parenthood Educa-
tion, *Prevention, Role Playing, Secondary Edu-
cation, *Self Control, *Training Methods

A brief overview describes a study in which high
school students were taught to deal effectively with
"crisis incidents" in a pre-parenting program. The
program described involved pretest; training in an-
ger control, alternative responses to stress, and ap-
propriate responses to behaviors; and posttesting.
The study found students could be taught to deal
effectively with critical child behaviors they might
encounter when they become parents. This over-

view is followed by a session-by-session training outline for a preventative approach to child abuse to be used with high school students. Forms and instructions for day-to-day training session exercises, and pre- and post-testing measures are included. (NRB)

This record of the Select Committee on Narcotics Abuse and Control contains testimonies addressing the problems facing drug abusing women. The extensive prescribing of legal drugs such as tranquilizers, sedatives, pain killers, and stimulants is examined. The problems of polydrug abuse and alcohol abuse in combination with other drugs are also explored. A member of Women-Together, Inc., a self-help counseling and peer therapy group, describes her problems with prescription drug abuse and how she worked to overcome addiction. A psychiatrist/psychoanalyst presents testimony on the miseducation of doctors about mind-drugs and on the various advertising policies and gimmicks used by drug companies to attract physician use of their products. Sexism in drug advertising is also discussed. The treatment procedures for drug-dependent women used by various programs are described in testimonies by women associated with those programs. A final testimony concentrates on prescription drug abuse by middle-aged black women. A section on Women and Pills reports on women's vulnerability to prescription drug abuse, lists eight danger signals of addiction, and presents a complete chart of the 12 most abused drugs. (NRB)

Descriptors—Abortions, *Adolescents, *Birth, Contraception, Intervention, Parenthood Education, *Pregnancy, *Prevention, *Research Needs, Sex Education, Sexuality, *Social Planning, State of the Art Reviews

Adolescents contribute nearly 20% of all births in the United States; half of these are unplanned or unwanted. Negative health and socioeconomic consequences are associated with adolescent childbearing, and teenagers account for nearly one-third of all reported therapeutic abortions. Failure to use other than traditional research methods to study antecedents and consequences of teenage pregnancy has resulted in inadequate information for public policy or program development. Age and race comparisons have been made in studies of adolescent sexual behavior; research data point to an increasing number of sexually active adolescents, most of whom do not use contraception regularly or effectively. Studies of social epidemiology of adolescent pregnancies lack quality data from males or couples; reliable data on teenage abortions are also scarce. Productive research by psychologists could be conducted in the areas of developmental issues, antecedents and consequences of adolescent childbearing, and evaluations of programs offering sex education, contraception, abortion, or parenting skills. There is a need for collaborative research efforts by social demographers, epidemiologists, psychologists, and others who could help find viable intervention strategies to reduce unwanted teenage pregnancies. Vecchia, Robert P. Employee Growth Need Strength as a Moderator of Relationships Between Job Attributes and Job Satisfaction.

Pub Date—[77]

Note—18p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Affective Behavior, *Ambiguity, *Employees, Individual Development, Individual Differences, Individual Needs, *Job Satisfaction, *Need Gratification, Personality Traits, *Role Conflict, Role Perception, *Supervisors

Employee growth need strength (EGNS) is defined as a worker's need to obtain "growth" satisfaction from his work. The moderating influence of EGNS on relationships between global job satisfaction and the job attributes of conflict and ambiguity were investigated. Production supervisors (N=57) completed questionnaires on role perceptions, job satisfaction, and EGNS. Results from moderated regression analysis suggest that EGNS significantly influences the relationship between role-conflict and satisfaction, but does not significantly influence the relationship between role-ambiguity and satisfaction. Findings point out the importance of individual differences as a moderator of the relationships between job attributes and employee affective response. Results also contribute to the construct validation of the trait of EGNS. (Author/NRB)

Cox, Steven G. Use of Family Counseling Simulation Materials for Training Correctional Counselors.

Pub Date—Mar 80

Note—10p.; Paper presented at the Annual Convention of the American Personnel and Guidance Association (Atlanta, GA, March 26-29, 1980).

Pub Type—Guides - General (050) — Reports - Descriptive (141) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Correctional Rehabilitation, *Counselor Training, Emotional Response, *Family Counseling, *Material Development, Models, Observation, Prisoners, *Simulation, Skill Development, *Training Methods

This paper concerning the development of simulation materials for training correctional counselors in

family counseling is oriented toward developing sequential counseling materials which will have positive consequences for the trainees' use. An offender family counseling training module is presented utilizing a series of transparencies depicting human beings in various stages of distress in conjunction with a method for trainees learning to cope with stressful family emotional situations. (Transparencies are not included, nor need they be specific. Any picture depicting human emotion or distress can be developed into a transparency.) The materials are developed so that the following goals may be accomplished: trainees will be able to more easily integrate theory and skill areas; the simulation materials will enhance the probability of retaining that which is learned since the trainees will be asked not only to cognitively grasp the material but also to actually use it experientially; trainees will see an increased value in the learning experience and view the training as being appropriate to their field. Descriptors—*College Environment, *Consultation Programs, Higher Education, *Prevention, Professional Development, Program Descriptions, Program Evaluation, Program Implementation, *School Counseling, *Student Personnel Workers, *Supervisory Training, Training Methods

Prevention, in the form of consultation with campus agencies, is perceived as an alternative to crisis intervention. The goals of such consultation are to create a healthier, more supportive, growth-producing environment in which individuals can receive help before their life problems become serious enough to warrant professional therapy. This paper briefly describes an on-going collaborative consultative relationship that assists helping professionals in developing a campus-wide training program for University employees. The program involves staff members of the Student Counseling Center, in consultation with the campus Personnel Office, in helping supervisors in various departments to improve efficiency and effectiveness. Entry, assessment, implementation, and evaluation phases of the consultation process are described. (NRB)

Descriptors—*Child Rearing, Children, Consumer Economics, *Family Planning, Individual Differences, *Males, *Parent Attitudes, Personality Traits, *Population Trends

Identifiers—*Firo B Scale, *Nowicki Duke Locus of Control Scale

Heretofore, researchers have perceived women as the ones concerned with having children, generally excluding males from their samples. In order to look at male attitudes on childbearing, an investigation was conducted on personality differences between childless males preferring children within five years of marriage and those preferring to delay childbearing for a longer period of time. A pilot study questionnaire located childless males and divided them into two groups of 25 subjects each with respect to preferred childbearing following anticipated or present marriage. Subjects completed the Firo-B, the Nowicki-Duke Internal-External Locus of Control Scale, and a demographic-attitude questionnaire. A significant difference was found, indicating that males preferring to delay childbearing wanted fewer children than those preferring children more immediately. Quantitatively measured attitudes on childbearing were not found to differentiate males of childbearing preferences. Males were found to have realistic attitudes with respect to childbearing

and were enthusiastic subjects who discussed why they preferred children, reasons why persons might not want children, and issues of concern directly related to their own plans for childbearing. (Author/NRB)

Retort to Religious Critics of RET.

Pub Date—Jun 80

Note—11p.; Paper presented at the National Conference on Rational-Emotive Therapy (3rd, New York, NY, June 6-8, 1980). Best copy available. Pub Type—Opinion Papers (120)—Speeches/-Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Beliefs, *Church Role, *Clergy, *Congruence (Psychology), *Counseling Techniques, Emotional Adjustment, Helping Relationship, Opinions, Philosophy, *Rational Emotive Therapy, *Religious Factors, Therapy

This paper is concerned with people who contact clergymen for counseling who could benefit from the short-term directive therapeutic approach of Rational Emotive Therapy (RET) and the reluctance of clergymen to use RET. The integration of the precepts of Christianity and the concepts of RET is considered. This paper is specifically a response to an article by John Sterner (1977) entitled "Is Rational Emotive Therapy Suitable for Pastoral Counseling?" Distortions of RET, out of context quotes and misquotes of Albert Ellis found in the Sterner article are discussed. Similarities between Ellis' RET and Sterner's Rational Theology are presented. This paper also discusses the use of RET in pastoral counseling and in counseling the religious client. Replacing irrational theology with rational theology is discussed, and a third category, non-rational beliefs, is explained. The article concludes with a brief discussion of Dr. Paul Hauck's (1972) book "Reason in Pastoral Counseling" which illustrates the complementary nature of RET and theology. (NRB)

The Displaced Homemaker: A State-of-the-Art Review.

Education Development Center, Inc., Newton, Mass.

Spons Agency—Bureau of Occupational and Adult Education (DHEW/OE), Washington, D.C.

Pub Date—80

Contract—300-79-0778

Note—127p.

Pub Type—Information Analyses (070)—Reference Materials—Bibliographies (131)

EDRS Price - MF01/PC06 Plus Postage.

Descriptors—Adult Vocational Education, *Displaced Homemakers, *Employment Opportunities, *Females, *Financial Support, Group Counseling, Individual Counseling, Job Training, Nontraditional Occupations, Outreach Programs, Reentry Workers, Skill Analysis, Social Services

The movement to aid displaced homemakers began in 1975 and local programs received funding support from state legislation, Vocational Education, and CETA. There are no definitive statistics on the number of displaced homemakers in the country although the Department of Labor has estimated the number at 4.13 million. Information from 136 local programs reveals that most are affiliated with secondary or post-secondary educational institutions and were established within the last 18 months. Programs reported contact with over 26,500 displaced homemakers, indicating they could serve more. Half the programs had multiple funding and budgets between \$25,000 and \$75,000. Most offer job readiness workshops, skills and career assessment, and individual and group counseling. Displaced homemakers need more job-specific training, financial support while in training, and opportunities in nontraditional occupations. Although displaced homemakers lack confidence in their own abilities, employers are satisfied with their work. The focus of the movement should remain with middle-aged and older women. There is a need for training of displaced homemaker advisors, counselors, and instructors. Program evaluations should consider funding, outreach, services offered, and methods of providing services. Descriptors—*Counselor Training, Elementary Secondary Education, *Equal Education, Expectation, *Females, Homosexuality, Inservice Teacher Education, Nontraditional Occupations, *Role Perception, *Sex Bias, Sex Fairness, *Teacher Improvement, *Training Methods, Values Education

Identifiers—*New Pioneers Program

This handbook is part of the New Pioneers training program designed to build trust between the sexes and expand roles for women and men. Based on the premise that barriers to equity often involve personal values, this handbook outlines 14 sessions to help educators explore and broaden their own sex-role perceptions and those of students. The seminars described were developed for use by teachers, counselors, administrators, Title IX and Sex Equity coordinators, vocational educators, teacher educators, and community groups. Seminars may be used individually or as a series of informal lectures or small-group sessions. Topics include "Hidden Curriculum," "How Sex Bias Hurts Men," "The Relationship Between Work and Family," and "Male and Female Cultures in the Workplace." Detailed lecture notes, discussion questions, activities, and an evaluation form are provided for each session. (Author/NRB)

Descriptors—*Adjustment (to Environment), *College Students, Comparative Analysis, *Educational Experience, *Employment Experience, Environmental Influences, Higher Education, *Professional Personnel, Responses, *Stress Variables, Success

Identifiers—*Boredom

Stress is a major sphere of influence on students that acts as the "invisible curriculum," and affects their reaction and adjustment to the whole college experience. There is a need to obtain systematic data about college students' experience of tedium, a particular form of stress, defined as the experience of physical, emotional, and mental exhaustion created by daily grinding, steady, continuous pressures and unending struggles to achieve unattainable goals. In order to compare students and professionals in terms of their tedium and to investigate various life and work features as tedium correlates, 84 undergraduates and 205 professionals completed a 21-item questionnaire. College students were found to experience more tedium than professionals. They also perceived their school work as more stressful and lacking in rewards relative to the way professionals perceive their work experience. (Author/HLM)

Interaction and Role Strain: One-Parent Versus Two-Parent Situations.

Pub Date—14 Aug 79

Note—18p.; Best copy available. Paper presented at the Annual Meeting of the National Council on Family Relations (Boston, MA, August 14-18, 1979).

Pub Type—Reports - Research (143)—Speeches/-Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Behavior Patterns, Comparative Analysis, *Family Relationship, *Interaction, *One Parent Family, *Parent Child Relationship, Parent Role, Parents, *Role Conflict, *Stress

Variables

The potential for role strain is much greater in single-parent families where one person functions as both caretaker and provider than in the two-parent household where these roles can be shared. Role strain affects the quality of relationships and the interactions between parent and child(ren). It was hypothesized that the role strain felt by single adults with children would be expressed in greater frequency of negative interaction or contact between adult and child. Observations were made of 238 cases of either a single adult with children or a couple with children in locations such as laundromats, stores, churches, parks, and restaurants. Neither the number of adults nor the sex of the single adult was related to the frequency of interaction or contact. The child's behavior was related to both the frequency and the mood of interaction and contact. Findings did not support the idea that role strain of single parents affect parent-child interaction, suggesting that single-parent families may be neither better nor worse than two-parent families, at least in terms of parent-child interaction. Cognitive/Behavioral Approaches to Stress Management.

Pub Date—Mar 80

Note—11p.; Paper presented at the Annual Convention of the American Personnel and Guidance Association (Atlanta, GA, March 26-29, 1980). Best copy available.

Pub Type—Reports - General (140)—Speeches/-Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Adults, *Behavior Modification, Behavior Patterns, *Coping, *Counseling Techniques, *Environmental Influences, *Intervention, Models, Patients, *Stress Variables

This article presents a model for analyzing the sources of stress which trouble clients, and for designing cognitive/behavioral counseling interventions pertinent to those sources. The concept of stress as responses to both pleasant and unpleasant stimuli and the consequences of inadequate coping processes are examined. Three major sources of stress are postulated in this model, including: (1) situational (transitional life events and crises); (2) habitual (repetitive behaviors and activities); and (3) temperamental (characteristic anxiety-producing patterns of cognition and behavior). For each source of stress, specific cognitive and/or behavioral counseling strategies are suggested, such as values clarification, goal-setting and prioritization, self-management procedures, relaxation training, and "stress-inoculation" training. Teenage Pregnancy and Teenage Illegitimacy: A Reconsideration of Theories of Illegitimacy.

Pub Date—[79]

Note—29p.

Pub Type—Information Analyses (070)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Adolescents, Behavior Patterns, Ethics, Females, *Illegitimate Births, *Maturity (Individuals), *Moral Development, Norms, Pregnancy, *Psychological Needs, *Social Influences, State of the Art Reviews, Trend Analysis

Viewing illegitimacy from an individualist, deviant behavior frame of reference has not been useful because of the high prevalence of illegitimacy. Theories attributing illegitimacy to the social marginality of subcultures are inadequate to explain illegitimacy among working class and middle class children. Theories based on the notion that mothers of illegitimate infants are mature women do not explain illegitimacy among teenagers. Analysis of current research indicates that pregnancy is occurring among teenagers because sociocultural factors pressure them into making decisions that require a more mature level of moral judgment than they possess. Preventive measures regarding illegitimacy should be based on theories of normal psychosocial adolescent development that include socialization experiences for persons at a given level of cognitive and moral development in the context of a heterogeneous society. Chapter 622 refers to a Commonwealth of Massachusetts law enacted in 1971 which guarantees access to all public schools and public school programs without regard to race, color, sex, religion, or national origin. Despite the literal compliance with Chapter 622 by the Amherst Regional Schools, Third World and/or female students continued to make self-limiting choices in both academic and extracurricular school programs. An inservice guidance curriculum was developed to train students themselves to become primary implementors of the Chapter 622 regulations by actively involving them in diagnosing and counteracting racial and/or sex role stereotypic inequities. Past-course evaluations revealed significant increases in knowledge about Chapter 622 regulations, awareness of sexist and racist situations, and the ability to observe instances of sex role stereotyping and racism in their own curricular and extra-curricular school activities. This book presents the state of the art of American medical education in alcohol and drug abuse, and is the culmination of a four-year collaborative effort among the medical school faculty of the Career Teacher Program in Alcohol and Drug Abuse. The first part contains reports, curricula, and survey data prepared for the medical education community, focusing on drug abuse and alcoholism teaching in medical/osteopathic schools, a course on alcoholism for physicians, the Career Teacher Program and Resource Handbook, and the role of substance abuse attitudes in treatment. The second part is the proceedings of the National Conference on Medical Education and Drug Abuse, November 1977. The conference sessions address issues such as: (1) the physician's role in substance abuse treatment; (2) physicians' use of drugs and alcohol; (3) drug abuse questions on the National Board Examinations; and (4) an overview of the Career Teacher Program activities. Identifiers—*Support Systems
Knowledge gained from the theoretical and empirical literature on social support theory, family systems theory, and social ecology provide the foundation for a model which studies stress, support systems, and coping patterns within the family. Puerto Rican (N=87) and Italian (N=49) families were interviewed to identify stress factors and coping mechanisms used in the family with young children and mothers, older adults, physically or emotionally disturbed persons, and juvenile/adult offenders. For Hispanic families, major stresses included child care problems, health care for the elderly, constant vigilance and attention to the handicapped, and disruption after criminal encounters. Coping styles differed depending on the resources of the focal functioning person. An inverse relationship existed between users of immediate and extended family resources. The Italian families, despite educational and linguistic handicaps, had considerable personal coping resources as well as resources throughout their individual family systems, particularly from female relatives. There were also strong ethnic neighborhood support for both groups. (Author/HLM)

This comprehensive training program, *Together We Can*, involves a cooperative effort to reduce sex-role stereotyping and to expand options in education, work, and life styles for females and males. This program guide describes the philosophy, funding, and development of materials for the entire program, and may be used as a resource for trainers using any portion of the materials. The materials are designed to be directed by a facilitator who involves participants in group activities such as discussions, creative expression, role playing, media viewing, game playing, and problem solving. Instructions for leading activities are provided. An overview for initiating change is presented along with suggestions for obtaining training program support. A section on implementing the program includes suggestions for recruiting various audiences: (1) preschool parents and personnel; (2) parent, community, and volunteer groups; and (3) teachers, counselors, and administrators. Information, guidelines, and resources for dealing with sensitive and multicultural issues are included. A comprehensive annotated bibliography is also provided. Audiovisual materials are not included. (Author/NRB)

Identifiers—*Together We Can

This comprehensive training program, *Together We Can*, involves a cooperative effort to reduce sex-role stereotyping and to expand options in education, work, and life styles for females and males. This packet consists of facilitator and participant manuals designed for use with elementary and secondary school teachers and counselors. The training kit is designed to raise awareness of the changing roles of women and men and to explore ways in which schools can help expand role options. The facilitator manual contains a program description with sections on program objectives, training schedules, materials and equipment needed, participant characteristics, facilitator role, training session preparation, and conducting and evaluating training. The section on Activity Directions contains a Program Activity Chart followed by detailed instructions for four training modules totaling 16 hours: (1) sex-role stereotyping, (2) changing roles, (3) school's role in change, and (4) what facilitators can do. The participant manual contains materials and work pages needed for the module workshops as well as resources and follow-up exercises, some of which are designed for teachers to use with their students. Audiovisual materials are not included. (Author/NRB)

Identifiers—*Together We Can

This comprehensive training program, *Together We Can*, involves a cooperative effort to reduce sex-role stereotyping and to expand options in education, work, and life styles for females and males. This packet consists of facilitator and participant manuals designed for use with preschool educators and parents of preschool children. This training package provides activities and information for use in examining how sex-role stereotypes are learned from family, school, and community, and how sex-bias affects an individual's aspirations and choices. The facilitator manual contains a program description with sections on program objectives, training format and schedules, materials and equipment needed, participant characteristics, facilitator role, and conducting and evaluating training sessions. The section on Activity Directions contains a Program Activity Chart followed by detailed instructions for six hours of training modules for preschool personnel and a one-hour training module for parents. Personnel training modules include: (1) defining sex role stereotyping; (2) analyzing and evaluating instruction; and (3) looking at assumptions. The participant manual contains all readings, worksheets, and booklets for use during sessions. Audiovisuals are not included. (Author/NRB)

**O'Neil, James M. And Others
Treatment Effects of the Strong Campbell Interest Inventory and the Self Directed Search on Men and Women.**

Pub Date—Sep 80
Note—30p.; Paper presented at the Annual Convention of the American Psychological Association (88th, Montreal, Quebec, Canada, September 1-5, 1980).

Pub Type—Reports - Research (143) — Speeches / Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Attitudes, Career Counseling, *Career Planning, Evaluation Methods, Feedback, *Interest Inventories, Interest Research, *Predictive Validity, *Sex Differences, *Test Interpretation

Identifiers—*Self Directed Search, *Strong Campbell Interest Inventory
Concern on how interest inventories are being used in career counseling and other preventive interventions has resulted in heightened sensitivity to the impact of interest inventories and the emergence of the concept exploration validity. Various aspects of exploration validity were assessed using three different interest inventories. The immediate reactions of college students (N=64) who completed the old and revised Self-Directed Search (SDS) and the Strong Campbell Interest Inventory (SCII) were assessed as well as their attitudes and behaviors four weeks after counselor or self-interpretation. Treatment, sex, and time differences were assessed for all groups. Women were found to have greater clarity about and certainty of ideas about career planning than men, regardless of the treatment or time. The SCII had greater clarity of directions than the old SDS immediately after testing. The revised SDS group was found to have greater clarity and certainty about their career planning than SCII immediately after testing. The revised SDS indicated significantly less decrease in clarity and certainty about career planning than the old SDS four weeks after interpretation. These differences suggest that a test user's sex and the treatment assigned may produce differential effects and outcomes. (Author/NRB)

Relationship of Therapeutic Change to Recidivism of Juvenile Delinquents.**

Pub Date—80

Note—13p.; Paper presented at the Annual Meeting of the Southeastern Psychological Association (26th, Washington, DC, March 26-29, 1980).

Pub Type—Reports - Research (143) — Speeches / Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Adolescents, *Behavior Change, *Behavior Rating Scales, Change Strategies, Correctional Institutions, Delinquency, *Delinquent Rehabilitation, Individual Characteristics, Males, *Personality Traits, *Recidivism, Therapy
Identifiers—*Jensness Behavior Checklist

The relationship to later parole outcome of therapeutic changes made by juvenile delinquents during residential treatment was explored. Subjects (N=823) were all those admitted to two California Youth Authority institutions for boys between August 1969 and March 1971. Change was measured by pretests and posttests with the 14 scales of the Jensness Behavior Checklist; recidivism was determined by a six-month follow-up of subjects. Results showed that recidivism status interacted with personality characteristics to produce an effect on change scores for several of the checklist scales. The Neurotic Acting-out and Immature Conformist nonrecidivists improved on several scales, while the Neurotic Anxious delinquents who did well on parole showed less improvement while institutionalized than those who later recidivated. Such data emphasize the importance of considering the differential responsiveness of various personality groups to treatment, and tend to support the development and refinement of differential treatment programs. Academic Perspectives in Substance Abuse Consultation.

Spons Agency—Minnesota Univ., Minneapolis. Coll. of Education.

Pub Date—Sep 80

Note—10p.; Paper presented at the Annual Convention of the American Psychological Association (88th, Montreal, Quebec, Canada, September 1-5, 1980).

Pub Type—Information Analyses (070) — Speeches / Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Alcoholism, *College Faculty, *Consultants, Consultation Programs, Crisis Intervention, *Drug Abuse, Evaluation Methods, Mental Health Programs, Models, Psychological Studies, *Psychologists, *Researchers, Research Methodology, State of the Art Reviews

Academic perspectives are reviewed for consultation in substance abuse within four general issues: consultation paradigms, research consultation and psychology, sources for consultation, and academic issues. The mental health/crisis intervention model is the most common consultation paradigm. Most consultation research in the substance abuse area focused upon issues of treatment and/or referral of those with alcohol or drug problems. Very little research exists with respect to the evaluation of the consultation. Research consultation is one method of consultation for academically affiliated psychologists who can contribute expertise in knowledge of the literature, methodology, ethical issues, and grant and report writing. The crisis intervention approach is inappropriate within a research setting; research consultation/evaluation should be a more continuous process. The role of the academician in consultation has been reviewed with respect to whether or not the academician who consults for pay may be shirking academic responsibilities. Research suggests that those who consult are generally more productive than their non-consulting colleagues, and that consultation for pay does not result in a reduction in academic performance. Descriptors—*Affective Behavior, Communication (Thought Transfer), *Congruence (Psychology), *Counselor Training, Experience, Graduate Students, Interpersonal Competence, *Nonverbal Communication, Observation, Practicums, Skill Development, *Skills, Therapists

Identifiers—*Affective Sensitivity Scale, *Incongruency Discrimination Assessment

Discrimination and reflection of incongruent communication are important therapist skills. Clinical and counseling graduate students (N=32) with different levels of graduate practica training were studied to assess the effects of level of experience on the ability of therapists and counselors to discriminate and accurately reflect incongruent communication. The effects of level of affective sensitivity were also examined. Subjects observed video-taped stimuli developed to reflect three levels and two types of incongruence, rated the level of incongruence expressed in each stimulus, and wrote their observations about the communication. Responses were rated for accuracy of reflection of content, affect, and total communication. The "experienced" trainees scored significantly higher than the "inexperienced" trainees on the Affective Sensitivity Scale. "Experienced" trainees discriminated the levels and types of incongruence differently from "inexperienced" trainees, but were no more accurate in reflections of the communication. High affectively sensitive trainees discriminated the incongruencies differently from low affectively sensitive trainees, but were no more accurate in reflections of the communication. Uniformly low scores on the reflection scales suggest that reflection of communication is not a well-developed skill among trainees. (Author/NRB)

The Effects of Normative and Situational Consensus Information on Causal Attributions for Prosocial and Antisocial Behaviors.

Pub Date—12 Apr 80

Note—17p; Paper presented at the Annual Meeting of the Eastern Psychological Association (51st, Hartford, CT, April 9-12, 1980).

Pub Type—Reports—Research (143)—Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Antisocial Behavior, *Attribution Theory, *Behavior Theories, *Cognitive Processes, Evaluation, Individual Power, Influences, Locus of Control, *Prosocial Behavior, *Responses, Social Influences

Identifiers—*Consensus

The interactive effects of implicit normative and explicit situational consensus information were examined regarding the processes of causal attribution and evaluation. Stimulus items were single sentence descriptions of antisocial and prosocial behaviors representing the extremes of high and low normative consensus in each behavior category, as determined from estimates given by a pretest group of "the proportion of people in society who would be likely to perform the behavior described." High and low levels of situational consensus information were created by inserting standard phrases into the sentences indicating that the actor either had many or few co-actors in his immediate context. Subjects (N=151) chose the behavior's "main cause" from three options and then evaluated the actor using a nine-point bipolar scale. It was found that internal attribution frequencies were affected by situational but not by normative consensus, while external attribution frequencies were affected by both kinds of consensus information. Attribution responses also varied as a function of behavior category. Evaluations were affected by normative but not by situational consensus information. Behavior category influenced extremity of evaluation at the low normative consensus level only. Also, internal attributions were generally followed by more extreme evaluations than were external attributions. (Author)

Modes of Representation in Cognitive Mapping.

Pub Date—80

Note—10p; Paper presented at the Annual Convention of the American Psychological Association (88th, Montreal, Quebec, Canada, September 1-5, 1980).

Pub Type—Reports—Research (143)—Speeches/

Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Adults, Behavior Patterns, *Cognitive Style, *Environmental Influences, *Interaction, *Maps, *Memory, *Perception

Identifiers—*Cognitive Mapping

Recent investigations of the cognitive components of human-environmental interactions owe much to the work of city planner Kevin Lynch, who hypothesized cognitive mapping as a two-way interactive process between individuals and their environment. Lynch identified five elements which individuals used in the construction of cognitive maps, specifically nodes (strategic areas), paths, edges, districts, and landmarks. It was hypothesized that Lynch's elements would be encoded in different modes of representation, and that these elements would be differentially elicited by the methods of externalizing cognitive maps. The memory components of cognitive maps in a model environment were investigated by means of actual and simulated "tours" using 60 adult subjects who were divided into three treatment groups: actual tour, dynamic film simulated tour (film of actual tour), and static film simulated tour (no movement in film). The "tours" were equated for time spent in each area of the environment. Results supported the hypotheses, suggesting that movement is an essential component in the organization and storage of cognitive maps, and that different methods of externalizing cognitive maps elicit different aspects of these internal representations. Descriptors—Behavior Patterns, *Counseling Effectiveness, Counseling Techniques, *Counselor Client Relationship, Counselors, *Interaction, Patients, *Perception, *Predictor Variables, *Responses, Therapeutic Environment

Identifiers—*Interpersonal Process Recall

Few, if any, studies exist in which the helpfulness of particular responses in context have been evaluated by the involved clients or counselors due to the lack of an adequate method for obtaining evaluations of the impact of individual counselor responses. The development of Interpersonal Process Recall (IPR) provides a research tool which allows clients and counselors to describe the intentions, perceptions, impacts, and other experiences associated with specific interaction events. IPR was used in two studies to provide a measure of therapeutic effectiveness and to find predictors of response effectiveness. Clients rated two measures of response effectiveness as well as each counselor response on four measures of effectiveness. The client-counselor pair in which a response occurred was the best predictor of response effectiveness, with the perception of the person rating response effectiveness as the second best predictor. Generally, clients felt most benefited by nonquestioning or reassuring responses, while counselors felt most effective when reflecting or responding with the intent of guiding or explaining. The application of stress management techniques to highly specialized populations and disorders has

become an increasingly important clinical endeavor in recent years. Curiously, however, individuals undergoing one of the most stress-laden experiences, graduate school, have rarely been the focus of such efforts. There are three major forms of therapeutic intervention, namely, cognitive-coping, problem-solving, and time management, which may assist students in coping with the stressors imposed by a graduate school career. Intervention strategies which use cognitive processes in evaluating stressful situations include rational emotive therapy, systematic rational restructuring, and self-statement modification. Problem-solving incorporates generating alternatives, making decisions about the alternatives, and verifying the chosen alternatives. Time management offers some general guidelines to help boost individual productivity by: (1) improving efficiency through basic self-management; (2) determining individual strengths and weaknesses; (3) planning work; (4) assessing progress; and (5) analyzing failures and learning from mistakes. These procedures and techniques can be employed on a self-management basis to facilitate adjustment to the graduate school environment. (Author/HLM)

Descriptors—Child Development, *Child Rearing, *Community Programs, Environmental Influences, *Neighborhoods, *Networks, Parent Child Relationship, *Parent Participation, Parents, *Prevention, Program Descriptions

Identifiers—*Support Systems

This paper presents the theoretical base and operational design of a neighborhood-based primary prevention program that seeks to enhance the development of very young children by focusing on the role of parents' social networks in supporting early child-rearing. Efforts to strengthen parents' involvement in and utilization of an informal network of supportive relationships with others are described in terms of a mutual aid system with other parents involved in the program. The program's evaluation strategy, which examines variations in parents' program experiences in relation to parent and child functioning, is discussed. Implications for prevention programs for parent-child relations are suggested. (Author)

Personality Tests: Self-Disclosures or Self-Presentations?

Pub Date—Sep 80

Note—11p; Paper presented at the Annual Convention of the American Psychological Association (88th, Montreal, Quebec, Canada, September 1-5, 1980).

Pub Type—Reports—Research (143)—Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Adults, *Disclosure, *Personality Measures, *Personality Traits, Research Projects, *Self Evaluation (Individuals), *Self Expression, Test Reliability, *Test Validity, Verbal Communication

When people talk about themselves, psychologists have noted that their verbal reports can be categorized as simple factual communications about the self, i.e., self-disclosure, or as ways to instruct others about how one is to be regarded, i.e., self-presentation. Responses to items on objective self-report measures of personality similarly can be regarded as self-disclosure or as self-presentations. In order to investigate whether objective self-report measures of personality are regarded better as sources of factual information about the self or as ways to instruct others about how one is to be regarded, self-disclosure and self-presentation were compared by testing the unique, divergent predictions each made about the kinds of personality variables associated with

consistency in self-description. For three groups of subjects (155 normal adults, 69 murderers, and 47 college students) almost all of the self-presentation variables were correlated significantly with consistency, while none of the self-disclosure variables was correlated with consistency. Results tended to support a self-presentation view of test-taking over a self-disclosure view. (Author)

An intervention strategy called comprehensive counseling is presented as a new approach to dealing with adolescents who have major problems in traditional schools and at home. Components of this approach include: (1) a learning environment in which instructional and counseling procedures are closely related through joint planning by a staff of educators and counselors; (2) individualized instruction; (3) group and individual counseling; and (4) family counseling and family participation in the life of the school. In addition the problems and outcomes of a functioning program of this type are discussed. (Author)

Descriptors—*Adjustment (to Environment), *Adolescents, *Counseling Effectiveness, *Discipline Problems, *Group Counseling, *Intervention, *Secondary Education, *Secondary School Students, *Self Concept, *Student Development, *Student Problems, *Youth Problems

The counseling profession must provide therapeutic opportunities that help disruptive and alienated youth adjust to the realities of society in a manner that is psychologically healthful to the individual, the school, and the community. A therapeutic group counseling model which focused upon the definition and implementation of specific goals identified by individual members during an intake interview was used to determine if disruptive students could assume responsibility for their own effective and active involvement in their educational experience and psychological development. Students (N=97) were randomly assigned to seven control and seven treatment groups. Treatment groups met from 9 to 12 weeks and ranged in size from 5 to 7 members. Results indicated that group counseling decreased school conflict and improved the self-concept of the disruptive youth. The counseled groups decreased their referrals to the discipline office and improved their academic achievement. (Author/HLM)

*School Community Programs

Identifiers—*Wisconsin

From 1976-79, over 46,000 Wisconsin youth left high school before receiving a high school diploma, a number reflective of a national trend. Research has documented dropout characteristics, their reasons for leaving school, and the consequences of their decisions, but little effort has been made to examine ways in which schools and communities attempt to deal with potential dropouts. The existing programs in Wisconsin designed to assist potential dropouts were identified and catalogued to develop a model for comprehensive dropout prevention strategies. Telephone and mail surveys, site visits, and reviews of school program reports were conducted with school administrative personnel and community-based agency coordinators. Results suggested a dropout intervention strategy which would: (1) be student-centered; (2) offer a variety of services and activities; (3) provide school and community programs at the K-12 level; and (4) use preventive and therapeutic counseling techniques. Descriptors—*Affective Measures, *Cognitive Processes, *Depression (Psychology), *Information Processing, *Locus of Control, *Personality Theories, *Personality Traits, *Recall (Psychology), *Self Concept Measures, *Self Esteem, *Self Evaluation (Individuals)

Depressed individuals seem to believe that they are qualitatively inferior; they tend to misinterpret and exaggerate losses and overgeneralize the meaning of self-relevant information. The way in which information about the self is processed by depressed individuals, in particular, the differences in self-schema content (the constellation of attitudes about oneself) between depressed and nondepressed individuals, was studied. Subjects rated a series of personality adjectives, recalled the adjectives, and completed a depressed-versus-nondepressed content rating task and a self-rating task. As predicted, depressed subjects displayed superior recall for self-referenced depressed-content objectives; nondepressed subjects displayed superior recall for self-referenced nondepressed-content adjectives. Study results offer empirical support for the idea that there is a negative self-schema specific to the disorder of depression. (Author/CS)

Descriptors—*Attribution Theory, *Behavior Patterns, *Cooperation, *Disclosure, *Interpersonal Relationship, *Personality Measures, *Rating Scales, *Self Evaluation (Individuals), *Sex Differences, *Social Behavior, *Social Exchange Theory, *Social Psychology

The construct Interpersonal Orientation (IO) refers to the degree to which a person is responsive to the interpersonal aspects of his relationships with other people. A self-report measure of IO was devised whose construct validity was supported by correlational data. Two experiments were conducted to assess the potential usefulness of IO in social-psychological research. In the first experiment, subjects of both sexes with high IOs expressed greater liking for individuals from whom they had received messages disclosing personal information. In the second experiment, males and subjects with low IOs behaved in accordance with the notion of equity (the idea that rewards are allocated on the basis of performance); females and subjects with high IOs were more concerned with equality than

with equity. The results support the usefulness of this measure which allows variation in behavior to be attributed to a stable personality difference. (Author/CS)

Ego Identity in Mature Women.

Pub Date—Apr 80
Note—9p; Paper presented at the Annual Meeting of the Eastern Psychological Association (51st, Hartford, CT, April 9-12, 1980).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Conflict Resolution, *Decision Making, *Females, *Identification (Psychology), *Interpersonal Relationship, *Locus of Control, *Personality Development, *Personality Traits, *Self Concept, *Sex Role, *Social Development
The relationship between psychosocial development and ego identity was explored among a group of 29 married women, 21-59 years old. After being interviewed, subjects were assigned to one of four categories of identity status, based on their statements regarding decision-making and commitment. There were significant differences between identity categories in resolution of all psychosocial stages in the Inventory of Psychosocial Development (IPD). Women in the Identity Achievement category (showing the most "active" level of decision-making and subsequent commitment) scored significantly higher than women in the other categories on all IPD stages except intimacy and trust. These differences provide empirical support for Erickson's theory of psychosocial development as well as some discriminant validity for the IPD. (Author/CS)

Sandler, Irwin N. Barrera, Manuel, Jr.
Social Support as a Stress-Buffer: A Multi-Method Investigation.

Pub Date—Sep 80
Note—18p; Paper presented at the Annual Convention of the American Psychological Association (88th, Montreal, Quebec, Canada, September 1-5, 1980).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Anxiety, *Conflict Resolution, *Coping, *Depression (Psychology), *Emotional Problems, *Interpersonal Relationship, *Networks, *Social Adjustment, *Social Reinforcement, *Social Structure, *Stress Variables
Identifiers—*Support Systems

People exposed to stressful experiences should be less negatively affected if they receive higher rather than lower levels of social support. This proposition was tested by investigating the "stress buffering" role of social support in a way that allowed comparison between conceptually different measures related to the construct of support. Results indicate that the quantity of helping behavior received and the number of helpers in the support network are not the critical features of social support. Support that is rated as satisfying, however, does provide effective assistance in coping with stress. The kinds of support received in different stress situations and the individual's ability to use this support are logical foci for further research. (Author/CS)

Content, Imagery, Social Desirability, & Emotionality Ratings for Depressed & Nondepressed Personal Adjectives.

Pub Date—79
Note—18p; For related document see CG 014 707.
Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Adjectives, *Cognitive Processes, *Correlation, *Depression (Psychology), *Personality Traits, *Psychopathology, *Rating Scales, *Recall (Psychology), *Self Concept Measures, *Self Evaluation (Individuals), *Test Norms

Recent studies have suggested that depressives process personal information in a biased and negative self-referential manner. Normative ratings on a variety of "depressed" and "nondepressed" adjectives were obtained to investigate the exact nature of information processing in depressives. Subjects rated adjectives on depressive content, imagery, social desirability, and emotionality. Two groups of words emerged from this study, differing significantly in depressive-content but equivalent in imagery word-frequency, and word-length values.

Knowledge of these word attributes will permit their systematic inclusion in cognitive research paradigms for the study of information processing and self-reference in depression. (Author/CS)

Kuiper, Nicholas A. Derry, Paul A.
Encoding Personal Adjectives: The Effects of Depression on Self-Reference.

Pub Date—[79]
Note—26p.; For related document see CG 014 706.
Pub Type—Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.
Descriptors—*Adjectives. *Cognitive Processes. *Depression (Psychology). Information Processing. Models. *Personality Theories. Personality Traits. Psychopathology. Rating Scales. *Recall (Psychology). *Self Evaluation (Individuals)

A central tenet of a self-schema model for depression is the idea that severity of depression is a crucial determinant of the content and cohesiveness of the depressive's self-schema. Consistent with predictions generated from this model, sample non-depressives displayed superior recall for self-referenced, nondepressed-content adjectives. Recall for mild depressives, however, failed to benefit significantly from self-reference judgments (i.e., judgments in answer to the question, "Does this adjective describe you?"). Medium depressives exhibited enhanced recall for self-referenced depressed- and nondepressed-content adjectives. Results offer an empirical demonstration of the role played by the self-schema in human information processing. In particular, the findings suggest that depressives employ a self-schema in personal information processing, but one which may differ in several ways from that of nondepressives. Further research might explore cognitive distortions or peculiarities in the depressive's evaluations, judgments, and descriptions of other individuals. (Author CS)

Descriptors—*Academic Aspiration. *Attendance. Behavior Patterns. Blacks. *Dropout Characteristics. Dropouts. Females. High School Equivalency Programs. Hispanic Americans. *Pregnant Students. *Reentry Students. Secondary Education. *Sex Role. Student Attitudes.

In education, considerable attention has been paid to the characteristics and prevalence of high school dropouts. However, pregnant teenagers present a special case of dropouts since many have interrupted their schooling by force rather than by choice. Additionally, the cross-sectional nature of most dropout studies precludes an investigation of those who later return to school. Structured home interviews were conducted with 160 Black and Hispanic females who had not yet graduated from high school when they first became pregnant. Their educational status three years after the first child's birth was ascertained, and characteristics of those who did and did not return to school were identified. Within four years of their first child's birth, 33% of the sample had returned to school. Of the returners, 26% had graduated. Black women were more likely than Hispanic women to return to school; Hispanic women born outside the United States were least likely to return. Decisions to return to school seemed to be a result of high educational aspirations and modern sex role attitudes. (Author/HLM)

Historical Treatment of Female Psychologists of Distinction.

Pub Date—80
Note—12p.; Paper presented at the Annual Convention of the American Psychological Association (88th, Montreal, Quebec, Canada, September 1-5, 1980).
Pub Type—Historical Materials (060) — Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Comparative Analysis. *Females. *History. *Professional Recognition. *Profiles. *Psychologists. Sex Differences. *Sex Discrimination

There is some question as to the fairness with which history has treated women psychologists who were distinguished in their own time. Only women who were prominent in the field of psychology at least 50 years ago were selected in order to give the history books the best possible chance to include them. The five women thus located were paired with five male contemporaries; specifically Mary Whiton Calkins, June Eita Downey, Leta Stetter Hollingworth, Christine Ladd-Franklin, and Margaret Floy Washburn were matched with Edmund Clarke Sanford, Warner Brown, Walter Fennel Dearborn, Edward Wheeler Scripture, and Walter Bowers Pillsbury, respectively. Analyses and comparisons of published books and articles, editorships, professional association memberships, honorary degrees, citations, awards, and coverage in psychological histories suggest that women, even prominent ones, are not accorded much respect by historical writers. Results suggest that modern historians of psychology could be suspected of elitism, chauvinism, and some lapses in scholarship. (Author/HLM)

Individualized Programs. *Mild Mental Retardation. *Moderate Mental Retardation. Prisoners, Program Descriptions. Program Evaluation. Social Workers
Identifiers—*North Carolina

The North Carolina Department of Correction, Division of Prisons, provides two deinstitutionalization services for mentally retarded, incarcerated offenders. These projects, funded by monies provided by the Council on Developmental Disabilities, serve mentally retarded youthful offenders (age 17-21) and retarded female offenders regardless of age. The youthful offenders tend to be first incarcerates, mildly to moderately retarded (I.Q. 69 to 36 inclusive), passive as compared to other youthful offenders, and serving a felony sentence of 10 years or less. All retarded female offenders, regardless of age or sentence, are served. Both projects provide on-site services by means of Developmental Disabilities (D.D.) Specialists who insure that an Individual Habilitation Plan is appropriately prepared and then followed. Social Workers, based in the field, provide casework services to the families of the inmate, and to the inmate after parole. All appropriate local agencies such as the Vocational Rehabilitation and Social Services are contacted in order to insure adequate off-site services. Both the coordinators and social workers provide advocacy services to the inmate while in prison and after parole. (Author)

An Evaluation of Memory Training Classes in the Well Elderly.

Spons Agency—National Inst. of Mental Health (DHEW), Rockville, Md.
Pub Date—May 80
Grant—5-R01-MH-31129-02

Note—11p.; Paper presented at the Annual Meeting of the Western Psychological Association (60th, Honolulu, HI, May 5-9, 1980). Best copy available.

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Depression (Psychology). Evaluation Criteria. *Information Processing. *Memory. *Mnemonics. *Older Adults. *Performance Factors. *Training Methods

Training older persons to use memory strategies and mnemonic techniques derived from an information processing model of memory has resulted in improvements in performance on specific tasks.

Some studies have also shown that the elderly are less likely to use memory techniques than younger persons and that it is the use of techniques that best predicts performance. The effectiveness of memory training classes for normal older adults was evaluated by measuring performance on six memory tasks before and after two types of training, Didactic and Inductive, and comparing the results with two control groups, an activity group and a wait list. Tasks included names and faces, a shopping list, directions, unrelated words, doctor's instructions, and daily tasks. Subjects completed a Memory Complaints Questionnaire to assess subjective memory complaints and two affective measures, the Zung Depression Inventory and the Brief Symptom Inventory. Practice, not training, produced greater results but there was a significant correlation between performance and complaints, and between complaints and depression. Those who complained more performed more poorly and were more depressed. (Author)

Descriptors—*Classroom Techniques. Elementary Education. Elementary School Teachers. *Reading Diagnosis. *Reading Research. *Remedial Reading. *Teacher Education. Teaching Methods

The purpose of this study was to describe the approach elementary school teachers use when diagnosing reading difficulties in their classrooms. The study examined two models, one depicting a general diagnostic process and one depicting a detailed diagnostic process. In depth interviews were conducted with ten teachers regarding their diagnostic and remedial practices for dealing with their students' reading difficulties. The results of the study indicated that the teachers (1) relied on general sources of information, such as listening to oral reading, as a basis for diagnosing children's reading deficiencies; (2) focused on general rather than specific categories of reading performance when rendering diagnostic judgments; and (3) prescribed remedial actions that reflected the desire to employ general instructional strategies, such as additional practice or individual instruction, rather than actions addressing the specifics of the children's problems. These findings raise questions regarding the

adequacy or appropriateness of the formal training in reading diagnosis that classroom teachers receive. (Author/AEA)

A Study of Adults Who Experienced Childhood Reading Problems.

Pub Date—[78]

Note—8p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Adults, Children, Comparative Analysis, Learning Problems, *Reading Achievement, *Reading Difficulties, *Reading Research, *Remedial Reading, *Self Concept

A study was conducted using contemporary test scores to describe adults who reported that they had experienced severe reading problems in childhood and that such problems continued to influence their functioning as adults. Twelve men and one woman ranging in age from 20 to 54 volunteered for the study. All had attended college or technical school and six had doctorates of philosophy, medical degrees, or a combination of both. Background information on childhood reading problems of the subjects was obtained by self-report only. Although all subjects expressed concern about their present reading skills, the evidence indicated successful attainment in their careers, and the results of the contemporary tests were positive in all cases. The tests that were administered indicated no current deficits in intelligence, oral or silent reading, word attack skills, or spelling. (MKM)

Descriptors—Comparative Analysis, Elementary School Teachers, Elementary Secondary Education, High School Students, *Reading Attitudes, Reading Comprehension, *Reading Instruction, *Reading Research, Reading Skills, *Student Attitudes, *Teacher Attitudes

A study was conducted to determine what beliefs secondary school students held about reading and to compare those beliefs with a set of elementary school teachers' beliefs identified by G. Duffy and W. Metheny. Three hundred high school students from freshman, junior, and senior social studies classes completed a revised version of the 45-item instrument used by Duffy and Metheny. The items represented five conceptual approaches to reading instruction: (1) basal text, (2) linear skills, (3) interest, (4) natural language, and (5) integrated whole. The first two categories indicate a structured approach to reading instruction; the last three, an unstructured approach. Analysis of responses indicated that student beliefs about reading were characterized by three concerns: getting meaning, receiving skill instruction, and interacting with the teacher in the learning environment. Comparison of student beliefs with the identified teacher beliefs showed partial agreement in the unstructured area. The findings suggest that students possessed well-defined conceptions of reading and that some

unanimity existed between their beliefs and those of elementary school teachers. (The instrument used in the study is appended.) (Author/FL)

Identifiers—*Center for the Study of Reading II.

This paper suggests that teachers concentrate on the ideational and structural properties of text rather than on information acquired from readability formulas when selecting and using texts. Emphasis is given to the importance of context in the analysis of text, and a framework is suggested for examining the text considering the functions texts are intended to serve in the classroom. Suggestions to teachers for examining the ideas, the relationships between ideas, and the structural qualities of texts include: (1) ideas might be examined by first isolating the essential understanding students are expected to derive from a text, then examining the extent and nature of support for these understandings provided within the idea units of a text; (2) relationships between ideas might be evaluated in terms of the probability with which the relationships are readily understood, implying that factors such as context, background knowledge, and reader purpose should be considered; and (3) the structural qualities of expository text might be examined in terms of the ease with which ideas can be mapped hierarchically and relationally. Suggestions are also given for assessing the structural qualities of narrative. (MKM)

This journal issue contains six articles related to language-centered reading instruction, integrated language arts, and reading comprehension. The first article discusses the language experience approach (LEA) to developing comprehension skills in adult beginning readers. The second article describes examples of uses of LEA in such content areas as English, social studies, science, mathematics, home economics, industrial arts, foreign language, and music or art, while the third article describes LEA activities for the intermediate and junior high student that emphasize class discussion, collection of words on topics of interest, and individual conferences. The fourth article reaffirms the method of integrated language arts instruction and lists teacher attitudes and objectives that are essential to such instruction, and the fifth article focuses on the parallel and exists between the creative process and LEA and explains the four creative stages of preparation, incubation, illumination, and evaluation. The last article argues for the importance of language games in a reading program and offers guidelines for shaping

ing the development of quality readers. (AEA)

Descriptors—Cognitive Style, *Educational Research, Elementary Secondary Education, Higher Education, Individual Differences, Literature Reviews, Preschool Education, Student Characteristics, *Teaching Methods, *Vocabulary Development

A review of studies of four vocabulary teaching methods—context learning, imagery, cognitive style, and natural word learning—resulted in several generalizations about their effectiveness. The generalizations are limited by problems such as the difficulty of defining when a word is "known" and the lack of a way to test permanence of word knowledge and by the awareness that no one method of instruction has conclusively been demonstrated to be the best for all students. Future research studies might explore the benefits of teaching roots and affixes, the effects of word difficulty on students' learning, the degree of transfer of word knowledge learned in different media, and the importance of cognitive style in word learning before college. Descriptors—Adult Literacy, Adults, Elementary Secondary Education, *Functional Literacy, *Literacy, *Longitudinal Studies, *National Competency Tests, *National Surveys, *Tests

Identifiers—*National Assessment of Educational

Progress

The position that the National Assessment of Educational Progress (NAEP) provides a data base that is compatible with various definitions of literacy and standards of competencies and can make a contribution to our understanding of the complex and controversial problem of literacy is supported in this paper. The paper notes that since the NAEP has surveyed a national sample of four age groups over a period of years since 1971, it is well suited for looking at a broad sample and providing longitudinal information. Other advantages of the NAEP for studying literacy that are cited are its comprehensiveness across many areas of study and functional skills, its breadth within single content areas, its covering of affective and background variables as well as achievement, and its ability to respond to new emphases, such as the proposed 1979-80 reading and literature assessment that has new exercises emphasizing comprehension of various kinds of texts. The use of the NAEP data base for the assessment of functional literacy conducted by NAEP in 1974 and 1975 for the National Right to Read program is discussed as an example of the use of the NAEP data base. The Development of the Perception of Textual Cohesion.

Pub Date—May 80

Note—9p.; Paper presented at the Annual Meeting of the International Reading Association (25th, St. Louis, MO, May 5-9, 1980).

Pub Type—Reports - Research (143) — Speeches/-Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Developmental Stages, Discourse Analysis, Elementary Secondary Education, Linguistics, Reading Processes, *Reading Research, *Reading Skills, Semantics

Identifiers—*Cohesion

Three experiments examined children's ability to perceive two of the elements of textual cohesion—personal reference and conjunction. The first experiment investigated the ability of 76 eight-year-old children to process anaphora in order to distinguish those children who were becoming fluent readers from those who were not. The children were given a cloze-type task that required them to replace pronouns from a reference group of cohesive ties that operate anaphorically in a text. It was found that although the children could recognize the pronouns in isolation, only fluent readers could replace them in correct position in a text. In the second experiment, 270 8-, 11-, and 14-year-old children completed a task similar to that in the first experiment, with the added task of replacing conjunctions. The results showed a clear developmental pattern and suggested that the mastery of these linguistic processes, especially conjunctions, was still being acquired at age 14. To eliminate the possibility that the results of the two experiments were affected by the nature of the specially written texts, a third experiment was conducted with 11-year-old children, using the work of a well-known author. The results confirmed the earlier findings. Taken together, the findings of the experiments suggest that the ability to perceive cohesion is subject to a lengthy developmental process. (FL)

Descriptors—Cognitive Processes, *Discourse Analysis, Illustrations, Information Needs, *Instructional Materials, Organization, *Pictorial Stimuli, *Reading Comprehension, *Research, Research Methodology, Research Needs, Research Problems

Identifiers—*Directions, *Instructions

A method was developed for characterizing and comparing the semantic content of picture-text combinations used as stimuli in research on reading procedural instructions. The written directions for assembling a toy model were analyzed, and sets of propositions in the instructions were constructed using C. H. Frederiksen's discourse analysis model.

Using the same model, written descriptions of pictures were consolidated and then reduced to sets of interrelated propositions. A comparison of the two sets resulted in revisions of text and pictures to obtain redundancy of essential information. Three general types of information were identified as "core" components of both forms: locative, referential, and sequential information. Stimulus materials attempting to emphasize each type of information in both text and pictures have been prepared and are being tested. So far the results of such testing have produced the following observations: (1) the linear nature of text makes core sequential information inherent, so manipulation of sequential information is difficult and may destroy the integrity of the instructions; and (2) core locative information is inherent in pictures and cannot be manipulated without changing the essence of the messages. A Syllable Frequency Count.

Pub Date—[77]

Note—27p.

Pub Type—Reports - Research (143) - Reference Materials - Vocabularies/Classifications (134)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Computational Linguistics, *Language Research, Reading Instruction, *Syllables, *Word Frequency, *Written Language

Identifiers—*Frequency Data

A frequency count of the syllables in an edited list of the 5,000 most common English words generated an unweighted list of the most common 322 syllables in the words and a list of 290 syllables weighted by the frequency of occurrence of words of which the syllables were constituents. The unweighted list contained 222 nonword syllables and 100 word syllables. The weighted list contained 190 word syllables and 100 nonword syllables. The latter 290 syllables account for 72% of the approximately six million syllable tokens in the 5,000 most common English words. The lists are a potential data base for the development of curriculum materials in reading, spelling, and other areas. They are also a potential data base for investigations and technologies in readability, computer translation, verbal learning, and language acquisition. (The lists are appended.) (Author/FL)

Ideographs, Syllables, and Alphabets: Reading as Information Processing in Different Writing Systems.

Pub Date—[79]

Note—20p.

Pub Type—Information Analyses (070)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Alphabets, Asian Studies, *Beginning Reading, Chinese, *Comparative Education, Foreign Countries, Japanese, Korean, *Orthographic Symbols, *Reading Difficulties, Reading Instruction, Reading Processes, Reading Research, *Written Language

Identifiers—*Ideographs, *Syllables

The history of three non-Latin based orthographies—Chinese, Japanese, and Korean—is reviewed in this paper. The characteristics of the three orthographies are examined regarding the ease of learning to read with these varied symbol systems. Attention is given to the incidence of reading disability in different orthographies, and research is reviewed concerning the way people process phonetic and nonphonetic systems. It is concluded that the research to date presents more questions than answers to the question of "is it easier to learn to read in an ideographic, syllabic, or alphabetic system?" The existence of linguistic universals across scripts in reading is noted, and research into brain hemispheric capacities regarding the way written language is processed by aphasics in Japan is cited as especially useful to cross-cultural understanding of the process of learning to read. An investigation of the relationship between children's self-concepts and reading achievement involved 117 fifth grade students in an urban, low socioeconomic area. Reading achievement information was obtained from records of the children's performance on the reading subtests of the Metropolitan Achievement Test, and information concerning self-concept was gathered through the use of the Piers-Harris Children's Self-Concept Scale. The analysis of the data based on the Pearson Product-Moment Correlation revealed a significant positive relationship between reading achievement and self-concept scores. EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Discourse Analysis, *Function Words, *Models, Organization, *Readability, *Reading Comprehension, *Surface Structure

A model is proposed that attempts to provide some order for the disparate findings with respect to the effects of signaling in text on recall. The type of signaling examined is that which explicitly cues the relationships among the major propositions in the text structure. It is noted that while it is generally assumed that such signaling is an aid to the reader, few studies have shown differences in recall for versions of texts with and without signaling. The model proposed recognizes signaling to be one factor in a series of interacting reader and text variables that affect recall. Thus, the relative effects of signaling on recall are seen to be dependent on such reader attributes as ability to use the "structure strategy" in reading, adequacy of text organization skills, and the difficulty level of the text. (Data on ninth grade student and adult readers are considered in support of the model.) (Author/RL)

A number of concerns about literacy, literacy instruction, and appropriate directions for literacy programs in the United States are addressed in these conference proceedings. Following an overview of the conference, the proceedings are divided into four sections and an introduction is provided for each section. The first section, "Perspectives on the Definition of Literacy," includes discussions on the difficulty of defining literacy. The second section, "Perspectives on Language and Cognition," contains articles on children's functional language and reading, the relationship between language and literacy, and written communication as functional literacy. The third section, "Perspectives on Reading," contains articles on theory and research on reading assessment and on relating theory and research to reading instruction. The fourth section, "Perspectives on Writing," has articles on a taxonomy of compositional competencies and sources of knowledge about literacy. (MKM)

Identifiers—*Trade Books

The six articles in the special features section of this journal issue focus on the use of children's literature in all areas of the curriculum. The first article concerns the use of mathematics trade books and offers ways of using new books in learning stations to foster independent learning. The second article discusses criteria for selecting science trade books and suggests ways for using science books in a primary grade classroom. The third article discusses change in the social studies and offers teaching methods that stimulate children's thinking about historical and current events. The fourth article points out a variety of ways trade books can be used during language arts lessons and suggests activities for specific areas of the language arts. The fifth article describes a library curriculum activity that helps to develop children's critiquing ability and their higher thinking processes. The final article in this section suggests ways in which the media specialist, curriculum specialist, and classroom teacher can work together to relate trade books about the arts to the curriculum. The remaining three articles in the journal issue deal with creative reading and writing, classroom materials for the gifted, and the content reading approach. (FL)

The two chapters of this monograph deal with the

issue of the existence of a perceptual grammar that influences reading proficiency, particularly initial reading proficiency. The first chapter indicates the importance of studying reading and writing in terms of readers' and writers' knowledge of visuo-spatial processing rules. It discusses research into the processing of single shapes, the processing of arrays of shapes, and the production of shapes, and it suggests some readily testable hypotheses relating to the grammar of two-dimensional space. The suggested hypotheses deal with five areas: (1) mirror image confusions and writing reversals, (2) internal (mind's eye) scanning, (3) differences between production and recognition of graphic symbols, (4) readers' use of Cartesian spatial rules, and (5) low versus high skills. The second chapter describes Lila Ghent Braine's work indicating that children have a concept of "right-side-up" different from that of adults and discusses evidence that this concept contributes to children's rotation errors in copying symbols. It also discusses factors that contribute to children's mirror image confusions, outlines some practical implications, and offers hypotheses about reasons for the persisting orientation errors of children who have difficulty learning to read. Descriptors—Cognitive Processes. *Context Clues. *Feedback. *Pattern Recognition. Perception. *Reading Research. *Visual Perception. Visual Stimuli. Word Recognition

This report is the second in a two-part series introducing an interactive activation model of context effects in perception. In the first part, a model for the perception of letters in words and other contexts was described and applied to a number of experiments. This second part applies the same model to a number of new experiments designed to assess the roles of direct and indirect evidence concerning the identity of a letter in an input string. The last section of the report proposes extensions of the model to the use of context in word recognition, pronouncing words and pseudowords, and speech processes such as spoken input, pronunciation tasks, and words embedded in sentential context. Descriptors—*Cues. *Developmental Stages. Elementary Secondary Education. Higher Education. Learning Theories. Reading Comprehension. Reading Instruction. *Reading Processes. *Reading Research. *Retention (Psychology)

A study was conducted to determine whether students at different grade levels could use categorical cues to encode information from prose text. Sixty college students, 74 high school students, 96 junior high school students, and 108 third grade students read a 12-paragraph passage containing two references to color and number per paragraph. The students in the experimental condition were told to remember colors for the first six paragraphs and numbers for the next six paragraphs. Students in the control condition were told only to read the passage. All students were administered a posttest that measured retention of color-related information, number-related information, and information incidental to color or number. Results indicated that the use of

categorical cues did not influence the total amount learned from a passage at the junior high, senior high, or college levels, but did significantly reduce the total amount of learning at the third grade level. The findings also indicated that explicit categorical cues were ineffective with junior high students and had a deleterious effect on the reading behaviors of third grade students. The pattern was reversed at the college level, suggesting that selective reading strategies are present in college students and can be induced by questions or evoked by direct categorical cues. (FL)

Descriptors—*Bilingual Education, Bilingual Teachers, Elementary Education, *Language of Instruction, *Questioning Techniques, *Reading Instruction, *Reading Research, *Teacher Effectiveness, Teacher Role

A study investigated the questioning strategies of teachers engaged in reading instruction of either Anglo children learning to read in English (Anglo teachers) or of Spanish speaking children learning to read in both Spanish and English (bilingual teachers). Three first grade and three third grade Anglo teachers and three first grade and five third grade bilingual teachers were videotaped as they gave regular reading instruction to their students. At the third grade level, two of the bilingual teachers gave instruction in English and three instructed in Spanish. The questioning strategies of the teachers were coded as to (1) direction of question, (2) type of question, (3) content of question, (4) questions asked by the teacher without giving students a chance to respond, (5) student response, and (6) teacher corrections of student responses. The findings showed that there were differences among the teachers' questioning strategies, but that they were not necessarily due to language of instruction. (FL)

A Comparative Analysis of Reading Miscues Made by Monolingual versus Bilingual Students.

Pub Date—Apr 80

Note—37p.; Paper presented at the Annual Meeting of the American Educational Research Association (Boston, MA, April 7-11, 1980).

Pub Type—Reports - Research (143) — Speeches - Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Bilingual Students, Comparative Analysis, Context Clues, Grade 3, Language of Instruction, *Miscue Analysis, *Monolingualism, Primary Education, Reading Instruction, *Reading Processes, *Reading Research, Reading Skills, *Spanish Speaking

An adaptation of a miscue taxonomy developed by G. A. Cziko was used to compare the reading performance of (1) monolingual English and bilingual third grade students reading in English, (2) monolingual Spanish and bilingual third grade students reading in Spanish, and (3) bilingual third grade students reading in both English and Spanish. Eight English monolingual, seven Spanish monolingual, and eight bilingual students participated in the study. While being videotaped, each read a story, first from his or her current reading book and then from reading materials especially prepared according to the language group the student was in. The sessions were then coded using a miscue analysis system that was adapted by adding or deleting categories. The results revealed that the students relied more on graphic information than on contextual information while reading. A trend toward increasing the use of contextual constraints of the text was found that seemed to be consistent with an interactive view of reading. In general, it was found that monolingual English readers used more contextual information than either the monolingual Spanish readers or the bilingual readers. (FL)

The case study of a 78-year-old music composer who had had a stroke revealed that he had a severe reading disturbance, a well-preserved writing ability, and no appreciable aphasia. He continued to read music and to compose. His text and music reading performance under different conditions suggested that this unusual dissociation (alexia without aphasia) was due to four factors: (1) he was unusually talented and knowledgeable musically and inferred a great deal about the music he was reading; (2) the symbols of staff music notation are more visually distinctive than the symbols of phonetic language writing systems; (3) in staff music notation, pitch is represented ordinarily, and other symbols are also distinguishable by their relative positions and sizes; and (4) in contrast to written language, music notation can be usefully read by interpreting it acoustically, kinesthetically, or in terms of formal musical concepts and it need not be interpreted referentially or in terms of auditory-verbal images. EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Content Analysis, *Content Area Reading, Elementary Education, Grade 6, *Readability, *Reading Research, Science Education, Social Studies, *Textbook Content, *Textbook Evaluation, *Textbook Research

Two representative samples of expository prose from sixth grade textbooks (one in science and one in social studies) were analyzed for clarity of explanation. Four text criteria were applied to the analyses: structure, unity, coherence, and audience appropriateness. The results of the analysis suggested that many children's textbooks are not clearly written. It was proposed that the procedures commonly used by authors to make texts easier to read (shorter sentences, easier vocabulary, less detail, and use of condensed explanations of ideas) may instead cause the text to be even more difficult to comprehend. The effect of poor quality text on how well children learn to read and comprehend text may also be very great. A third suggestion, based on these research results, is that poorly written texts may develop undesirable student attitudes toward reading texts. To combat these possible effects of poorly written texts, it was proposed that editors and publishers monitor textbook production more carefully, that teachers evaluate texts carefully and help students develop textbook reading skills, and that authors of textbooks pay closer attention to structure, coherence, unity, and audience appropriateness. (The response of one of the publishers of the textbooks that were evaluated is attached and is followed by comments from the editor of this report series.) (RL)

Descriptors—Basic Skills, *Classroom Research, Concept Formation, *Educational Practices, Literature Reviews, *Reading Comprehension, *Reading Instruction, Reading Materials, *Reading Skills, Teacher Behavior, *Teaching Methods

This report examines taxonomies of reading comprehension subskills in light of a process-oriented model of text comprehension. Part One presents an outline of reading comprehension subskills in the context of a simple conceptual framework, summarizes the conclusions of several reading specialists and researchers as to what comprehension consists of, and draws an idealized picture of the instructional goals that should be addressed in classroom practice. Part Two discusses studies that investigated what skills are actually taught in the classroom, how the skills are sequenced, and the instructional methods typically used in classroom settings. The report concludes that although none of the techniques reviewed were particularly startling or novel, observational evidence suggests that they are too seldom used and that the systematic use of direct interactive strategies appears to offer the most immediate promise for bringing about significant improvements in reading comprehension instruction. Descriptors—*Educational Research, Elementary Education, *Evaluation Methods, *Interaction, *Interaction Process Analysis, *Reading Instruction, Reading Research, Reliability, *Student Teacher Relationship, Teacher Effectiveness, Validity

Prompted by the need to develop improved tools for describing and assessing teachers' skills in teaching reading, a study was undertaken to examine the effectiveness of a system for classifying and tallying teacher-pupil verbal interaction during classroom instruction. Specifically, the study investigated the extent of agreement among college students using a time-line format when ranking categories of verbal interaction in three criterion reading lessons, and it examined the use of selected ratios of verbal interaction as a means of discriminating among criterion reading lessons as compared to the judgments of a jury of reading teachers who ranked the quality of the lessons without reference to the verbal interaction factors. Twenty-five graduate students were

trained in the Flanders Interaction Analysis technique using the time-line format. The students then coded the verbal interaction of three videotaped reading lessons. These lessons were also viewed by seven reading teachers, who ranked them according to overall effectiveness. The results indicated that the students reached high agreement in tallying the verbal interaction. In addition, the use of the ratio of teacher questions/pupil responses to teacher lecture/pupil initiated comments was found to rank the lessons in the same quality order as did the jury of reading teachers. Identifiers—*Project RISE

The Project RISE (Reading Individualized in Special Education) program undertaken by the Austin (Texas) Independent School District collected and analyzed data on the reading achievement of junior high school special education students. A random sample of 256 such students was given several measures of reading achievement. Demographic information that was gathered for the students included data on sex, IQ, ethnicity, free lunch status, nature of handicap, and type of teacher from whom reading instruction was received (regular or special education). The students were also classified according to the instructional arrangement as "resource" (those receiving at least one hour of special education instruction per day), "integrated" (those receiving more than three hours of such instruction per day), and "self-contained" (those receiving full-day special education service). The findings revealed that (1) resource students had higher reading achievement than integrated students, (2) minority students scored below Anglo students in reading achievement, (3) students who were not eligible for free lunch scored higher and made bigger gains than did students who were eligible, and (4) students who received reading instruction from special education teachers were generally lower in ability than those taught by regular teachers, but both groups made comparable gains. Descriptors—Higher Education, Language Attitudes, *Language Research, *Language Usage, *Pronouns, *Reading Comprehension, Reading Research, Sex Bias, *Sex Fairness, Student Attitudes

In response to the growing awareness of the impact of sexist language in society, many writers and educators have begun to use either noncontrived "inclusive" pronouns ("he or she," "s/he," or "he/she") or contrived inclusive pronouns ("they") in place of the traditional "exclusive" pronouns (male referents only). A study was undertaken to discover the effects of inclusive/exclusive language on college students' reading comprehension, their determination of the quality of written materials (perceived human interest), and the likelihood of their adopting inclusive pronoun usage after reading materials containing it. Three hundred fifty-eight students were randomly assigned to one of three language conditions: (1) exclusive "he," (2) noncontrived inclusive "s/he," and (3) contrived inclusive "they." After reading one of three experimental pas-

sages, the subjects were administered tests measuring comprehension, perceived human interest of the materials, and likelihood of adoption of the language form used. Analysis of data revealed no significant main or interaction effects on any of the dependent variables. The results provide partial support for the continued use of inclusive language in written materials. (FL)

Descriptors—College Students, Exceptional Persons, Higher Education, *Reading Difficulties, *Reading Improvement, Reading Teachers, School Counseling, *Student Development, *Student Needs, Student Teacher Relationship

The reading instructor and clinician may need to come to terms with the need for a changing role in working with college students with severe reading problems. As a growing number of intellectually able children with severe reading problems are identified during elementary and secondary school years, more students with a history of learning disabilities will be applying to colleges and universities. Although early identification and specialized help should bring about success in reading for these students, there will continue to be students who will need to circumvent some of the traditional reading requirements and find more efficient ways to learn and perform in college. The role of the reading instructor and clinician in helping these students find more efficient ways of meeting their goals in college should include the following: (1) recognizing when a student needs and can benefit from specialized instruction; (2) recommending coping strategies that fit individual needs; and (3) determining when vocational or psychological counseling is needed. (A list of 14 suggestions for college students with specific learning problems is attached.) (RL)

Descriptors—College Students, *Difficulty Level,

Higher Education, *Readability, *Reading

Achievement, *Reading Rate, *Reading Research

Identifiers—*Reading Flexibility

The hypothesis of this study was that reading rate

would be relatively constant (within a 15% range of

the subject's mean reading rate) both within and

across different difficulty levels of materials as long

as the levels of difficulty remained at or below the

subject's ability level. The subjects were 65 college

students whose reading levels ranged from grades

9.8 to 16.0. The subjects read three reading passages

(eighth, twelfth, and sixteenth grade reading levels),

marking their progress through the passages at 30-

second intervals. To make the purpose for reading

constant, subjects were asked to complete a word

recognition task after reading each passage. The

data revealed an almost normal distribution of interval

scores around each subject's average reading

rate, lending support to the position that internal

variation of reading rate was minimal. The subjects

reading above the twelfth grade level tended to

maintain their average reading rate for passages at

the eighth and twelfth grade levels. When data for

these subjects included the passage with the six-

teenth grade reading level, not a single subject main-

tained their average reading rate. These findings

offered clear support for the constancy of reading

rate hypothesis. (RL)

Descriptors—Academic Achievement, *Cognitive

Processes, *Difficulty Level, Elementary Education, Grade 2, Grade 5, *Oral Reading, *Reading

Ability, Reading Comprehension, Reading Difficulties,

Reading Rate, *Reading Research, *Silent Reading

A sample of 48 second grade and fifth grade children,

containing equal numbers of high and low ability

readers, participated in a study that explored the

degree to which oral and silent reading represented

the same cognitive process for different age and

ability level children. Their reading rates and com-

prehension scores for both oral and silent reading

were compared for text that varied in terms of de-

codability (regularity of phonic patterns), word fre-

quency, syllables in words, and semantic difficulty of sentences. The results suggested that oral reading and silent reading represent a similar cognitive process. However, there was evidence that readers decreased their processing time on difficult words in silent as compared to oral reading. This tendency was pronounced for poor readers. (Author/FL)

Martin, Joanne And Others
The Development of Knowledge Structures. Research Paper No. 557.

Stanford Univ., Calif. Graduate School of Business.

Pub Date—Sep 80

Note—51p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Adults, *Cognitive Processes, *Generalization, Higher Education, *Induction,

*Knowledge Level, Learning Theories, Reading

Comprehension, *Reading Research

Identifiers—Schema Theory

A study was conducted to examine the process of

the development of knowledge structures concern-

ing events. Specifically, it investigated (1) the ways

in which individuals build theories about events as

they experience them; (2) the number of events an

individual must experience, and how similar those

events must be, before he or she begins to generalize

about them; and (3) how the content of an event

knowledge structure changes as it becomes based on

increasing amounts of experience. Eighty-nine

graduate students were given descriptions of events

to read. The number of events (one, two, three, or

four) contained in the stories and the level of their

similarity were manipulated. The subjects were

asked to write "what happened" in the stories they

had read and these responses were then content

analyzed. The results showed that subjects exposed

to only one event tended to write episodic scripts,

with concrete details about the event. Subjects ex-

posed to two or three similar events wrote some-

what more abstract scripts, and those exposed to

four similar events wrote the most abstract scripts.

Less evidence of generalization was present when

subjects read two, three, or four dissimilar events.

The findings suggested that the content of inductive

theories changes as those theories become based on

increasing amounts of supporting evidence. (Au-

thor/FL)

Diagnosis, Reading Instruction, Student Teacher

Relationship

The Feedback to Oral Reading Miscue Analysis

System (FORMAS) is a low-inference coding sys-

tem developed to characterize verbal interaction be-

tween teacher and students during oral reading

instruction. The six lessons presented in this manual

are designed to teach the use of FORMAS in ap-

proximately ten hours. Each of the lessons deals

with one of the five clusters of behaviors repre-

sented in the coding system: (1) the characteristics

of the miscue itself, (2) the ways in which students

attempt to deal with their miscues, (3) the teachers'

verbal feedback to student miscues, (4) the feedback

given by other students during group oral reading

instruction, and (5) the resolution of miscues. A

sixth lesson presents additional information re-

quired by the coding system. Each lesson offers a

narrative description of the behavior cluster with

appropriate definitions and a section of practice

coding exercises. The manual also contains a list of

extended coding exercises and a section for use

in calculating reliability. A coding sheet and a list of

definitions used in the coding system are appended.

This publication deals with practical areas of early reading in instruction that may be of immediate use to practitioners. The first chapter offers a perspective on current theories of reading instruction, and subsequent chapters deal with topics that are often considered controversial among those who teach reading. Discussed are the learning processes of young children, reading readiness, the pros and cons of using basal readers, phonics instruction, linguistic science and reading instruction, miscue analysis, and dialects and early reading instruction. The final chapter bridges the span between the past and the future of reading instruction. (AEA)

Descriptors—*Classroom Observation Techniques, Classroom Research, Educational Research, Elementary Education, *Reading Instruction, *Research Methodology, *Teacher Effectiveness, Teaching Methods, *Teaching Styles

Qualitative and quantitative methodology in classroom observation were combined in this study that examined nine second grade reading classes. Each classroom was observed by an ethnographer and a classroom coder ten times throughout the year, and each observation lasted 90 minutes. For each classroom, four of the ten observations were also videotaped. The classroom observation system used was that developed by the Stanford Research Institute for use in the evaluation of the National Follow Through programs. Of particular interest in this observation system is the Five Minute Observation, which records classroom interactions in "frames" completed four times per hour. Four codes comprise each frame, indicating who performed the action, to whom it was directed, and what was done. Results indicate that some type of narrative record, or series of interviews, always be used in conjunction with categorical observation systems. (HOD)

Descriptors—*Educational Assessment, Educational Research, *Educational Testing, Educational Trends, *Equal Education, *Literacy, Program Evaluation

Identifiers—*National Assessment of Educational Progress

To understand the contributions of the National Assessment of Educational Progress (NAEP) toward solving the problems of literacy and equity, this report addresses two questions: (1) How can

NAEP provide useful information concerning educational equity and standards of and levels of literacy, particularly with regard to linguistic and ethnic minorities; and (2) What kinds of data can be collected and analyses performed to chart changes in literacy over time and provide clues about the types of programs required for improving literacy? Divided into three parts, Part One explores differing conceptions of literacy, ways in which NAEP can address certain of them, ways in which NAEP can serve as a proving ground for literacy measures, and potential enhancements to the current NAEP model; Part Two explores NAEP's contribution to equity studies as a descriptive data base and a source of analytical inquiry; and Part Three examines trade-offs involved in potential enhancements of the current design. Appended are a discussion of trends for two kinds of literacy, a sampling of equity graphs, tables and statements, and NAEP publications in reading, writing and literature. (HOD)

Selecting and Using Materials for College Disabled Students.

Pub Date—Mar 80

Note—7p.; Paper presented at the Annual Meeting of the Western College Reading Association (13th, San Francisco, CA, March 27-30, 1980).

Pub Type—Guides - Classroom - Teacher (052) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—College Students, Reading Diagnosis, *Reading Difficulties, *Reading Instruction, Reading Material Selection, *Remedial Reading, *Teaching Methods

High school graduates too frequently find the routes to their career goals blocked by inadequate reading skills. College instructors can help these academically disabled students by accurately diagnosing students' reading deficiencies and by selecting appropriate materials to strengthen specific skill areas. In selecting materials for learning disabled students it is important to stress visual, auditory, and tactile learning experiences. Basic word recognition skills of reading disabled students can be strengthened through exercises in sound and symbol discrimination, structural analysis (phonics, decoding, and syllabication), dictionary use, figures of speech, and comprehension. Descriptors—*Classroom Techniques, Elementary Education, Grade 3, Grade 4, Grade 6, *Reading Instruction, *Reading Research, Student Behavior, *Teacher Behavior, *Teaching Styles, Time Factors (Learning)

Limited to first, third, fourth, and sixth grade teachers within the tri-state area of Delaware, New Jersey, and Pennsylvania, this survey examined (1) what teachers did when they taught reading, (2) the materials they used, (3) who made decisions about instructional processes, and (4) the bases they used. The responses are reported in terms of four classroom process constructs: "Opportunity" (encompasses variables related to the time available for students to learn curriculum content); "motivators" (covers variables that support and enhance student learning, both curriculum variables and nonacademic interaction among people in the classroom); "structure and place" (includes the clarity and specificity of curriculum objects, the frequency with which new objectives are presented, and the relationships between the curriculum materials and the stated curriculum objectives; and the placement of students into appropriate levels of the curriculum, sequencing and pacing, and grouping patterns); and "instructional events" (subsumes mechanisms and methods for connecting the learners with the feedback that is needed to implement their progress toward the desired competency). Descriptors—Discourse Analysis, Grade 12, Language Styles, *Readability, Reading Comprehension, *Reading Research, Secondary Education, *Sentence Structure, Textbook Evaluation, Textbooks, *Word Frequency

Identifiers—*Stylistics

A study was conducted to determine the effects of sentence length, sentence structure, and word frequency on the readability of textbook prose. Specifically, the study assessed the extent to which the factors, taken alone or in combination, affected the readability of two 1,000-word college textbook passages when the content remained the same. Two existing textbook passages were rewritten to create eight different versions of each passage: one pair of passages was written with a shorter average sentence length than the original, a second pair contained more frequently occurring synonyms substituted for some of the infrequently occurring words in the original, and a third pair was composed of modified sentence structures. The remaining pairs included combinations of these three readability factors. At the first of two sessions, 336 high school seniors read a passage about cells or computers, recorded their reading times, responded to measures of interest and comprehension, then read a second passage. The second passage, on the other topic, was assessed for retention a week later. Results showed that shortening the averaging sentence length, changing the sentence structures, and altering word frequency did not improve the reading efficiency of the students, nor did they affect the students' interest in or their comprehension of the passages. Descriptors—Disclosure, Freedom of Speech, *Government Role, *Journalism, *Local Legislation, *Media Research, News Reporting, *State Legislation

Identifiers—*Open Meetings

Standard legal methods, statutory developments, case law, and attorney generals' opinions were analyzed in a study of the nine states that received the lowest rankings in J. B. Adams's 1974 investigation of open meeting laws across the United States. In addition, statutory and judicial open meeting activity in the remaining 41 states was surveyed to provide an overview of the field. The nine states examined were: Connecticut, Delaware, Hawaii, Indiana, Maryland, Mississippi, New York, Rhode Island, and West Virginia. The major findings were that (1) all of the nine states have enacted comprehensive open meeting laws since 1974, (2) all 50 states have comprehensive statutory laws requiring open meetings of state and local agencies, and (3) no reported appellate court decision has invalidated any of the major provisions of any state's open meeting statutes. Identifiers—*United States

Third World nations' calls for a new international information order are discussed and the responses of Western governments and in particular of the United States government to those calls are analyzed in this paper. The paper notes the Third World countries' preferences for a more restrictive flow of information across borders, their limited interest in the use of technology to transmit information, and their internal policies of restricting access of information to less advantaged classes, positions that are not accepted by Western countries. Official Western government responses are described as having been expressed primarily through participation in United Nations sponsored conferences, especially those of UNESCO. An overview of these conferences and their major issues is provided. A discussion of the reasons behind Western policies that promote a more open right to communicate includes mention of the profit motive and cold war diplomatic and political intentions. (MKM)

Needs Satisfied by Media Use: An Audience Typology.

Pub Date—Aug 80

Note—39p.; Paper presented at the Annual Meeting of the Association for Education in Journalism (63rd, Boston, MA, August 9-13, 1980).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Adults, Behavioral Science Research, *Information Needs, Information Sources, Journalism, *Media Research, *Need Gratification, *News Media, Newspapers, News Reporting, *Public Opinion, *Use Studies

A study was conducted to segment the mass media audience on the basis of basic needs and media satisfactions. Two hundred undergraduate journalism students completed lengthy questionnaires rating their media use before and during the New York newspaper strike of 1978, along with their basic needs, media satisfactions, and a variety of other measures related to media use. Basic needs were categorized into needs for information/interpretation, social comparison, consumer information, escape, relaxation, and social contact/integration. Respondents were grouped, based on basic need scores, into four audience types: (1) the information dependent emphasized their needs for information about the environment and about other people; (2) escapists needed to escape, relax, and have something to do with others; (3) the

socially conscious had a high need for information about other people; and (4) the self concerned had high needs for media use and consumer information and a high interest in advertising and immediate gratification. These four types differed significantly on media use, content preferences, media satisfactions, and demographic indicators. The evidence for such different audience types has important conceptual and methodological implications for mass communication research. (AEA)

Descriptors—Communication Research, Information Dissemination, *Information Sources, *Mass Media, *Media Research, Models, *Political Influences, *Politics, Research Utilization, Theories

Identifiers—*Agenda Setting, *Political Parties

A review of research on the roles played by the mass media and the political parties during the agenda-setting stage of political activity in the United States indicates that the mass media have assumed some of the informing and issue-initiating functions generally understood to be performed by political parties. It seems desirable to develop an empirically based theoretical model based on an acknowledgement that political parties play a minimal role in informing the public and establishing the issue debate and on a recognition of the substantial role of the media in those areas. Such a model would be based on an understanding that (1) the parties provide a mechanism for determining who the governmental actors will be, and the party label provides an affective cue for the 10% of the public considered political "actives" and for voters; (2) the issue-initiating and informing functions operate largely outside the partisan machinery; (3) political actives use a number of institutions (the mass media being a primary one) to initiate and carry on debate; (4) the mass media provide information that can be used by political actives; (5) candidates and governmental officials seek to disseminate their positions through the media; and (6) information about governmental activity is provided to the public largely by the news media. Descriptors—*Aesthetic Education, *Art, Educational Needs, Educational Objectives, *English Instruction, Etymology, Fine Arts, Higher Education, Humanities Instruction, *Interdisciplinary Approach, Language, Literary Criticism, *Literature, *Music, Relationship, Teacher Role, Visual Arts

Identifiers—*Shakespeare (William), Shaw (George Bernard)

The major thesis of this paper is that the teaching of English should be interdisciplinary. The paper shows that the works of George Bernard Shaw and William Shakespeare are interdisciplinary and observes that the greatest current educational need is for breadth of education and interdisciplinary linkages rather than for transmission of facts. It shows how human beings use language, myths, and metaphors to express and create realities; demonstrates how reality is expressed and transformed in music and art; and shows how historical realities are portrayed in Shakespeare's chronicles. The paper also points to the relationship of English instruction to the reality of the outside world, shows how the English classroom is analogous to the theatre, and argues that the explosive energies beneath the surface of artistic structure in music and poetry are stimuli to intellectual involvement in the English class. The paper concludes by outlining salient characteristics of art, by pointing out that one area of

knowledge confirms another the way one art form confirms another art form, and by noting that the purpose of English is the purpose of art: to analyze and transcend experience and to seek higher unities and syntheses for common understanding. (GT)

Evaluation Design: Written Composition Program.

Publication Number 79.24.

Austin Independent School District, Tex. Office of Research and Evaluation.

Pub Date—80

Note—24p.

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Educational Assessment, Elementary Education, Minority Group Children, *Program Effectiveness, *Program Evaluation, *Writing (Composition), *Writing Instruction

This booklet outlines procedures for evaluating a school district's writing program that was designed to overcome the adverse educational and social effects of minority group isolation by improving the academic achievement of minority group students. The first section describes how the writing program addressed three of the school district's priorities for students in kindergarten through grade five: (1) student achievement in language arts, (2) student achievement in social studies, and (3) minority student achievement in all basic skills areas. The second section lists the methods proposed to evaluate the program, including commercially available tests, classroom observations, and teacher questionnaires. The third section discusses the two issues to be addressed by the evaluation: the dissemination of the instructional activities of the written composition program throughout the school district and the retention of certain aspects of teacher training in the program model. The remainder of the booklet provides a breakdown of the evaluation into specific skill areas and information on the dissemination schedule, information sources, data collection, and time allocation. A Schema for Analyzing Response to Literature

Applied to the Responses of Fifth and Eighth

Graders to Realistic and Fantasy Short Stories.

Pub Date—[78]

Note—45p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Comparative Analysis, *Critical Reading, *Discourse Analysis, Elementary Education, Grade 5, Grade 8, Literary Criticism, *Reading Habits, *Reading Interests, Reading Research, Student Reaction

Identifiers—*Reader Response

A study was conducted (1) to develop a more comprehensive theoretical framework for exploring the nature and process of response to literature, (2) to develop an integrated schema for analyzing responses, and (3) to apply this theory and schema to the responses of fifth and eighth grade students to two different kinds of texts. Subjects were ten fifth grade students and ten eighth grade students who were asked to listen to a taped version of a fantasy story and a realistic story as they read along. Fol-

lowing exposure to the stories, subjects orally responded to questions designed to elicit responses such as retelling, evaluation, and interpretation. Responses were analyzed to determine the level of discourse, cognitive operation, pattern of reference, and reconstruction of the text during recall. Responses to the two stories revealed differing patterns across age and text. Eighth grade students were found to have more interpretive responses and fewer expressive responses and fifth grade students demonstrated more global responses to the stories. The findings suggest that response to literature is influenced by the nature of the text as well as by the reader, that readers are sensitive to elements of the text such as style, lexicon, and events, and that they are aware of their relationship to world events. Descriptors—Failure, *Media Research, News Media, *News Reporting, *Programming (Broadcast), *Radio

Based on case studies of 15 all-news radio stations, this report isolates major factors contributing to the all-news format's frequent failure and assesses its potential for success. The history of the News and Information Service (NIS), which the NBC radio network operated between 1975 and 1977, serves as a backdrop for the information presented in the report. Sections of the report discuss the following topics: (1) the 15 stations and 33 officials in the original case studies, (2) reasons the stations converted to the all-news format, (3) the effect on local staff, (4) the business community's response, (5) promoting the all-news format, (6) local programming and staff credentials, (7) stations' appraisals of NIS, (8) factors involved in stations' decisions to drop the all-news format, (9) all-news stations on their own after the demise of NIS, (10) the commitment to local coverage within an all-news format, (11) journalism and show business, and (12) the future of all-news radio stations. The report concludes with a critique and confirmation of the viability of all-news formats. (RL)

Descriptors—*Design, *Editing, Graphic Arts, Guidelines, Headlines, Journalism, *Layout (Publications), *Newspapers

This report discusses the graphic strategies available to editors for positioning the day's news. The purposes of the report are: (1) to introduce those in charge of designing the newspaper page to the structural approach to design (the structural approach is defined as incorporating horizontal and vertical structures in the available spaces, while creating visual order), and (2) to provide several graphic strategies that will allow the designer flexibility and functionalism in a variety of design problems. Headline alternatives, the use of white space, borders, and quotations are a few of the strategic tools discussed in detail. Approximately half of the report consists of illustrations of the various strategies suggested. (AEA)

Descriptors—Annotated Bibliographies, *Childrens Literature, Citizenship, *Citizenship Education, Conflict, Conflict Resolution, Content Area Reading, Elementary Secondary Education, Interdisciplinary Approach, Laws, *Reading Materials, Reading Material Selection, *Social Studies, *Thematic Approach, *Values Education This annotated bibliography is intended for pre-school, elementary, and middle school teachers who want to incorporate law-related reading materials into their reading, language arts, and social studies programs. Fiction, fantasy, poetry, and nonfiction are listed under four general topics: citizenship, conflict and conflict resolution, authority and governance, and values. The four broad topics are divided into 32 subthemes, which are matched to the book titles in an alphabetical grid at the end of the bibliography. Each entry in the bibliography contains author, title, annotation, type of literature, and intended age/grade level of the work. Some entries have suggestions for discussion questions and activities. Several unit approaches are suggested for studying various subthemes within the general topics. (RL)

Building Communicative Competence in the Bilingual/Bidialectal Classroom.

Pub Date—Nov 79

Note—39p.; Paper presented at the Annual Meeting of the National Council of Teachers of English (69th, San Francisco, CA, November 22-24, 1979).

Pub Type—Speeches/Meeting Papers (150) — Information Analyses (070)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Bilingual Students, Black Dialects, Communication Problems, *Communication Skills, *Cultural Awareness, *Cultural Differences, Elementary Secondary Education, Language Skills, *Linguistic Competence, *Minority Group Children, Sociolinguistics, Speech Communication, *Teacher Responsibility

Identifiers—*Intercultural Communication

Cultures differ in rules that govern communicative behavior, and these differences can cause teacher/student miscommunication in the classroom and can also interfere with the academic performance of minority group children. These differences can be overcome, however, by knowledgeable teachers who endeavor to build and expand the communicative competence of minority group children. Teachers can accomplish this by fostering children's ethnic identity and pride while expanding their communication skills to include those of the dominant culture. To achieve this, teachers should provide a broad range of experiences to expose children to the full repertoire of communicative strategies and rules as they are defined by each culture. Teachers should also provide activities that expand children's social sensitivity and metalinguistic awareness and that afford opportunities to practice newly acquired dominant culture skills. The goal is to produce individuals who are capable of functioning in two realms and who feel comfortable in both. (FL)

Patterns of World Coverage by the Major Western Agencies.

Pub Date—May 80

Note—32p.; Paper presented at the Annual Meeting of the International Communication Association (30th, Acapulco, Mexico, May 18-23, 1980).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Communications, Developed Nations, *Developing Nations, Foreign Countries, Freedom of Speech, *Information Sources, *International Relations, International Studies, *Media Research, *News Reporting, Press Opinion

Identifiers—*News Agencies

Drawing from the findings of a lengthy study of international news conducted by the American Committee of the International Association for Mass Communication Research at the request of UNESCO, this paper provides information on the system by which news is distributed around the world, on the international news content of four Western news agencies (The Associated Press, United Press International, Reuters, and Agence France-Presse), and on different explanations for the dominance of these four organizations. The paper concludes that Western news agencies do not ignore the Third World in their regional service to developing nations, that news emphasizing politics is standard all over the world, and that western agencies are dominant in most of the world because their files require less editing to conform to local sensitivities and opinions. Tables are provided concerning (1) geographic distribution of wire service news to Latin America, (2) geographic representation of wire service news by regional origin, (3) coverage of three world areas by Western news agencies, (4) distribution of the main topic of wire service news to Latin America, (5) correlation between main topics in First and Third World coverage, (6) themes and references in foreign news, (7) correlation between media and wire service coverage in Latin America, and (8) sources of foreign news from 16 countries. Descriptors—*Faculty Advisers, Guidelines, *Journalism Education, *School Newspapers, Secondary Education, *Student Publications, Teacher Responsibility, *Teacher Role, Teaching Methods, *Yearbooks

This guide offers advice and practical assistance to high school publications advisers. The first section provides general information about school publications, including planning and organizing, public relations, protecting the program and the school, available resources, and advertising. The second section concerns school newspapers and contains information on selecting a staff, staff responsibilities, planning the first issue, and figuring a paper budget. This section also offers guidelines for making policy and editorial decisions and provides examples of editorial policy statements; samples of a style sheet, nameplate, masthead, headline schedule, assignment sheet, and slug sheet; and a schedule for a biweekly publication. The third section deals with yearbook production. Following a discussion of the purposes of a yearbook, it offers guidelines for good yearbooks, a yearbook evaluation exercise, guidelines for critiquing the yearbook, an evaluation guide for exchange yearbooks, and a discussion of the pros and cons of yearbook competitions. Glossaries of newspaper and yearbook terms are appended. (RL)

The Struggle for Self-Determination: Public Broadcasting, Policy Problems and Reform.

Pub Date—Aug 80

Note—47p.; Paper presented at the Annual Meeting of the Association for Education in Journalism (63rd, Boston, MA, August 9-13, 1980).

Pub Type—Information Analyses (070) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Government Role, Mass Media, *Needs Assessment, *Policy Formation, *Public Television, Radio, *Telecommunications

Identifiers—*Public Broadcasting In the current communications regulatory and policymaking environment there are several factors of crucial importance to public broadcasting, including (1) the system's increased visibility; (2) the impact of inflation on governmental budget decisions; (3) policymaker assumptions about new technologies, economic forces, and deregulation; and (4) concerns about the system's performance in such areas as financial accountability and public access and participation. These and other factors have been

reflected in recent Federal Communications Commission notice and proposed rules, in the "Public Telecommunications Financing Act of 1978," and in the various proposals for the rewrite of the Communications Act. The main participants in this debate have been members of the communications reform, policymaking, and professional public broadcasting communities. The debate has revealed changes and some inconsistency in policy toward public broadcasting, which appear to be leading to a softening of federal support for the system, to its continued politicization, and to certain public service losses. These difficulties suggest the advisability of reassessments among all involved parties—the reformers, the policymakers, and the public broadcasters. (Author/FL)

Courses in college composition taught as part of the University of South Carolina's program at the Women's Correctional Center in Columbia, South Carolina, (a minimum security state prison) have proved valuable to prisoners. Despite the problems encountered, including lack of cooperation from the prison administration and inadequacy of available materials, the program has been found by many inmates to be an important way to prepare to reenter society. The benefits that inmates derive from writing instruction are improved skills in communication, thinking, and semantics. The Women's Correctional Center community is very verbal, and inmates are aware of the need to adapt their language to fit varying prison situations and to express themselves clearly and carefully. Written language is also important in the prison community since it is needed for such activities as applying for privileges, appealing convictions, and writing letters. Through their training in writing skills, inmates have gained knowledge about language and words, consciousness of diction, improved persuasive writing skills, and an avenue for self-expression. The prison courses have differed from traditional courses in the writing topics chosen and in increased chances for individualized instruction. (Excerpts from inmates' writing are included.) (GT)

Don't Shut a Stereotype Skeleton in Your Classroom Closet.

Pub Date—Apr 79

Note—14p. Paper presented at the Annual Meeting of the Association for Childhood Education International (St. Louis, MO, April 8-13, 1979)

Pub Type—Guides - Classroom - Teacher (052) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Elementary Education, Ethnic Stereotypes, *Instructional Materials, *Role Perception, Sex Stereotypes, *Stereotypes, *Student Attitudes, Teacher Attitudes, Teaching Methods, *Textbook Bias, Textbooks

Teachers need to be aware of the stereotypes that their textbooks promote. An informal survey of the illustrations in a sampling of third grade textbooks revealed numerous examples of ethnic and sexist stereotypes. A knowledge of children's learning patterns can help teachers lead their students away from stereotypes by introducing them to information beyond their textbooks. Suggested classroom activities include (1) comparing a newspaper report on a geographic location to a textbook account of that place, (2) comparing news reports to textbook descriptions of certain groups of people, (3) using male and female paper dolls in a classroom of very young children, (4) taking a field trip to see persons working in nontraditional roles, (5) expanding the textbook material on a particular ethnic group, and (6) posting a career bulletin board with pictures of both males and females in certain careers. Descriptors—*Advertising, *Comics (Publications), *Expository Writing, Higher Education, *Periodicals, Popular Culture, Reading Interests, Reading Materials, Recreational Reading, Secondary Education, *Teaching Methods, Writing Exercises, *Writing Instruction

Magazines and comic strips are two readily available cultural artifacts that can be used by expository writing teachers. Magazines are a particularly rich source of referential material for the composition classroom, offering examples of various prose styles and formal structures. One possibility for using magazines in writing classes is a four-part unit on magazine advertising that demonstrates Erving

Goffman's views on how advertising reflects and reinforces male dominance and female submissiveness as normative behavior. The unit would include an introduction to Goffman's views, a workshop in which students examined material in Goffman's terms, a prewriting discussion of ways to share conclusions about the material, and the actual writing of expository essays. A unit on comics could discuss ideas such as distinguishing between the complexities of authorial intention and the psychology of reader response, making some attempt to differentiate between the cartoonist's intent and the rhetoric employed to convey it, and employing a standard descriptive vocabulary that accounts for the psychology of comics and the parts of a comic strip. This booklet is one of a series of teacher-written curriculum publications launched by the Bay Area Writing Project, each focusing on a different aspect of the teaching of composition. The first part of the booklet describes a college writing center and the tutorial teaching that takes place in the center. The second part reports a case study of a student who worked through six drafts of a piece of writing. Appended is a transcript of the tutorial session on the fifth draft. (AEA)

Sequences in Writing, Grades K-13. Curriculum Publication No. 13.

California Univ., Berkeley. School of Education. Spons Agency—Carnegie Corp. of New York, N.Y.; National Endowment for the Humanities (NFAH), Washington, D.C.

Pub Date—80

Note—60p.

Available from—Publications Department, Bay Area Writing Project, 5635 Tolman Hall, University of California, Berkeley, CA 94720 (\$3.00 postage and handling)

Pub Type—Guides - Classroom - Teacher (052) — Collected Works - Serials (022)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Elementary Secondary Education, Program Descriptions, *Remedial Instruction, *Sequential Approach, Sequential Learning, Teaching Methods, *Writing (Composition), *Writing Exercises, *Writing Instruction, *Writing Processes

Identifiers—*Bay Area Writing Project

This booklet is one of a series of teacher-written curriculum publications launched by the Bay Area Writing Project, each focusing on a different aspect of the teaching of composition. It describes four sequences for teaching writing developed by four teachers at four different levels—kindergarten through grade three, intermediate grades, grades 9 through 12, and remedial—that share the following similarities: (1) all are based on the teachers' observations of the development of writing abilities in their students, (2) all treat writing as a process that may move through several stages rather than merely as the creation of finished products to be evaluated by the teacher, and (3) all view the teacher's role as one of assisting and encouraging student writers individually in finding the most effective written form for their ideas. (AEA)

Systematic or Unsystematic Invention Instruction: Which is More Effective for a Student Writer?

Pub Date—80

Note—35p.; Research prepared at the State University of New York at Buffalo.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Anxiety, College Bound Students, Comparative Analysis, Concept Formation, Grade 10, Intelligence Quotient, Noncollege Bound Students, Secondary Education, *Student Characteristics, *Student Improvement, Teaching Methods, *Writing Instruction, *Writing Research, *Writing Skills

Identifiers—Free Writing, Heuristics, *Invention (Rhetorical)

A study was conducted to identify characteristics of student writers that might be used to predict which of two invention procedures—free writing or the tagmemic heuristic procedure—would be more effective in improving writing skills. A secondary purpose was to investigate whether writing improvement correlated with a lessening in anxiety. Three student characteristics were identified: conceptual level, IQ, and educational preference (aspiration). The subjects were 93 tenth grade students

in four sections, all taught by the same teacher, who was also the researcher. Throughout 20 weeks of instruction, the writing problems assigned and the data given were the same for all sections, but two sections were instructed in the tagmemic heuristic approach and two were instructed in free writing. Anxiety and attitude, conceptual level and IQ, and writing skills were assessed before, during, and after treatment. Results indicated that (1) the groups that studied tagmemic heuristics showed a trend toward writing improvement; (2) tagmemic heuristics were significantly more useful than free writing in increasing the number and variety of ideas in expository essays for college-bound students and for students with low conceptual level and with middle ability; and (3) after instruction in tagmemic heuristics, anxiety tended to decrease in low conceptual level and middle IQ groups and to increase in college-bound students. Gwyn, Cindy Swanson-Owens, Deborah

Essay Editing: Helping Students Teach Themselves.

Pub Date—[80]

Note—12p.

Pub Type—Guides - Classroom - Teacher (052) — Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Editing, *Expository Writing, Higher Education, *Peer Evaluation, *Teaching Methods, Writing Exercises, *Writing Instruction, *Writing Skills

Since good prose is usually prose that has been carefully edited, devoting a significant portion of class time to editing should improve the writing and attitudes toward writing of college students in expository writing classes. By requiring students to edit their essays in class, writing teachers force the students to break their writing into a series of steps and to realize that writing is a process. One method of working the editing process into classroom activities is to have students meet in groups of three during the week before essays are due and have them edit each other's work. Preparing students to edit essays in this manner requires both individualized and group instruction in how to work with others and how to read essays critically. This information is provided by the teacher through lectures, drills, and homework interspersed with editing activities throughout the semester. In this way, students will initially edit papers for only those techniques that have previously been covered in class. As the semester goes on, they will acquire more expertise in editing until they have learned all the essential editing skills. An alternative to interspersing instruction with editing is to spend the first part of the semester instructing and the last part editing. Both schedules have been successfully applied. (A sample editing checklist for use by students is attached.) (RL)

Newspaper Reading in Longitudinal Perspective: Beyond Structural Explanations.

Pub Date—Aug 80

Note—36p.; Paper presented at the Annual Meeting of the Association for Education in Journalism (63rd, Boston, MA, August 9-13, 1980).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Adults, *Behavior Change, Behavior Patterns, Information Seeking, Information Sources, *Media Research, *Models, *Newspapers, *Predictor Variables, *Reading Habits

Data from a national survey were used to test a model representing the dynamics of newspaper reading behaviors. It was hypothesized that three types of constraints (structural constraints, transitional constraints, and self-constraints) would be present to various degrees in four types of newspaper readers: regular readers, regular nonreaders, past readers who had quit reading (droppers), and past nonreaders who had begun reading (adders). These four types of readers were present in a sample of 1,201 people surveyed during both the 1974 and the 1976 election campaigns. Operational indicators included education and income for structural constraints; age and residential, marital, and occupational changes for transitional constraints; and campaign interest, campaign activity, attention to public affairs, and political activity outside the campaign context for self-constraints. Overall, the constraints model held up well under testing. As predicted, structural constraints accounted for sta-

ble nonreading. Transitional constraints, particularly those associated with youth and mobility, predicted changes in readership status. Directional changes, as represented by the adders and droppers, were associated mainly with indicators of self-constraints. The data were also consistent with expectations that self-constraints would be a function of structural factors, the strongest indicators of readership status. (RL)

Children's Ability to Solve Spatial Perspective and Rotation Problems through Language and Pictures. Technical Report No. 17.

Harvard Univ., Cambridge, Mass. Harvard Project Zero.

Spons Agency—National Inst. of Education (DHEW), Washington, D.C.

Pub Date—Sep 80

Grant—G-78-0031

Note—25p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Behavioral Science Research, Child Development, Children, Cognitive Ability, Cognitive Development, *Cognitive Processes, Language Research, *Language Usage, *Perspective Taking, Primary Education, *Problem Solving, *Spatial Perception

The role of verbalization in children's mental operations was studied by comparing the mental operations children used in spatial perspective tasks (indicating another's view) and rotation tasks (imagining an object's rotation and one's own subsequent view). Each of 96 children (equal numbers of boys and girls, kindergarten and second grade students) was given one of the tasks and asked to respond either verbally or by picture selection. The results indicated that verbalizations led to substantially more correct responses on the perspective task, but not on the rotation task. Errors on the perspective task appeared primarily due to a failure to use the rule that a person in a different vantage point sees a different view, whereas errors on the rotation task appeared primarily due to failures in the computation process of determining exactly the nature of the new view. It was proposed that children manipulate descriptions of object features in perspective taking, while they manipulate more holistic images in rotation tasks. (Author/RL)

Assessing Children's Language: Guidelines for Teachers.

National Association for the Teaching of English (England).

Pub Date—80

Note—93p.

Pub Type—Guides - Classroom - Teacher (052) — Books (010)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—*Child Language, Elementary Education, English Instruction, Guidelines, *Language Arts, *Language Usage, *Student Development, *Student Evaluation, Teacher Role, *Teaching Methods

Intended for classroom teachers, this book suggests some approaches to assessing children's language, describes some practices, and advises teachers of some of the problems in child language assessment. Chapter one provides illustrations of assessing child language usage, including looking at a piece of writing, administering a reading test, listening to a pupil read aloud, and responding to examination answers. Chapter two discusses the structures of assessment (the surface features of language use, the process of language, and the "basics" of language), their implications for teaching, and their implications for assessing. Chapter three focuses on tests, examinations, and their alternatives. The final chapter restates the guidelines for assessing children's language and considers how these guidelines might assist in the assessment problems used as examples. A glossary and bibliography are included. (RL)

Identifiers—*Document Design Project

Research from several disciplines has been examined to create this literature review of information on document design, the overall movement toward producing public documents that the intended users can understand. Six chapters review appropriate research from the areas of psycholinguistics, cognitive psychology, instructional research, readability, human factors, and typography/graphics. A seventh chapter, written in the form of a case study, illustrates the development of an actual document design experiment, showing how research from the different disciplines can be used collectively to treat a typical document design issue. An appendix contains lists of references used in the seven chapters. (RL)

Identifiers—*Document Design Project

Four activities of the Document Design Project (DDP) in its first year of operation are described in this report. The activities described are: (1) dissemination of information about the project; (2) creation of information services, including a library of more than 450 items; (3) development of a three-day course on document simplification, which was attended by people from 15 federal agencies; and (4) development of 16 technical assistance projects designed to build the capacity of federal agency staff members to design clear, comprehensible documents. A large portion of the report is devoted to descriptions of the scope and status of each of these projects. Appendixes present letters of appreciation from three federal agencies, a reprint of a "Higher Education Daily" article on a study of the complexity levels of basic grant applications, a list of conferences attended by DDP staff members, and a list of participants in DDP workshops. Identifiers—*Document Design Project

A variety of college writing programs was surveyed and evaluated for examples of approaches to the teaching of the writing process in expository, business, professional, and technical writing. Some of the findings are: (1) Freshman composition teachers are focusing more on teaching the composition process than they were before, but one course in the freshman year is hardly enough training to make a student a skilled writer. (2) Advanced composition courses are becoming more popular, but there is a lack of definition of what advanced composition should cover. (3) Writing labs are available now at most schools, concentrating on teaching the mechanics of correct grammar for underprepared students. (4) "Writing across the curriculum" is a catch phrase covering several ways to involve non-English teachers in the teaching of document design skills. This interdisciplinary approach is the one most likely to have an effect on student awareness of the importance of writing ability. (5) Technical writing is the most appropriate model for a classroom-based course that directly teaches the composition process, including audience awareness, stylistics, use of graphics, and review, but few non-technical students take such a course. (6) There is great potential in graduate writing programs, because the few programs now operating at that level differ not only in focus but also in quality. (RL)

This report is a statement of the tentative plans for an interdisciplinary program in document design (effective written communication of ideas to achieve social purposes) at Carnegie-Mellon University. It summarizes the current status of program planning in the following areas: the philosophy underlying the program, the structure of the program, its curriculum design, the needs and specifications for a communication design center for research activities, the core courses of the program, student programs in document design, and student evaluation. Programs at other universities with emphases on rhetoric and cognitive psychology, in which programs in document design might be offered, are discussed. (RL)

Draft specifications for an undergraduate course in professional writing, designed to teach practical writing skills, are presented in this paper. The paper notes the need for such a course to prepare professional personnel for the writing they do in their jobs.

and it suggests that the course be aimed at juniors and seniors in liberal arts, engineering, and business programs. It then presents a prospective outline for the course, indicating topics that would be covered in an introductory course overview and in teaching students about six areas: (1) making decisions about documents, (2) prewriting steps, (3) writing and designing a document, (4) editing and revising a document, (5) evaluating documents, and (6) legal drafting and forms design. The paper also discusses the course format, materials for the course, and staffing for the course. (GT)

As part of the evaluation of four different versions of a patient package insert (PPI) for diazepam (Valium) created by the Food and Drug Administration (FDA), the content, organization, language, and design of the PPIs were compared. One PPI was a short prose piece with clear organization that did not particularly highlight warnings or, indeed, any specific piece of information. The second PPI was clear, personal in tone, and had a high level of explanation. It also stressed warnings more than the other versions by placing this section first, by highlighting it with use of large type and a box, and by using the word "warnings" rather than "cautions." The third PPI had a more complex style and organization than the first two PPIs, with a higher level of personalism but not as high a level of explanation as the fourth PPI. The last version of the PPI had the most difficult language style and the most complex graphic design. It did not use a personal tone but it had a high level of information and explanation. (RL)

Identifiers—*Document Design Project, *Instructions

To illustrate the types of factors that must be considered in evaluating public documents, this paper analyzes a number of possible outcomes resulting from one type of document, the patient package insert (PPI) designed to provide consumers of prescription drugs with information about the drugs. It first outlines the intended sequence for a PPI: (1) the patient receives the PPI, reads and comprehends it, (2) is satisfied with the prescribed treatment, (3) follows the prescribed regimen, and (4) improves in health. It then diagrams and discusses possible variations in the intended sequence that might result from such factors as the patient's failure to read the PPI, the patient's lack of comprehension of the PPI, or the patient's decision against taking the prescribed drug. It also shows possible variations in physician behavior that might affect the PPI sequence and considers complications such as those

that might arise from a PPI's presentation of information that frightens a patient. In its conclusion, the paper notes the usefulness of such analyses in document evaluation, outlines implications of the PPI analysis, and asserts that an evaluation should be a historical undertaking rather than a one-shot study. Identifiers—*Audience Awareness, *Document Design Project

To investigate differences in the writing processes of novice and expert writers, a test of writing skills was developed that required subjects to write a business letter in defense of a particular system of public transportation in response to a letter objecting to that system. In the first of three experiments, significant differences were found between the way ten expert writers (college graduates with extensive writing experience) and ten novices (first-semester freshmen with low verbal Scholastic Aptitude Test scores) generated ideas for their letters, generated outlines from given lists of ideas, and translated given outlines into text. In the second experiment, novices were asked to translate given outlines into letters, and the investigator studied the effects on their writing of completing a questionnaire that focused attention on the concerns of the reader of the letter. Results suggested that only 4 of 30 novice subjects addressed their reader's concerns in their letters and that the questionnaire had no effect on performance. In the third experiment it was found that two manipulations—removing the given outlines and increasing the specificity of the complaint letter—dramatically increased response to the audience. The results have implications for the training of writers and for the management of document generation within large organizations. (The paper includes materials used in the experiments and sample letters written by subjects.) (Author/GT)

Identifiers—Conditionals, *Document Design Project, *Instructions

Twenty-four adults participated in an experiment to determine the difficulty of conditional sentences of the kinds frequently found in the instructions in government forms. The stimulus materials were 128 sentence frames of the form, "If you are X, press button Y," where X was replaced by sixteen different conditional structures. These sentences functioned as conditional instructions, with the antecedent "if clause" expressing a reader-referenced statement on whose truth value the command was contingent. Responses were timed from sentence onset to response, and response accuracy was recorded. Results indicated that (1) whenever possible, negated or embedded clauses should be avoided in the design of instructions (e.g., "not male

and not married" should be changed to "female and single"); (2) performance in following instructions varied with the type of construction used; (3) conditional instructions of the form, "If you are not A, and are B, then do X" should be rewritten as "If you are B and not A, then do X"; (4) strings of "ors" are more difficult than strings of "ands"; and (5) response time for wrong items was substantially longer than for correct items. Identifiers—*Document Design Project, *Instructions

Forty adults served as subjects in a study of the comprehensibility of instructions conditioned by multicategory compounds, such as "If you are male, or both married and not employed, go to question 3." The stimulus materials were 96 sentence frames of the form, "If you are X, press (button) Y," in which "X" was replaced by coordinate compounds generated by different combinations of five factors: (1) number of categories in the antecedent statement, (2) organization of categories, (3) "and" versus "or," (4) presence or absence of negation, and (5) organizational subtypes. In individual sessions, subjects responded to all 96 instructions, presented one at a time on a computer display terminal. Analyses of subjects' response time and accuracy yielded a number of results, including that the pattern of results, for both speed and accuracy, was primarily of the interactive type and that each of the major sentence dimensions appeared to contribute to overall sentence difficulty. The results have both theoretical and practical implications and lend support to the premise that complex instructions should be experimentally evaluated prior to inclusion in a public document. Identifiers—*Document Design Project, *Headings, Warranties

A study was conducted (1) to discover whether using standardized headings on warranties would increase or decrease people's speed and accuracy in understanding the terms of warranties and (2) to determine what effect headings would have on people's attitudes toward warranties. Subjects were 48 adult consumers who read groups of four warranties for television sets and responded to questionnaires about the warranties. The warranties were counterbalanced so that different subjects received warranties in different orders. Each set of warranties had two warranties with headings and two without headings. All the warranties were written in clear and simple language. There were no statistically significant differences in either the number of correct responses or in the time taken to answer the questions. That is, subjects read warranties without standard-

58 Document Resumes

ized headings just as well as they read identical versions with standardized headings added. However, approximately 90% of the subjects showed strong preferences for standardized headings on warranties. (RL)

To assist researchers, practitioners, and students in locating journal articles, books, papers, and reports relevant to all aspects of document design, the Document Design Project staff at Carnegie-Mellon University (CMU) is designing and building a computerized reference library using the operating system ZOG. The library will include material from all the disciplines that apply to document design and will display on a video terminal screen not only the bibliographical information, but also such things as the abstract, a brief description of any experiments, and guidelines for applying the findings. The operating system ZOG is a rapid response, large network, menu selection system developed for person/machine communication by CMU's computer science department. (This booklet gives step-by-step directions for using the system, illustrates instructions with actual frames that would be displayed on the videorecorder, describes the contents of the library, and explains the four ways material can be accessed—by author, discipline, type of document, or guidelines for document designers.) To determine if people who wrote legal documents could read such documents with understanding and rewrite them to be understandable to the general public, eight experienced government writers were asked to rewrite a portion of a government regulation for a general audience. The writers—four lawyers and four nonlawyers—were audio recorded as they revised the document to discover the protocols they were using as they worked. Their revisions were then ranked for comprehensibility. The two writers of the revisions rated highest had the following characteristics in common: (1) they were both lawyers, (2) they were the only writers who stated that they felt confident they had understood the regulation and that they had generated a satisfactory revision, (3) they were the only writers who read the passage completely through before attempting any revision, (4) they were very concerned with the appearance of the regulation, (5) they interpreted the task of revision broadly, (6) their editing protocols were laced with references to writing rules, (7) they were in touch with their audience, and (8) they were the only writers to reread their revisions. In contrast, the writers of the revisions rated poorest did not realize the needs of their audience. In addition, they misunderstood important aspects of the regulation and they interpreted the

instructions for revision in a very narrow sense. (Guidelines for revision based on the findings are included.) (FL)

Descriptors—Adults, *Communication Problems, Cues, Expository Writing, *Readability, Reading Comprehension, *Reading Research, *Technical Writing, *Writing Skills

Identifiers—*Document Design Project, *Headings

Misleading headings in documents, which make it hard for readers to find what they need, are common in many types of documents. A review of research on the importance of cues in the reading process suggests that heading misuses might seriously impair understanding. Three experiments were conducted to discover how headings cue or mislead adult readers. Results of the first two experiments indicated that headings may be very important in some documents and suggested factors that differentiate between effective and ineffective headings. Results of the third experiment suggested that misleading headings can be offset by clear prose and led to the conclusion that the role headings play in documents is dependent on the nature of the document and on the reader's degree of familiarity with it. In attempting to write headings that help readers, document writers should consider that effective documents develop a human-centered network of ideas focusing on their audience's needs and that they are based on the "scenario principle," providing examples of scenarios in which the reader will likely play a part. Writers of headings should (1) adopt the scenario principle, (2) anticipate readers' questions, (3) clarify all terms used, and (4) make sure that short, definitional headings are accurate and specific. Identifiers—*Document Design Project, *Revision (Written Composition)

Defining "functional documents" as those such as regulations, contracts, and policies that people must read in order to act, this paper posits the need for a revision principle by which writers can structure such documents to meet readers' needs. The first part of the paper describes a research project that uncovered some needs of readers in processing and comprehending a functional document. The second part of the paper uses the findings of the research project to formulate a principle for the revision of documents, labeled the "scenario principle," which states that functional prose should provide examples of human agents performing actions in an understandable context. Descriptors—Age Differences, *College Students, Higher Education, *Nontraditional Students, *Student Attitudes, Surveys, *Writing Instruction, *Writing Research

A survey was conducted to measure attitudes toward writing and toward methods of teaching writing to discover whether or not there were measurable differences between traditional college-aged students and older students and to consider what instructional implications such differences might have. Respondents included 137 students between 18 and 24 years of age and 45 students between 25 and 50 years of age. The two groups responded similarly to seven of the eleven areas covered by the instrument. Both groups indicated that they placed a high value on a college degree, both mildly agreed that they wrote well, most respondents believed that writing skills would prove useful to them, both groups did not consider their own experiences as adequate to write about, and both groups valued peer criticism. Differences between the groups were that older students indicated they spent more time outside of class revising work and preparing for class and they wanted more direction, guidance, or limitations concerning assignments. Descriptors—*Cultural Influences, Educational Trends, *English Instruction, *Literary Genres, *Mass Media, *Narration, Secondary Education, *Student Developed Materials, Student Motivation

This paper argues that the ideas people hold about teaching literary genres are out-of-date, that fictions of the imagination have been taken over by the media, which turn everything into entertainment and do not allow reflection. Student narratives are suggested as a way of incorporating personal narrative as a literary genre in order to create opposition to the prevalence of media. The student narrative genre is considered in this paper as an appropriate one for beginning the process of critical engagement between experience and culture. Several examples of student narratives are included to illustrate this thesis. (MKM)

Descriptors—Elementary Secondary Education, *English Instruction, Instructional Materials, *Learning Activities, *Learning Disabilities, *Mainstreaming, Peer Relationship, *Physical Disabilities, Teaching Methods

The ten articles in this journal issue are intended to help English teachers deal with the problems posed by mainstreaming handicapped children into their classrooms. The first and second articles suggest ways of meeting the special needs of mainstreamed students and the third discusses the use of a videotaping activity as a reward for learning disabled and emotionally disturbed children. The fourth article offers observational and evaluative techniques for identifying students with weak self-images, which it identifies as a hidden psychological handicap. The fifth article describes a competency-based program designed to meet the needs of junior high school students with special needs, and the sixth suggests ways to help students in a regular classroom learn to accept their handicapped classmates. The seventh article discusses the use of teacher/student contracts as a means of behavior

modification, while the eighth discusses the legal and moral responsibilities of language arts teachers to their handicapped students. The ninth article offers an activity designed to help angry, frustrated students identify, accept, and resolve their anger and develop a positive self-image. The final article discusses resources to aid the English teacher in teaching handicapped students. (FL)

The Fitchburg, Massachusetts, school system's writing program designed to meet the requirements of the commonwealth's Basic Skills Improvement Policy is discussed in this paper. The skills sequences that were selected for use in the areas of composition (levels kindergarten through grade 12) and mechanics and usage (levels two through nine) are listed. The methods for evaluation of each of the sequences are discussed and the following materials are provided: writing sample topics; analytic rating sheets for writing samples (levels two through twelve) and explanations of the composition rating categories (levels four through six); a sample page from the mechanics and usage test; a sample student achievement report for the mechanics and usage test; and samples of class diagnostic summaries in both composition and mechanics and usage. Male Readership Differences in Liquor Magazine Ads Employing Nonsensical and Sexual Humor. Pub Date—Aug 80

Note—13p.; Paper presented at the Annual Meeting of the Association for Education in Journalism (63rd, Boston, MA, August 9-13, 1980).

Pub Type—Reports - Research (143) — Speeches - Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Advertising, *Communication Research, *Humor, *Males, Persuasive Discourse, Responses, *Sexuality

A study examined the attention getting value of nonsensical and sexual humor used in liquor advertisements to determine if one was more effective than the other in attracting male magazine readers. Thirty-two Starburst liquor ads taken from 1976 and 1977 issues of "Time," "Newsweek," and "Sports Illustrated" were analyzed by three male readers. Starbuck is a syndicated research service that measures readership through the use of an aided-recall technique to establish the amount of attention given to a particular ad. The readership scores for each ad generally represent interviews with one hundred or more readers whose demographic char-

acteristics match those of the audience of the magazine in which the ad originally appeared. The subjects were individually instructed to study each ad carefully and, based on an "overall impression" decision rule, to identify it as employing either nonsensical or sexual humor (according to definitions of the terms developed from research literature). Although no readership differences were found for male readers who remembered seeing or reading some part of the liquor ads, a significant difference was found for male readers who remembered reading more than half of the ads' copy. The findings suggest that ads employing nonsensical humor are potentially more effective in attracting male readers to "read on" than are ads employing sexual humor. (FL)

Descriptors—Content Analysis, Educational Research, Elementary Education, Measures (Individuals), Spelling, *Spelling Instruction, *Student Evaluation, *Test Construction, *Textbook Content, *Textbook Research

A study was conducted to determine the precise content of elementary school spelling instruction. Spelling textbooks for grades one through six from seven major commercial publishers were selected on the basis of their use in elementary classrooms and were subjected to a critical, computer-assisted analysis in order to identify and classify the specific spelling skills actually taught through textbook instruction. The most striking fact to emerge from the investigation was that there is very little agreement among the series as to the appropriate content of spelling books. The results provide a better understanding of current spelling instruction as well as data for the construction of instruction-referenced assessment instruments such as the Southwest Regional Laboratory's Proficiency Verification Systems (PVS). PVS is an assessment inventory that matches assessment to actual instruction, and this investigation was directly related to the development of spelling inventories similar to the PVS inventories that have already been developed and implemented in mathematics and reading. (Appendixes identify the seven spelling series studied, the distribution of skills in the seven series, and suggested levels for assessing spelling content.) (AEA)

The purpose of this study was to focus on features of spelling textbook instruction that were not included in an earlier investigation. This paper presents data gathered from further analysis of the same seven commercial series used in the previous assessment and discusses the scope and sequence of major instructional categories. The following selected categories, given minimal treatment in the earlier study, are subjected to a thorough analysis: (1) consonant clusters, (2) irregular words, (3) compound words, (4) homophones, (5) abbreviations, (6) contractions, and (7) syllabification processes. More than half the paper consists of appendixes that identify the seven spelling series studied, the grade level distribution of spelling elements in the seven series, the focus of exercises for grades one through six, and the occurrence of each of the seven selected categories in three or more series. Descriptors—Journalism, Journalism Education, *Leadership Responsibility, *Newspapers, *Press Opinion, Public Opinion, *Social Responsibility, *Urban Improvement, Urban Studies

The failure of today's newspapers to provide creative leadership in successfully integrating our cities is tragic. White racism has become a critical factor in the neglect of our cities, as has the reluctance of some newspeople to involve themselves more deeply in efforts to explain today's urban crisis. Much of the journalism profession's disappointing performance in urban affairs reporting can be

60 Document Resumes

blamed on journalism education's failure to provide the requisite expertise in urban affairs to aspiring journalists. During the past few years, most of the special programs in urban affairs that were created in the late 1960s and early 1970s in schools and departments of journalism around the country have been dismantled. Some examples of progress can be seen, however, as the subject of urban affairs creeps slowly back into the agenda of conventions and other meetings of journalistic organizations. The progress is, however, slow and slight. (AEA)

Descriptors—Elementary Education, *Motivation Techniques, Teaching Methods, *Writing (Composition), *Writing Exercises, *Writing Instruction, Writing Skills

This journal issue provides topics and methods that elementary school teachers can use in writing instruction. The first part of the bulletin describes the nature of the composing process, the types of writing that elementary students produce, and an analysis of teaching strategies. These comments speak to the classroom teacher and reflect recent research as well as concerns and insights by respected authorities on composition. Suggestions are given for establishing and encouraging a classroom atmosphere conducive to creating a good writing program. Part two of the bulletin lists more than 1,000 topics for composition that are addressed to the pupil under the following headings: the writer's world (impressions, thoughts, values, etc.), characterization, narration, imaginative writing, play writing, reporting, and miscellaneous. Part three offers the teacher practical suggestions and motivational techniques for bringing composition into the elementary school curriculum. (RL)

Descriptors—Content Analysis, *Evaluation Criteria, Evaluation Methods, *Models, Narration, Persuasive Discourse, Student Development, *Student Evaluation, *Writing (Composition), Writing Processes, *Writing Research Identifiers—*Writing Evaluation

A model for assessing student writing achievement uses sets of criteria to chart students' writing progress that are based on a study of exemplary samples of student writing produced at various stages of development. The model provides a viable alternative to assessment methods that call for students to produce lengthy essays on preselected topics in a limited time. Criteria for evaluating narratives based on personal experience are in the form of four questions: (1) What kinds of ordering occur as the writer imaginatively recounts past events? (2) How much audience awareness does the writer demonstrate? (3) How comprehensive is the writer's point of view? and (4) What actual or potential understanding of the uses of language does the writer demonstrate? Applying these criteria to a narrative example demonstrates their usefulness. Possible criteria for evaluating achievement in writing moral or social argument include questions on the complexity, coherence, and integrity of the argument, as well as the degree of the writer's awareness of opposing viewpoints. This analysis is in the spirit of investigations of writing development going on internationally and can contribute to a joint effort among English teachers to replace the old essay exam model. Descriptors—*Broadcast Industry, *Court Litigation, *Federal Regulation, *Freedom of Speech, Institutional Autonomy, *Mass Media Identifiers—*Federal Communications Commission, *First Amendment

This monograph traces the themes in various court decisions that reflect a growing respect for the broadcast industry as a mature communication medium which, despite federal regulation, deserves a fuller measure of the First Amendment protection enjoyed by other media. The review begins with the first government involvement in broadcast content in 1929 when the Federal Radio Commission—predecessor of the Federal Communications Commission (FCC)—moved beyond technical supervision to setting programing standards for licensees. The review continues through the 1960s,

when broadcast regulation gained broader scope under the Supreme Court, up to the present, when the FCC and the Supreme Court seem to be lessening their involvement in any form of broadcast content. The affirmative interpretation of the First Amendment, "the fairness doctrine," the landmark "Red Lion Broadcasting Co. v. FCC" decision, the "CBS v. DNC (Democratic National Committee)" decision that replaced "Red Lion" as the leading precedent in broadcast regulation, and the "family hour" viewing decisions are among the issues discussed in depth. Descriptors—Age Differences, *Athletics, *Business, *Foreign Countries, *Media Research, News Media, Newspapers, *News Reporting, Reading Habits, *Reading Interests, Reading Research

Each of the three studies in this report explores in some detail a category of news that traditionally has been regarded as monolithic—business, sports, and foreign news. Highlights of the three studies are as follows: (1) A public opinion poll showed that people were more interested in stories about local business and industry than in national business news or stock market reports. The young were most interested in reading about new products, how business and industry affected the environment, and how business in general operated. Coverage of business by both newspapers and television was considered slightly biased in favor of business and industry, and public statements of major corporations were considered generally trustworthy. (2) A study of reader interest in sports news showed that males, the middle-aged, the elderly, and persons with higher education and income expressed the most interest in sports news; but a breakdown of sports news showed that females were more interested than males in local sports. (3) Although people say there is too much violent subject matter in the news about foreign countries, the respondents to a set of specially prepared foreign news stories rated the article with violent subject matter as the most interesting; but respondents did consider stories that related foreign news events to home and country as more interesting than stories which emphasized conflict. This report is one of a series of papers presented to a continuing in-house seminar on learning sponsored by the Ford Foundation. The paper reports on several schools where writing and individual expression are valued, identifies one approach to the teaching of writing, and addresses two central questions underlying the crisis of writing in the United States: Is it important to write? And, if so, why don't we write? The first question is answered affirmatively in the first section of the paper with the reasons that writing contributes to intelligence, develops initiative, and is often the means to a personal breakthrough in learning. The second section of the paper discusses the second question and offers such reasons for our failure to write as inadequate preparation of teachers to teach writing and too little concern for the individual development of the learners themselves. The third section proposes the process-conference approach to teaching writing as a proven, workable way to reverse the decline of school writing. This method is described as one

in which teachers help students by initiating brief, individual conferences during the process of writing, rather than by assigning topics in advance of writing and making extensive corrections after the writing is finished. (AEA)

An Exploratory Analysis of Selected Early Television Commercials Compared with Selected Recent Television Commercials.

Pub Date—Aug 80

Note—18p; Paper presented at the Annual Meeting of the Association for Education in Journalism (63rd, Boston, MA, August 9-13, 1980).

Pub Type—Reports—Research (143)—Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Advertising, Characterization, *Comparative Analysis, Ethnic Stereotypes, *Production Techniques, Sex Stereotypes, *Television Commercials, *Television Research

The characteristics of 69 award-winning television commercials from 1948 through 1958 were compared to those of 58 award-winning commercials from 1976 and 1977. The examined characteristics were type of storyline used, selling strategies, use of humor, live action versus animation, production techniques, and the depiction of blacks, women, orientals, and "rugged" men. Apparently television commercial formats have remained relatively consistent over the years, with the only noticeable change being an increase in dramatic structure. Significantly fewer animated commercials were used in the more recent period. Blacks and orientals, two groups that did not appear in any of the older commercials, were found in small percentages of the more recent ones (the orientals were depicted in stereotypical situations). Women appeared in increasing numbers in the later commercials and were depicted as more independent than those in the earlier commercials; but they continued to be portrayed as sex symbols in some of the later commercials. The rugged, individualistic outdoorsmen so often found in older commercials were rarely found in the more recent commercials (one modern commercial was a tongue-in-cheek spoof of this "rugged" characterization). The standard length of 1948-58 commercials was 60 seconds, while the length of commercials in the more recent group was equally split between 30 and 60 seconds. The 1976 and 1977 commercials showed increases in the number of scenes per commercial. (RL)

Descriptors—*Adolescent Literature, *Children's Literature, *Literary History, Literature Appreciation, Mass Media, Poetry, United States Literature

A major trend in children's literature is the growing academic recognition of the field—indicated by the large number of new texts that have been published since 1975. Scholarly periodicals in the field have likewise grown since the 1970s. Library science, elementary education and English literature have fostered the development of children's literature. Current trends in the subject and treatment of children's literature include (1) the celebration of traditional America indicated by "A Gathering of Days" and "Ox-Cart Man" receiving the 1980 Newbery and Caldecott awards, and by the conservative mood of the country; (2) a continuing presentation of ethnic materials effectively portrayed in picture book format; (3) fewer strident examples of street language and more emphasis on the stylistic grace of language, which may enhance poetry; and (4) the progressing rapprochement between the mass media and children's books providing more media translations of children's books. Descriptors—*Attitude Change, *Change Strategies, Creative Dramatics, Elementary Secondary Education, *Literature Appreciation, Mass Media, *Motivation Techniques, Oral Reading, *Student Attitudes, *Student Interests, Teaching Methods, Writing (Composition)

Too often teachers ask students to forget their personal experiences in relation to a literary work when they come into the classroom. Many classroom practices (selection of materials, book report/test syndrome, and ineffective assignments) can be detrimental to the pleasure in reading and the building of a desire for continued interest in books. An environment can be created in which students feel comfortable about discussing their responses to their reading, including such approaches as (1) reading groups—developing small reading interest groups that suggest to students that one reason for reading is the opportunity to share reading experiences with others; (2) oral and dramatic activity—providing an aesthetic dimension and aiding comprehension and appreciation; (3) writing activity—encouraging the student's response to what has been read without dwelling unduly upon critical reaction; and (4) media activity—making the study of literature more interesting by adding a dimension that is part of students' lives. Rather than teaching literature as a depersonalized object that has little relevance to the students' lives outside the classroom, teachers must acknowledge the great importance of the reader's personal response and the text. Let's Keep Photographers Out of Court: A Legal Primer for Photographers.

Pub Date—Aug 80

Note—19p; Paper presented at the Annual Meeting of the Association for Education in Journalism (63rd, Boston, MA, August 9-13, 1980).

Pub Type—Information Analyses (070)—Speeches/Meeting Papers (150)

Descriptors—*Court Litigation, Journalism, *Legal Problems, *Legal Responsibility, *Mass Media, Photographers, *Photography

Identifiers—*Photojournalism

Photojournalists who sometimes do freelance work should have an awareness of the legal issues relating to their work. The history of litigation involving photographers is clouded by misapplication of existing law, ambiguity in applicable law, and lack of knowledge on the part of all parties. Nonetheless, certain basic principles, if followed, provide a measure of guidance for photographers who sincerely wish to keep themselves out of costly legal battles. Four areas of mass communication law that bear particular relevance to the photographer are invasion of privacy, libel, contracts, and copyrights. A number of court cases involving photographers illustrate several tenets that photographers should try to follow, including the needs to understand privacy law, to know how captions under photographs can make them libelous, to use consent forms in all photographic work, to register photographic copyright, and to occasionally talk to local attorneys about current issues in media law. (A list of 13 principles/suggestions for photographers to follow is offered.) (RL)

Report No.—SWRL-TN-3-79-03

Pub Date—14 May 79

Note—25p.

Pub Type—Reference Materials—Vocabularies/Classifications (134)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Communication Skills, Elementary Education, *English Instruction, *Language Arts, *Vocabulary Development, *Word Frequency, *Word Lists

This technical lexicon for elementary school communication skills instruction was compiled from high-frequency words in six previously compiled technical lexicons: grammar, composition, spelling, handwriting, reading, and literature. Following a description of procedures used in preparing the lexicon, three appendices provide student terms, teacher terms, and student terms arranged by grade level. The listings of the terms contain average grade level designations, frequencies (low, medium, high, very high) based on the total number of grade levels at which reviewers found the word, and the subject areas in which the terms were used. Student terms not on the teacher list are asterisked; similarly, teacher terms are asterisked when they also appear on the student list. (RL)

Descriptors—Elementary Secondary Education, *Student Evaluation, Teaching Methods, *Test Construction, *Testing Problems, *Test Items, *Writing Skills

Specifying and writing appropriate items for student writing assessments is an exacting task. All too frequently, however, teachers approach this task by reading a skill statement and hurriedly writing a few items with correct answers combined with several distractors. This approach disregards the essentials of isolating a single skill for assessment, considering whether a productive rather than a receptive skill is being assessed, guaranteeing the precision of the directions, and serving diagnostic purposes with the use of appropriate distractors. Writing accurate, appropriate, precise specifications is time consuming.

but such effort by writing teachers is essential when the results of the project may be used in minimum competency testing. (Nine items—each listing the skills statement, grade level, and the sample item—are offered as illustrations of the difficulties inherent in the construction of test items for writing assessments.) Descriptors—*Learning Theories, Models, *Writing (Composition), *Writing Instruction, *Writing Processes

Linda Flowers and John Hayes have formulated a cognitive model of the composing situation, including the recursive composing process. This model has been converted into an instructional model that is appropriate for the design of instruction in writing. The instructional model incorporates three major units: task environment, composing process, and long term memory. The task environment includes the composing problem, the text produced, and feedback. The composing process includes planning (setting goals, generating ideas, and arranging them), translating (the actual writing), reviewing, and changing. These subprocesses operate cyclically. Long term memory includes knowledge of content, skills, and techniques used in composing, as well as knowledge of the use of outside sources. (Author/FL)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Educational Change, *Educational Improvement, Elementary Secondary Education, English Instruction, *Teacher Role, Writing (Composition), *Writing Instruction, *Writing Processes

One of the most disconcerting findings of researchers who have looked at the way writers write is that their processes bear little resemblance to what is expected of students in the classroom. Some aspects of the lesson that do not correspond to our current understanding of the composing process are (1) providing no time for the conception and incubation of ideas, (2) allowing no opportunity for the use of expressive language, (3) assigning topics of little interest to the students, (4) using an oversimplified formula for composing, (5) relying on a stiff form of outlining as a necessary first step in composing, and (6) attempting to improve writing by focusing on the elimination of errors. Teachers must help students realize that writing is a process of discovery, a way of revealing their own thoughts. They must also keep in mind how varied the writing process can be, both from writer to writer and from task to task. The writing program should be flexible enough to accommodate the composing processes with which students have experienced success, while at the same time providing them with opportunities for experiencing alternate strategies which they may adopt as part of their personal repertoire. An Investigation of the Effects of Sexism and Sex Role Identification on the Criticism of Classroom Speeches.

Pub Date—Nov 80

Note—36p.; Paper presented at the Annual Meeting of the Speech Communication Association (66th, New York, NY, November 13-16, 1980).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Communication Research, Evaluation Criteria, Females, Higher Education, Males, Research, *Sex Bias, *Sex Differences, *Sex Role, Sex Stereotypes, *Speech Communication, Speech Skills

A study was undertaken to clarify the inconsistent research findings on the effects of the sex of the evaluator and the sex of the speaker in classroom speech criticism by examining the effects of the sex role identification and the sexism of the evaluator. One hundred twenty-three college students enrolled in a basic public speaking course completed the Bem Sex Role Inventory, which measures a person's femininity, masculinity, or androgyny, and the

Pearson Response to Sexism, which measures an individual's perceptions of the differences between sex roles. Throughout the quarter-long course, the students were randomly assigned to critique the speeches of other students. Approximately ten people critiqued each of the speakers. At the end of the course, ten critiques of male speakers and ten critiques of female speakers were randomly selected for each evaluator and the total points assigned to each speech by the evaluator was recorded. The results showed that feminine females tended to be more lenient in their criticism than androgynous persons, who, in turn, were more lenient than masculine males. In addition, sexist evaluators were more harsh than were nonsexist evaluators. A high correlation between sex and sexism demonstrated that women were most often nonsexist and that men were most often sexist in their evaluations. (FL)

Metakinesic Behavior in the Description of Non-Verbal Behavior.

Pub Date—Aug 77

Note—26p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Adults, *Body Language, *Communication Research, *Nonverbal Communication Identifiers—*Gestures, *Metakinesics

Metakinesics, a gesture used to describe another gesture, was examined in four judges discussing videotapes of 12 children listening to a story teller. The analysis of the data was divided into four parts: (1) comparing the judges' metakinesics among themselves, (2) comparing the judges' kinesics in taped and untaped situations, (3) comparing judges' kinesic behaviors with their metakinesic behaviors, and (4) analyzing in detail the interpreting functions of one of the judges. What emerged from the analysis of the data was a process of metakinesics programming that was similar to that in Eugene Nida's ethnolinguistic model of translation. It appeared that the image of the kinesic behavior of the model (storyteller) was mediated through the general kinesic behavior of the interpreter (judge) before it was produced metakinesically. The mediation process involved the interpreter's rules of ethnokinesics, the interactional situation of the moment, and possible constraints of seating arrangements or physical objects on the interpreter. Brain Specialization Research and the Teaching of Nonverbal Communication.

Pub Date—80

Note—14p.

Journal Cit—Iowa Journal of Speech Communication; v12 n2 Fall 1980

Pub Type—Information Analyses (070) — Journal Articles (080) — Guides - Classroom - Teacher (052)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Attitude Change, *Cerebral Dominance, *Change Strategies, Higher Education, *Nonverbal Communication, *Perceptual Development, Secondary Education, Speech Communication, Speech Curriculum, Theories, *Visual Literacy

The connectionist theory of brain functioning, which holds that specialization exists within the brain, has three implications for teachers of nonverbal communication. One implication involves the relative emphasis to be placed on linguistic/linear versus nonlinguistic/nonlinear mental processing. Teachers can shift emphasis to nonlinguistic processing by using John W. Weigart's set of visual symbols to create images of abstract concepts instead of describing the concepts in words. Since verbal and nonverbal behaviors tend to be processed in different areas of the brain, another implication of connectionist theory is that nonverbal behaviors are not easily explained in linguistic terms, suggesting the need for less certainty in the interpretation of nonverbal behaviors. Teachers can demonstrate this by showing their classes videotapes of group discussions in which people display various moods through nonverbal characteristics. Students will probably confuse certain characteristics (tiredness-irritation, shyness-arrogance), thereby alerting them to the dangers of giving verbal labels to nonlinguistic behaviors. Finally, the connectionist theory implies a need to widen the definition of literacy. Teachers of nonverbal communication can offer experiences in visual literacy by using films, music,

and tactile experiences to increase sensory awareness. These activities introduce students to the range of visual, aural, and sensory patterns that are integral parts of thinking and communicating. (RL)

Family Matters: An Approach to the Theatre and to Theatre Research.

Pub Date—Aug 80

Note—20p.; Paper presented at the Annual Meeting of the American Theatre Association (44th, San Diego, CA, August 10-13, 1980).

Pub Type—Information Analyses (070) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Acting, *Drama, Family Counseling, *Perspective Taking, *Research, *Role Perception, Role Playing, Systems Analysis, *Systems Approach

The relational concepts developed in mathematics and psychology are used in this paper to explicate the needs and responsibilities of dramatic acting and theatre research. A parallel is constructed between the emergence of the mathematical concept of function, the awakening of psychology to the concept of relationship (especially regarding family counseling), and the functional relationships of actors dramatizing situations before audiences. Descriptions of developments in family counseling show the therapeutic effects of psychodrama and how actors can learn from such family counseling procedures. It is proposed that actors are a part of society who simulate the lives of other members of society for the benefit (understanding) of society as a whole. This approach to drama based on systems theory should stimulate new ideas about acting and renewed enthusiasm for theatre research. (RL)

Descriptors—*Classification, Communication (Thought Transfer), *Decision Making, *Group Dynamics, Interaction Process Analysis, Measurement Techniques, *Organizational Communication, Problem Solving, *Systems Analysis Identifiers—*Coding

This paper is an account of the theoretical and practical underpinnings of the Decision-Proposal Modification Coding System (DPM), which allows researchers to study more accurately the many aspects of group decision making in organizations. Following an introduction that reviews and supports arguments for process-oriented research on decision making, several conclusions of past research on decision making are summarized. Other sections of the report contain discussions of the following topics: (1) the situation and content of organizational decision making, (2) the use of role theory to support the perspective for creating the coding system, (3) the sequences in the process of negotiating decisions, (4) a multilevel model of decision making, (5) the eight assumptions underlying development of the DPM, and (6) the criteria for categorizing organizational communication with the coding system. The codes and their definitions are attached. (RL)

The Effects of Numerical Imbalance and Gender on Tokens: An Examination of Kanter's Theory.

Pub Date—May 80

Note—28p.; Paper presented at the Annual Meeting of the International Communication Association (30th, Acapulco, Mexico, May 18-23, 1980).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Adults, *Communication Research, Females, *Group Behavior, *Group Dynamics, Males, *Organizational Climate, Organizational Communication, *Role Perception, *Sex Differences

A study examined the effects of gender on social interaction under numerically imbalanced conditions. Specifically, the study tested R. M. Kanter's

assumption that all tokens (individuals who enter a work environment where their gender is numerically scarce) respond in a similar manner to token conditions, although evidence exists that males and females respond differently. An interpersonal simulation was run to test both males and females under three different sex ratio conditions. Subjects were 122 librarians—42 males and 80 females. These subjects role-played situations in which they were members of minority groups in the ratios 19:1 (skewed), 6:1 (tilted), and 1:1 (balanced). Effects were measured using the Situational Communication Apprehension Measure (SCAM), because responses in extreme ways would be evidence of perceived performance pressure. The degree of numerical imbalance was found to be linearly related to performance pressure, and males felt significantly less performance pressure than females under the highly skewed sex ratio conditions. Overall, Kanter's theory was supported. (RL)

Identifiers—*Conversation

A study was conducted to compare the validity of two theories of interpersonal communication: (1) uncertainty reduction theory, based on the assumption that communication consists of attempts to reach a cognitive state of balance, and (2) coordinated management of meaning theory (CMM), based on the assumption that persons attempt to create a coordinated conversation coherent to each person and under their mutual control. Nine dialogues were developed to represent a first social meeting of two persons. Three types of information sequencing (derived from uncertainty reduction theory) and three levels of aligning actions (derived from CMM research) were manipulated in the dialogues. Each of 180 college students was asked to read one dialogue and rate the conversants on scales measuring six factors related to communication. The results did not support the hypothesized relationship between socially normative performance and positive evaluations derived from uncertainty reduction theory. They did support the perspective of CMM theory, which predicts a preference for conversants who show the ability to coordinate extranormative patterns of interaction. The data suggested a reciprocal relationship in which communication creates patterns of social order that may in turn be used by conversants to guide talk. (GT)

Descriptors—Bureaucracy, *Communications, *Communications Satellites, *Cooperative Planning, Information Systems, *International Organizations, *Organizational Communication, Specialists, *Standards, Technological Advancement

Identifiers—International Telecommunication Union, United Nations Economic and Social Council Communications specialists should interpret the slogan "integrated communications planning" as a concern for communicating efforts to promote education, health, racial equality, and world peace rather than as a call to expand bureaucratic power and control. The advantages of multiple initiatives and of allowing specialists to perform their specialties could be endangered by an overly strong and

comprehensive integrated framework. Examples of situations where such a framework could be detrimental include (1) the setting and freezing of technical standards for the telecommunications industry, (2) satellite orbit and frequency allotments in a tightly unified satellite communications system, and (3) attempting to coordinate the efforts of organizations as diverse as the International Telecommunication Union (ITU) and the United Nations Economic and Social Council (UNESCO). The history of freedom consists of efforts to confine authorities to their strictly restricted domains. Communications planners should have their authority narrowly confined. (AEA)

Descriptors—Consumer Economics, *Economics, *Information Needs, *Information Systems, Information Utilization, Marketing, *User Satisfaction (Information)

Unlike other economic goods whose worth can be determined through market research, the market place for information denies the creator of that information the preferences of consumers. Copyright may be considered partial compensation. Copyright, however, is not an aspect of information per se, but rather a result of the way the information is packaged and distributed. In an information market, if the buyer has perfect information, the market is destroyed, not perfected. The consumer also faces a problem, as the consumer is reliant on peers for help in both evaluating and pricing information. The evaluation and pricing strategies require detailed usage data from the information system that supports the content, data that can be captured only by systems capable of supporting content behaving as a private economic good. A network's ability to process data about how content is used and to convert that into useful information to aid in the evaluation and pricing of content could be our most important resource as we enter the information age. Identifiers—*Whistle Blowing

Although "whistle blowing" (public protest by employees of management decisions) is being reported with increasing frequency, this paper points out that organizational communication researchers have not examined the phenomenon. The paper offers a review of current literature on the topic and presents a model, drawn from an examination of 51 whistle blowing episodes, of the steps through which such incidents progress. It also reviews selected areas of organizational communication literature and makes several recommendations for reducing the need for whistle blowing drawn from this literature. A list of the 51 whistle blowing episodes examined is appended. (FL)

Identifiers—*Canada
This review of the impact of the microelectronic revolution on the Canadian telephone industry focuses on the prospect of dwindling job security for telephone workers. Technical advances that are cited as having reduced the industry's job market include the dial telephone, direct distance dialing, directory assistance computerization, and interactive television directories. Also discussed at length are the effects of two computer operated switchboard systems, Traffic Operator Position System (TOPS) and Traffic Service Position System (TSPS), as well as the effects of electronic switching, digital technology, and the attachment of subscriber provided terminal equipment to the telephone network. The paper concludes with the warning that any further introduction of technological innovations must be well-planned or else industrial chaos and turmoil among Canadian organized labor will result. Identifiers—*Intercultural Communication

A descriptive field study was conducted in Seoul, Korea, to assess Korean interpersonal communication. The data for the study were collected through observations of interpersonal communication patterns among students in university classes, between faculty and students as well as among various faculty members, among business people, and between the researcher and his housekeeper. The observations suggested that Koreans (1) disregard personal privacy (in a Western sense) in matters of business and personal affairs; (2) are extremely reluctant to disclose their personal motivations; (3) have exceptional regard for status and position; (4) regard human relationships and contact as especially important; (5) are incredibly generous; and (6) are so image conscious that the appearance of things is more important than their substance, such as in verbal or written commitments to do something by a certain time. Koreans also show unwillingness to take advice and are resistant to systemic change. (MKM)

Descriptors—Code Switching (Language), *Communication Problems, Context Clues, Cultural Context, *Cultural Differences, English (Second Language), *Language Usage, *Second Language Learning, *Speech Communication, *Tagalog

Identifiers—*Intercultural Communication

Examples of cross cultural misunderstandings are examined in this paper to show how cultural (contextual) meaning must be regarded as an integral feature of the overall semantic meaning of an utterance. The examples, taken from the Filipino dialect Tagalog, illustrate how ignorance of the cultural assumptions and attitudes associated with an utterance may well lead to misunderstanding and conflict. What is noteworthy about these examples is that, although they are commonplace and conventional, they conceal a dimension of meaning as long as the Tagalog speaker communicates with other

Tagalog speakers, either in English or in Tagalog. When the speaker talks with a native speaker of English, however, potential problems not entirely obvious to either the speaker or the hearer may occur because the speaker uses lexical equivalents in the target language and the hearer adds a cultural dimension of meaning. For these reasons, foreign language instructors should insist on having cultural notes and comments included in second language learning texts and activities. (RL)

Descriptors—*Communications, *Creative Expression, Film Industry, Futures (of Society), *Mass Media, Radio, *Technological Advancement, Television, *Video Equipment

A brief review of the development of such media as film, television, and radio reveals a pattern that can be applied to the new media of cassette and cable television, videotext and videodisc. The pattern is that while each new electronic invention at first provided familiar material through a novel device, it eventually brought into existence a new set of creative professions and broadened the aesthetic or informational experience of the audience. There is a connection between a technology and its content, and the latter in time comes to influence the whole growth and capitalization of the technology. Constraints in the establishment of new media include the general belief that the possible role of the medium is already filled and the need to accustom the audience to a new level of necessary wastefulness of time or money. It is impossible to predict what will emerge as the content of the new distribution media, but there is an optimism that the new media will facilitate the growth of creative professions based on the technical capability of a single person to make an entire feature film, for example, and on the current phenomenon of the independent producer interested in working apart from the organizational machinery of the film and television industries. Descriptors—*Communication Research, *Group Dynamics, Interaction, *Interaction Process Analysis, *Research Methodology, *Speech Communication

Identifiers—*Conversation

The activities involved in coding conversation sequences and the lack of attention given to their systematic validation within the field of speech communication are discussed in this paper. The paper first reviews briefly the assumptions underlying relational coding and the implications of viewing these activities as practical accomplishments. It provides a theoretic rationale that draws attention to the need to study the cyclic behavior of groups as they sequence themselves conversationally within and across talk. A study that employed these methods of analysis is discussed, as are the findings and their implications for understanding relational development in group systems. Finally, the paper offers a reflexive critique of the methodological assumptions and procedures employed to study these particular group systems. (FL)

The use of telecommunications to expedite business communications in the "office of the future" is addressed in this paper. After briefly describing the development of the telephone industry and its response to consumer needs, the paper discusses the importance of information exchange through word processing, electronic mail, teleconferencing, facsimile devices, and distributed data processing. It also discusses the benefits of a paperless office of the future such as improved office productivity and more effective decision making based on current, complete, and relevant information. The obstacles to using paperless documentation are mentioned, including the question of the legality of electronically stored documents, the current lack of standardization among hardware systems, and the need for retraining all users of the new equipment. Additional potential problems not directly connected to the field of business communications are also discussed. (AEA)

Identifiers—*Indonesia

Information exchanged between people is a renewable expanding resource that can contribute to human growth and development, and the new technology of videotape offers an excellent vehicle for that exchange. Traditional forms of information exchange or communication used in human development work are limited in many ways, and a more positive approach to development communication involves the following principles: (1) equality exists between sender and receiver, signaled by the willingness to listen as well as talk; (2) people must be accepted as they are and spoken to on that ground; (3) communication must deal in feelings as well as thoughts; and (4) telling the truth is essential. Videotape technology is ideally suited to serve these principles, and its value was demonstrated in the development of a small format video program that was produced to qualitatively evaluate the results of family planning in Indonesia. Program production involved representatives from both the family planning program and the television network in each of Indonesia's 15 districts, with local Indonesian women exchanging their views on various methods of birth control. Identifiers—*Japan

The public broadcasting service in Japan, the NHK, is a nongovernmental, noncommercial, and nonprofit making organization that is financed solely by fees collected from viewing households. At present, 80% of the total number of households in Japan have a contract with NHK and 96.5% of these households have actually paid the receiving fee to NHK. As a broadcasting organization, NHK is one of the world's largest in scale with five radio and television channels, more than 60 program producing and material gathering stations, more than 3,000 transmitter sites, and more than 1,680 programs produced and broadcast each week. A crisis in financing has arisen as expenditures are rising with inflation and income from receiving fees from new sets is decreasing. NHK is working hard at building audience support for both programing and continued fee payment as a method of continued financing for the public broadcasting service, although some audience resistance to this method is being evidenced. The NHK is focusing on continued cooperation with the national government and will strive to maintain its independence without reducing program hours or production. (MKM)

Identifiers—*Canada

The development of solutions to national and international communications problems is a matter of the highest priority because of the speed and impact of current communications changes. Canada, which has developed many sophisticated communications technologies and applications, has found that in working out a communications relationship with the United States it must develop a balance between protecting legitimate sovereign rights and ensuring

the free flow of information. For example, one problem implicit in the flow of data across national boundaries is the extent to which control over data is retained by the originator or the originating countries. Centralization of data, while perhaps efficient, carries some very real costs that must be considered. Many communications concerns regarding developing nations need to be considered. Recent events have shown that an accommodation to developing nations' needs and a rapprochement between developing and developed nations are occurring. The challenge for each country is to stimulate the production and dissemination of information in a way that permits society, culture, and the economy to flourish. One of the major challenges is to ensure that communications facilities appropriately serve people's needs, and the most delicate question is how much control governments should assume over information flow. Identifiers—*Japan

The development and use of broadcasting satellites in Japan are discussed in this paper. The paper describes the medium-scale experimental broadcasting satellite, YURI, launched by NASA in 1978, and reports that experiments with YURI in the areas of basic technologies in the broadcasting satellite system, experiments on satellite control technologies and operational control techniques for the satellite broadcasting system, and experiments of reception of radio waves from a broadcasting satellite have shown favorable results and that practical application of broadcasting satellites are technically feasible within the foreseeable future. It recommends to the Space Activities Commission of Japan that an operational broadcasting satellite be launched in 1983, prior to the planned launchings of space platforms in 1985 and 1990. The paper notes that space development in Japan has now reached a turning point that will lead from the initial phase of ground work consolidation to a second phase of practical application, working under the auspices of

the Telecommunications Satellite Corporation of Japan, recently established by the Japanese Diet. Objections of commercial broadcasters who fear disruption of regional broadcasting by broadcasting satellites are also presented. (MKM)

Descriptors—Aerospace Technology, *Broadcast Industry, *Communications Satellites, Foreign Countries, *Freedom of Speech, *International Relations, *Technological Advancement, *Telecommunications

Twenty-three years after the launching of the first satellite, there is still no fully operational direct broadcasting satellite system. Since such systems were expected much earlier, many questions present themselves concerning (1) whether there is a perceived need for such a system, (2) whether the technology is available at cost effective levels, (3) whether that technology has been adequately tested, and (4) whether the system could create more problems than it would solve. An evaluation of the situation suggests that there is a need for direct broadcast satellites to serve large areas of low population density and that the technology is available at cost effective levels; experiments and studies in Canada have indicated that low power level satellites are especially cost effective. In addition, the technology is being tested and three satellite launches have been conducted: HERMES, providing service to Canada, the United States, and Australia; YURI, providing service to Japan; and ANIK-B, providing service to Canada. Other projects are currently under consideration in more than nine countries. Problems do arise from the system, since satellite coverage is very broad and the signal cannot be prevented from crossing national borders, thus causing conflicts between the provision of a totally free flow of information and the right of each nation to determine what shall be broadcast to its citizens. This guide is designed to assist school administrators and teachers in planning and developing dramatic and theatre arts programs that meet the needs of a wide range of students from kindergarten through grade 12. The first section of the guide sets forth a philosophy, goals, and criteria for effective theatre arts programs in general. The second section outlines a model program for primary and elementary schools and includes instructional objectives, a statement of program scope, and sample activities. The third section details a model program for the junior high or middle school and offers a sample instructional unit on exploring careers through creative dramatics. The fourth section delineates a model program for the secondary school and presents a course outline on theatre arts exploration and a sample instructional unit on the nature of theatre. Each program outline also contains charts of expected competencies for the appropriate grade levels and self-assessment checklists for evaluating the programs. Appendixes contain suggestions for building a theatre arts program, notes on program evaluation, and a list of several elements common to all arts. (FL)

A System for Coding Integration and Differentiation Messages (SID): Operationalizing Inclusion.

Pub Date—May 79

Note—35p.; Paper presented at the Annual Meeting of the International Communication Association (29th, Philadelphia, PA, May 1-5, 1979).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Adults, *Communication Research, *Group Dynamics, Higher Education, Interpersonal Competence, Models, *Speech Communication

Identifiers—*Coding

A "System for coding Integration and Differentiation messages" in group communication (SID) was developed, based on the theoretical and empirical work of W. C. Schutz, W. Bennis and H. Shepard, and A. Koestler. In SID, integrating messages are defined as those dealing with material internal to the group and having positive affect, or internal with neutral affect and agreement. Differentiating messages are defined as: (1) those concerned with material external to the group and showing positive, negative, or neutral affect; (2) internal messages showing negative affect; and (3) internal messages with neutral affect and disagreement. Messages that are neither integrating nor differentiating are internal, with neutral affect and neutral agreement. SID was used to categorize the communication in two self-analytic groups, each composed of seven college students. The results showed that, in both cases, the groups began with low integration and high differentiation and gradually increased integration behavior and decreased differentiation behavior. (FL)

Human Values and Ego-Involvement: Toward the Conceptual Clarification and Operational Precision of Social Judgment Theory.

Pub Date—Nov 77

Note—25p.; Paper presented at the Annual Meeting of the Western Speech Communication Association (Phoenix, AZ, November 19-23, 1977).

Pub Type—Information Analyses (070) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Attitudes, *Measurement Techniques, *Self Concept, Social Problems, *Speech Communication, Theories, *Values

Identifiers—*Social Judgment Theory

This paper suggests that human values play a central role in communication and in the conceptualization of social judgment theory's fundamental terms: attitude and ego-involvement. It contends that values are the basis of an individual's attitude or category system and that one's level of ego-involvement in an issue is a function of (1) the importance of values associated with the topic and (2) the strength of the relationship between the issue and values. The paper posits the need for a value index of ego-involvement and provides guidelines for the development of such an instrument based on the Rokeach Value Survey, describing the advantages such an index would have over existing measures of ego-involvement. Identifiers—*Japan, United States

The Communicator Style Measure (CSM) was administered to 731 students in Japanese universities and 520 American students at the University of Hawaii to discover if members of certain ethnic or national groups possessed a style of speaking that

distinguished them from members of other groups. The CSM contains 51 randomly ordered items that inquire of subjects if a particular communicative behavior is descriptive of how they perceive their style. The nine behaviors gauged as independent variables are (1) dominant, (2) attentive, (3) friendly, (4) relaxed, (5) contentious, (6) dramatic, (7) animated, (8) open, and (9) impression-leaving. The one dependent variable measured is communicator image. The student responses were analyzed using a procedure for comparing independent samples of unequal size. The results showed that the American and Japanese students were significantly different on all variables except dominance and friendliness. Specifically, the Americans perceived themselves as more attentive, contentious, animated, and impression-leaving than the Japanese and had a stronger image of themselves as communicators. The Japanese saw themselves as more relaxed, dramatic, and open than the Americans. (FL)

Lange, Jonathan I.

Rhetorical Sensitivity and Understanding.

Pub Date—Feb 80

Note—20p.; Paper presented at the Annual Meeting of the Western Speech Communication Association (Portland, OR, February 16-20, 1980).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Adults, College Students, *Communication (Thought Transfer), *Communication Research, *Communication Skills, *Dating (Social), Higher Education, *Individual Characteristics, *Interpersonal Competence

The relationship between understanding and rhetorical sensitivity was studied in the context of dating relationships. The hypothesis was that rhetorically sensitive persons would understand their dating partners better than persons who were not rhetorically sensitive. Subjects for the study were 34 dating couples in which one of the partners was enrolled in an introductory communication course. These subjects provided data by completing a two part questionnaire. The RHETSEN scale was used to measure rhetorical sensitivity, while a modified version of the Interpersonal Perception Method was used to gauge understanding. Correlational analyses failed to support the hypothesis. There were no significant correlations between rhetorical sensitivity and measures of understanding at the individual level. Two explanations for the results are (1) the apparent complexity of the rhetorically sensitive individual, and (2) differences between the attitudes and the behaviors of rhetorically sensitive persons. Descriptors—*Cognitive Processes, *Concept Formation, Conflict, Conflict Resolution, Fundamental Concepts, *Persuasive Discourse, *Rhetoric, Speech Communication

The roles that essentially contested concepts play in persuasive discourse are examined in this paper. The first section of the paper reviews W. B. Gallie's original explication of the nature of essentially contested concepts and the body of theoretical literature that has developed in response to it. It then notes three major areas of disagreement that have arisen within the theoretical literature: (1) whether the definition of an essentially contested concept can be resolved, (2) whether an exemplar must exist in order for a concept to be essentially contested, and (3) whether essentially contested concepts are rooted in rhetorical argument. The second section of the paper analyzes and responds to these three areas of theoretical conflict. It then uses the responses as a foundation for the creation of a consistent and coherent perspective on both the nature of essentially contested concepts and on the roles that they may play in persuasive discourse. The five plays most frequently produced in high schools—"Our Town," "Harvey," "Arsenic and Old Lace," "You Can't Take It With You," and "The Curious Savage"—perpetuate an image of women that is no longer tolerated in most educational materials. An analysis of these plays shows that they include many more male than female roles and that female characters tend to fall into two familiar stereotypes: woman as nurturer (homemaker, nurse, caretaker of men and children) and woman as lovable, ridiculous eccentric whose ideas are not to be taken seriously. Not one of the five plays includes an example of a competent, decisive woman who solves problems and meets challenges independently. There are good reasons for continuing to produce these plays: they are important examples of American dramatic literature, and they are popular with audiences and actors. Teachers can mitigate the effects of their negative images of women through two strategies: (1) they can use the plays as teaching devices for examination of attitudes toward women and of the changing role of women, and (2) they can balance the production schedule with plays offering a more positive or contemporary image of women. (The paper lists criteria for choosing plays that portray women positively, and it discusses a number of plays that meet the criteria.) (GT)

Descriptors—*Broadcast Industry, *Federal Regulation, *Freedom of Speech, *Government Role, *Technological Advancement, *Telecommunications

Identifiers—*Federal Communications Commission

In this address, the chairman of the Federal Communications Commission (FCC) reviews commitments he made as he took office and presents some of his views on the broadcasting industry, government regulation, and the overall communications environment. He reiterates his opposition to program censorship and notes that the FCC has been successful in preventing control of speech on radio and television. He notes that a policy of zero-based regulation has been followed by eliminating third class license testing requirements, changing first class operators' job requirements, eliminating hundreds of regulations, and developing a new approach to all renewals. Children's programming is an area in which the chairman feels that the marketplace has failed to provide adequate programming and in which the FCC may reduce barriers to alternative media that want to enter the marketplace with specialized services. He notes the changing world of communication and predicts that existing stations will adapt to new markets, new technologies, and innovations in broadcasting with the same skill that radio adapted to television during the last few decades. Believing that changes in regulatory policies are inevitable, he urges broadcasters not to resist new services, new entry, and new market conditions. (MKM)

Sociolinguistic Analysis of Texts.

Pub Date—Apr 80

Note—13p.; Paper presented at the Annual Meeting of the Central States Speech Association (Chicago, IL, April 10-12, 1980).

Pub Type—Speeches/Meeting Papers (150) — Information Analyses (070)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Communication Research, *Dialogs (Literary), *Literature, *Oral Interpretation, *Sociolinguistics, *Speech Communication, Speech Habits

A sociolinguistic analysis of texts is advocated for expanding an oral interpreter's creation of an event from written texts. Two studies are reviewed that suggest that language choices are related to the speaker's purpose, thought processes, role, cultural expectations, and sex. The specific area of study suggested as highly useful for interpretation analysis is the investigation of speaker purpose, or in sociolinguistic terms, functions that refer to the ways an act of speech operates to accomplish a goal for the speaker. A diagram compares three function categories common in speech situations. S. Ervin-Tripp's categories of conversational openings and their corresponding functions are suggested for use when analyzing poetry. It is also suggested that viewing a literary selection as a series of speech acts and identifying the associated functions assists the performer in several ways. One result of functional analysis of dialogue is said to be a greater understanding of forces operating between characters that will help release the performer's behavior. (MKM)

Interruptions: Structure and Tactics in Dyadic Conversations.

Pub Date—May 80

Note—25p.; Paper presented at the Annual Meeting of the International Communication Association (30th, Acapulco, Mexico, May 18-23, 1980).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Behavioral Science Research, *Behavior Patterns, Communication Problems, *Communication Research, *Communication Skills, Feedback, *Interpersonal Competence, *Interpersonal Relationship, *Sex Differences, Speech Communication

Identifiers—Conversation, *Interruption

An exploratory study was conducted to define and differentiate interruptions structurally and tactically. The participants were 60 college students assigned to female-female, female-male, and male-male conversational dyads. The dyadic conversations were recorded for 14 minutes, during a period of "getting to know each other" and during a task of agreeing on the rank order of a list of behaviors. Dyad type was found to have a significant effect on the occurrence of particular types of interruptions. The female-female pairs were more likely to allow interruptions that lasted a substantial period of time without necessarily changing speakers. Female-male dyads exhibited the most proportionate use of "back channel" interruptions (conventional signals of attention to continuous discourse). Females were more likely to engage in interruptions of greater length, where there was no exchange of turns, while males were more likely to engage in interruptions where there was an exchange of the speaking turn. Dyad type correlated with interruption tactics, with more topic changes and connections (bringing together two entities or separate parts) occurring in dyads where males were present. A pattern of interruption behavior emerged indicating that once an interruptive behavior occurred, it became established in that conversation and was repeated for a time. (RL)

A study explored the means by which children apply knowledge of the television medium and of the real world in distinguishing among the levels of reality and fantasy presented on television. Fifty-four second-, fourth-, and sixth-grade children were presented with a series of paired (reality/fantasy) television shows. They were asked to choose which show in each pair was the more real and to supply the reasons for their choices. The results indicated that the children reached similar decisions about which shows were "more real." However, the reasons underlying those decisions showed distinct developmental differences. In comparing program content to real life, children began with rigid assessments of the actuality and possibility of the content, often focusing on specific physical elements; eventually, they began to apply more general and comprehensive evaluations of the plausibility of characters and plots. In addition, when applying their knowledge of television by citing television-specific criteria, children initially relied on the observable features of the medium and eventually moved toward an increased recognition of features that indicate the representational and fictionalized status of television. Other findings were that older children had an increased number of strategies that enabled them to assess a wider diversity of program types and that they had developed the ability to appreciate the realistic aspects of television as well as its fantasy elements. Three preschool children were observed intensively for three years to examine the ways they attempted to organize and classify the world of television. Of interest were children's changing abilities to differentiate six adult-perceived categories of television fare: cartoons, advertisements, news, adult shows, children's shows, and "Sesame Street." In addition, children's understanding of the relationship between television characters and their shows, the concept of target audience or producer's intent, and the temporal organization or scheduling of the television world were explored. The acquisition of the six categories was found to occur in the following order: advertisements, cartoons, "Sesame Street," news, children's shows, and adult shows. The children were unable to organize television fare consistently in the categories until after the age of three; they were able to distinguish all six categories by the age of four and one-half. After the age of two, children passed through a series of steps such that by age five they recognized show beginnings and endings and were able to state the specific times and days of certain shows, reflecting a relatively solid grasp of television's temporal organization. Still to be grasped by the five-year-old children were the exact nature of the links between characters and their shows and the concept of target audience. (Author/RL)

Descriptors—*Communication Research, Cubans, *Hispanic Americans, *Mass Media, *Mexican Americans, Political Power, *Political Socialization, Puerto Ricans, *Socioeconomic Influences

An examination was undertaken of the relationship between some socioeconomic variables, particularly communication exposure variables, and the political participation of Puerto Ricans, Mexican-Americans, and Cubans living in Chicago, Illinois. Data for the investigation were taken from an earlier survey of the communication patterns and organizational activities of that city's Hispanic-American residents. Interview data gathered from 388 respondents were analyzed to determine two types of political behavior (voting and nonvoting activities) and media exposure. Socioeconomic background data were also analyzed (sex, age, years of residence in the United States, level of education, and income). The analysis revealed that political participation of Hispanic Americans, both voting and nonvoting activities, was not equal across ethnic groups. Results with respect to one background variable, years of residency in the U. S., indicated that with the passing of time, the Hispanics in general might become more involved in political activities. In addition, the findings suggested that the effects of mass media exposure are important for understanding and predicting how each ethnic group may or may not participate in United States politics. Descriptors—Audiences, Communication Research, Comparative Analysis, Mass Media, *Political Influences, *Speeches, *Television Research, *Television Viewing

Identifiers—*Audience Response, *Media Effects

A study compared the relative effects and functions of a live versus a televised presentation of a political message. Specifically, the study examined whether (1) the audience for a live political speech differed from the audience for a similar televised speech, (2) a live political speech produced more positive attitude change regarding the speaker than did a similar televised speech, and (3) a live political speech served different functions for the audience than did a similar televised speech. Data for the study were derived from two field experimental procedures. One procedure measured an audience's before-and-after responses to a televised speech by a politician; the other measured before and after responses to a live personal appearance by the same politician. Both events occurred within a three-day

time span in the same city, had approximately the same intent, and shared approximately the same message content. Telephone interviews elicited information from 89 viewers of the television presentation both before and after the event, and questionnaires were used to gather information from 131 people attending the live event. The results indicated that several characteristics differentiated audiences exposed to the message through the two differing channels. In addition, the live channel produced more positive change toward the candidate than did the television channel. The functions that the events served for individuals also differed. (FL)

Descriptors—Child Language, *Delayed Speech, *Language Acquisition, *Language Research, Language Role, *Language Usage, Linguistics, *Mothers, *Parent Child Relationship, Preschool Children, Preschool Education, Reinforcement

A study was conducted to analyze the language behavior of mothers of children with normal language development and mothers of children with delayed language development as they interacted with their children to determine if the two groups of mothers provided different linguistic inputs for their children. Two randomly selected groups of children from two to five years of age (14 normal and 14 language delayed) and their mothers participated in the study. The language of both groups of mothers, as they interacted with their children in a structured task situation and an unstructured free play situation, was audiotaped, transcribed, and analyzed. The findings indicated that the mothers of the language delayed children were providing much of the same linguistic information as the mothers of the normal children. These mothers, however, were providing their children with shorter utterances, used fewer questions, and provided fewer utterances signifying acceptance and more signifying rejection than did the mothers of the normal children. John Sparrow, British attorney and educator, argues that the current rejection of limitations on public decency in the name of freedom of speech needs reappraisal. His comments can be used as a basis to consider whether in the field of public decency the right of public expression in any medium is being upheld at the loss of respect for the personal right of individuals to protect themselves from such indecencies. If it is socially acceptable that people should be able to walk the streets without being physically assaulted, then perhaps they should be able to walk the streets without having their sensibilities assaulted by someone shouting four-letter words, by someone expressing himself nonverbally by exposing his genitalia, by graffiti or posters with objectionable words, or by sexually explicit pictures. It seems that laws must be interpreted by juries seeking to determine what might outrage a person of ordinary sensibilities. While many could become comfortable with laws permitting the protection of sensibilities in public, they still strongly object to the thought of censoring in the more private sphere of theatre, film, literature, painting, and sculpture. This belief in never censoring art and literature must also be reconsidered, since people also are affected by exposure to art and literature. (MKM)

Descriptors—Attitudes, *Creative Writing, Interviews, Opinions, *Oral Interpretation, *Poetry, *Poets, Workshops

The ideas of four contemporary poets—Ann Deagon, Lyn Lifshin, Marge Piercy, and Alice Walker—concerning the oral interpretation of poetry are presented in this paper. The poets' ideas relate to the following topics: (1) the importance of reading poems aloud; (2) reasons why they give poetry readings, and effects of their poetry readings on their poetry; and (3) their attitudes toward the oral interpretation of their poetry by other people. The paper summarizes the poets' responses by noting that all the poets except Walker believe strongly that the oral interpretation of a poem is necessary for its full realization; that Piercy and Lifshin find their own poetry readings often give them critical insights that lead them to make changes in their poems; and that Deagon, Piercy, and Lifshin all are interested in hearing good oral interpretations of their poetry by other people. (Most of the comments presented in the paper were made by Deagon, Lifshin, and Piercy during long interviews; only a few ideas of Walker, who was interviewed briefly, are included.) (GT)

Descriptors—Acting, *Behavior Modification, Dramatics, Higher Education, Speech Communication, *Student Teacher Relationship, *Teacher Improvement, Teacher Responsibility, Teacher Role, *Teaching Methods

Since a fundamental problem of acting-fear is a fundamental human problem, the basic job of acting teachers is to help their students become the kind of people who can act. Acting teachers need to help their students cast off their fears, free their bodies and their imaginations, and learn all the skills of self-knowledge, self-control, and perception so inhibited by fear and by the ego-trap that fear generates. The way acting teachers can accomplish all these things is by going to the experts in the fundamental sciences and technologies of human behavior to get the necessary information, tools, and skills. Without necessarily adopting the notion of therapeutic techniques, acting teachers need to adopt the therapeutic concept of intervention—interacting with another person to change that person's behavior, beliefs, and attitudes. The challenge of such a teaching attitude is that acting teachers will need to re-educate themselves, learning techniques such as Alexander Lowen's bioenergetics, Tai Chi, anatomy, physiology, kinesiology, first aid, CPR, speech science, neurobiology, kinesics, proxemics, and semantics. These studies are essential to acting teachers because they presume to tinker with people's bodies and minds at profound levels. (RL)

Descriptors—Acting, Dramatics, Self Concept, Skill Development, *Teaching Methods, *Theater Arts, Training Methods

Identifiers—*Improvisation

An acting teacher can train students to bring the reality of their personal lives to the various artificial structures that give form to playscripts and that can otherwise induce rigid or mechanical performances if not balanced by the vibrancy of the actor. A series of exercises allows students to discover how they may use their own impulses, responses, and past experiences to bring immediacy, spontaneity, and authenticity to the structure of memorized language. The exercises integrate improvisation into a training program not as an end in itself, but as a means toward making a student a better actor. The exercises also facilitate the transition between improvisations and scene work, moving students from improvisations that are designed to free a personal responsiveness to inner impulses toward maintaining the same freedom of personal responsiveness within the structure of a memorized scene. Students can be led through exercises that begin with physical warm-ups, to games like "follow-the-leader" and "here and now" word game, to open scene dialogues in which students learn that there is no one way a line should be read, and, finally, to memorized dialogue. Differentiating Among Social Situations: An Investigation into the Situational Element in Communication Competency.

Pub Date—May 80

Note—44p.; Paper presented at the Annual Meeting of the International Communication Association (30th, Acapulco, Mexico, May 18-23, 1980).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Adults, *Communication Research, Communication Skills, *Communicative Competence (Languages), Higher Education, *Interpersonal Competence, Research Methodology, *Social Influences

The bulk of communication research has approached competency from a trait perspective and has attempted to identify the individual characteristics that are presumed to generalize across all social settings. The role of social situation and the possibility that some individuals can be competent in some settings and incompetent in others have not been investigated thoroughly. A study was therefore undertaken to refine the theoretical base surrounding communication competency and to take preliminary steps toward exploring the relationship between competency and social situation. First, a set of 50 social situations was generated from open-ended communication diaries kept by 36 college students over a two-day period. This set was then narrowed to a sample of six situations by three raters and was evaluated in terms of (1) personal benefits/goals, (2) resistance, (3) intimacy, (4) apprehension, (5) homophily, (6) rights, and (7) dominance. Next, 296 students were asked to evaluate the situations using the seven criteria. Factor analysis indicated that while the emphasis placed upon a particular situation changed from situation to situation, "personal benefits/goals" and "resistance" accounted for the greatest amount of definitional variance. Discriminant analysis found "intimacy" and "apprehension" to best differentiate the six stimulus situations. (FL)

Language and Cognitive Processes: Directions for Research in Interpretation.

Pub Date—[77]

Note—26p.

Pub Type—Information Analyses (070)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Cognitive Processes, Language Processing, *Language Research, *Language Skills, *Oral Interpretation, *Psycholinguistics, Speech Communication, Speech Skills

This paper indicates the relevance of psycholinguistic research to the study of the interpretation process. Citing selected experiments that demonstrate some of the possibilities for extending research into the language experience of the interpreter, the paper argues that such an approach might lead into examining the experience of imagery, semantic processing of ambiguity, production

of speech and silence, and exercise of memory. It contends, in addition, that there are numerous other aspects of the interpretation process, related to and inseparable from language, that can be studied. Although focusing on experimental psycholinguistic research, the paper suggests other approaches to language study that might be useful. It notes, for example, that sociolinguistic and ethnographic methods are currently contributing to research in oral language and could directly approach the interpretive process. The paper concludes that the act of interpreting literature is a language experience that includes the involvement of the senses, the memory, the imagination, and the intellect and that psycholinguistic research needs to expand understanding of the interaction between the art of interpreting and the interpreter's linguistic-cognitive behaviors. Close It, Sell It, or Lease It: What to Do with That Old School.

Pub Date—Apr 80

Note—16p.; Paper presented at the Annual Meeting of the National School Boards Association (40th, San Francisco, CA, April 19-22, 1980).

Pub Type—Reports - Descriptive (141) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Board of Education Policy, *Building Conversion, Criteria, Declining Enrollment, Elementary Secondary Education, *School Closing, *Shared Facilities, *Space Utilization

Identifiers—*Colorado (Denver)

The Denver (Colorado) Board of Education has taken a number of steps to avoid closing schools. Among these are refiguring school capacities; providing full-time space for programs that do not always function full-time; providing additional private space for related services (psychological, social work, and nursing); expanding instructional materials space; providing space in response to the mandates of Public Law 94-142; and providing programs for the neighborhood. Further attempts to handle the school closing problem were a communitywide examination in 1978-79 of the need for school closings and a recommendation that, for schools with a population of less than 50 percent of capacity, multiple-use occupancy be examined. The school district and the city of Denver have established a commission that attempts to take advantage of the opportunities for better, more efficient use of joint resources. Included are guidelines used in making decisions about surplus school space titled "Criteria for Alternate Use of Surplus Space," and "Criteria for the Disposition of Real Property." (MLF)

Reduction in Force—Is Your Board Prepared?

Pub Date—Apr 80

Note—19p.; Paper presented at the Annual Meeting of the National School Boards Association (40th, San Francisco, CA, April 19-22, 1980).

Pub Type—Speeches/Meeting Papers (150) — Legal/Legislative/Regulatory Materials (090)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Board of Education Policy, *Board of Education Role, *Court Litigation, Declining Enrollment, Desegregation Litigation, Elementary Secondary Education, *Legal Responsibility, *Reduction in Force, School Districts, School Law

With the basic assumption that reduction in force is inevitable, this paper discusses the legal ramifications as well as an orderly procedure for implementing reduction in force. Recent litigation with regard to reduction in force action falls in the broad categories of constitutional questions, statutory law, and contract provisions. Constitutional issues may result whenever an attempt to use the reduction in force procedures to remove unwanted employees can result in the infringement of procedural and substantive constitutional rights. However, most litigation and reduction in force procedures fall within the category of statutory issues. These include the issues of seniority and tenure, legal qualifications, hearing rights, sufficiency of evidence warranting actions, and call-back rights. Concerning the issue of contracts, boards of education need to be sensitive in providing for the possibility of staff reductions to include special provisions in the individual employment contract. As a model, the Phoenix Union High School District reduction in force procedures for classified employees and administrative personnel are summarized. (Author/MLF)

A Systems Approach to Explaining Teachers' Leadership Behavior.

Pub Date—80

Note—37p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Academic Ability, Classroom Environment, Class Size, Community Colleges, *Correlation, Governance, *Leadership, Organizational Theories, Participation, *School Organization, Student Characteristics, Student Teacher Relationship, *Systems Approach, *Teacher Attitudes, *Teacher Behavior, Two Year Colleges

This paper focuses on identifying the way that individual and organizational variables affect the classroom leadership behavior of teachers. Measured are the effects of one individual-level variable and six organizational variables—three at the organization system level and three at the classroom subsystem level. The individual-level variable is teachers' attitudes toward control. The classroom subsystem variables are perceived student competence, student level, and class size. The organization system-level variables are formal participation, informal participation, and individuals' perceptions of the participativeness at their college. Data collected from 147 community college teachers and their students indicate that organizational and classroom characteristics may have an impact on teacher behavior, but that this impact sometimes is moderated by the attitudes of teachers toward control. Descriptors—Business Education, *Cost Effectiveness, *Individualized Instruction, *Instructional Innovation, Learning Laboratories, Program Administration, *Program Implementation, Secondary Education, Teacher Effectiveness

Identifiers—*Centennial High School OR

This document describes a practical method for implementing individualized instruction in the secondary school. The first section of the document distinguishes between mistaken notions and fears concerning individualized instruction and the characteristics of a true individualized instruction program. Part 2 describes the author's experience with the planning, implementation, and management of a model individualized instruction program in the Business Education area at Centennial High School in Gresham, Oregon, during the 1976-77 school year. A cost analysis of this model, revealing a 33 per cent cost savings, forms the third part of the document. Included is a cost analysis of a "typical" school considering individualized instruction, a cost justification, and procedures for analyzing purchasing needs. The fourth section discusses application of individualized instructional techniques to other academic areas. Conclusions and recommendations fill out the fifth and final section. Samples of materials used in the Centennial program are appended. (Author/PGD)

What Is the Middle School Movement Really About?

Pub Date—6 Jul 80

Note—15p.; Paper presented at the Annual Summer Conference of the American Association of School Administrators (3rd, Chicago, IL, July 6-9, 1980).

Pub Type—Speeches/Meeting Papers (150) — Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Adolescent Development, Adolescents, Children, Educational Change, *Educational Theories, Intermediate Grades, Junior High Schools, *Middle Schools, Secondary School Students

The special needs and characteristics of pubescent adolescents led to the creation of junior high schools around the turn of the century, but these watered-down senior high schools have not provided a satisfactory transition between childhood and young adulthood. The middle school movement has not remedied the situation. It has provided programs hard to distinguish from those of traditional junior high schools in a disorganized welter of various grade groupings. While the varying rates of cognitive development and sexual maturation among 10-to-14-year-olds serve as rallying points for those in the middle school movement, the practical reasons for restructuring school systems are more often related to population shifts, budgetary pressures, and court orders, and little effort is made to account for developmental phenomena. One factor in this failure is the lack of an adequate research base to underpin the claims of middle school proponents that a new type of education is necessary. What the middle school movement now needs are hard-headed theoreticians, researchers, and policy analysts to articulate the purposes, functions, and practices that can result from the implementation of effective middle school programs. Identifiers—Linking Agents, National Institute of Education, *Research and Development Utilization Program

In 1976 the National Institute of Education established the Research and Development Utilization (RDU) Program. This project was intended to apply research and development products to local school problems; to develop a problem-solving and product

selection process usable by local schools and to organize a linkage system making national, state, and other external resources available to local school personnel. Seven projects serving over 300 school locations in 20 states were operated under the RDU program from 1976 to 1979. Preliminary findings from a study of the program suggested that engagement in RDU program activities would promote school improvement. Several variables were examined to determine which were important to the impact of the RDU program at the school level. Such variables included characteristics of the research and development products chosen, degree of modification of externally developed products, strategies selected for problem-solving, amount of coordination with outside experts, and techniques used during product implementation. These variables were found to be more powerful predictors of success at implementing innovations at the local school level than was school "readiness" as measured by previous experience with innovative efforts, federally funded programs, or use of externally developed research and development products. The Most Significant Minority: One-Parent Children in the Schools.

Institute for Development of Educational Activities, Dayton, Ohio.; National Association of Elementary School Principals, Washington, D.C.

Pub Date—28 Jul 80

Note—28p.; First-Year Report of a Longitudinal Study Conducted by the Consortium for the Study of School Needs of Children from One-Parent Families.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Academic Achievement, Attendance Patterns, Discipline Problems, Elementary Secondary Education, Family Characteristics, Family Environment, Family Problems, *Family School Relationship, *One Parent Family, Records (Forms), *Student Problems

A study of children living with only one parent revealed that these children achieve less and present more discipline problems in both elementary and secondary schools than do their two-parent peers. The study, conducted by the National Association of Elementary School Principals and the Institute for Development of Educational Activities, involved 26 schools in 14 states. Each school was surveyed twice, once during each semester of the 1979-1980 school year. The data indicated that students from single-parent families tended to qualify more often for subsidized lunch programs and changed residence more often than students from two-parent families. At all levels, single parent students were more often tardy, absent and truant than were other students. They were also more often involved in disciplinary actions and dropped out more often. Single-parent students at the secondary level tended to visit in-school health clinics more frequently than their two-parent peers, but fewer of them were absent from school during any given period. This report concludes with a brief discussion of ways schools can help single-parent students deal with their problems. Forms used to gather data for this study are included in an appendix. Demographic Factors Related to Enrollment Projections. Draft.

Pub Date—[Apr 80]

Note—13p.; Paper presented at the Annual Meeting of the American Educational Research Association (Boston, MA, April 7-11, 1980). Table 2 may not reproduce clearly.

Pub Type—Speeches/Meeting Papers (150) — Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Data Analysis, Elementary Secondary Education, *Enrollment Projections, *Enrollment Trends, Long Range Planning, Population Trends, *School Demography, Trend Analysis

School districts must analyze demographic data carefully if they hope to deal effectively with changing enrollment patterns. Sources of relevant data include local planning boards, utility companies, government records of vital statistics, carefully conducted school censuses, and municipal records of housing construction and property transfers. The cohort survival method is the most common method for analyzing enrollment data. The type of analysis

selected to establish survival ratios, whether based on straight averages or weighted (trend) averages, should be appropriate to the particular conditions of the school district. (Author/PGD)

Descriptors—Compliance (Legal), Data Analysis, Disabilities, Elementary Secondary Education, *Individualized Education Programs, *Individualized Instruction, Legal Responsibility, *Mainstreaming, Parent Attitudes, Research Methodology, Special Education

Identifiers—*Education for All Handicapped Children Act

Public Law 94-142, the Education for All Handicapped Children Act of 1975, stipulates that an Individualized Educational Program (IEP) be prepared for each handicapped child going to public school. Each IEP must include a statement of the child's current performance, a statement of annual goals and instructional objectives, a statement of services to be provided to the child, the dates when services are to be initiated and their expected duration, and appropriate evaluation criteria and procedures. A study of the IEP process in a large urban school system in Texas found that a significant amount of legally required information was missing from the IEPs; that speech handicapped students' IEPs were more accurately written than those of either mentally retarded or learning disabled students; that the majority of IEPs were not appropriately reviewed and updated; that parent involvement was moderate and related to the accuracy of the IEPs; and that parents who had been informed about the nature of their child's IEP thought it a good plan. The study sampled 1317 IEP documents for students with eight handicapping conditions and surveyed 236 parents. This report discusses the methodology used in the study and the reliability of that methodology. (Author/PGD)

Descriptors—City Government, Costs, *Declining Enrollment, Elementary Secondary Education, *Financial Problems, Higher Education, Literature Reviews, Planning, *Public Agencies, Reduction in Force, *Retrenchment, *School Closing, School District Spending

Identifiers—Wisconsin

In this paper a review of the Wisconsin declining enrollment trend is presented and implications are noted for Wisconsin districts involved in school closing efforts. The author suggests that districts can best meet the challenge of declining enrollment by considering local enrollment projections, taking a facilities and program inventory, figuring future facilities needs, and ensuring public and community involvement. A review of recent literature related to "cutback management" is presented to help local school personnel better understand how public organizations function and react to diminishing resources and diminishing client groups. The work reviewed and summarized includes the following: Charles H. Levine on the causes and results of public sector funding reductions, Andrew Glasberg on New York's and other cities' municipal budget decreases, Robert Behn on the policies and practices associated with the closing of government facilities, Garry Brewer on the considerations related to program termination, Richard Cyert on organizational stagnation or decline at the university level, and Edgar Kelley on the reduction in force (RIF) process. Descriptors—*College School Cooperation, Educational Environment, Elementary Secondary Education, *Faculty Development, Program Descriptions, Teacher Attitudes, Teacher Morale, Teaching Conditions, Urban Schools

Identifiers—English High School MA, University of Massachusetts

This paper chronicles the collaboration of Boston's English High School with the University of Massachusetts. It begins with a history of the school from its start in 1820 up to the late sixties when the school achieved more of a minority population. After a problematical beginning plagued by lack of coordination and direction, the collaborative program made a change in administrative responsibilities and staffing patterns that heralded a period of great energy and enthusiasm among teachers. At this time the goals of the collaboration were set down as staff development, curriculum development, and improvement in communications. A teacher center was established. However, two years later, at the time of the writing of this paper, the situation was one of worry about declining school enrollments, low morale, and dissatisfaction with administration. It is difficult to analyze effects of the innovation because the school conditions and the people involved have changed. The teacher center, cluster programs, and a college incentive program remain as evidence that collaboration can produce positive programs. Although the collaboration has not achieved all its goals, the university has contributed to the life of the school. (JM)

Identifiers—*Preadolescents, Puberty

The extent to which the middle school becomes a true educational alternative is directly related to the ability of middle school educators and researchers to identify and investigate the developmental needs and learning capacities of students. Three important developmental characteristics of early adolescents are a high need for peer friendships, a rising awareness of increased physical changes, and a strong concern with how they match up to common behavioral or physical stereotypes. The middle school student also has several important learner characteristics: the ability to organize knowledge and concepts into problem-solving strategies, interest in planning his or her own learning experiences, and a value system that is shifting from the influence of elders to the influence of peers. The teacher must be aware of the developmental and learning characteristics of the middle schooler and design learning experiences functional to the learner. Teachers must not attempt to compete with students' friends or with powerful influences such as the media. Learning must include the preadolescents' need for social contact. Teachers must present educationally and environmentally relevant issues. The challenge to American educators is forcefully presented by the early adolescent. (Author/JM)

This paper provides a critical review of the state of the comparative study of educational innovation and reform and proceeds to identify a number of theoretical issues and challenges on which further comparative work is likely to shed additional light. The review portion of the paper deals with the heuristic, political, and theoretical utility of existing comparative work on educational innovation and singles out a number of typologies and generalizations from the literature as particularly significant findings. The second major part of the paper then develops a theoretical agenda that is organized around the issues of knowledge utilization (with special reference to experimental paradigms of reform), the legitimacy of innovation decisions, and the relationship between innovation and conflict. Identifiers—Education for All Handicapped Children Act, Elementary Secondary Education Act Title I, Emergency School Assistance Act, Title IX Education Amendments 1972

The purpose of this paper is to explore the interactions among federal education programs on the local level. Federal education programs work almost exclusively through the local education agency (LEA). Federal programs can work only if the LEAs can meet the aggregate requirements they impose. The burdens imposed by federal programs are of two kinds: administrative and financial. Administrative burdens are the demands placed on LEA personnel in interpreting federal rules, planning and implementing services required by the rules, and accounting for the use of funds. Financial burdens are the demands placed on funds from local and state revenues. This paper creates an agenda for analysis of the aggregate effects of interactions of federal programs. It, first, identifies for each of the major federal programs the features that may interact with other programs; second, identifies possible problems that those interactions might create; and third, defines questions for research on the implications of those problems for the effectiveness of federal education programs. Recently the framework of the Concerns-Based Adoption Model was used to guide the implementation of a revised elementary science program in grades 3-6 in the Jefferson County (Colorado) Public Schools. This paper explores how student achievement on a locally developed, criterion-referenced test is related to the length of time the revised science program has been in use. Three groups of students drawn from schools in three phases of the implementation were identified based on reading scores. The data indicate a definite trend toward increased student achievement in those classrooms where the innovation had been implemented for a longer time period. (Author/MLF)

Pub Date—Apr 80

Note—74p.; Paper presented at the Annual Meeting of the American Educational Research Association (Boston, MA, April 7-11, 1980). Figures may be marginally legible.

Pub Type—Reports - Research (143)—Speeches/Meeting Papers (150)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—*Classroom Observation Techniques, Elementary Education, *Ethnography, *Research Methodology, *Research Problems, Student Teacher Relationship, *Teacher Behavior

The debate between proponents of ethnographic and quantitative methodology in classroom observation is reviewed, and the respective strengths and weaknesses of the two approaches are discussed. These methodologies are directly compared in a study that conducted simultaneous ethnographic and quantitative observations on nine classrooms. It is concluded that inferences about classroom processes are best made using quantitative methodology, but that ethnography is a very useful adjunct for purposes such as generating hypotheses and pilot testing quantitative instrumentation. In 1977, 13 staff development projects were initiated in California under ESEA Title IV-C. The task of each project was to design and implement a unique system for developing a comprehensive staff development program. The materials in this book

describe one of the 13 staff development projects: a "Service Center" for staff development that was established to improve student achievement in the areas of language, reading, and mathematics in grades K-8. The ultimate goal of this project is to plan a total district staff development program that will enable administrators, teachers, instructional aides, and parent volunteers to develop a high degree of specific skills and knowledge in order to increase student academic growth in a climate that promotes learning. In this publication the staff development activities are described, and the staffing patterns and procedures for individualizing instruction are outlined. Required materials and instructions for replicating the project are offered. The appendixes contain project surveys, tests, and forms; and sample newsletters and inservice announcements. Identifiers—Levels of Use

The Levels of Use (LoU) interview has been developed to study implementation as a dynamic process. This paper focuses on the use of a mathematics skills monitoring system and reports how information collected during the typical LoU interview provided the data for assigning each teacher to a configuration or pattern of use of the monitoring system. The monitoring system and the technical procedures for deriving the configurations from the interview data are reported. The primary objective of the paper is to describe in detail the methods used to discover how teachers were using the program and to cluster the teachers into groups with similar patterns of behaviors. The relationships between teacher behaviors and student achievement illustrate one application of the results of these procedures. (Author/MLF)

Assessment of the Neighborhood School Councils and Other Organized School/Community Groups, September 1979 Through April 1980. District of Columbia Public Schools, Washington, D.C. Dept. of Research and Evaluation.

Pub Date—Jun 80

Note—74p. Some figures and appendixes may not reproduce clearly due to small or broken print of original document.

Pub Type—Numerical/Quantitative Data (110) — Reports - Research (143)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—*Citizens Councils, Elementary Secondary Education, *Group Structure, *Neighborhood Schools, *Organizations (Groups), *School Community Relationship

One hundred eighty-two schools (94 percent) responded to the survey of organized school-community groups. The survey instrument consisted of five questions in relation to four specified school groups (Neighborhood School Council, Parent-Teacher Association, Home and School Association, and Local School Board) although other groups could be added. The questions concerned group establishment, membership, election procedures, operation, and advice given to the local school administrator. Responses are shown in the form of tables and graphs by school level. Most schools indicated that the groups had improved the educational program, and done this, for the most part, through financial support and volunteer services. The majority of the responses showed that the groups provided an opportunity for involvement of the local school community in decision-making and improved communication between school and community. The main reasons given for not providing an opportunity for involvement and/or improving communication were the lack of interest and participation and the inactivity of the groups. (Author/MLF)

Descriptors—Academic Ability, *Class Organization, *Classroom Environment, Ethnography, Grade 2, *Perception, Primary Education, Reading Instruction, *Self Concept, *Student Attitudes, *Student Teacher Relationship

A student interview was administered to second grade students to determine how accurately they perceived their class environment. Three areas investigated were differential treatment of students by the teacher, the organization and management of the classroom, and students' self-rated ability. Ethnographic reports, teacher interviews and student outcome data were used to verify the students' responses. The students accurately reported differen-

tial teacher behavior and the organization and management of the classroom, but inconsistencies were found between the students' self-rated ability and the ability level of their reading groups. (Author)

Descriptors—*Academic Achievement, Elementary Education, Grade 2, Grade 5, *Mathematics Instruction, *Reading Instruction, *Teacher Behavior, *Teacher Effectiveness, Teacher Evaluation, *Time Factors (Learning)
Identifiers—*Academic Learning Time

This volume describes the process, findings, and implications of a complex research project known as the Beginning Teacher Evaluation Study (BTES). A major contribution of the study is its focus on Academic Learning Time (ALT) as a measure of learning. ALT is the amount of time a student spends engaged in academic tasks of appropriate difficulty. The study began as a search for information on which to base policy decisions regarding desirable competencies for beginning teachers. For a variety of reasons the study began to focus on second- and fifth-grade mathematics and reading and on experienced, rather than beginning, teachers. The book is divided into three parts with 14 chapters, each by a different author or group of authors. The first describes and analyzes the findings of the study and connects them to a growing body of literature on the importance of time as a key influence on learning. The second explores what the study might mean to teacher educators, staff developers, teachers, and principals. The third section moves the research findings into the schools; a teacher and a principal describe how they use the findings. In addition, policy-making and dissemination are discussed as two essential concerns of large-scale research on teaching and learning, such as the BTES. (Author/MLF)

Descriptors—*Curriculum Development, Elementary Education, *Individualized Education Programs, *Individualized Instruction, *Student Needs, *Student Teacher Relationship

The intent of this booklet is to stimulate interest in individualized education, to promote study of it, and to encourage educators to experiment with the ideas in ways appropriate to their local situations. Chapter 1 analyzes the concept of individualization. The chapter includes paradigms that may be helpful for examining some of the current programs in use. Chapter 2 treats administrative arrangements, curriculum materials, and delivery systems for selected comprehensive systems of individualization. Chapter 3 draws on research and evaluation studies to answer the question "What do we know about individualization that can guide practice in schools?" The fourth chapter offers suggestions to principals and teachers for individualizing instruction in their own schools, and an epilog stresses the need for teachers to expand their abilities to respond to the needs of learners. Identifiers—*Coleman Report, *School Effectiveness

The methodological parameters of evaluative research studies help to identify a conceptualization of the phenomenon under investigation. Holistic critiques that identify the conceptual models under which the research was conducted shed light on the validity of the disparate inferences made from a number of studies of schools and school effectiveness. This paper attempts such a critique of studies of school effectiveness in general, and the 1966 "Equality of Educational Opportunity Survey" by Coleman and others in particular. A table presents a brief overview of three studies of school effectiveness. Differences in the methodological parameters (data analysis strategy, stratification levels, level of data aggregation, and selection of independent and dependent variables) and the impact of these differences on conclusions about school effectiveness are identified and discussed. It is important that discussion of the methodological parameters characterizing varied research studies be put in a more general, conceptual framework, so that the model of schooling being examined by different researchers can be identified and critiqued. Identifiers—*Ohio Board of Regents

The Ohio Board of Regents was established as a mechanism to coordinate the growth of higher education institutions in Ohio during the period when enrollments in K-12 school systems suggested large increases in college attendance. During the 1960s 23 states took similar actions to centralize state authority to coordinate or govern higher education. Ohio legislators were influenced by internal political circumstances as well as by external (federal and regional) considerations; these included interinstitutional rivalries, a gubernatorial election campaign, consultants' recommendations, and federal educational program directions. The agenda-building model makes clearer the diverse activities spread over 10 years. (Author)

Intellectual Freedom in the Public Schools: An Assessment of "Tinker" and Its Progeny, 1969-1979.

Pub Date—Sep 80

Note—210p. Ed.D. Dissertation, University of Massachusetts.

Pub Type—Dissertations/Theses - Doctoral Dissertations (041) — Legal/Legislative/Regulatory Materials (090)

EDRS Price - MF01/PC09 Plus Postage.

Descriptors—*Academic Freedom, Censorship, *Civil Liberties, Court Litigation, *Court Role, *Freedom of Speech, School Newspapers, School Responsibility, School Role, Student Publications, *Student Rights, Teachers
 Identifiers—*Intellectual Freedom, Teacher Rights, *Tinker v. Des Moines Independent School District

In 1969, in "Tinker v. Des Moines," the Supreme Court declared that both students and teachers were entitled to exercise their constitutional rights while in school. The purpose of this dissertation was to discover whether the propositions and the philosophy of "Tinker" have been used by state and federal courts to support intellectual freedom in the schools. The first two chapters survey various interpretations of the purpose and importance of free speech and examine the importance of intellectual freedom for education in a democratic society. Against this background, cases involving issues of intellectual freedom for teachers and students in public schools are then analyzed. Consideration is given to how the courts have balanced the preferred right of free speech with the unique needs and purposes of public schools. It is concluded that the major importance of the Tinker case has been its recognition and reassertion of a philosophy that respects children's individuality and uniqueness. Judging from the relevant cases reported between 1969 and 1979, the degree of support that intellectual freedom has been given by the courts does not appear outstanding. (Author/JM)

Descriptors—Elementary Secondary Education, *Faculty Development, Inservice Education, *Leadership Training, Participant Satisfaction, Participation, Program Evaluation, *Staff Development, Teacher Participation

The Leadership Development Program (L.D.P.) was begun in 1978-79 by the Vancouver (British Columbia) School Board to provide leadership development opportunities for educators who aspire to or show potential for leadership. This evaluation was undertaken through questionnaires assessing participant opinions of the general value of the program and the success of the program in meeting its objectives. All four of the key elements of the program were achieved: it was open to all interested educators, participation was self-initiated, the program was developed from the needs of potential participants, and participants attended only those sessions of interest to them. Four of the seven major objectives of the program were realized. It provided participants opportunities to become aware of themselves as educational leaders, to develop and refine personal and professional goals, to become knowledgeable about educational management, and to become increasingly effective at working with others. Furthermore, 88 percent of the participants reported acquiring useful skills and knowledge. Almost all participants rated the general value of the L.D.P. highly and felt the workshops were worth repeating. Topics suggested for future workshops included time management, communications skills, and stress management. Suggestions for future meetings included more practical courses, fewer informational sessions and more skill development sessions. (JM)

Descriptors—*Administrative Change, Administrative Organization, Administrator Attitudes, Administrator Role, Administrators, *Assistant Principals, *Educational Administration, Management Development, Organizational Development, *Organizational Effectiveness, Questionnaires, Secondary Education
 Identifiers—*Vancouver Board of School Trustees BC

In March, 1977, the Vancouver, British Columbia, Board of Trustees responded to a need for administrative assistance in its four largest secondary schools by appointing Vice-Principal Interns in two schools, a Vice-Principal for Curriculum in a third school, and a School Business Assistant in the fourth. These two-year appointments were evaluated at the end of the second year to determine their effect and the implications for the schools of discontinuing the assistance. Staff members, administrators, educational specialists, students, parents, and teachers were surveyed in one or more of the schools affected. Results indicated that the assistance provided by the new personnel permitted regular administrators to make better use of their time; made task distribution and work loads more equitable for all administrators; allowed smoother operation; and improved communication between administrators, staff, students, and teachers. It was believed by those surveyed that discontinuation of the program would be detrimental on nearly all counts. Training offered the interns was regarded as valuable and effectively designed. Survey respondents also suggested means of improving the roles of the assistant administrators and outlined criteria for determining when secondary schools need assistance. Sample questionnaires constitute an appendix to this report. (Author/PGD)

Descriptors—Administrator Role, *Advisory Committees, Decision Making, Elementary Secondary Education, Group Dynamics, *Parent Participation, Parent Role, *Parent School Relationship, Policy Formation, Questionnaires, School Policy Identifiers—*Vancouver Board of School Trustees BC

In 1975 the Vancouver, British Columbia, Board of School Trustees established School Consultative Committees (SCCs). These advisory committees were designed to allow parents to participate in the decision-making process at the local school level. An analysis of the minutes of meetings of twelve of these SCCs (eight elementary and four secondary) during the 1979-1980 school year and of responses of committee members to questions regarding the role and aims of SCCs provided information on exactly what SCCs do once they are well established and what difficulties they face. Members felt the SCC role was primarily advisory, but the minutes indicated that SCCs received information, dealt with requests, and participated in discussions while only rarely making advisory suggestions or recommendations. The principal's role in establishing and maintaining the SCC was shown to be very important, while readiness of parents to participate was identified as a major problem. Suggestions were made for encouraging participation, particularly among parents for whom English was a second language. This report includes as appendixes summaries of SCC members' responses to the specific questions asked during interviews. (Author/PGD)

On Models of Supervision in General and on Peer-Clinical Supervision in Particular.

Pub Date—Oct 79

Note—11p.

Pub Type—Opinion Papers (120) — Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Elementary Secondary Education, Instructional Improvement, *Peer Evaluation, Professional Recognition, *School Supervision,

Teacher Attitudes, Teacher Participation, *Teacher Supervision, Teaching (Occupation)
 Identifiers—*Clinical Supervision, *Peer Supervision

The purpose of this paper is to show why teacher professionalism dictates a new posture on supervision, to suggest criteria for selecting models of supervision, and to urge further research on one model of supervision that appears promising for preservice and inservice teaching. Teachers have long struggled to be recognized as professional and to achieve autonomy. This desire for professionalism suggests criteria for the selection of teacher supervision models. The model must be based on a sound theory of education, must provide teachers with latitude for decision-making, must be congruous with professional treatment of teachers, must be acceptable to those receiving supervision, must be feasible for inservice and not just preservice teachers, and must be supported by the results of research. There appears to be growing support for clinical supervision although it is lengthy, demanding, and expensive. Collegial supervision has the same problems. A model of supervision that appears realistic is "peer supervision," a model that supplements the existing supervision program by using fellow teachers to observe, provide feedback, and interact with other teachers. This model meets all criteria for a teacher selection model except one: because it is new, it does not yet have the support of research efforts. (Author/JM)

Using Public Performance Standards to Redefine the Games of Power, Legitimacy and Secrecy in Schools.

Pub Date—Mar 80

Note—23p. Paper presented at the Annual Meeting of the American Educational Research Association (Boston, MA, April 7-11, 1980).

Pub Type—Speeches/Meeting Papers (150) — Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Competency Based Education, Curriculum, Educational Objectives, Elementary Secondary Education, Evaluation Criteria, Graduation Requirements, School Role, *Student Certification, *Student Evaluation, *Student Teacher Relationship, *Teacher Influence, *Teacher Role

The demand for competency based education reflects a desire for more public, consistent, and objective standards of student assessment. This demand implies a change in the definition and interrelations among four operational functions of the school: instruction, acculturation, supervision, and certification. The institution of externally referenced performance standards also interferes with the current teacher-centered mechanisms for gaining student compliance in four ways. It violates the beliefs that teachers alone have the right to set evaluation standards for students. Second, it changes the role of teachers from judge to facilitator. Third, it forces a shift toward more interaction among teachers. Finally, teacher power over students, formerly based on their monopoly over evaluation and certification, will be replaced by opportunities to work with students on common goals. This potential loss of power is seen as a major source of resistance to any change in ground rules for student evaluation. Nevertheless, one can anticipate an improvement in both learning climates and incentives for success as standards become more visible and clearly defined. (Author/JM)

Act Title IV

Title IV represents the first consolidation of federal education programs. It funds a wide range of items, from school library acquisitions to innovative projects on art education and teenage pregnancy. The major objectives of this study were to describe how the Title IV program operates in states and local school districts; to assess Title IV as an example of a consolidated program strategy; and to use Title IV as a basis for understanding the role of the states in implementing federal education policy. Data sources include a survey of Title IV program officials and state advisory council members in 50 states, surveys of public and nonpublic school officials in about 600 local districts, and fieldwork in eight state departments of education and 24 school districts. The study supports the following general conclusions about Title IV: (1) Title IV is a popular, well-run program that is praised for its flexibility and ease of administration. (2) Title IV did not result in consolidated management of former categorical programs. (3) States and local school districts vary in the substance, management, and quality of Title IV-B and Title IV-C activities. (4) Small IV-B and IV-C grants can induce substantial improvement in local practices. (5) Title IV participation of eligible nonpublic school students is uneven. (Author/JM)

This report seeks to answer two questions: (1) What has been the impact of litigation, and especially Ford Foundation supported litigation, on the women's rights movement? (2) How effective is litigation as a tool in promoting equality for women? The analyses, conclusions, and recommendations are based on interviews with the Ford grantees and other experts on women's rights, and examination of judicial opinions, and legal and social science literature concerned with women's rights. The report begins by looking at the historical context in which the women's rights litigation effort evolved, and then analyzes the existing economic data to see if any objective changes have occurred. Key litigated issues are examined to separate hopes from realities, and to determine whether there has been a pattern to the victories and defeats, and whether there has been an overall net gain or loss. Finally, some conclusions are offered on the litigators' achievements and an assessment of whether or not there is cause for disenchantment. Recommendations are then offered as to how litigation should be structured in the future in order to take advantage of the lessons of the past. (Author/MLF)

Descriptors—Elementary Secondary Education. *Evaluation Criteria. *Evaluation Methods. Federal Aid. *Federal Programs. *Federal Regulation. Government (Administrative Body). Government Role. *Program Evaluation. School Districts. State Departments of Education
This report concerns evaluation of federally sup-

ported educational programs at the national, state, and local levels. It was undertaken in response to Section 1526 of the Education Amendments of 1978, which requires that the Commissioner of Education conduct a comprehensive study of evaluation practices and procedures. Two broad sources of information were used: contemporary research and development by other researchers, and direct investigations by the project staff. Introductory material is presented in the first chapter. Chapter 2 considers the rationale, evidence, and opinion bearing on why evaluations are done; the confusion and argument engendered by general demands for evaluation; and the audiences to whom evaluations are addressed. Chapter 3 addresses the question of how evaluations are executed. Chapter 4 covers the organization of evaluations and the capabilities of evaluators, and chapter 5 considers quality of evaluations. The way evaluation results are used is considered in chapter 6, and case studies on the use of evaluative information are included. Chapter 7 covers recommendations. An extensive bibliography concludes the report. Legislative and management background, and research strategies are contained in the appendixes. (Author/MLF)

Descriptors—Career Development. *Career Education. Elementary Secondary Education. *Hearing Impairments. Inservice Education. *Program Development. *Program Implementation. *Workshops

The document provides guidelines for conducting a workshop for administrators, teachers, and counselors on career education for the hearing impaired student in grades K through 12. Initial chapters address the history and purpose of the workshop; concept outline; instructions for using the manual; selection, registration, and preworkshop orientation of participants; workshop facilities preparation; and preparation of the trainer. The bulk of the document contains 18 modules, each with strategies designed to be implemented in 45 minutes (except for two 90 minute modules). Each module begins with statements of the trainer goal, learner outcomes, and advance preparation procedures; followed by an outline of materials/resources needed with concepts covered; module procedures (including time, a code for visuals to be used, and trainer narrative); and a concept outline. Modules cover such topics as self awareness as the basis for career development, decision making techniques, and technical assistance resources. A supplementary

section provides additional instructions for each module; and appendixes contain orientation materials, transparency masters, and a summary outline of the delivery skills workshop. (SBH)

An Operational Definition of Learning Disability

and its Application to a Study of Juvenile Delinquents.

Educational Testing Service, Princeton, N.J.

Pub Date—7 Apr 80

Note—40p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Adolescents. *Definitions. *Delinquency. Exceptional Child Research. *Learning Disabilities

The paper reviews various types of definitions of learning disabilities and presents the specific operational definition that was used in a study involving 1,105 adolescents on the relationship between learning disability and juvenile delinquency. The definition of learning disability is analyzed in terms of its principal components, types of approaches used, and varying levels of conceptualization. The fundamental presumptions of the definition are discussed in terms of the variability in their interpretation. The central cause of the learning problem is then examined, the focus being placed on the variance in the types of areas stressed and the levels of conceptualization used to describe the nature of the cause. Various modes of classification are presented and exemplified in different remedial approaches. Against this background, the authors present the operational definition that was used in the study on learning disability and juvenile delinquency. First, the conditions under which data collection took place are discussed and the test data used in the study are presented. The paper then attempts to answer a series of questions using the data. Questions are directed toward analyzing how the measurement of the concept worked. Various factor analytic and correlation studies are discussed. (Author/SBH)

Descriptors—*Clinical Diagnosis. *Definitions. *Etiology. Handicap Identification. *Learning Disabilities. *Neurology. *Theories

The paper summarizes several approaches to the identification of learning disability and then discusses the nature of learning disability in the context of competing hypotheses as possible explanations of insufficient or unsatisfactory achievement. Because learning disability may only be inferred as a cause of unsatisfactory learning, the information requirements of adequate diagnosis are postulated, and a researchable theoretical network of relationships is presented. Learning disability is seen as a breakdown either in the neurological process or a result of some physically damaging event or situation, or as an impairment of mental functioning as a result of a profound deprivation of stimulating environment. The latter alternative is seen to be highly speculative, but to afford a possible explanation of cases of disability which do not show signs of neurological impairment. The complexity of learning disability is recognized by this approach and suggestions are made for studying the phenomenon. (Author/SBH)

Descriptors—Case Studies, *Disabilities, Elementary Education, Exceptional Child Research, Generalization, *Individualized Education Programs, Kindergarten, *Mainstreaming, *Mild Mental Retardation, *Peer Teaching

Two research studies (the first involving five mildly mentally handicapped kindergarteners, the second, twelve elementary aged handicapped children) were conducted to examine the effects of peer teachers on the implementation of individual education programs and to determine whether the skills learned in one educational setting would generalize to a second educational setting. In Study Series I were mainstreamed into the regular classroom and taught letter recognition by kindergarten children from the peer group. Results indicated that handicapped children could make significant progress when given additional help from peer teachers utilizing the instructional implementation plans. Further, it was concluded that the skills learned in the regular class setting generalized to the special class setting. Twelve case studies in Study Series II were used to examine teacher-to-student instruction versus student-to-student instruction in the regular classroom. The results indicated no consistent or definitive differences between teacher and student instruction on either correct or error responses. Graphic illustrations present statistical data from the studies. (Author/SBH)

Report on the District-Wide Interviews in Special Education: Teacher Satisfaction, Student Integration, and Student Satisfaction, Spring 1978.

San Juan Unified School District, Carmichael, Calif. Pub Date—78

Note—75p.

Pub Type—Reports - Research (143) - Tests/Questionnaires (160)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—*Disabilities, Elementary Secondary Education, Exceptional Child Research, *Mainstreaming, Peer Acceptance, Questionnaires, *Student Attitudes, Student Placement, *Teacher Attitudes

Over 200 interviews were conducted with students and teachers at the elementary, intermediate, and high school levels to investigate satisfaction with the San Juan School District (California) Master Plan, suggestions for the improvement of services, and satisfaction with the integration of the special education students. Teachers were generally satisfied with the Master Plan and saw improvements in parental involvement, the individualized teaching style, and student self concepts. Factors responsible for unsuccessful cases were reported as class behavior problems, motivation problems, and attendance problems. Integration of the learning development class (LDC) was less successful than the integration of the resource specialist class (RSP) student. Among findings related to integration were the following: the LDC student was usually integrated for physical education; at nearly all levels more RSP students than LDC students said they had friends in the regular classes; approximately half of the LDC students said most of their friends were in the LDC room; the use of labels appeared to be at a minimum; the stigma that the students attached to special education appeared to be at a minimum, except for the intermediate LDC student; the special education students generally agreed that they were being helped; and the RSP and high school LDC students were satisfied with their placement, but nearly half of the elementary LDC students and nearly three fourths of the intermediate LDC students did not agree with their placement. Sample questionnaires are appended. (Author/SBH)

Identifiers—*Gifted Science Project Resource File, *Maryland (Montgomery County)

The manual explains the use of the Gifted Science Project Resource File. The file is designed to identify science resources for third through eighth grade gifted students and their teachers. The resources are matched with the objectives of the Montgomery County (MD) schools "Program of Studies." Sections outline the project calendar, list the participating schools, describe the format of the resource file, and outline steps in the use of the file (such as selection of students and student science interest). Examples illustrate how to select a resource and arrange for its use by a student. Samples of the evaluation reports and project letters are appended. (PHR)

Identifiers—*Project APT

One of a series of materials developed by Project APT (Administrators, Parents, and Teachers/Assessment, Programming, and Training), a program designed to foster home/school coordination in educational planning and program implementation for severely mentally retarded and/or multiply handicapped students; the booklet provides five screening tools in the areas of hearing, vision, physical function (for both ambulatory and nonambulatory students), oral motor, and maladaptive behavior. For each of these areas, instructions for the use of the form, the actual form, and a statement of educational implications resulting from the screening are included. An introductory section outlines each screening instrument, surveys information needed in the assessment process, describes the intake procedure, and provides the screening summary form. Two other sections present a Cognition Checklist (for brief educational assessment) and a Home Information Questionnaire (which gathers information from parents). (PHR)

Identifiers—*Developmental Assessment Wheel, *Project APT

One of a series of materials developed by Project APT (Administrators, Parents, and Teachers/Assessment, Programming, and Training), a program designed to foster home/school coordination in educational planning and program implementation for severely mentally retarded and/or multiply

handicapped students; the booklet provides the Developmental Achievement Wheel, an instrument designed to assess the functional level of multiply handicapped students. The wheel format gives an overview of the student's performance in the following six areas—cognition, language, gross motor, fine motor, self help, and socialization. Made up of five concentric rings (0 to 6 months, 6 months to 1 year, 1 to 2 years, 2 to 4 years, and 4 to 6 years) the wheel permits the recording of past, present, and future levels of performance with the use of developmental milestones. Suggested equipment to be used in each area at each age level is listed and the assessment instrument worksheet is included. (PHR)

Conditional Logic of Young Gifted Children.

New York Univ., N.Y.

Pub Date—Mar 78

Note—18p.; Paper presented at the Annual Meeting of the American Educational Research Association (March, 1980). The research was supported by a small grant from the Dean's Development Fund of the School of Education, Health, Nursing and Arts Professions at New York University.

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—*Concept Formation. Elementary Education. *Gifted. *Learning Theories. *Logical Thinking

Identifiers—*Conditional Logic

To test the hypotheses that gifted Ss will be better able to supply missing conclusions to conditional syllogisms as a factor of maturation and that the hierarchy of difficulty in supplying conclusions will be from affirming the antecedent and denying the consequent, to linear transitivity to nonlinear transitivity, and finally to conditional chains; 160 gifted children (ages 4 to 12) were studied. Findings vali-

dated both hypotheses. There was a developmental pattern in the ability to supply the missing conclusions, with an increase noted at each age level until age 9 when ability leveled off until age 11. The hierarchy existed, but was clustered into two groups (one the first two principles, the other the last three) with conditional chains by far the hardest principle for the Ss to grasp. (PHR)

The Impact of Creativity Training on Learning Disabled Students' Creative Thinking Abilities and Problem-Solving Skills.

Pub Date—Apr 80

Note—10p.; Paper presented at the Annual International Convention of The Council for Exceptional Children (58th, Philadelphia, PA, April, 1980, Session A-10).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Creative Development. *Creativity.

Intermediate Grades. *Learning Disabilities.

*Problem Solving. *Skill Development

The study investigated the impact of participation in a creativity instructional program on measures of creative thinking and problem solving with 49 learning disabled intermediate level students and a control group of 24 nondisabled students. The Purdue Creative Training Program was used as the independent variable. Analysis of verbal fluency, verbal flexibility, and total verbal creativity revealed the experimental group to be significantly higher in posttest scores than control Ss. Among seven implications for further research were the need to conduct longitudinal studies on the efficacy of creativity training with learning disabled students and to extend the training to different problem solving criteria. Identifiers—*Project TEACH

The paper describes Project TEACH (Technical Educational Aids for Children with Handicaps), a program at the Shrine School which is designed to meet the needs of physically handicapped and health impaired children. The program emphasizes the use of specialized equipment with the severely physically handicapped children at the school. The need for adequate physical management is stressed as is the importance of such aspects as proper seating and the use of powered equipment which is considered invaluable when it increases mobility. The communication needs of this population are discussed. The educational program is outlined, including the academic, vocational, and developmental aspects. It is explained that the project has five children in each of the three educational program areas who each receive individualized programs using equipment tailored to their special needs. (PHR)

Descriptors—*Conflict Resolution. *Disabilities. Elementary Secondary Education. *Individualized Education Programs. Models. Parent Role. *Parent School Relationship. *Problem Solving

The paper is an outgrowth of a Utah task force composed of school personnel and parents examining conflict in the individualized education program (IEP) process for handicapped children. An introductory section examines the history of parent-school relations, reviews the steps in the IEP process, and describes such conflict resolution strategies as win-lose, lose-lose, and win-win. Implications of each strategy are noted. Four steps in a problem solving model are described: problem identification and definition, solution generation, solution evaluation, and solution decision. Descriptors—*Compliance (Legal). *Disabilities. Elementary Secondary Education. Federal Legislation. *Individualized Education Programs. *School Districts. *State Programs. *State School District Relationship

Identifiers—Education for All Handicapped Children Act. *Utah

The document deals with two major issues relating to the individualized education program (IEP) process in Utah—compliance with P.L. 94-142 (the Education for All Handicapped Children Act) by local districts and the state's role in monitoring such compliance; and the development, implementation, and review of IEPs and the state's position with respect to assisting local districts in moving toward exemplary practice in these areas. Six sections address the following topics: IEP compliance and the monitoring process. IEP definitions for annual goals and short term objectives, qualitative issues relating to the IEP, the IEP as a concept, structure of the IEP process, and best practice standards in terms of distinguishing between the letter and the spirit of the law. Appended is a page of goals and objectives designed as acceptable examples of the definitions presented. (Author/SBH)

Descriptors—*Disabilities. Elementary Secondary Education. Exceptional Child Research. *Individualized Education Programs. *National Surveys. *Program Implementation. *Research Design

The paper explains the design of a national survey which was intended to identify factors associated with variations in the properties and contents of individualized education programs (IEPs); provide descriptive information about the target population; the nature and setting in which special education services are provided to this population; assess changes in significant properties of IEPs from one year to the next; and provide insights into the extent to which the services actually provided to handicapped students coincide with those specified in their IEPs as mandated by P.L. 94-142 (the Education for All Handicapped Children Act). Section One provides an introduction with information on background of the survey; survey objectives; design related activities (literature review, exploratory site visits, and development of instrumentation); and procedures for analyzing IEPs and enrollment data in Curriculum Information Center files. A second section outlines the 10 basic evaluation questions to be addressed in the survey, objectives of the State Facility Substudy, components of the Retrospective Longitudinal Study, and confidentiality procedures. The document describes a research and demonstration project to identify and develop information about rehabilitation programs for handicapped people in African countries. Initial chapters deal with introductory information (need for the project, project objectives, summary of work plan); a description of the project; project procedures; and results and discussion of project findings. The bulk of the

document contains reports on current developments in programs for handicapped people in the following countries: The Gambia, Ghana, Liberia, Nigeria, Senegal, Sierra Leone, Togo, Ethiopia, Kenya, Malawi, Mauritius, Tanzania, and Uganda. Individual sections on each country provide a brief profile with map; reports on facilities for vocational rehabilitation; and summaries relating to rehabilitation, special education, health, and contacts and resources in rehabilitation and government. A final chapter offers a project summary and recommendations. Among appended materials are sample articles and a selected listing of United States nonprofit organizations involved in overseas assistance programs for the rehabilitation of the disabled in Africa. Descriptors—*Communications. *Disabilities. *Educational Opportunities, Information Networks. *Inservice Education. *Organizations (Groups). *Postsecondary Education

The book contains the major addresses, workshop findings, and materials from a 2 day workshop on communication networks designed to promote opportunities for the handicapped in higher education. The book is arranged in sections following the format of the conference program, with each segment prefaced by a brief introduction indicating the content of the session and identifying the speakers. Abstracts of each major address are included as well as the full, edited text of the speeches. A final section in which individual workshop leaders reported their group's findings is summarized and synthesized into a conclusions and recommendations section. An evaluation section follows in which responses to a postconference questionnaire surveying delegates' information seeking needs and behavior are tabulated and analyzed. A separate section of the book lists and annotates some communications vehicles that participants considered useful sources of information. Also provided are responses of a preconference questionnaire which elicited identification of organizations focusing on concerns of the handicapped in a postsecondary training setting. Workshops cover the following areas (names of panelists in parentheses): tactics for problem solving (J. Moffat); communication resources (R. Cheever, R. Mahler, and H. Roth); inservice education (G. Graham, and D. Kauppi); and organizations (D. Swift, T. O'Rourke, E. Lozano, Jr., and M. Redden). (SBH)

Descriptors—Inservice Teacher Education. *Multiple Disabilities. Program Descriptions, Program Evaluation. *Teacher Education. *Teaching Skills. *Visual Impairments

Identifiers—Project SERVE

The final report analyzes the achievements of Project SERVE, a training program for teachers of multiply handicapped/visually impaired students. The two basic objectives were (1) to prepare teachers who have demonstrated both generic teaching competencies as well as skills related to the target population; and (2) to produce teachers who have

experience in a wide range of service delivery systems. The first section of the report describes the project's objectives, core training procedures, and specific practice and seminars. A second section evaluates the project's educational significance in such terms as a summary of student encounters in field settings, basic roles graduates are prepared to fill, number of personnel prepared, and contributions to research. Three final sections address project design, program evaluation, and the project's inservice component. Seven appendices comprise nearly one half the document, and include information on competency goals, core didactics, and field application requirements. (CL)

ED 192 496 EC 130 158

Gipsman, Sandra Curtis
The Ability to Assume the Upright Position in Blind and Sighted Children.

California Univ., Berkeley.

Spons Agency—Bureau of Education for the Handicapped (DHEW/OE), Washington, D.C.

Pub Date—79

Grant—G007701187

Note—17p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Blindness. Children, Exceptional Child Research. *Human Posture. *Motor Development. *Partial Vision

To investigate the ability of 48 blind and partially sighted children (8 to 10 and 12 to 14 years old) to assume the upright position, 55 were given six trials in which they were requested to move themselves from a tilted starting position in a specially constructed chair to an upright position. No significant differences were found between three visual groups (totally blind, legally blind, and sighted) in the ability to assume the upright position. Findings suggested that the ability to judge the upright may be a postadolescent development. The possibility of moving the chair to the right and left many times in small increments as if to "zero in" on the upright position is suggested as an approach to mobility training. (CL)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Annotated Bibliographies. *Educational Media. *High Interest Low Vocabulary Books. *Instructional Materials. *Reading Difficulties. *Reading Materials, Remedial Instruction, Secondary Education. *Underachievement

The supplement to the annotated bibliography, Educational Materials for Remedial Instruction-1978, lists more than 100 titles appropriate for use with students working at levels below their actual grade placement and having difficulty in passing the state required competency tests. Titles listed are those judged by an evaluating committee to be designed specifically for the underachiever i.e., skills building materials characterized by high interest content appealing to older students and low level difficulty of vocabulary, instructions, activities, etc. The difficulty level, determined when possible by the Fry Readability Formula, and the interest level, based on the judgement of the evaluating committee, appear after the bibliographic entry for most titles. Information provided for each entry also includes the following: title, author (where applicable), series title (where applicable), publication date, source, price, and a brief description. Titles are

listed by subject area (languages, mathematics, reading, survival skills) and categorized within each subject area by format (books, workbooks, filmstrips, recordings, tests, transparencies, etc.). A separate section contains titles of recommended leisure reading books. A directory of publishers and producers concludes the document. (SBH)

State Plan for the Education of the Gifted.

Georgia State Dept. of Education, Atlanta, Office of Instructional Services.

Pub Date—79
Note—34p.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Delivery Systems, Educational Legislation, Elementary Secondary Education, Eligibility. *Gifted. *Program Implementation. *Special Programs. *State Programs, State School District Relationship, Talent Identification

Identifiers—*Georgia

The document outlines the Georgia State Plan for providing special programs to gifted students within the public schools. Section I covers legal authorizations for special education services including state statutes, state board of education policies, and federal regulations and statutes. The primary responsibilities of state department of education staff (such as providing teacher allotments and operational funds to local education agencies to be used to operate programs for the gifted) are mentioned in Section II. A third section covers management and operation of the state plan with segments on the following: state structure; local structure; function and relationship of the advisory committee; cooperative arrangements; criteria and assurances for state education agency approval for local plans for education of the gifted; personnel; instructional materials; target population, student eligibility, placement, and identification; facilities; delivery models; support services; administration; appeal procedures; and disbursement of funds. Section IV outlines the provisions of Georgia's Program for Exceptional Children, Regulations and Procedures; while a final section lists standardized mental ability and achievement tests. (SBH)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—*Disabilities. *Due Process, Elementary Secondary Education, Federal Legislation. *Gifted. *Legislation. *Program Design, State Legislation. *State Programs

Identifiers—*Georgia

The document reviews state of Georgia and federal law regarding the provision of special education programs for exceptional children and youth and outline procedures for providing those programs. Section I presents a summary of Georgia Chapter 32-6A, particularly the sections which address establishment of other special programs of education; allotment of teachers and other personnel; sharing of costs; transportation; public libraries; calculated cost of instructional services; and coordination with other agencies. A second section lists procedural safeguards for general provisions (such as communications to parents), due process, least restrictive environment, nondiscriminatory testing and placement, and confidentiality. Section III focuses on general provisions for establishing a program; various delivery models; facilities, equipment, and materials; and transportation. A fourth section states definition, eligibility and placement, enrollment, and facilities for 11 program areas: mental retardation; behavior disorders; specific learning disabilities; visual impairment; hospital/home instruction; speech impairment; physical, multiple, and other health impairment; hearing impairment; audiology; intellectual giftedness; and deaf blind. Three special programs—the Grant Program for the Handicapped Children, the Psychoeducational Centers for the Severely Emotionally Disturbed, and the Georgia Learning Resources System—are described in a fifth section. The document concludes with appended materials which include parental consent forms, notification and authorization forms, and definitions. (SBH)

Descriptors—Adjustment (to Environment), Elementary Secondary Education, Ethics. *Gifted. *Humanistic Education, Human Relations. *Interpersonal Competence, Moral Development. *Self Actualization. *Teaching Methods, Values Education

The author contends that a comprehensive approach to differentiating instruction for the gifted must involve values, feelings, personal growth, and interpersonal relations so the gifted child is free to realize his optimum potential. The paper describes some of the major adjustment problems faced by the gifted as well as some approaches to affective education. Sections address the following: problems of the gifted/talented/creative; curriculum implications of changing conceptions of man (individual versus holistic man, cooperation rather than competition); approaches to affective education; moral education; the new civism; values clarification; philosophy for children; moralizing and role modeling; group processes and perceptual psychology; games; situational ethics; social action; media and visual literacy; critical thinking; creativity; aesthetic education; humanistic education; the F. Williams Model for teaching thinking and feeling; and suggested principles for affective education programming. A nine page bibliography covering 35 subject areas concludes the document. (SBH)

Identifiers—*Special Programs for Individualized Needs

The document contains the final report of the Special Programs for Individualized Needs (SPIN) program designed to develop a demonstration model for training day care personnel to identify developmentally delayed or emotionally disturbed children and to program for them within the regular day care setting. Major objectives were to develop diagnostic and individually planned programs to improve the competencies of children with developmental deviations, to develop a system for integrating individually planned programs into the general curriculum of a day care center, and to develop a system for training teachers to do the above. Among accomplishments were collaboration of two agencies to improve services to young handicapped children and upgrading of skills of day care employees. Objectives and outcomes are outlined for direct service, inservice training, special service, parent/family participation, and child assessment program components. Also reported are training for personnel from other agencies, demonstration and dissemination activities, coordination with other agencies, accomplishments related to state and local planning, future directions of the SPIN project, and budget. Appendixes, which make up over half the document, contain a report of the project as presented to the Mile High Child Care Association Board and the SPIN preschool manual which provides guidelines for assessing the developmental levels of young children with special needs, for programming for this population, and for helping these children grow and learn in regular day care or Head Start settings. The manual contains information on staff training workshops, tips for classroom instruction, and numerous forms, checklists, and planning charts. (SBH)

Descriptors—Biculturalism, Court Litigation. *Cultural Influences. *Disabilities, Elementary Secondary Education, Emotional Disturbances, Federal Legislation. *Handicap Identification. *Hispanic Americans, Intelligence Tests, Learning Disabilities, Mental Retardation, Spanish Speaking, Speech Handicaps, State Legislation, Student Evaluation. *Test Bias, Testing

The text examines issues related to Hispanic children in special education. Chapter I discusses four court cases brought against schools for inappropriate placement of Hispanic and other minority students in classes for the educable mentally retarded. Testing is the focus of Chapter 2, which includes analysis of linguistic and cultural bias, factors involved in intelligence testing of Spanish speaking children, and a review of seven tests recommended

for diagnosing exceptionalities in this population. Chapter 3 views learning in a dual cultural context; touches on the effects of such cultural factors as dependency, personalism, and humanism; considers the effects of culture on communication; and describes interference factors originating in the majority culture. Related national and state legislation is reviewed in Chapter 4, and Chapter 5 discusses the current status of special education with Hispanics and makes suggestions regarding testing, overall service delivery, inservice training, and teaching competencies. The chapter also provides prescriptions for teaching Spanish speaking children with specific handicaps (emotional disturbance, mental retardation, learning disabilities, and speech and communication handicaps). Preschool Summer Language Program. A Final Report Presented to the Educational Program Committee of North Clackamas School District. North Clackamas School District 12, Milwaukie, Ore.

Bureau No.—EPC-79/80-5

Pub Date—11 Feb 80

Note—39p.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Disabilities. *Language Handicaps.

*Parent Education. Preschool Education.

*Speech Handicaps. *Summer Programs

The report examines a summer program for 22 speech and language delayed preschool children. It is explained that a 6 week speech and language program for the children was supplemented by a series of four parent training sessions. Aspects of the child's program, including personnel, transportation, physical setting, scheduling, large group activities, work time activities, and play time activities are described. Positive comments on the program's effects are cited. Among the appended materials, which comprise nearly one half the document, are a list of materials used and sample organizational and individualized educational program forms. (CL)

A Manual of Art for the Educable and Trainable

Mentally Retarded Child. Revised.

Alabama State Dept. of Education, Montgomery.

Pub Date—78

Note—38p.

Pub Type—Guides - Classroom - Teacher (052)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Art Activities. *Art Expression. Elementary Education. *Mild Mental Retardation. *Moderate Mental Retardation. Program Implementation

The document is designed for the Alabama special education teacher who desires to provide an art program for the educable and trainable mentally retarded student. The manual offers information to local school systems on initiating, organizing, and expanding services in this area. Hints are presented about organizing the classroom, art supplies, scrap materials, sources of ideas for creative expression, and combining colors. Twelve pages are devoted to lesson plans in the following art activities: cutting, tearing, and pasting (for example, silhouettes and collage); drawing and painting using pencils, crayons, chalks, and paint; printing processes; crafts (for example, puppets, paper mache, and masks); and other media activities (for example, booklets and seasonal activities). Materials, procedures, and suggested lesson subjects are outlined for each activity. (Author: SBH)

ED 192 516 EC 130 197

Pearl, Ruth A. And Others. Learning Disabled and Normal Children's Responses to Requests for Clarification Which Vary in Explicitness.

Pub Date—Sep 79

Note—14p.; Paper presented at the Annual Boston University Conference on Language Development (4th, Boston, MA, September, 1979).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Child Development, Elementary Education, Exceptional Child Research, *Feedback, *Learning Disabilities, *Responses

The study involving 67 learning disabled (LD) children (grades 1 through 8) was designed to track the developmental course of the understanding of the more subtle forms of feedback (i.e., facial expression), to examine LD children's understanding of nonexplicit requests for clarification relative to that of normal achieving children, and to explore how individual differences in children's understanding of conversational rules may be related to measures of the more general perceptions. Children's locus of control was identified using the Intellectual Achievement Responsibility scale and the Crandall scale, and children's understanding of different types of feedback was examined via the classic referential communication task requiring the child to describe each of a series of abstract figures to an adult female experimenter so that she could find the picture being described from a large array of the same pictures. Results indicated that whether children respond to requests for clarification is related both to their personal characteristics and to the explicitness of the feedback. The prediction that LD children would be less responsive to facial feedback than control children was confirmed only for young LD girls. (SBH)

Descriptors—*Child Rearing, Elementary Secondary Education, *Gifted, *Parent Education, *Parent Workshops

The document offers guidelines for conducting an inservice program for parents of gifted students. Initial sections describe the inservice model, list activities on identification of the gifted, and present information on emotional consequences of gifted-

ness. Following sections address key points from other presentations, the workshop agenda, and procedures for writing a speech. A sample parent questionnaire is included as are the text of a speech given to parents by a parent, a list of questions and concerns raised by parents during inservice meetings, biographical information on two children, and a parent bibliography. Appendixes include question and answer sheets containing information on such topics as parents of the gifted and talented, characteristics of the gifted and talented, and funding for gifted programs. Descriptors—*Conversational Language Courses, Cross Cultural Training, Cultural Education, *German, Learning Activities, Learning Modules, Phonology, Postsecondary Education, *Pronunciation, *Second Language Learning, *Speech Communication, Speech Skills, *Vocabulary Development

This is the first module of 10 in the German Headstart program. Each of the 2 units in the module contains objectives, exercises, and a self-evaluation quiz. In addition, there are several supplementary exercises and self-evaluations. The objective of this module is to enable the student to pronounce and read German sounds, to find out the location of some landmarks in German, and to understand various answers one might get to some questions. Unit One deals with the most important differences between sounds and spellings of German and English; unit two presents conversations and exercises on them. (AMH)

Identifiers—Questions

This is the second module of 10 in the German Headstart program. Each of the 3 units in the module contains objectives, exercises, and a self-evaluation quiz. In addition, there are several supplementary exercises and self-evaluations. The objective of this module is to enable the student to deal with three situations: (1) getting to a specified place, (2) asking how far away it is, and (3) finding out which means of transportation to take. The emphasis is on developing the ability to request information and to ask directions. In addition, German numbers are introduced. (AMH)

This is the third module of 10 in the German Headstart program. Each of the 2 units in the module contains objectives, exercises, and a self-evaluation quiz. In addition, there are several supplementary exercises and self-evaluations. The objective of this module is to enable the student to order a meal in a restaurant and to chat with a German in the restaurant. Much emphasis is placed on understanding the names of German dishes and drinks in print and pronouncing them properly. (AMH)

Ingram, D. E.
Methodology (Chapter A in the Teacher's Manual of the Adult Migrant Education Program, Australia).

Australian Dept. of Immigration and Ethnic Affairs, Canberra.

Pub Date—79

Note—41p.

Pub Type—Guides - Classroom - Teacher (052)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Adult Education. *Course Content. Educational Theories. *English (Second Language). *Second Language Instruction. *Teaching Methods

This methodology for teaching English as a second language begins with a discussion of the basis for methodology, which is seen as revolving around the nature of language and the nature of the learner and society. The actual methodological approach is embodied in the following chapters: "Developing an Integrated Programme," "Focus on Use," "Focus on Communication," "Focus on the Learner," "Contextualize the Language," "Provide Wide, Diverse Experience," "Practice 'Mobilizing' the Language," "Individualize Instruction," and "Language Laboratory." A section devoted to course components covers community involvement, syntax, vocabulary, functions, discourse and cohesion, the sound system and paralinguistics, registers, the four macroskills, culture teaching, and attitudinal development. Descriptors—*Conversational Language Courses. Instructional Materials. *Languages for Special Purposes. *Law Enforcement. *Police. Postsecondary Education. Second Language Instruction. *Spanish. Speech Communication. Textbooks

This textbook is designed to satisfy the linguistic needs of law enforcement personnel in the United States who deal with Spanish-speaking communities. The text is adaptable to individualized and self-paced programs. The material stresses career-oriented, "need-to-know" Spanish, relevant cultural awareness materials, practical role-playing exercises, and task assignments. Mexican-American terminology is used with footnotes for Puerto Rican variations. It de-emphasizes grammar and the solving of grammatical problems. Text material has been thoroughly researched from both a professional and a linguistic point of view, and is based on realistic and authentic situations. All vocabulary is practical and is presented in context with lively cartoon-type visual cues. Dialogue non-verbal cues are in comic strip format with the written text on the open page to the right for easy reference. Content provides for intensive development of oral expression, listening comprehension, and reading knowledge of basic Spanish required in performing specialized functions. Also included are relevant phonetics, vocabu-

84 Document Resumes

lary, and cultural material. (Author/AMH)

This two-way dictionary is a supplement to the Persian 12-Week Course. It consists of a Persian-English and an English-Persian section. Phonetic symbols are used for indicating Persian pronunciations. In addition to vocabulary, the Persian-English section contains idioms and expressions. With the infinitives, the present and past simple roots of the verb are given. Explanatory notes are provided. The English-Persian section is simplified and contains only the vocabulary of the course. (DLI/JB)

This first volume of the DLI Basic Course in French contains 15 lessons, one for each day of the first three weeks and initial phase of the course. Every fifth lesson is a review lesson. The objective of the initial phase is to enable the student to distinguish and produce the sounds of French with sufficient accuracy to understand and speak French within the limits of the vocabulary and grammar included in this volume. The approach is audio-lingual and student-centered. The volume includes the entire phonology and the first grammar lessons. The stage is set, as well, for the study of French life and culture. The individual lessons include the following elements: (1) perception drills on new materials; (2) a formal dialogue which has to be memorized for instant recall; (3) homework consisting of intensive drill on known material, mastery of a certain number of vocabulary items, and the study of grammar notes; and (4) pattern practice and performance which leads gradually to free conversation. (Author/AMH)

Volume 6 of the Basic Course in French contains 10 lessons, one for each day of the twelfth and thirteenth weeks of the intermediate phase. Every fifth lesson is a review lesson. The objective of the intermediate phase is to enable the student to distinguish and use the most essential structures of French. The approach is audio-lingual and student-centered. This volume includes such features as structures expressing duration of time and the formation of the subjunctive mood. The individual lessons include the following elements: (1) perception drills on new materials; (2) a dialogue to be mastered; (3) homework assignments that include intensive drills, vocabulary items, study of grammar notes and written exercises; and (4) review and practice material in reading and pattern drills which lead to free conversation. (Author/AMH)

This volume provides the prescribed cultural background that is part of the final phase of the Basic Course in French. The texts provide the basis for discussions and personal research through which students become acquainted with various aspects of the French-speaking world and learn the referential meaning of words and expressions as they are understood by the educated native speakers of French. The topics presented include: (1) French geography, politics, agriculture, family life, education, the military academy, industry, holidays, literature, and history; (2) other countries where French is spoken, such as, Belgium, Switzerland, Guiana, Haiti, Algeria, and Zaire; (3) the French in America; and (4) means of transportation in Central Africa. Descriptors—*Baseball. Cultural Education. English (Second Language). Second Language Instruction. *Spanish. *Vocabulary Development

This pamphlet is an alphabetical English-Spanish listing of more than three hundred words, phrases, and sentences related to the game of baseball as it is reported in Mexico City, in border towns, and in Spanish language newspapers in the United States. At the end of this dictionary are listed the major league teams of the United States and Canada in English and Spanish. Many of the Spanish words are Mexicanized English, such as "el jomron" a home-run, and "el ampayar," the umpire, while others are taken directly from English like "el pitcher," "el score," and "safe." The listings that are phrases and sentences are taken from newspaper reports of actual games. This pamphlet may be used in the Spanish classroom as a cultural item. It can also be employed in a bilingual program, in an English for special purposes course, or even for use in the media. (PJM)

This bibliography of education from a distance (by correspondence or telecommunication) covers materials produced in the late 60s and in the 70s. All facets of education and a variety of instructional subjects are covered. The 1,866 entries are not annotated. Both published and unpublished materials (many of the latter available from ERIC) are included. The great majority of items are in English, although other languages are covered as well. Items are arranged alphabetically by author. A subject index is provided, and addresses for obtaining items and for further information are appended. (JB)

Descriptors—Abstracts, *Annotated Bibliographies, Audiovisual Aids, English (Second Language), *German, Information Systems, *Language Research, Linguistics, *Modern Languages, Reference Materials, Research Tools, Resource Materials, *Second Language Instruction, Second Language Learning, Teaching Methods

This annotated bibliography on the teaching of modern foreign languages is the product of a West German information dissemination system that is similar to ERIC. The bibliography is published quarterly and lists items compiled in conjunction with the ERIC Clearinghouse on Languages and Linguistics as well as with a number of institutions all over the world. Most of the 303 items in this issue appeared in 1979 and 1980 but some are dated earlier. Although the items deal primarily with modern language instruction several other areas of linguistics are considered. The entries include mostly German, English, French, and Russian titles. The publication is composed of three main sections: (1) an alphabetical author/title listing of items, including full bibliographic citations and subject index terms; (2) abstracts of the items in German, and (3) a subject index developed from the descriptor terms assigned to each entry. These three main sections are preceded by directions on the use of the bibliography and lists of sources cited—periodicals, publishers, and institutions. The publication concludes with a cross-reference index of author/title to entry number. (Author/AMH)

Descriptors—Ethnicity, Language Acquisition, *Language Attitudes, Language Skills, *Learning Motivation, Majority Attitudes, *Retention (Psychology), *Second Language Learning, Social Attitudes

Identifiers—English Canadians, French Canadians

Social, attitudinal, and attitudinal factors that influence acquisition of a second language can also have an effect on the subsequent retention of that language. "Retention" is the maintenance or improvement of proficiency in a language following its acquisition. A study by G. Edwards shows that long-term retention of linguistic and communicative competence in a second language for bilinguals is a function of: (1) successful prior or initial learning,

(2) opportunity to use the information initially acquired, and (3) interest in using this information. Past research has concentrated on social factors of language acquisition rather than language retention. However, since retention depends on language competence, those factors that affect competence will also affect retention. These social factors include: (1) positive orientation toward the language group; (2) attitudes toward the learning situation; and (3) learner motivation. Of these three, motivation is the main factor linking attitudes to achievement. Additional factors are the individual's willingness to participate in activities to promote retention of the language, the perception of the prestige of the native language, and the individual's self-image when using the native language. Descriptors—Bilingualism, English (Second Language), *Evaluation Methods, French, Language Skills, *Language Tests, Longitudinal Studies, Measurement Techniques, Measures (Individuals), *Second Language Learning, *Testing

This bibliography of 138 works published since 1970 deals with evaluating the acquisition of language skills. The work is appropriate for foreign language instruction and English as a Second Language. The bibliography is divided into four sections: (1) controlled experiments; (2) evaluation in general; (3) evaluation in foreign language learning; and (4) bibliographies on evaluation, including collections of tests. The first section lists works on experiments in second language instruction that have resulted in an evaluation. Part two deals with basic works, particularly those which treat particular aspects and processes of evaluation. The third section is divided into three parts: (1) factors to be evaluated, that is, book, articles and tests on testing the various language skills; (2) testing techniques that have resulted in special studies, namely, dictation, cloze procedure, multiple choice and translation; and (3) works treating current preoccupations and problems, especially self-evaluation and bilingualism. Cognitive Mastery of Grammar Rules in Foreign Language Learning. Some Experimental Work Based on the Vygotskian Model.

Pub Date—80

Note—63p.: Paper presented at the Annual Meeting of the American Educational Research Association (Boston, MA, 1980).

Pub Type—Speeches/Meeting Papers (150) — Reports - Descriptive (141)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Audiovisual Instruction, Cognitive Processes, Dutch, *Grammar, Interference (Language), Language Patterns, *Language Processing, Language Research, Learning Activities, Models, Psycholinguistics, *Russian, *Second Language Learning, Socialization, Symbolic Learning, Transfer of Training

Identifiers—*Vygotsky (Lev S)

The research discussed here, primarily that of P.J. Gal'perin and his associates at the University of Moscow, is an experimental demonstration of basic tenets of Vygotsky's theory. According to Gal'perin, grammatical knowledge is formed first by teaching the students material grammatical actions: these actions are ultimately to become mental actions. These mental actions are developed by passing through a series of stages in which the action takes successively different shapes, that is, material, verbal, and mental shapes. The teaching strategies developed by Gal'perin are discussed in some detail. Further discussion is devoted to a series of experiments in which use is made of: (1) visual models which materialize the grammatical structure underlying the concept of verb aspect in Russian, and (2)

an activity algorithm which serves as a recipe for the performance of the given task. (Author/AMH)

Washington Association of Foreign Language Teachers, Pullman.

Spons Agency—National Endowment for the Humanities (NEH), Washington, D.C.

Pub Date—78

Note—140p.: Prepared by the NEH Institute/Workshop for the Teaching of French Culture, University of Washington (Seattle, WA, July 1978).

Language—English; French

Pub Type—Guides - Classroom - Teacher (052)

EDRS Price - MF01/PC06 Plus Postage.

Descriptors—Adolescents, Class Activities, *Cultural Education, Food, *French, Learning Activities, Secondary Education, *Second Language Instruction, Spanish, Teaching Methods, Units of Study

This guide to cultural education as part of foreign language instruction begins with two short theme-setting papers: "Thoughts on Teaching Foreign Culture" by Howard L. Nostrand and "Modern Foreign Languages for Everyone: An Overview" by Alain Blanchet. A cultural events calendar presents a month-by-month program of activities built around cultural themes: culture games and culture discovery unit, stereotyping, folklore, intra-school class exchange, "corresponding" cultures, art fair, international dinner, foreign language festival, and a trip to a foreign country. Extensive reports on a French meal and a Spanish meal follow. Two complete cultural units conclude the document. The first is entitled "Le rôle du pain dans la vie française" ("The Role of Bread in French Life"). A variety of activities and projects includes a guide to accompanying slides, a "cultoon," and a mindmap. The second unit, "Le Français des jeunes" ("The French of Young People") revolves around youth culture in France and provides a list of slang expressions. (JB)

Suggestology and Suggestopedia: A Selective Bibliography of Western Sources.

Pub Date—80

Note—34p.

Pub Type—Reference Materials - Bibliographies (131)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Cognitive Processes, Educational Psychology, *Learning Theories, Music, Perception, Psycholinguistics, Psychophysiology, *Second Language Instruction, *Teaching Methods Identifiers—*Lozanov Method, *Suggestopedia

Newcomers to the field of suggestopedia, or the Lozanov method, are at a loss as to how and where to obtain literature on this subject, thus prompting the publishing of this bibliography. Recent interest has been spurred by, among other things, the establishment of the Society for Suggestive-Accelerative Learning and Teaching (SALT) in America and the publishing in English of Lozanov's "Suggestology and Outlines of Suggestopedia." This bibliography, with more than two-hundred titles, was compiled with information from ERIC, Social Scisearch, Comprehensive Dissertation Abstracts, Language and Language Behavior Abstracts, and an MLA bibliography. In addition to the works dealing directly with suggestopedia, an addendum with 22 titles lists: (1) sources dealing with psychological and physiological research on the brain and its function in learning, (2) works treating subliminal suggestion and perception, and (3) papers on the influence of music on learning and behavior. Autonomy and Foreign Language Learning.
Council for Cultural Cooperation, Strasbourg (France).

Pub Date—79

Note—65p.

Pub Type—Reports - Research (143) — Guides - Non-Classroom (055)

Document Not Available from EDRS.

Descriptors—Communicative Competence (Languages), *Independent Study, *Second Language Learning, Self Evaluation (Individuals), Student Educational Objectives, *Student Responsibility Identifiers—*Autonomy (Personal)

The autonomous language learner takes responsibility for the totality of his learning situation. He does this by determining his own objectives, defining the contents to be learned and the progression of the course, selecting methods and techniques to be used, monitoring this procedure, and evaluating what he has acquired. Objectives are specific to the learner, and the learner's communicative needs determine the verbal elements chosen. Learning thus proceeds from ideas to correct grammatical, lexical, and phonological form. The self-directed learner chooses the methods of instruction through trial-and-error. His selection is based on the objectives set and its applicability to internal and external constraints. The student evaluates his attainment through his objectives, and this evaluation helps him to plan subsequent learning. The concept of autonomous learning requires a redefinition of knowledge from an objective universal to a subjective individual knowledge determined by the learner. For teachers, it means new objectives which help the learner define his personal objectives and help him acquire autonomy. Several experiments in autonomous learning are described. (PJM)

Benson, Douglas K.

A Select Bibliography of Sources on the Teaching of Hispanic Culture.

Pub Date—79

Note—30p.

Pub Type—Reference Materials - Bibliographies (131)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Annotated Bibliographies, Class Activities, Cross Cultural Studies, Cultural Awareness, *Cultural Education, Higher Education, Instructional Materials, *Latin American Culture, Secondary Education, *Second Language Instruction, Spanish, *Spanish Culture

The bibliography consists of three parts: (1) an introduction, with a rationale for teaching Hispanic culture in Spanish language courses; (2) a description of one model for organization and implementation of cultural materials; and (3) the bibliography itself. Suggestions are also made on how to use film material in a conscious sequence, and how to relate films to reference materials. The materials described are intended for use at the freshman/sophomore level of college language study, but most are appropriate for high school and junior high language courses as well. A distinction is made between references useful only for the teacher or for advanced students, references which would be valuable for

general classroom activities as well as for the instructor, and essential references. The references on Hispanic cultures focus on values, perceptions, non-verbal meanings and customs. (Author/AMH)

More Competence in Foreign Languages Needed by Federal Personnel Working Overseas. Report by the Comptroller General of the United States.

Comptroller General of the U.S., Washington, D.C. Report No.—ID-80-31

Pub Date—15 Apr 80

Note—88p.

Available from—U.S. General Accounting Office, DHISF, P.O. Box 6015, Gaithersburg, MD 20760 (free)

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—*Competence, Evaluation Criteria,

Federal Government, *Government Employees,

*Language Proficiency, Language Skills, *Personnel Evaluation, *Personnel Policy, Second Language Instruction, Second Language Programs

Identifiers—Foreign Service

This report discusses the effectiveness of current programs and personnel policies in federal agencies with respect to foreign language needs. Overall, the United States has about 16,700 federal positions requiring language skills. The General Accounting Office (GAO) found that the foreign language competence of American personnel abroad is less than adequate for maximum effectiveness and efficiency, though some agencies are better than others. This inadequacy is attributed to the fact that the system for defining foreign language skill requirements is insufficient or nonexistent, and improvements are needed in foreign language assignments and in training policy and procedure. Low foreign language proficiency limits job performance, but efforts by federal agencies to meet language needs are hampered by: (1) inadequate planning which places insufficiently skilled people in language-related positions, (2) inadequate language training, (3) unforeseen turnover in these language-related positions, and (4) the fact that second language skill is only one of many capabilities an employee needs. Recommendations are given to help improve personnel policies and practices, language training programs, and the process for determining foreign language requirements. (PJM)

Learning Arabic Sounds: A Guide to the Pronunciation of the Phonemes of Arabic for Native Speakers of English.

Pub Date—80

Note—58p.

Pub Type—Guides - Classroom - Learner (051) — Guides - Classroom - Teacher (052)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—*Arabic, Articulation (Speech), Consonants, *Phonemes, Phonology, *Pronunciation Instruction, *Second Language Learning, Vowels

The purpose of this guide is to teach English speakers accurate pronunciation of the Modern Standard Arabic phonemes. Included are discussions concerning attitudes toward language learning in general, basic linguistic concepts, a descriptive survey of the phonemes with detailed instructions for their production, and lists of minimal pairs suggested for use in phonology drills and exercises. The distinctive features of the phonemes are graphically described and verbal instructions lead the student to their proper pronunciation. Attention is given to the special difficulties encountered by native speakers of English in attaining Arabic sound production skills. Both common and exclusive characteristics of the two languages are used as a basis for comparison and contrast, directing the student to the discovery and understanding of the new and different Arabic sound system. The guide assumes the aid of a native Arabic speaker as a model for mimicry and a source of criticism and correction. (Author/PJM)

Evaluation of the German-American Partnership Program between Madison Public Schools and Neutourschule of Mainz, Federal Republic of Germany.

Goethe House, New York, N.Y.

Pub Date—79

Note—41p.; Headings printed in colored ink will not reproduce well.

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Cultural Education, *Cultural Exchange, *Exchange Programs, *German, High School Students, Language Proficiency, Program Evaluation, Secondary Education, Second Language Learning, *Second Language Programs, Student Attitudes, Student Motivation

Identifiers—*German American Partnership Program, West Germany

The program evaluated here involved a two-way exchange of students and teachers from a school in Mainz and two high schools in Madison, Wisconsin. Homestay and cultural touring were outstanding aspects of the program. To measure the impact of the program on American participants, tests and questionnaires were administered before and after the visit. These instruments produced evidence that strongly suggests that the program had a highly favorable impact on desire to speak German as well as on self-confidence in self-expression in German. The great majority of students showed considerable improvement in fluency, and there appeared to be a positive carryover into reading ability. Students, who all went into the program with a positive attitude toward German language, culture, and people, had that attitude strongly reinforced. From the standpoint of language learning, the most significant factor appears to be the development of an "integrative" attitude toward the German language and people. The measurement instruments are appended. (JB)

Identifiers—Ohio State University

This conference covered the following topics: (1) individualized instruction in Arabic, French, German, Latin, Russian, and Spanish at the Ohio State University; (2) individualized instruction in the same languages at other institutions; and (3) individualized instruction in other languages. Panel discussions included individualized instruction at small institutions, developing oral proficiency in an individualized setting, a roundtable discussion for administrators of individualized programs, and training teachers for individualized instruction. Descriptors—Communication Problems. *International Relations. Interpreters. *Official Languages. Translation

Identifiers—*Esperanto. *United Nations

The policies of the United Nations with regard to the six official languages have left holes in the fabric of international cooperation. Maintaining language services in all six languages has proved to be an impossibility because of the scarcity of trained interpreters and translators between, for instance, Chinese and Arabic. English, French, and Spanish are of necessity favored and are often used exclusively for various U.N. activities. Reliance on relay translation leaves many delegates at a disadvantage. Maintaining extensive language services is a strain on limited financial resources. Even full language services would not bring linguistic democracy to the United Nations; many delegates would still be hampered by the need to communicate in a language not in use, officially or culturally, in their country. Ironically, a single official language could prove more of a diplomatic force than pluralism, since delegates could count on being able to communicate in a spontaneous and unstructured manner with each other. However, it is not possible in the present day to impose any national language as the sole diplomatic lingua franca. Esperanto, as an established, easy-to-learn, international language with no attachment to any particular nation or people, should be considered as the solution to the communication difficulties of representatives from the nations of the world. Identifiers—France

The student of English as a second language in the French school system is confronted with morpho-syntactic and lexical difficulties when he or she reads texts on the university level. In addition to these difficulties, the method of approaching the text may also prove to be a problem. A method is outlined to help the student achieve an active and receptive reading skill. The student reads the first sentence of each paragraph prior to reading the whole text. This technique enables him to spot the major pieces of information, to structure the text at the macroscopic level, to predict the content of the paragraphs, and to localize the information. The use of this method in a university-level course is described, and the limitations of the method are discussed. (Author/AMH)

The recent development of the communicative approach to foreign language instruction has been accompanied by many methodological applications, most of which have revolved around an authentic use of discourse. This evolution in language instruction presents some problems, especially when communicative competence is interpreted too narrowly. Some practitioners and theoreticians are beginning to reexamine the pertinence of a differentiated training in language skills and aptitudes. These considerations have led to an examination of the status and treatment of linguistic aptitudes as they are presented in teaching materials presently available and in the framework of training in communicative competence. The linguistic aptitudes or skills in question fall into four categories: psycholinguistic, sociolinguistic, linguistic, and pedagogical. Specific training in these skills may be more economical for the learner and enable the learner to take short-term needs into account, to progress at different speeds in different skills, and to have more scope for self-direction. This course on the language of Sri Lanka is intended to be taken under a Sinhala-speaking instructor. This module introduces the Sinhala writing system. The emphasis of the module is on letter recognition. Directions for writing the symbols in the "basic" alphabet are provided so that students will have a culturally appropriate and phonetically accurate method of writing down words. Many photographs of Sinhala signs are included. Each of 28 lessons covers a specific aspect of reading and writing characters. With the addition of four practice reading sections at the conclusion of the module, this first part of the course can be completed in about 15 hours. (JB)

Identifiers—Sri Lanka

This course on the language of Sri Lanka is intended to be taken under a Sinhala-speaking instructor. This module consists of 90 "cycles," or short lessons, each based on a theme from everyday life. Dialogues appear occasionally among the cycles. Major themes include classroom expressions, terms of address, talking about money, conducting embassy business, taking the bus, knowing languages, the daily routine, the land and the people, paddy cultivation, and traveling by rail and air. In addition to drills and word lists, each lesson includes notes on structures of prominence in that lesson. Many photographs depicting life on Sri Lanka are included. (JB)

Problems in Contrastive Analysis and Error Analysis.

Pub Date—80

Note—15p.

Pub Type—Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Contrastive Linguistics, Descriptive Linguistics, *Error Analysis (Language), *Interference (Language), Linguistic Difficulty (Interference), Second Language Learning, Structural Analysis (Linguistics)

Recent years have seen the decline in popularity of contrastive analysis (CA) and the rise of error analysis (EA) as a method for explaining and predicting errors in second language learning. In CA, it is felt that by comparing the structure of a first language (L1) to that of one being learned (L2),

errors can be predicted. These errors are caused by "interference," the negative transfer of habits from L1 to L2. CA has been disappointing in its prediction of errors because it has underestimated the contribution of the learner, has not recognized fully the nature of what is to be learned, and has not taken into account the method of presentation of L2. EA looks at the errors made in L2, and claims the identification, description, and explanation of these errors will lead to a better understanding of the language learning process. Problems with CA include the lack of appropriate description, difficulties in making comparisons, and the absence of an effective measure of difference between L1 and L2. Inadequacies of EA in description and explanation of errors are due to misconceptions about the learning process. But EA, unlike CA, does take into account the learner and the manner of presentation. Teaching as a Linguistic Process. Mid-Project Research Report.

National Inst. of Education (DHEW), Washington, D.C.

Pub Date—79

Note—58p.: Prepared through the Program on Teaching and Instruction.

Pub Type—Reports - Descriptive (141) — Reports - Research (143)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Bilingual Students, Class Organization, *Classroom Communication, Cognitive Processes, *Communication Research, Communication Skills, Communicative Competence (Languages), Discourse Analysis, Elementary Education, Ethnic Groups, Ethnography, *Research Methodology, *Teaching Methods

Investigators wrote proposals for research on the nature and learning of communicative processes in the elementary classroom. Three questions were addressed: (1) What is the nature of communication in the classroom? (2) How do students acquire the rules of classroom discourse? (3) What is the effect of inadequate learning of classroom discourse rules? Abstracts of eight federally-funded projects on the topic and two commissioned papers are included here. The first, "A Summary of the Research Area: Methodology and Substantive Issues," by Louis A. Gomes, suggests that successful research methodology should be shared to benefit other researchers. In "Practical Implications of the Research," Marie E. Shiels-D'Joudi examines each project in terms of its implications for the "educational practitioner." The degree of attention to practical areas in the projects varies from extensive to minimal. It is suggested that expectations for research, basic or applied, should be made clear by the funding agencies. (PJM)

Developmental Changes in the Effects of Presentation Mode on the Storage and Retrieval of Noun Pairs in Children's Recognition Memory.

Spous Agency—National Institutes of Health (DHEW), Bethesda, Md. Div. of Research Resources.

Pub Date—[79]

Note—31p.: Paper presented at the Biennial Meeting of the Society for Research in Child Development (San Francisco, CA, March 1979).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Child Language, Children, *Cognitive Development, Cognitive Processes, Language Acquisition, Language Processing, Language Research, *Memorization, Nouns, Pictorial Stimuli, Psycholinguistics, *Recognition (Psychology), Verbal Stimuli

Four problems in children's paired-associate memory were addressed: (1) reappraisal of the presumed developmental trend in presentation mode effect during grade-school years, (2) identification of the locus of this developmental effect, (3) evaluation of the influence of combined presentation (verbal plus pictorial) relative to pictorial presentation on the storage and retrieval of pairs, and (4) evaluation of the influence of combined presentation relative to verbal presentation. Five hundred seventy-six children (144 each from kindergarten and grades 2, 4 and 6) memorized 32 pairs of common nouns by the study-test recognition procedure. Results indicated an increasing superiority of pic-

torial over verbal presentations during the grade-school years. This Grade x Presentation Mode interaction was observed in the storage phase of task performance but not in the retrieval phase. Combined presentation did not influence either the storage or retrieval of pairs relative to pictorial presentation but did enhance the storage of pairs relative to verbal presentation. A developmental trend in combined presentation relative to verbal presentation was observed in the retrieval of pairs such that retrieval was facilitated by combined presentation with older children, while presentation mode did not affect retrieval for younger children. Results are discussed in terms of dual coding and elaboration theories of paired-associate memory. (Author/JB)

A Select Bibliography of Error Analysis and Interlanguage Studies.

Abo Akademi (Finland).

Pub Date—80

Note—89p.

Pub Type—Reference Materials - Bibliographies (131)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—Bibliographies, Contrastive Linguistics, *Error Analysis (Language), *Interlanguage, Periodicals, *Second Language Learning

This unannotated bibliography consists of four sections. Section One is a general introduction to error analysis and interlanguage studies, aimed primarily at students writing their theses and at practicing teachers with little experience in these fields. Section Two presents a list of the journals referred to in the bibliography. Section Three, the bibliography proper, includes some 800 items on error analysis and interlanguage studies, covering the period from 1970 to 1979 (including also a few "classical" papers from the late 1960s). The two most important criteria for inclusion are that items have been published and that they are in English. Books and articles on contrastive analysis are included only if they deal with either or both of the two linguistic fields in question. Review articles are included. Bibliographical items are not categorized but are arranged alphabetically according to author, chronologically for each author. Section Four presents a list of other bibliographies in the field, arranged chronologically. (Author/JB)

English-Dari Dictionary.

Peace Corps, Washington, D.C.

Pub Date—Jan 79

Note—318p.

Language—English; Dari

Pub Type—Reference Materials - Vocabularies/Classifications (134)

EDRS Price - MF01/PC13 Plus Postage.

Descriptors—*Idioms, Phonetic Transcription, *Vocabulary, Word Lists

Identifiers—Bilingual Materials, *Dari

This 7,000-word dictionary is designed for English speakers learning Dari. The dictionary consists of two parts, the first a reference to find words easily translatable from one language to the other, the second a list of idioms and short phrases commonly used in everyday conversation, yet not readily translatable. Many of these entries have no adequate translation and may thus provide an insight into the Afghan culture. The list of translatable words gives Dari words in Arabic script and phonetic transcription. The list of idioms gives the phonetic transcription only. (JB)

Identifiers—Pennsylvania

In 1978 a study was initiated to determine the use and importance of foreign language proficiency in Pennsylvania businesses. Two hundred eighty-four respondents represented the commercial, health, and municipal domains. Positive responses (indicat-

ing employment of personnel skilled in languages other than English) were received from 41% of businesses, 60% of health care facilities, and 79% of municipalities, thus from 43% of total respondents. The survey revealed the following trends: (1) 85% of positive responders have employees with foreign language proficiency; (2) fewer than 25% of employers include an item on language proficiency on employment applications, and fewer than 20% would consider such proficiency for promotion; (3) the most important language in all categories was Spanish, with Italian, German, and French appearing less than half as frequently (this discrepancy was less pronounced with business respondents); (4) change in client attitude brought about by foreign-language-skilled personnel seemed most important in the health field (52%); and (5) 62% of the businesses felt that expansion might increase their needs for language proficient employees. The responding organizations are listed in an appendix. Results are reported in tabular and graphic form. (JB)

Descriptors—African Languages, *Basaa, Biculturalism, *Bilingualism, Children, Cultural Context, Cultural Influences, *French, Language Research, *Language Usage, Social Influences, Sociolinguistics, *Vocabulary Development

This study on the African child had three objectives: (1) to become familiar with the environment of the African child, (2) to investigate the vocabulary to which the child is exposed at home and at school, and (3) to compare the vocabulary of the native language with that of the school. The first part of the study constituted a linguistic study of the family situation to discover the lexical repertoire of the child in his or her native language, Basaa, as well as in the French language used in school. The second part took account of the fact that the child grows up simultaneously in two worlds, the African cultural milieu and the educational milieu. The child's native culture forms the child's understanding and organization of meaning; the educational milieu uses a language whose form and content imply many realities totally foreign to the child. Part three compared the data from Cameroon children with similar data from French children as well as vocabulary of the native language and the language of the school. (Author/AMH)

VP Anaphor Choice in Discourse.

Pub Date—80
Note—12p.; Paper presented at the Annual Meeting of the University of Wisconsin-Milwaukee Linguistics Symposium (9th, Milwaukee, WI, March 7-8, 1980).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Discourse Analysis, Pronouns, *Sentence Structure, *Structural Grammar, *Verbs
Identifiers—*Anaphora

Five types of Verb Phrase (VP) anaphors which appear to exist in free variation actually have specific grammatical, semantic, and rhetorical functions which account for the existence of some to the exclusion of others in certain syntactic environments. The five anaphors are: "do so," "do it," Verb Phrase Deletion (VPD), VPD with "too," and so-inversion. "Do so" and "do it" are the only true VP pro-forms. Certain grammatical restrictions on VPD with "too" and so-inversion that do not hold for the other three forms indicate that VPD with "too" and so-inversion are positional variants of each other. In natural speech, VPD with "too" and so-inversion are used only when subjects are compared; the others, elsewhere. Thus, where there was apparent free-variation, only more restricted forms occurred in a given environment. VPD with "too" and so-inversion are also divided along distributional and functional lines. "Too" usually occurs with one-word subjects, presents a marked, "new-old" information sequence, and an unmarked word order parallel to its preceding sentence. The function is to contrast subjects. "So" can occur with multiple subjects and produces a marked word order by subject-auxiliary inversion, thus highlighting information. Both syntactic structure and information sequencing act together, producing different rhetorical effects. (PJM)

Descriptors—Bilingualism, Contrastive Linguistics, English (Second Language), Error Analysis (Language), *Interference (Language), *Language Dominance, Language Research, *Language Usage, Mexican Americans, Second Language Learning, *Spanish, *Syntax
Identifiers—Texas (El Paso)

The Spanish syntax of 36 English-Spanish bilingual students at the University of Texas at El Paso was examined to determine the variety and extent of English influence on Spanish syntax and to correlate the relative extent of this influence with selected extra-linguistic factors. The most significant finding was that the group of students having the highest rate of English-influenced Spanish syntax indicated that they spoke predominantly English with their peers; in contrast, the group of students revealing the lowest average of English-influenced Spanish syntax indicated that they spoke mostly Spanish with their peers. Information Processing Models of Skilled Reading: The Relationship Between Chinese Orthography and Coding Tactics in Primary Memory.

Pub Date—79
Note—36p.; Based on the author's Ph.D. Dissertation, Indiana University, 1979.

Pub Type—Reports - Research (143)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors—Adults, *Chinese, Cognitive Processes, *Decoding (Reading), Language Processing, Language Research, *Phoneme Grapheme Correspondence, Phonology, Psycholinguistics, *Reading Processes, *Retention (Psychology), Word Recognition

A probe recall short-term retention task was used to test the applicability of the "phonological recoding" (Conrad, 1972) and "flexible decoding" (Smith, 1972) models to processing tactics used by readers of Chinese. Subjects were 45 adult speakers of Cantonese. Stimuli were lists of Chinese characters

which varied in terms of phonological and visual similarity. The dependent variable was the proportion of correctly recalled target characters from "recent" positions. Significant primary memory interference effects were observed for phonologically similar lists but not for visually similar lists. Results were interpreted with reference to the two models of skilled reading. (Author)

Identifiers—Reduction (Phonology), *Voicing

Four papers report on phonetic differences between Finnish and English, with pedagogical implications for teaching English as a second language. "The English /ptk/-bdg/ Distinction: Data and Discussion" by Kari Suomi is a survey of recent work on the phonetic parameters of the fortis/lenis distinction. The distinction "voiced-voiceless" is preferred to "fortis-lenis." In "The Voiceless-Voiced Opposition of English Consonants: Difficulties of Pronunciation and Perception in Communication between Native and Finnish Speakers," Risto Hanninen analyzes the learning difficulties encountered by Finns in isolated words, in words included in word lists, and in words embedded in meaningful sentences. Learning difficulties vary greatly according to context. In voiced-voiceless identification tests, Finnish students failed to identify most of the tested oppositions. In "Vowel Reduction in the English of Finnish Learners" by Hannele Heikkinen, the quality of the final reduced vowel in English, when used by Finnish speakers, was found to be influenced by lip rounding reflective of Finnish "oe." Finally, in "The Discrimination and Identification of English Vowels, Consonants, Junctures and Sentence Stress by Finnish Comprehensive School Pupils," Reijo Lammimäki deals with problems of language testing as related to identification problems, and questions the usefulness of existing tests in interlanguage research. Kendall, Janet Ross Mason, Jana M.
Polysemous Words and Sentence Comprehension: A Follow-Up Study.

Pub Date—80
Note—15p.; Paper presented at the Annual Meeting of the American Educational Research Association (New Orleans, LA, April 7-10, 1980).
Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Cognitive Processes, *Context Clues, Elementary Education, *Reading Comprehension, Reading Instruction, *Semantics, *Word Recognition

Three experiments were conducted to determine how children assign meaning to a multiple-meaning word in a sentence context. Fourth-grade children were given sentences in which a key word carried a meaning other than its "primary," or most familiar, meaning. Two types of multiple choice questions could then follow: in the first type, the secondary, or "correct" meaning, and the primary were among the choices. The second type had only the secondary meaning among the choices. Findings show that when the primary meaning was among the choices, it was chosen by the children, even when it was inappropriate to sentence context and the children knew the secondary meaning. This would indicate that children were not attending to sentence context, but to individual words. They correctly chose secondary meaning when it appeared without the primary meaning. Training was then conducted to determine which of two methods was more effective for teaching meaning: teaching contextualization or teaching individual words. Findings show the former to be better. Two explanations are offered: (1) grade-school reading instruction focuses more on

individual words rather than extended discourse, making contextualization difficult; and (2) ability to contextualize may be due to the child's knowledge of different meanings of a word. Thus, context training is more effective for meaning learning. (PJM)

Seely, Jonathan

On Seeing Red with the "Silent Way".

Pub Date—[80]

Note—18p.

Pub Type—Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Color, *English (Second Language), *Mnemonics, Phonics, *Pronunciation Instruction, Second Language Instruction, Teaching Methods

Identifiers—*Silent Way (Gattegno)

As a learner-oriented approach, Gattegno's "Silent Way" has recently been receiving much attention in the teaching of English as a second language. Whereas the cognitive approach to the teaching of language deserves praise, an integral aspect of Gattegno's method includes the introduction of a 37-color alphabet, used in a one-to-one phonics approach now out of favor among reading specialists. There is an inconsistency between Gattegno's rule-oriented approach to syntax and the patternless memorization of color-grapheme correspondences. While there is much good in Gattegno's cognitive approach and subordination of teaching to learning, there is an equal danger of "seeing red" with his colors. (Author)

A Compendium of Bilingual Education and Related Projects at the National Institute of Education. National Inst. of Education (DHEW), Washington, D.C.

Pub Date—Jul 80

Note—72p.

Available from—Bilingual Team, Reading and Language Studies Division, Teaching and Learning Program, National Institute of Education, Washington, DC 20208

Pub Type—Reference Materials - Directories/Catalogs (132)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—*Bilingual Education, Bilingualism, *Educational Research, Ethnic Groups, Federal Aid, Institutions, Literacy Education, Minority Groups, Multicultural Education, Program Descriptions, Second Language Learning

Identifiers—*National Institute of Education

Fifty-four current and recently-completed research projects related to bilingual education and funded by the National Institute of Education (NIE) are described. In addition to a 200- to 300-word abstract, each project description includes the name and address of the project director, the funding amount, duration of project, and the NIE project officer. Bilingualism, ethnic education, literacy education, second language acquisition, and sociocultural factors influencing education of minorities are among the frequent themes of funded projects. Projects under the direction of the following divisions of NIE are included: Reading and Language Studies Division; Teaching and Instruction Division; Learn-

ing and Development Division; Home, Community and Work Division; Testing, Assessment and Evaluation Division; Program on Education Policy and Organization; and Program on Dissemination and Improvement of Practice. Among the projects described are national centers, contract programs, grant-award studies, unsolicited awards, and regional education laboratories and centers. (JB)

Descriptors—Government Employees, *Language Proficiency, *Personnel Management, Personnel Needs, Postsecondary Education, Second Language Instruction, Second Languages

Identifiers—*Department of State, *United States Information Agency

Three years after a General Accounting Office review found that the Department of State and the U.S. Information Agency were not meeting their overseas language requirements, opportunities were still identifiable for improving this situation. The Department of State met the problem largely by lowering required proficiency levels rather than by increasing language skills. The Information Agency's percentage of appropriately filled language-designated positions actually decreased, although language-designated positions represented a larger percentage of the Agency's overseas staff than they did in 1972. To improve language capabilities, it is recommended that: (1) assignment procedures allow adequate time for language training before the assumption of posts, and that strict criteria be developed for granting training waivers; (2) the system for determining language-designated positions be based on actual job requirements and the positions be periodically reviewed; and (3) a system be developed to ensure that persons who have the greatest need for post language training are identified and given priority training. Descriptors—*Asian Americans, Cultural Background, Elementary Secondary Education, *English (Second Language), Immigrants, Language Proficiency, Second Language Instruction, *Student Teacher Relationship, Teaching Methods, Testing, Word Lists

Identifiers—*Limited English Speaking

This handbook for teachers of Asian immigrants at the elementary and secondary level presents in a straightforward manner, in outline form, information of use to teachers who must work with limited-English-speaking children from an Asian cultural background. The manners, school behavior, and parent-teacher relationships of Asian students are described. Guidelines for assessing English proficiency are set forth. Methodology and specific strategies for teaching English as a second language (ESL) are outlined. Finally, chapters are devoted to coordination with ESL and content area teachers, and to planning content area lessons. The following are included in appendices: definition and description of English proficiency levels, outline of factors that produce good interview, social humanities framework, outline of cultural topics for discussion, survival word lists, and a short article entitled "Culture and the Student." Frisian-Dutch Bilingual Primary Schools.

Netherlands Ministry of Education and Sciences, The Hague.

Pub Date—76

Note—83p.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—*Bilingual Education, *Dutch, Educational Assessment, Government Role, Language Attitudes, Minority Groups, Primary Education, Sociocultural Patterns

Identifiers—*Frisian, *Netherlands (Friesland)

To establish a framework for surveying the bilingual situation in the Netherlands and especially in Friesland, bilingualism is viewed from four angles: linguistically, psycholinguistically, sociolinguistically in the micro-environment (the speaker's community), and sociolinguistically in the macro-environment (the state). The background of bilingual education is sketched, and five widely differing types of bilingual schools from around the world are described. An attempt is then made at a comprehensive survey of foreign languages encountered in the Netherlands primary schools. With a basis thus built for the recognition of bilingual education in Friesland, the language situation in that province is described. Language ideology is discussed with reference to the language attitudes of first-year college students. The history of Frisian education is juxtaposed with the teaching situation today. The Flexible Education system in use in Friesland is elucidated. A consideration of the future of Frisian education revolves around the role of government as determined by statutory measures and the report of a government commission. It is concluded that, ideologically, bilingual education has a firm hold in Friesland, though its practical implementation is a continuing concern. (Author/JB)

Lexical Innovations: How Children Learn to Create New Words. Papers and Reports on Child Language Development, Number 18.

Stanford Univ., Calif. Dept. of Linguistics.

Pub Date—80

Note—25p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Child Language, *Language Acquisition, *Language Processing, Lexicology, Psycholinguistics, Semantics, Speech Communication

The meaning of children's lexical innovations is distinguished from the forms they rely on to convey meaning. Children require knowledge of the context in order to judge how the meaning of their innovation can be conveyed to the addressee. This contextualization is often achieved by default, since children tend to limit their early conversations to the here-and-now. Learning to assess what the addressee does and does not know is one factor children must attend to as they acquire the conventions of innovation. The word forms of lexical innovations seem to be acquired in a predictable order, with productive forms being mastered earlier. Children also attend to the semantic coherence of the new forms they are constructing, and regularize the lexical paradigms. This results in choosing, for instance, a single form for all agent nouns. Other principles also operate in the acquisition of the word formation rules for a language. (Author/JB)

Descriptors—*American Indian Languages, *Child Language, Discourse Analysis, *Language Acquisition, Language Processing, Language Research, Nouns, Psycholinguistics, Verbal Development, Verbs, Young Children

Identifiers—*Mohawk, Prefixes, Suffixes

The spontaneous speech of a Mohawk-speaking boy was recorded from age 2;10 to 4;1. Analysis of this speech indicated that certain verbal prefixes are acquired earlier than suffixes. The pronominal pre-

fix of nouns, on the other hand, enters late. Yet, before the appearance of any nominal affix, the child already uses a pronominal possessive as a free form. Its status is that of a noun. The pattern of verb-affix acquisition appears to be language particular. The pattern of affix acquisition in general conforms to the well-known principle that irregular forms are mastered later than regular ones. Data also stress the importance of low frequency forms. These might mark important transitional periods within a child's speech development. Language acquisition research that focuses mainly on quantitative material might thus ignore important strategical clues. Overgeneralization in a child's speech is not only indicative of capacity to differentiate, but it may also reveal the manner in which new linguistic information is processed. (Author/JB)

Descriptors—*Child Language, Cognitive Development, Language Acquisition, Language Research, Observational Learning, Psycholinguistics, *Time Perspective, *Vocabulary Development, Young Children

Forty-five children drawn equally from nursery school, kindergarten, and first grade were administered a nonverbal imitation task, a production task, a comprehension task, and a verbal imitation task. The results of the four tasks support the Temporal Complexity Hypothesis, which states that the components of temporality—order among events (O), simultaneity of events (S), and duration of events (D)—are acquired before their coordinations (OD, SD). Results also supported the order of acquisition hypothesis which predicted the order O, S, D. The order of difficulty of the tasks was found to be nonverbal imitation (easiest), verbal imitation, comprehension, and production. Within-subject analysis of the data supported cross-subject analysis. The following conclusions are drawn: (1) conceptual knowledge generally precedes linguistic knowledge; (2) children were able to imitate words just beyond their comprehension, suggesting that they may learn to use new words through imitation; and (3) children understand temporal words before they are able to describe temporal relationships. Descriptors—Adults, Cognitive Development, Contrastive Linguistics, English (Second Language), Interference (Language), Language Research, *Phonology, *Pronunciation, Psycholinguistics, *Second Language Learning, Identifiers—*Accents, Affricates, Fricatives, Ice-landic

An investigation of the naturalistic acquisition of a second language phonology, based on the case of a native Icelandic speaker learning the fricatives and affricates of English, reveals that neither transfer hypothesis nor the developmental hypothesis alone provides an adequate explanation of second language phonological development. This development is best accounted for by a systematic interaction between general processes of phonological development and transfer from the native language. Transfer best predicts the order of difficulty of English fricatives and affricates, while the developmental hypothesis best predicts sound substitution for difficult segments. The pattern of interaction between transfer from the native language and developmen-

tal processes noted for fricatives and affricates may be somewhat different for other types of phonological segments. Finally, variability-in language models, among different language learners, and in an individual child's production—is a complicating factor for any detailed analysis of phonological development. Several ways are suggested of taking these types of variability into account in future studies of second language phonological acquisition. (Author/JB)

Descriptors—*Articulation (Speech), *Child Language, *Language Acquisition, Language Research, North American English, Phonetics, Preschool Children, Identifiers—*Voicing

This paper reports on an investigation of the voice-onset-time (VOT) characteristics of word-initial stops produced by four year-old children. Instrumental analysis of the children's spontaneous speech showed that they had distinct distributions for voiced and voiceless stops at all three places of articulation and that there was very little overlap between voiced and voiceless cognates. Comparison of words uttered in isolation with words uttered in a sentence context revealed that these children had shorter VOT values in running speech. Reanalysis of data from younger children showed evidence of such modification according to context at age 1;9. However, even at age four the data were not completely adult-like: compared with adults, the four-year-olds had longer mean VOT values, there was a greater range of values, and there was less modification according to sentence context. The four-year-olds' data were interpreted as further evidence for the position that in producing voiceless stops in terms of mean VOT values, children first overshoot adult values and then only gradually draw them back towards adult values. Descriptors—*Child Language, *Consonants, Language Acquisition, Language Processing, Language Research, Phonology, Preschool Children, Identifiers—*Segmentals (Phonology)

This is an investigation of the phonological units used by preschool children. Twenty-four English-speaking children aged 4;0 to 5;0 were given three experimental tasks which investigated their ability to segment initial consonant clusters into phoneme-length units: (1) in a segmentation task they gave the first sound of initial cluster words; (2) in a grouping task they made initial cluster words a separate category or a subset of a larger category of words beginning with the same sound; and (3) in a symbolization task they used colored blocks to represent the sounds in initial clusters. The children were aware that words are composed of smaller segments and treated the segments as discrete units before they could identify the number of segments in a word. Data support the hypothesis that children treat clusters as units before they segment clusters into component singletons. The ability to treat the cluster as composed of two parts and to relate these parts to singleton sounds correlated with the children's prereading knowledge. (Author)

Identifiers—*Texas (El Paso)

An approach to foreign language instruction that emphasizes language acquisition rather than learning will emphasize the development of listening comprehension even at the expense of oral production, since research has shown that the latter does not suffer where the former is fostered. This approach tends to reduce the restrictive workings of the "affective filter." Just how powerful that filter can be is illustrated by the poor results of Spanish programs in the public schools of El Paso, Texas. In this city, students undergo traditional FLES training, which amounts to hundreds of hours of Spanish instruction over a period of six years. Still, the effect of the program is to teach failure through the repeated reinforcement of awareness of communicative incompetence. Furthermore, a linguistic continuum of native and non-native Spanish speakers exists in El Paso, rendering nearly impossible the separate placement of Anglos who would benefit from a classroom environment free from the implied intimidation of those who speak at least some Spanish at home. An aural-comprehension approach would effect a high degree of individualization, permitting real progress for each student and freeing students from what amounts to a burden to perform. (JB)

Identifiers—Canada

This paper reviews the research on second language acquisition and bilingualism conducted in Canada over the past decade (1970-79). The material on second language acquisition is presented under the following headings: approaches to second language instruction, individual differences and second language acquisition, and effects of second language acquisition on individual characteristics. The literature on bilingualism is discussed under these headings: perceptual processes, the representation of experience, consequences of bilingualism, and bilingualism in interpersonal communication. The bulk of the paper consists of a narrative report; an 11-page bibliography, alphabetical by author, is appended. (Author/JB)

Introduction to the Arikara Language.

Mary Coll. Bismarck, N. Dak.

Spons Agency—National Endowment for the Humanities (NFAH), Washington, D.C.; Office of Bilingual Education and Minority Languages Affairs (ED), Washington, D.C.

Pub Date—79

Note—445p.; Best copy available.

Pub Type—Guides - Classroom - Learner (051)

EDRS Price - MF01/PC18 Plus Postage.

Descriptors—*American Indian Languages, Grammar, Postsecondary Education, Secondary Education, Second Language Instruction, Textbooks, Vocabulary

Identifiers—*Arikara

Arikara is spoken by the Arikara Tribe on the Fort Berthold Indian Reservation in North Dakota. This textbook is designed for use in a beginning language class or for independent study. It is intended to be a practical introduction to the language that will serve the need for a year-long course at either the secondary or postsecondary level. It is hoped that the book also constitutes a modest contribution to the preservation of the rich Arikara linguistic heritage. The 50 lessons combine in their themes grammar instruction with vocabulary development. Verb charts and a vocabulary list are appended. (JB)

Nahinsky, Irwin D.

Notes on a Theory of Concept Representation in Semantic Memory. Lektos: Interdisciplinary Working Papers in Language Sciences, New Series, Volume 1.

Louisville Univ., Ky. Interdisciplinary Program in Linguistics.

Pub Date—80

Note—47p.; Not available in paper copy due to small print size.

Pub Type—Reports - Research (143)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—Classification, *Cognitive Processes, *Concept Formation, Learning Theories, *Memory, Mnemonics, Psycholinguistics, *Semantics, Verbal Learning

A theory for representation of concepts in memory is proposed which emphasizes the association of salient exemplars with the concept. Previous theories dealing with the classification processes involved in acquiring new concepts have shown that clear category boundaries do not exist. It is proposed that present theory must account for the "fuzziness" of category boundaries found in natural languages as well as how learning is nonetheless achieved. A set of exemplars, associated with the concept through learning experience, is used for comparison with a newly encountered stimulus to ascertain if that stimulus is encoded as a set of features. Thus, the exemplars associated with the concept become a collection of intersecting feature sets. In this context, the set of features common to all exemplars is considered the set of "defining" features for the concept. A concept is considered "fuzzy" to the extent that "nondefining" features in the set of represented features are more frequent than defining features. Difficulty of verifying class membership for stimuli is hypothesized to increase with fuzziness of the concept as measured by a proposed index. Tests of the theory are suggested. (Author/PJM)

Improving Foreigners' Pronunciation of American English.

Pub Date—80

Note—93p.; M.A. Thesis, Hunter College of the City University of New York.

Pub Type—Guides - Non-Classroom (055) — Dissertations/Theses - Masters Theses (042)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—Classroom Techniques, Educational Needs, *English (Second Language), Foreign Students, Higher Education, Lesson Plans, Models, North American English, *Pronunciation Instruction, Second Language Instruction, Teaching Methods

Existing literature on pronunciation instruction in English as a second language is reviewed, revealing that significant attention to the improvement of American English pronunciation among foreign students has been lacking. For the teacher's benefit, an analysis of basic phonetics is presented, laying a foundation for understanding pronunciation problems of foreigners. A model of nine lessons for teaching American phonemes is developed in detail, using one example (th), but applicable to all others. A multi-approach technique is used (audio-lingual, syntactic, contrastive analysis, articulatory, theatrical, visual aids), as well as useful games and special devices. The study emphasizes the great need for, and advantages of, increased attention to pronunciation improvement. (Author)

The Role of the Teacher-Made Visual Aid in the Adult ESL Classroom.

Pub Date—80

Note—142p.; M.A. Thesis, Hunter College of the City University of New York.

Pub Type—Dissertations/Theses - Masters Theses (042) — Reports - General (140) — Guides - Classroom - Teacher (052)

EDRS Price - MF01/PC06 Plus Postage.

Descriptors—*Adult Education, *English (Second Language), Formative Evaluation, *Material Development, Second Language Instruction, *Teacher Developed Materials, *Visual Aids

Teacher-made visual aids (as opposed to the commercial variety) for adults are evaluated. These materials are put in perspective through a determination of their relationship to current theories of visual learning, design, color, and size. Reasons for their continued applicability for adult students are considered. A description of the uses of a number of visuals (which are in the text) is included, and suggestions for the creation of similar visuals are offered. It is concluded that teacher-made visuals have an important immediacy and remain valuable in instruction in English as a second language as much for adults as for children. (Author)

Identifiers—Danish, Tongan

This instructional aid for elementary and secondary teachers of English as a second language recommends itself especially to those situations where a bilingual teacher and a formal bilingual program are not available. The first item presented is a letter to parents translated into each of the 21 languages covered. The letter urges the parents to reinforce at home what the student is being taught in school. Information on syntax variants and common pronunciation problems is then presented for each language. Several sections are devoted to transcultural picture word lists of things, opposites, place or position, actions, colors, numbers, and shapes, with the English word for the object, action, etc. printed under the picture. The book concludes with the "220 Basic Sight Word List" of Dolch in the various languages. (JB)

Semantic Facilitation on a Bilingual Lexical Decision Task.

Pub Date—10 Apr 80

Note—13p.; Paper presented at the Annual Convention of the Eastern Psychological Association (51st, Hartford, CT, April 10, 1980).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Adults, *Bilingualism, *Language Processing, Lexicology, *Memory, Psycholinguistics, Semantics, Translation

The research reported here examines the influence of knowledge of two languages on the organization of semantic information in long-term memory. Eight English-French bilingual adults were presented pairs of letter strings and had to decide whether both strings were words. Half of the trials contained English-French word pairs which required a "yes" response. Of these, half were translation pairs and half were semantically unrelated English-French word pairs. Reaction times for the

translation pairs were found to be significantly faster than those of the semantically unrelated word pairs. When this result is compared against a similar monolingual lexical decision task, it is found that the magnitude of this semantic facilitation effect is much larger, both in absolute time reduction and in the proportion of variance accounted for by the manipulation. The presence of this semantic facilitation effect indicates that the meanings of words from different languages are organized in a common area of bilingual semantic memory. (Author)

Grammatical Morpheme Development in an Aphasic Child: Some Problems with the Normative Model.

Pub Date—79

Note—49p.; Revised summary of a paper presented at the Annual Boston University Conference on Language Development (4th, Boston, MA, September 15, 1979).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Aphasia, *Child Language, *Cognitive Development, *Language Acquisition, Language Research, *Morphemes, Morphology (Languages), Phonology, Psycholinguistics, Young Children

Major findings are reported of a longitudinal, naturalistic study of grammatical morpheme development in an aphasic child from 5;5 to 6;1. The majority of the morphemes were not acquired in the same order nor at the same mean length of utterance (MLU) levels reported for normal children. As an alternative to the normal acquisition model, based on the theory of cumulative grammatical complexity, it is proposed that the forms developed in order of their semantic and phonological salience, as determined by syntactic, semantic, and phonological context. It is suggested, with respect to current remedial training procedures, that neither the MLU index nor level of grammatical morpheme production serves as a reliable measure of the aphasic child's grammatical knowledge. Given the operation of temporal sequencing constraints, abnormally low levels can result from a strategic tendency to reduce the length and phonological complexity of the sound string or phrase. It is argued that the more redundant and less sonorant items are particularly susceptible to these processing constraints and that their omission does not in itself constitute evidence of a syntactic or cognitive deficit. (Author)

Walton, Marsha D.

The Discourse of Making Amends: A Grammar of Remedial Interchanges.

Pub Date—Apr 80

Note—16p.; Paper presented at the Southeastern Conference on Human Development (Alexandria, VA, April 1980).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Child Language, *Cognitive Development, *Discourse Analysis, *Generative Grammar, *Language Acquisition, Language Research, Psycholinguistics, Speech Communication, Young Children

Narrative observations were made of remedial interchanges occurring among school children (K-4) in open classrooms. Transcripts of interchanges were typed move by move and coded according to a hierarchical coding scheme (remedy, defiance, no response, relief, ending, and ambiguous). The interchanges of the kindergartners and first graders were examined separately from those of the third and fourth graders in an effort to produce a descriptive grammar that would be capable of generating the move sequence observed at each age. The rule systems of the resulting grammars revealed only minor discrepancies. However, an examination of misses-interchanges not generated by the grammar-proved cogent for a developmental analysis. Furthermore, when all interchanges were parsed according to the grammar, an analysis of frequency of choice of a given move among the grammatical possibilities revealed a number of age differences in selection tendencies. Older children appear as more adversative, and seemingly less mature than younger children. However, by responding to a challenge with a counter-challenge, an older child reveals a readiness to play two roles, a complexity not often seen among young children. More simpli-

tic measures of complexity such as the number of moves per interchange did not change with age. (JB)

Descriptors—*American Indians, *Bilingual Education, Educational Planning, *Federal Legislation, Hispanic Americans, History, Immigrants, Non English Speaking

Identifiers—*Bilingual Education Act 1968, Bilingual Programs

This analysis explicates the federal legislation which is the foundation for many bilingual education efforts in the United States today. The first section sets forth the political background that led to the passage of the Bilingual Education Act of 1968. This background information considers the experiences of the Hispanic population in the southwest, the American Indian, and the European immigrant. The history of restriction and tolerance of non-English-speakers is set forth. The second section is an examination of the existing bilingual education legislation set forth analytically, but with some attention to the evolution from 1968 to 1974 and then 1978. Breadth of coverage, purposes, program design, the allocation process, the application process for program grants, and program administration are discussed. The concluding section addresses the questions raised by Congress and recent reports which suggest future directions and issues for bilingual education. (JB)

Descriptors—*Albanian, Dialogs (Language), Independent Study, *Pronunciation Instruction, Second Language Instruction, Speech Instruction, Structural Analysis (Linguistics), *Vocabulary Development

This self-instructional book is designed for students interested in learning to speak present-day standard Albanian. It is intended to be used in conjunction with a teacher or with tape recordings that can serve as a model for oral/aural exercises. The 30 units provide material for about 180 hours of study. Each unit consists of five parts: (1) the dialog, in which the goal is to be able to recite the dialog simultaneously with the model after several repetitions, and then to coordinate the written Albanian version with accurate pronunciation; (2) an analysis which gives an explanation of how the Albanian language functions, along with generalizations the student may have missed; (3) hints on pronunciation and a practice section that focus on the details of Albanian pronunciation; (4) a listening section, where already presented material is worked into a new conversation; and (5) supplementary vocabulary. The Albanian-English glossary lists all the words in the book and the number of the page on which they were first presented. (PJM)

This volume contains ten articles and a book review. Josef Vachek talks about "Vilem Mathesius as Forerunner of Contrastive Linguistic Studies." In "Contrastive Generative Grammar and Their Polish Equivalents," saying that despite different surface structures, they have identical semantic structures. A contrastive analysis of "The Generic Noun Phrase in English and Polish" is done by Janina Smolska and Jan Rusiecki. Ossi Ihalaainen's "Some Remarks on Word Order and Definiteness in Finnish and English" discusses passive syntax. Also included are: "Similarities and Differences between Notional Passive Sentences in English and Polish," by Ireneusz Bobrowski; "Non-Typical Cases of Plural Nouns in English and Polish," by Barbara Dan-cyger; "Lexical Cohesion in Text Analysis," by Aleksander Szwedeck; "An Investigation of Thai Interference in Selected American English Phenomena," by Eugene J. Briere and Colonel Sinuan Chianpong; and "Some Remarks about the Pragmatics of Negation in Polish and English," by Maria Kawinska. The review is "Phonology and Resonances: Some Remarks on Biedrzycki's 'Fonologia Angielskich i polskich rezonantow,'" by Edmund Gussman. (JPM)

Descriptors—Adjectives, *Contrastive Linguistics, Discourse Analysis, English, French, *Grammar, *Polish, Pragmatics, Second Language Learning, Semantics, Syntax, Vocabulary

Identifiers—Danish, Modal Auxiliary Verbs, Tense (Verbs)

This volume contains six articles. In "Integration of Linguistics as a Basis for Contrastive Studies," Hans-Heinrich Lieb discusses the problems associated with complex contrastive analysis. Hanne Martinet's "A Functional and Contrastive Analysis of Attributive Adjectives Endings in '-ant' and '-ende' in French and Danish, Respectively," shows how present participles are transferred to the adjective class in both languages. In "On Proper 'Improper Answer'" Ewa Iwanicka shows the effect of context in determining what is grammatically acceptable. Jan Rusiecki, in "Latent Bilingualism," purports that with the aid of a modest grammatical machinery and a rich vocabulary, a learner can achieve a high degree of complexity and efficacy of communication in a second language. In "Towards a Semantic Syntax of English: The Case of the Modals 'can' and 'may,'" Rene Dirven argues that there is a strong interdependence between syntax and semantics and pleads for an approach to syntax that has a built-in semantic level. James Pankhurst provides a model for analyzing time and tense relations on a cross-linguistic basis in "Closer to a Theory of Tense for Contrastive Analysis." (JPM)

Identifiers—Japan

The purpose of this report was to determine the changes that occurred from 1972 to 1976 in the field of Japanese study in the United States. The investigators compiled information from already published material and obtained data from questionnaires that were sent to all colleges and universities known to employ at least one specialist on Japan in the academic year 1976-77. The information is presented in five components: (1) teaching and training, i.e., the distribution by discipline of faculty specialists, courses and enrollment in Japanese study, study in the disciplinary courses, studying done in Japan, and Japanese study at the undergraduate, graduate, and professional school level; (2) individual and collaborative post-doctoral research and other publications; (3) service to the community beyond university walls; (4) American college and university library facilities; and (5) financial resources. The report is constructed wholly of quantitative evidence. The appendices, containing text and detailed tables, summarize the major points. (Author/PJM)

The Full-Year Asian Language Concentration FALCON Program in Chinese Language at Cornell University.

Pub Date—May 79

Note—32p.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Chinese, *College Second Language Programs, Communicative Competence (Languages), Graduate Students, Higher Education, *Intensive Language Courses, Language Skills

The Full-Year Asian Language Concentration (FALCON) program was designed for students who need an intensive program in Chinese to make them proficient enough for graduate study. Using L1, FALCON teaches students to express adult concepts in L2. Since good writing requires a great degree of proficiency, it is neglected initially for the sake of a balance between speaking and reading. More time is spent on speaking to help familiarize the student with various dialects and because active speaking develops more language skills than does passive reading. The volume of reading done shows the student the vast difference in style between spoken and written Chinese. Only Chinese is spoken in oral drill sessions, while the native language is used to explain grammatical points and to gloss Chinese words in order to assure that the student fully comprehends the new material. Cultural Bias in Testing ESL.

Pub Date—Feb 80

Note—12p.; Paper presented at the Annual Meeting of the Southeastern Conference on English in the Two-Year College (15th, Birmingham, AL, February 21-23, 1980).

Pub Type—Opinion Papers (120) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Cloze Procedure, Cultural Context, Culture Conflict, *Culture Fair Tests, *English (Second Language), *Language Tests, *Test Bias, Test Items

Although cultural content is unavoidable as a backdrop for good language testing, cultural bias in testing English as a second language presents many dangers. A picture cue calling for a correct grammatical response may evoke an incorrect answer if the pictorial content is culturally coded. The cultural background behind a test must be accurately reflected, without misinformation or misleading emphases. Current events, especially those involving geography and "hot news items," should be questioned as a cultural setting for test items. A test designed for use abroad should not contain culture-coded items reflective only of certain American households. Test administration must take into account cultural conditioning that may find the student terrorized in the face of a typographical error, a timed test, or the language-specific bias of a cloze test. Syntactic differences between the native language and English may render certain tests useless as placement instruments. Test formats that are taken for granted in the American educational system, especially cloze tests, should be examined for the degree to which they may, by their nature, handicap one linguistic group or another. Identifiers—Canada

This is the final report of an evaluation of exchange programs operating under the Canadian Bilingual Exchange Secretariat. Two types of exchange programs are evaluated: a summer program between groups of secondary students from selected schools in Quebec and Ontario, and a school-year program between groups of students from selected schools in the same provinces. Student characteristics and effects of programs on student attitudes are discussed. The overall effects of both programs were found to be positive. Important language gains were demonstrated by participants, both in terms of second-language ability and language-learning strategies. The sociocultural outcome comprised processes of gaining knowledge, establishing contact, and experiencing another culture. Recommendations include: (1) broadening the social and geographical area from which exchange participants are drawn, (2) arranging for the different needs of students in core programs and those in immersion or bilingual programs, (3) stressing participation in family and community life rather than acquisition of cultural knowledge, and (4) preparing standard resource modules. Descriptors—Adult Education, Cost Effectiveness, Educational Needs, Educational Research, *English (Second Language), *Enlisted Personnel, *Language Proficiency, Military Training, *Personnel Management, Spanish Speaking

Identifiers—Navy

This study was conducted to determine the extent of the Navy's problem with recruits who speak English as a second language (ESL). One hundred two Hispanic recruits were tested and interviewed to assess their proficiency in English and problems that low proficiency might be causing in recruit training. Two groups that work with Spanish-speaking recruits responded to a questionnaire. Results indicated that: (1) the Navy needs an ESL training program, (2) the Defense Language Institute's English Comprehension Level test should be used to screen recruits for ESL training, and (3) all recruits who speak English as a second language and who have had no prior U. S. education should be referred

automatically to the ESL program. An economic analysis was also conducted. The analysis indicated that the savings resulting from lowered attrition would pay for the ESL program. (Author)

Descriptors—Adult Education, Bilingual Education, English (Second Language), Formative Evaluation, Legislation, Program Administration, *Program Effectiveness, Surveys, *Vocational Education

Identifiers—*Bilingual Programs, *Limited English Speaking

Vocational educational programs for adults with limited English-speaking (LES) ability were surveyed and evaluated. The survey facilitated a profile of the status of bilingual vocational training, of the target group and trainee characteristics, of varieties of program design and operation, of instructional practices in English as a second language, and of outcomes for trainees. On the basis of this descriptive information, an analysis produced an assessment with the following major points: (1) efforts of LES persons to profit from vocational education are severely restricted and the problem affects millions of United States citizens; (2) inadequately trained LES persons are unable to fill the critical need for trained personnel in vital occupational categories; (3) LES persons suffer the hardships of unemployment or underemployment; (4) a critical shortage exists of instructors possessing both the job knowledge and dual language capabilities required for vocational instruction of LES persons; and (5) a shortage exists of instructional materials and of instructional methods suitable for bilingual vocational training. A process evaluation was generally appropiate regarding enrollment of appropriate target groups, effectiveness of instructional services, adequacy of noninstructional and support services, and effectiveness of planning and management. A number of legislative and administrative recommendations are offered. (JB)

Descriptors—Abstracts, *Annotated Bibliographies, Audiovisual Aids, English (Second Language), *German, Information Systems, *Language Research, Linguistics, *Modern Languages, Reference Materials, Research Tools, Resource Materials, *Second Language Instruction, Second Language Learning, Teaching Methods

This annotated bibliography on the teaching of modern foreign language is the product of a West German information dissemination system that is similar to ERIC. The bibliography is published quarterly and lists items compiled in conjunction with the ERIC Clearinghouse on Languages and Linguistics as well as with a number of institutions all over the world. Most of the 284 items in this issue appeared in 1978 and 1979 but some are dated earlier. Although the items deal primarily with modern language instruction several other areas of linguistics are considered. The entries include mostly German, English, French, and Russian titles. The publication is composed of three main sections: (1) an alphabetical author/title listing of items, including full bibliographic citations and subject index terms; (2) abstracts of the items in German; and (3) a subject index developed from the descriptor terms assigned

to each entry. These three main sections are preceded by directions on the use of the bibliography and lists of sources cited—periodicals, publishers, and institutions. The publication concludes with a cross-reference index of author/title to entry number. (Author/AMH)

Foreign Language Learning for Older Learners: Problems and Approaches.

Peace Corps, Washington, D.C.

Pub Date—10 Apr 78

Note—13p; Not available in paper copy because of faint type in original document.

Pub Type—Opinion Papers (120)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—Individualized Instruction, *Middle Aged Adults, *Older Adults, Postsecondary Education, *Second Language Instruction, Second Language Learning, Teaching Methods

An examination of some of the learning difficulties of Peace Corps volunteers 45 years of age and older who have attempted to learn a second language, combined with a review of research findings on the learning capacity of older learners, reveals areas in which the older learner can be helped to more complete success in foreign language study. Specific recommendations begin with the adjustment of physical classroom conditions such as lighting, temperature, seating, and acoustics. Individual needs and abilities should be defined in terms of prior education, sex, time elapsed since formal education, and previous exposure to foreign languages. Individualized instruction should be emphasized. Instruction will be relevant to older learners if material is drawn from the lives of people their age. Self-pacing should be emphasized instead of speed. The contract approach to attainable short-term goals can be useful. Concentration will be enhanced by breaking material and study periods into short units. Visual and vocal reinforcement will facilitate memorization, and new structures will be absorbed if they are integrated into those already known. Finally, the teacher may find that anxieties will be reduced if he/she is ready to take on the role of counselor and is sensitive to difficulties. (JB)

Fifty Views of Cooperative Education.

Detroit Univ., Mich. Midwest Center for Cooperative Education.

Pub Date—78

Note—111p.

Available from—Midwest Center for Cooperative Education, University of Detroit, Detroit, MI 48221

Pub Type—Opinion Papers (120) — Books (010) — Collected Works - General (020)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—College Credits, Community Colleges, *Cooperative Education, Cooperative Programs, Education Work Relationship, *Employer Attitudes, *Experiential Learning, Faculty, Field Experience Programs, Industrial Training, Liberal Arts, Planning, Postsecondary Education, Program Administration, *School Business Relationship, *Vocational Education, *Work Experience Programs

A series of opinions on many facets of the administration of cooperative education programming is presented. Part One reviews the philosophy of cooperative education including Lawrence Canjar's "convert" speech, a comparison of experiential and cooperative education, and discussions of parallel programs. In Part Two employers discuss cooperative education. Representatives of such companies as the Ford Motor Company, Lockheed Aircraft Corporation, and the Chrysler Corporation examine why employers participate in cooperative education, and representatives from such companies as the Detroit Edison Company and the J. L. Hudson Company explain how employers select cooperative students. Recruiting employers and a comparison of students' and employers' needs are the topics of the third section. Administration of cooperative education programs is considered in the fourth part, including some thoughts on cooperative program management, some administrative pitfalls, coord-

inator responsibilities, a look at liberal arts and cooperative education, and a cooperative education in community colleges. Part Five explores the issue of academic credit for cooperative training experience, and faculty and faculty relations are described in Part Six. The final part surveys trends, wisdom, and information in articles on the evaluation of cooperative education, placement by computer, federal funding, the Cooperative Education Association, the history of the National Commission for Cooperative Education, and the use of veterans' benefits with cooperative education. Program Review and Evaluation: Designing and Implementing the Review Process. AIR Forum 1978 Paper.

Pub Date—May 78

Note—32p.; Paper presented at the Association for Institutional Research Forum (Houston, TX, May 24, 1978).

Pub Type—Reports - Descriptive (141) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Academic Education, Administrator Role, *College Administration, Decision Making, Departments, Evaluation Criteria, *Evaluation Methods, Higher Education, Information Needs, Institutional Evaluation, *Needs Assessment, Program Design, *Program Evaluation, *Program Implementation, Self Evaluation (Groups), Use Studies

Identifiers—Air Forum

Problems, issues, and options related to the design and implementation phase of an academic program review process are considered. Directed toward administrators and other nonexpert participants in program review, the analysis is intended to assist in the decision of what kind of review is needed, how it might be carried out, and how results might be used. It is assumed that there is no one best way to design and implement a review process and the process should be user-oriented from the outset. Four groups that may be involved in the design of the review process are administrators, faculty members, consultants, and mixed groups. The need to specify and interrelate the types of decisions and information needs, purposes and types of program review, and users of program review is indicated. Three general ways to conduct the review are self-review, external review, and multiple or mixed reviews. Specific groups or staff members who could serve as evaluators within each of these alternative review approaches are specified. Types of program review methodology can be classified as classical experimental and social-anthropological methods. Elements that may be included in overall plan of program review are listed, as are possible implementation groups, implementation procedures, and implementation responsibilities. (SW)

Identifiers—*University of Texas Austin

An experimental project at the University of Texas at Austin, which was designed to increase the participation of minorities and women in educational research and related work, is described. The project brings together individuals who are at the post-doctoral and pre-doctoral level to cooperatively work on research questions. The project model includes the following provisions: (1) stipends for four post-doctoral participants and eight pre-doctoral participants and experience in special activities and research projects; (2) special activities that include monthly seminars conducted by the post-doctoral participants and other scholars; (3)

special sessions (five per year) to be conducted by nationally recognized researchers; (4) opportunities to engage in team research projects and in individual research projects; (5) access to support services such as statistician consultant services, computer time, and library resources; and (6) the opportunity to engage in publication of research findings through a project-sponsored compilation of research projects. Aspects of 1978-79 program recruitment, support services, training, and dissemination activities are described, as are proposed activities for 1979-80. Appended materials include information and forms concerning selection criteria, project needs assessment, training session agendas, monthly progress reports, session evaluations, program evaluation, research teams and topics. Can There Be Anything Affirmative About Affirmative Action in the 1980's?

Pub Date—79

Note—8p.; Paper presented at the Annual Meeting of the American Association for Higher Education (Washington, DC, April 17, 1979).

Pub Type—Speeches/Meeting Papers (150) — Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Administrator Responsibility, *Affirmative Action, Change Strategies, *College Desegregation, *Equal Education, Females, Futures (of Society), *Higher Education, Incentives, Minority Groups, Racial Balance, Womens Education

The inherent problems of affirmative action efforts have been compounded in recent years by new ones: increasing difficulty for administrators to take risks; severe problems in predominantly black colleges brought about by successful desegregation of predominantly white colleges; and divisiveness in minority communities. New opportunities also exist, since the pool of educated women and minorities has increased, and that group has an increased awareness of its political clout. It is important now not only to maintain the base of affirmative action programs already existing, but also to superimpose a new concept that encourages institutions to act more positively rather than simply try to correct previous imbalances and problems. Programs should be structured to concentrate on the most motivated individuals and institutions, and to provide incentives rather than disincentives. A new sense of purpose and a new strategy for action are essential to all these efforts (MSE)

Descriptors—*College Planning, Computers, *Data Bases, *Data Collection, Higher Education, Institutional Evaluation, *Institutional Research, Norms, Recordkeeping, Research Directors, Research Methodology, Sampling, *School Surveys, *Small Colleges

Identifiers—*Higher Education General Information Survey

An assessment of the Higher Education General Information Survey (HEGIS) reveals that small colleges can benefit from the consistency of standardized responses in creating individual planning data systems. HEGIS has a long enough history to have stabilized its several instruments. However, if one is looking to create student or personnel specific data bases, HEGIS data will probably be too vague. Instead of approaching data collection for HEGIS in a haphazard manner, colleges should: gather all of the forms in one place under one office of policy and planning; do longitudinal studies with HEGIS data; do comparative studies using other institutions' HEGIS data; and encourage annual cross-institutional studies to provide both longitudinal and comparative information for a consortium of colleges interested in doing data planning. Possible studies that can be conducted using HEGIS data are briefly explained. Research directors should be aware that HEGIS data is incomplete on personnel composition and financial aid statistics. Federal form EEO-6 provides a more comprehensive picture of each institution's personnel, while the FISAP form gives more detailed information on institutional financial aid. Appendices include an outline of HEGIS data elements and a document reporting HEGIS history and various survey instruments developed by the National Center for Education Statistics in May, 1978. A Capsule Look at Zero-Base Budgeting.

Pub Date—15 Jul 80

Note—9p.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Budgeting, *Budgets, College Administration, Decision Making, *Educational Finance, Higher Education, *Resource Allocation

Identifiers—*Zero Base Budgeting

Weaknesses of the traditional incremental budgeting approach are considered as background to indicate the need for a new system of budgeting in educational institutions, and a step-by-step description of zero-based budgeting (ZBB) is presented. Proposed advantages of ZBB include the following: better staff morale due to a budget that is open and justified; decision packages conveying an understanding of the whole operation; better job satisfaction; and hopefully less turnover of valued personnel. The major disadvantages of ZBB include: much paper work and time must be devoted to the effective use of the system; the system may not improve the organization; and the decision packages are hard to develop and ranking is difficult. It is suggested that ZBB be used every four or five years. (Author/SW)

Identifiers—Massachusetts

Conference proceedings on evaluation of credentials and degree equivalences of foreign students are presented. The conference was designed to improve evaluations in Massachusetts and to encourage more cooperation and greater consistency. Contributions are as follows: a UNESCO approach by Sanford Jameson; the approach of the National Association of Foreign Student Affairs by Hugh M. Jenkins; patterns of educational systems by Joel B. Slocum; and problems and resources in credentials evaluations by Gary W. Hopkins. Summaries of panel discussions on undergraduate and graduate study include the following: institutional policies on foreign student admission, communication with foreign applicants, evaluation practices, what certificates and diplomas to accept, when and how to award advanced standing credit, how to assess previous foreign study for transfer credit, verifying the authenticity of foreign educational credentials, how to understand different grading systems, evaluation of letters of recommendation, assessing foreign institutions, assessment of English-language skills, and professional licensing. Appendices include details of the UNESCO approach to credentials evaluations, an article on education in the People's Republic of China by G. James Haas, and a bibliography. (SW)

A summary of data gathered from the National Research Council's Survey of Earned Doctorates during the academic year 1978-79 is presented. The data were obtained from questionnaire forms filled out by graduates as they completed requirements for their doctoral degrees. Between July 1, 1978 and June 30, 1979 a total of 31,200 research doctorates were awarded by U.S. universities. This is an increase of 1.1 percent from doctorates awarded in 1978. Information is presented on the distribution of doctorate recipients by broad field and sex plans from 1969-79, trends in the employment and study plans of doctorate recipients, trends in postdoctoral study abroad plans, and employment plans by racial/ethnic group and field of doctorate. Statistical tables provide the following information: number of doctorate recipients by sex and subfield, number of doctorate recipients by citizenship, racial/ethnic group, and subfield; profile of doctorate recipients by sex and field of doctorate; percentage of doctorate recipients by sources of support in graduate school, by sex, and summary field; and profile of doctorate recipients by racial/ethnic group and U.S. citizenship status. A list of titles of degrees included in the study and a sample form are included. (SW)

Descriptors—Budgeting, Community Colleges, Comparative Analysis, *Educational Finance, Elementary Secondary Education, *Financial Support, *Higher Education, National Surveys, Private Colleges, *Regional Characteristics, *State Aid, State Colleges, Statistical Data, *Tax Allocation, Trend Analysis

Results of a ten-year review of state appropriations for higher education in the states are presented. Findings reveal a wide range of differences among the regions of the nation and among the individual states. The share of education appropriations received by higher education institutions has grown considerably, with the greatest rate of growth occurring in the private sector. Appropriations for student aid in higher education has also increased considerably from 1968 to 1977. The division of the share within the public sector has shifted toward a larger percentage appropriated directly to the community colleges, and a smaller percentage appropriated to the advanced graduate and research universities. While higher education has increased its share of the education appropriations, its share of state general revenue dropped slightly. Overall, state governments in the aggregate kept pace in funding the increases in full-time-equivalent enrollment although the percentage change was small. Projections for future public support of higher education are included. Data on state general revenues are reported by region and by state. State appropriations information include funds to public elementary and secondary education, and appropriations to various sectors in higher education. Information is presented on appropriations adjusted for inflation, the private sector, and appropriations by enrollments. Appended material includes survey instruments and an analysis of issues in requesting information and using the data. (SW)

Descriptors—*College Choice, Course Descriptions, Degree Requirements, Higher Education, Information Needs, *Information Seeking, Institutional Research, *School Catalogs, Student Characteristics, *Student Needs, *Undergraduate Students, *Use Studies

Identifiers—*University of North Dakota

Information was obtained on the use of the University of North Dakota undergraduate catalog to determine whether it influenced a student's decision to attend the university, what it is used for, and whether the user differs among students according to age, sex, or college. Usable responses to a questionnaire, which is appended, were obtained from 1,031 students in January 1979. On the whole, results indicate that there are other factors more influential than the catalog in the student's decision to attend the university. Between 58 and 78 percent of the respondents always or usually use the catalog for information about degree requirements. Students also refer to the catalog for specific information on housing, financial aid, and student services. The younger students appear to be the largest users of the catalog for obtaining information on student life. It is suggested that some types of information could be minimally covered in the undergraduate catalog and provided under separate cover. (SW)

Descriptors—Adult Students, *Age Differences, *College Choice, *College Freshmen, *College Transfer Students, *Decision Making, Higher Education, Institutional Research, *Student Attitudes, Student Characteristics

Identifiers—*University of North Dakota

Students' reasons for applying for admission to the University of North Dakota for the academic year 1979-80 were studied. Information was obtained from a question appearing on the admission application form completed by all new freshmen and college transfer students. Results revealed that students cited reasons related to academic program 40.2 percent of the time, followed by location (25.5 percent), and school's reputation (13 percent). Further analysis revealed that age appeared to account for most of the differences. Students 25 years or older were more likely to give location as a reason than were students 19 and younger, or students aged 20-24. These groups generally stated a reason related to an academic program. Variations in stated reasons were evident between new freshmen and transfer students, military veterans and non-veterans, and between students maintaining continuous enrollment and those who had last attended school more than six months ago. However, since each of these variables consisted of categories that reflected age differences between groups, the findings were probably more symptomatic of the age differential than of true differences between groups. Differences between findings of this study and those of the American Council on Education are noted. (SW)

Descriptors—*Black Colleges, Black Students, College Role, *Educational History, Federal Aid, Federal Government, *Federal Legislation, *Government School Relationship, *Higher Education, *Land Grant Universities

Identifiers—Morrill Act 1862

Sources of information on the origin and development of the land-grant university in America and on the histories and contributions of these schools that were created and maintained by federal aid are listed. This bibliography of 600 entries also includes sources of information on the effectiveness of the federal land-grant program, on the relationship of the federal government to these schools, on the role of the Afro-American land-grant institutions in providing higher education for Black Americans, and on the legislative history of the Morrill Act of 1862. To provide background studies for the social origins of the land-grant idea and development of the land-grant schools, general histories of American higher education are included as well as general histories of the American people. Resource materials consist of books, monographs, journal articles, U.S. government publications, Congressional documents, doctoral dissertations and masters' theses. The period covered ranges from the middle of the nineteenth century through the summer of 1979. A subject index and a list of the land-grant colleges and universities by state are included. (SW)

The second edition of the University of Louisville Fact Book provides for government, professional, and proprietary agencies an analyses of all aspects of the university. Areas include: general information that examines the history, mission, location, and size of the university; administration; degrees; students; faculty; staff; budget; grants and contracts; physical facilities; and libraries. Graphs and tables represent information on areas such as degrees awarded in 1978-1979, part-time student enrollment, distribution of budget dollar, assignable building space, and university library holdings. Highlights reported include: fall 1979 enrollment at the University of Louisville was 19,155; 56 percent of students are full-time, and 44 percent are part-time; between 1976 and 1979 the total numbers of degrees awarded at the university increased by 13.5 percent; the university received \$1.2 million from private sources in 1979; federal support for the university increased last year to over eight million dollars; and more than \$190,900,000 is committed to construction and renovation projects in progress. This fact book was an award winner at the 1980 Annual Forum of the Association for Institutional Research. (LC)

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Age Groups, *College Faculty, Educational Finance, Employment Practices, Expectation, Faculty Mobility, *Federal Legislation, Higher Education, Models, *Older Adults, Personnel Policy, *Public Policy, *Teacher Attitudes, Teacher Characteristics, Teacher Employment, *Teacher Retirement, Teacher Salaries, Tenure

Identifiers—Early Retirement, *Mandatory Retirement

Findings of three reports on the potential impact of age 70 mandatory retirement legislation on the arts and sciences faculties of institutions belonging to the Consortium on Financing Higher Education (COFHE) are summarized. In a report by J. Russell Southworth et al., faculty flow (departures, new appointments, appointments to tenure, etc.) is modeled for the period 1974-78. Based on the model, future projections are made with respect to effects of the retirement legislation on payroll costs and new appointments for junior faculty. The report by John O. Blackburn and Susan Schiffman presents a more complete profile of the faculty for whom data were collected and discusses the adjustment to age 70 mandatory retirement from a policy analysis perspective. The third report by the Institute for Research in Social Behavior contains results from a field survey and describes faculty expectations for retirement, their evaluation of their present health and financial situation and their response to five hypothetical early retirement incentive plans. In addition to highlights of these three reports, the applicability of study results for individual institutions is considered. Appended are a list of retirement studies and committees at COFHE institutions and descriptions of selected early retirement plans with examples. (SW)

ED 192 646 HE 013 105**Selleck, Laura****Equality of Access to Ontario Universities.**

Pub Date—Sep 80

Note—34p.

Pub Type—Information Analyses (070)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Access to Education, *College Attendance, Economically Disadvantaged, *Educational Opportunities, Expectation, Foreign Countries, Higher Education, *Low Income Groups, Predictor Variables, Socioeconomic Status, Student Characteristics, Student Financial Aid, Tuition

Identifiers—Canada, *Ontario

Results of studies concerning socioeconomic inequality characteristic of student populations in most university systems and equality of opportunity at the point of university entrance are considered in relation to the accessibility of Ontario universities to students from low-income families. Important considerations in the design of such studies are also addressed. It is claimed that studies of educational expectations and student characteristics in Ontario and elsewhere show that young people who attend postsecondary institutions, particularly universities, are disproportionately drawn from the urban, middle to upper class, educationally sophisticated, and relatively prosperous sectors of society. Whether the background factors affecting academic success, motivation, and career expectations are primarily sociocultural or economic is a matter of debate. Gender and background variables represented by socioeconomic status and regional strata categories are correlated with levels of postsecondary educational achievement. Gender and urban-rural origins are also related to the level of postsecondary education. It is suggested that there is a shortage of reliable data on the number of people who are prevented from attending a university simply because they cannot afford it. There is uncertainty about the effect of different forms of financial aid and the effect of tuition costs on attendance. (SW)

ED 192 647 HE 013 107**Picciano, Anthony G.****Student Attrition/Retention Study at the College of Staten Island, 1979.**

Staten Island Community Coll., N.Y.

Pub Date—Feb 80

Note—74p.

Descriptors—College Attendance, *College Students, *College Transfer Students, Dropout Research, *Dropouts, Financial Problems, Higher Education, Institutional Research, Predictor Variables, *School Holding Power, *Student Attrition

Identifiers—*City University of New York Coll of Staten Island

Student attrition at the College of Staten Island was investigated. The 2,786 students who left school from the spring 1979 semester to the fall 1979 semester were selected for analysis using a

survey developed by the National Center for Higher Education Management Services. Responses were obtained from 452 former students. Study variables were full-time/part-time status, credits completed, grade point average, and curriculum. It was found that the most dominant characteristic of the attrition population was their need to work in order to support themselves and pay their tuition; employment was a more important immediate goal than continuing school. Certain subpopulations of students, however, did exhibit greater tendencies to one category of reasons than to others. Full-time or part-time status, and lower or upper division, are important variables and may cause students to leave for different reasons. Students who planned to return to the college and students who had no plan for college basically indicated that a variety of employment, financial, and personal circumstances were their major reasons for leaving. Students transferring to other colleges indicated largely that academic reasons were the most important reasons for leaving college. A sample survey form is included. (SW)

Student Ratings and Image for an Ideal Professor.
Pub Date—Feb 79

Note—12p.; Paper presented at the Annual Meeting of the Eastern Educational Research Association (Kiawah Island, SC, February 1979).
Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—College Faculty, College Students, Education Courses, Evaluation Criteria, Expectation, Higher Education, Pretests Posttests, Student Attitudes, Student Evaluation of Teacher Performance, Teacher Effectiveness, Teacher Evaluation

A 16-item Q-sort evaluation of teaching was administered to 2,784 graduate and undergraduate students in education at a state university. Four subscales based on Spady's (1974) teacher competencies model, subject expertise, pedagogical expertise, stimulation and empathy were obtained from two pilot studies. Test-retest reliability and construct validity were established. On the pre-course sort, the most important characteristics of an ideal professor were "knowledge of subject matter" followed by "communicates clearly" and "presents well-organized course." On the post-test evaluation of the professor these factors plus "enthusiastic about teaching" were obtained. Correlations between pre-test and post-test were significant at the .001 level and ranged from .30 to .50. Students' ratings of professors appear to be little more than their scaling of the professor against their expectations. If they get what they expect the professor rates high, and if it is different, the professor rates low. Reexamination of the use of student rating forms for important decisions is suggested. Faculty Attitudes Toward the Older Adult Learner.

Pub Date—Apr 80

Note—30p.; Paper presented at the Annual Meeting of the American Educational Research Association (Boston, MA, April, 1980).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143) — Tests/Questionnaires (160)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Adult Development, Adult Learning, Adult Students, Age Discrimination, Age Groups, Attitude Measures, College Faculty, Developmental Stages, Higher Education, Older Adults, Stereotypes, Teacher Attitudes

Identifiers—Indiana, Ohio

Faculty attitudes toward older learners were studied using an adaptation of Kogan's (1951) attitude scale and methodology. Forty-nine faculty members from various colleges and universities in Ohio and Indiana were subdivided into two groups: those who had taught in a structured higher education experience aimed at people over 60 years of age and those who had not. Results indicate that younger faculty members were less critical about older adults as learners and potential learners than are older more experienced faculty members. Older faculty members who had taught a high number of classroom contact hours with adult learners expressed less positive attitudes toward the capabilities of older adults to be successful college students. Younger

faculty members maintained few negative stereotypes of older adults as learners. Further revision of specific item pairs of the survey is being pursued. Survey items and the responses of the four subgroups are included. (SW)

Descriptors—Agency Role, College Faculty, College Role, College Students, Cooperative Programs, Government School Relationship, Higher Education, Information Dissemination, Models, Public Agencies, Public Policy, Public Service Occupations, Research Projects, School Community Relationship

The Public Service Research Program at the University of California at Davis is described. The goal of the program is to develop a systematic approach to an integrated community/university program. Requirements are that a public policy issue must be addressed, faculty and students must be involved, and collaboration with a government agency or a community must occur. Collaborative research projects with government agencies, commissioned papers, and workshops, conferences, and symposia form the basis of the program. The importance of dissemination of results, extension networks using courses, and/or consultation are an important part of the public service research process. The program is supported by a networking function performed by the central program staff. Factors that have contributed to the success of the program are noted. (SW)

Differences in Attitudes Toward Retirement Among Male and Female Faculty and Other University Professionals.

Pub Date—Nov 78

Note—22p.; Paper presented at the Annual Meeting of the Gerontological Society (November 1978).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—College Faculty, Females, Higher Education, Males, Marital Status, Negative Attitudes, Professional Personnel, Retirement, Sex Differences, Teacher Attitudes, Teacher Characteristics, Teacher Retirement

The effect of gender on retirement attitudes among college faculty and other university professionals were studied, and variables that might affect attitudes toward retirement were investigated. A 35-item questionnaire was mailed to all faculty and nonteaching professionals at a university center, a four-year college, and a community college of the State University of New York. Of the 2,058 questionnaires, 958 were returned. Attitudes toward one's own retirement were found to be gender-related: "looking forward to retirement with pleasure" was the modal response for men, while

"looking forward to retirement with mixed feelings" was the modal response for women. The responses of single persons were equally divided between "with pleasure" and "mixed feelings" for both men and women. Separated, widowed, or divorced men and women, on the other hand, tended to anticipate retirement with "mixed feelings." It was primarily among the married university professionals that men and women differed in attitudes toward retirement, with married men holding the more favorable attitude and married women expressing greater ambivalence. When respondents assessed their attitudes toward retirement in general, women tended to have less positive attitudes than did men. The variables of respondent age, job status, marital status, educational level, and job satisfaction yielded little conclusive information about the possible sources of women's more negative attitudes toward retirement. Some possible explanations are offered. (SW)

The Impact of Implementing Title IX in a Predominantly Black Public University.

Pub Date—[79]

Note—21p.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Athletics, Black Colleges, College Admission, College Faculty, College Students, Compliance (Legal), Educational Opportunities, Employment Practices, Equal Education, Equal Opportunities (Jobs), Federal Legislation, Federal Regulation, Females, Higher Education, Males, Personnel Policy, Sex Discrimination, State Colleges, Teacher Salaries, Womens Athletics

Identifiers—Florida A and M University

Information on the impact of implementing Title IX of the 1972 Education Amendments at Florida A and M University, a predominantly Black public university, is presented. Title IX assures everyone regardless of sex an equal opportunity to learn a skill, choose a course of study, advance in status, participate in a sport, receive a scholarship, or otherwise benefit from the offerings of any institution supported by federal aid. The regulations apply in three main areas: admission of students, treatment of students, and employment in the institution. Treatment of students relates to access to and participation in course offerings, and all extracurricular activities including student organizations and athletics. It is upon the enforcement of the regulations related to intercollegiate athletics that the most heated discussions have taken place. Compliance is evaluated in terms of elimination of discrimination in athletic programs and elimination of the discriminatory effects of the historic emphasis on men's sports. Doubt about the per capita method of providing money to women's sports is expressed, and a breakdown of the financial aspects of the men's and women's athletic programs is presented. In relation to employment, the employer must provide equal pay to male and female employees performing the same work, and no female may be excluded from employment because of pregnancy. Actions taken by Florida A and M to comply with the regulations regarding employees are described. (SW)

This 60th annual report on collegiate enrollments in the United States is based on data received from 1,635 four-year institutions in the U.S., Puerto Rico,

and the U.S. Territories. General notes, survey methodology notes, and a summary of findings are presented. Detailed statistical charts present institutional data on men and women students and staff in these categories: unitary state college and university systems; public universities and institutions of complex organization; private universities and institutions of complex organization; multipurpose colleges and universities; independent colleges of arts and sciences (liberal arts); music, fine arts, and applied arts schools; independent law, medicine, and allied health schools; independent technological, business administration, and related schools; Bible schools and colleges; and theological schools for lay workers. Summary data are presented on: full-time entering freshman enrollments in 1200 comparable institutions; largest institutions; geographical divisions; and percentage enrollment changes for 1950-1979. Identifiers—*Japan, United States

The progress report of the College and University Program covers activities from 1977 through 1980. The primary purpose of the organization is to assist higher education institutions in Japan and the United States in establishing one-to-one international exchange relationships. Program objectives during this period have focused on binational program development, formation of advisory committees in the two countries, implementation of conferences as vehicles for program development, and planning for future exchange in business education and administration. On-site institutional visits, 26 links between American and Japanese institutions, and cities involved in exchange programs are listed. Special programs are described. The first conference held, other conference representations, and future conference plans are outlined, and progress toward new exchange programs is noted. A directory of individuals in the organization is appended. (MSE)

Data are presented from a survey covering the period of October 1, 1977 through September 30, 1978. The figures given represent all obligations to institutions of higher education in the United States by 14 federal agencies. A summary analysis is given for three categories of data: those on colleges and universities in general, university-administered federally-funded research and development centers, and independent nonprofit institutions and non-profit-administered federally funded research and development centers. Detailed statistical tables and some technical notes are appended. The federal agencies represented are the Agency for Interna-

tional Development; Department of Commerce; Department of Defense; Department of Transportation; Environmental Protection Agency; Department of Energy; Department of Health, Education, and Welfare; Department of Housing and Urban Development; Department of the Interior; Department of Labor, National Aeronautics and Space Administration; Nuclear Regulatory Commission; National Science Foundation; and Department of Agriculture. Dollar amounts of obligations are given for each institution and each agency funding it. (MSE)

Issues concerning equity in postsecondary education are examined with respect to students as well as institutional employees. A list of individual characteristics and circumstances that can relate to equity issues is presented to aid college administrators analyze and identify equity target populations applicable in the institution. The major equity issues that colleges and universities have in common regarding students and employees are identified, a general framework to help administrators in their evaluation is presented, as are examples of analyses that may be guides for equity reviews. The need for the top administrators of a college to review equity issues, set priorities and goals, and determine the level and type of commitment desired on an institution-wide basis is addressed. The way in which the equity commitment of the top administrators is institutionalized is considered by providing examples of processes and activities that can be utilized and coordinated to implement changes. A bibliography on equity is included that displays entries on a form that indicates relevant subject categories. A summary of the meaning of the subject-category labels is presented separately. (SW)

The third volume of the revised "Higher Education Finance Manual," this guide describes the principles included in presenting financial information in a format showing where money comes from (sources) and where it goes (uses). Potential analytical applications and limitations of the source/use concept are described, and the application of the standard source/use matrix as a supplementary financial statement and communication tool is examined in detail. Implementation of the source/use concept in terms of collection, compilation, and formatting of data for the standard source use matrix is also addressed. It is suggested that the source-use concept should be viewed as a way to format data and analyze institutional finances, rather than as a specific financial statement. It shows the relationship between the expenditure of institutional monies and the sources of funding for those expenditures. The standard source/use matrix describes current fund operations and expands the "statement of current funds revenues, expenditures, and other changes" by relating particular sources of funds to particular uses. It provides a one-page summary of current institutional financial affairs. (SW)

Identifiers—Denison University OH, Drake University IA, Santa Fe Community College FL, University of Wisconsin System

Cost behavior analysis, a costing process that can assist managers in estimating how certain institutional costs change in response to volume, policy, and environmental factors, is described. The five steps of this approach are examined, and the ap-

plication of cost behavior analysis at four college-level settings is documented. The institutions and areas of analysis are as follows: Denison University—operation and maintenance (O&M) of physical plant; Drake University—instructional capacity; Santa Fe Community College—student services; and the University of Wisconsin System—library services. A major feature of the Denison study is the method used to assign O&M service levels to particular kinds of rooms. In the Drake study, a formula was developed that shows classroom utilization as an important feature of the study. The Santa Fe study is useful for its validation of the requirements of different kinds of students for varying levels of student services. The library study undertaken at the Wisconsin System was a component of a much larger effort to develop a formula to appropriate state revenues. The method used for dividing library services into those that are affected by student enrollments and those that are affected primarily by acquisitions is also significant. It is suggested that the case studies reveal the challenge of applying cost behavior analysis to the internal reallocation of resources and to state allocation of funds. (SW)

Descriptors—*Academic Persistence, Administrator Role, Definitions, Dropout Prevention, *Dropout Research, Higher Education, Models, *Predictor Variables, Researchers, Research Methodology, *School Holding Power, *Student Attitudes, *Student Attrition

This document was developed to (1) help clarify the various concepts of retention and attrition within a unifying conceptual framework, (2) synthesize the research on retention and attrition, and (3) examine the implications of the research for postsecondary administrators and researchers. Retention and attrition research pertains to both the percentages of students who complete programs and the reasons for completion or attrition. Practical considerations concerning attrition and retention that administrators should consider are briefly addressed. After clarifying terms, (including persister, stopout, dropout, retention, and attrition), that appear to affect attrition and retention are described, and activities and strategies that may help reduce attrition rates are recommended. Theoretical and empirical literature is reviewed, as are attempts to classify retention. A new structure for classifying retention is proposed, and indicators and measures for attrition and retention are described. The difficulties of interpreting students' self-reported reasons for leaving school are also addressed. An extensive bibliography is included. (SW)

The second volume of the revised "Higher Education Finance Manual" (HEFM), this data users' guide is oriented to the nonaccountant and describes the kinds of information about postsecondary education that can be derived from institutional financial data. Contents include: a description of fund accounting for higher education, a discussion of the relationship between accounting data and programmatic financial data, a guide to the implementation of the HEFM guidelines at the state level, and a guide to the implementation of the HEFM guidelines at the institutional level. An overview of how to understand and use institutional reports explains each of the three traditional financial statements: the balance sheet, the statement of changes in fund balances, and the statement of current funds revenues, expenditures, and other changes. For each financial statement, its purpose, format, definition of terms used, and limitations are discussed. The discussion of implementation at the institutional level is based on written comments by key persons at seven institutions that have implemented the HEFM guidelines. Additionally, the relationship between the most widely used structure for operational data in higher education (the HEFM functional expenditure categories) and the most widely used structure for programmatic data in higher education (the NCHEMS Program Classification Structure) is examined. Descriptors—Academic Education, Classification, College Students, Data Collection, *Definitions, Educational Facilities, Educational Finance, Employees, Glossaries, *Higher Education, Information Dissemination, *Information Needs, Information Processing, Lexicography, *Postsecondary Education, Postsecondary Education As a Field of Study, Research Needs, School Personnel, Specifications, *Standards

This glossary is designed to promote awareness and use of a common language of terms, definitions, and procedures concerning postsecondary education at the institutional, state, and national levels. It may be especially useful to those who deal with data in institutions, governmental agencies, and educational associations. The alphabetically arranged entries are restricted to those that reflect established standards for data exchange and communication among the various components of postsecondary education. Standard classification structures have been established to achieve comparability in reporting, and some standards have been established and required for federal reporting. Standard definitions are required when institutions exchange information among themselves and when they report to state agencies, the federal government, and other organizations. There are 360 entries and subentries, and an appendix groups all substantive entries according to the following categories: academic, facilities, financial, general, personnel/employees, and students. Identifiers—Zero Base Budgeting

Papers and summaries of discussions from the 1979 forum of the National Center for Higher Education Management Systems are presented. Contents are organized into three sections: (1) the links between long-range planning and short-range budgeting, (2) the relationship of program review and evaluation to academic planning and budgeting, and (3) improvement of communication and participation in the planning and budgeting process. The following papers are presented: "Developing an Integrated Planning and Budgeting System," by John A. Bers; "Linking Academic Planning and Budgeting," by Durward Long; "Enhancing Planning and Budgeting Decisions through a Modified Zero-Based-Budgeting Approach," by Gary M. Munsinger; "The Role of Program Review in Academic and Fiscal Planning," by Robert C. Shirley and J. Fredericks Volkwein; "Management Information Systems: The Human Factor," by Kevin M. Diran; and "Political Behavior in Higher Education Budgeting," by Joan C. Tonn. (SW)

Identifiers—*Oregon, Oregon Community College System

The results of a 1977 assessment of the value of uniform financial data for the Oregon community college system are described. The utility of both programmatic data and auditable accounting data is also addressed. Business managers, presidents, and governing board chairmen at four community colleges and representatives of six different state agencies were interviewed to determine the perceived need for uniform financial data and views of data formatted in accordance with the Oregon Community College Classification of Accounts. This set of uniform reporting guidelines were derived in large part from the expenditure and revenue categories and definitions outlined in the "Higher Education Finance Manual" of the National Center for Higher Education Management Systems (NCHEMS). The characteristic of the uniform reporting guidelines that almost every user group in Oregon regarded as most important was the capability they provide to generate uniform financial data. Many felt that the ability to compare uniform data would make their tasks easier, while some believed that the ability of community colleges to provide uniform data would result in better management. NCHEMS' observations concerning the design and implementation of a uniform account structure for the community college system in Oregon are presented. The Classification of Accounts format and interview results for each of the user groups are included. (SW)

Descriptors—*Academic Standards, Accreditation (Institutions), Educational Assessment, *Educational Quality, Educational Research, *Evaluation Criteria, Graduate Study, *Higher Education, *Institutional Evaluation, Professional Education, Program Evaluation, Reputation, *Research Methodology, State Standards, Undergraduate Study

Studies concerning attributes of quality in higher education as defined in academic studies are reviewed. Separate reviews are presented for studies of quality at the graduate level, in professional programs, and at the undergraduate level. Academe's continuing attempts to quantify "quality" so as to

measure it empirically rather than subjectively through reputational ratings are examined. In addition, accreditation and state program review, both of which exemplify external approaches to assessing quality in American higher education, are discussed. In academic studies, usually conducted by researchers from the higher education community, assessments have focused on identifying the best institutions (or graduate departments). It is concluded that whether based on peer review or on the application of a set of traditionally-used quantifiable indicators, such assessments ignore about 99 percent of the nation's higher education institutions. It is suggested that these rankings serve to reinforce the hierarchical structure of the system, whereby material and human wealth tend to be concentrated in a few institutions. It is also noted that the teaching-learning function of higher education has been virtually ignored in quality assessments. Conclusions and recommendations as to how quality in higher education might be better defined and how methods of assessing quality might be improved are presented. A bibliography is included. (SW)

Descriptors—*Accountability, Collective Bargaining, *College Faculty, Contracts, Evaluation Criteria, Faculty College Relationship, *Faculty Workload, *Federal Regulation, Government School Relationship, Higher Education, Noninstructional Responsibility, State Action, Teacher Attitudes, Teacher Responsibility, *Teaching Load

Methods for analyzing faculty workload, workload issues related to collective bargaining and new federal reporting requirements, and faculty and institutional perspectives about faculty workload are considered. Workload studies are valuable to state legislators concerned with budgets, enrollment trends, and efficient institutional operations. Typical questions that workload studies address and three commonly used quantitative measures are outlined. Two approaches to assessing workload are quantitative measures based on institutional data and measures based on faculty self-reports of how they spend their times. For collective bargaining contracts, workloads are typically defined in terms of credit or contact hours. Teaching-related activities that do not have specific credit hours attached are given equivalencies. A new federal requirement for institutions receiving federal grants and contracts is that the department must report 100 percent of compensated faculty activity for all faculty, even those not directly involved in the federal activities. Reasons for this regulation and objections voiced by faculty members are examined. Some proposals for alternative workload structures are briefly noted. A bibliography is included. (SW)

Identifiers—*Office of Education

The final report of the Third Student-Commissioner Conference on Financial Aid and Access to Postsecondary Education is presented. The focus was the U.S. Office of Education's television, radio, and printed information and counseling programs about postsecondary opportunities, and how these strategies affect many kinds of prospective students. Discussions among 12 high school students, 85 postsecondary students, and about 60 staff persons from the Office of Education are summarized. The conference featured a special campaign to assist students in reducing errors in filing for funds through the Basic Educational Opportunity Program. Students provided feedback about the language and layout of the Basic Grant Forms, Student Consumer's Guide, Basic Grant forms, and Guaranteed Student Loan forms. Participants worked in six task forces to produce the detailed recommendations in this report. In addition to consumer review of postsecondary financial aid and counseling programs of the U.S. Office of Education and the new Department of Education, the conference also trained the student leaders on ways to improve aid and counseling programs on high school and postsecondary campuses to better meet student needs. In addition to specific recommendations, comments of students and officials are included. (SW)

Proceedings of a colloquium on foreign student recruitment, sponsored by the National Liaison Committee on Foreign Student Admissions, are presented. The colloquium was designed to examine the demographic and economic conditions that have created the need to increase recruiting practices currently taking place. Included are a review of the agents in the recruitment business and the alternatives facing the U.S. educational community in responding to uncontrolled and ethically suspect activities. Two background papers are presented, the first of which, "Foreign Student Recruitment—Why?" by Malcolm Scully, presents demographic data projecting postsecondary enrollment patterns to the end of the century and documenting the present unsettled state of many institutions due to declining enrollments. In the second background paper, Fred Lockyear describes "Current Practices in Foreign Student Recruitment." Discussions of these papers are included, as are the materials produced by two working groups. One group developed guidelines for the establishment of a clearinghouse to collect and disseminate information about recruiting activities and procedures. The other prepared statements identifying abuses in recruitment that are of common concern and a set of criteria for ethical recruitment. In reaching consensus on the conclusions of both working groups, the total assembly discussed ways of disseminating the information throughout the educational community and of promoting ethical practices. Identifiers—*California

A review of issues in California postsecondary education in the 1980's begins with an overview: what postsecondary education is, who it serves, how it is funded, state priority goals, and identifying important policy questions in the near future. The coming environment for postsecondary education is analyzed according to population trends, college participation rates, costs of energy, the overall economy, and public opinion of education. A section on California's students looks at student needs and goals, and postsecondary education's obligations to them. Statistical tables present considerable data in this and the preceding section. Faculty issues are discussed: collective bargaining, faculty affirmative action, part-time faculty, and faculty mobility, development, and retirement. Statewide planning is viewed both at the state and segmental levels. Essential elements in the planning process are outlined, including the following: strong executive leadership and commitment, examination of underlying assumptions, definition of the mission and goals of the institution or system, inclusion of a participatory process, and inclusion of an effective program review. Identifiers—*United States (South)

Approximately 50 statistical tables are presented to provide the latest data on higher education in 1979 and 1980 for the United States, the Southern Regional Board (SREB) region, and the 14 individual member states. Information contained in the tables is grouped under the six headings that form the sections of the publications: population and economy, enrollment and institutions, degrees, institutional finances, student finances, and faculty. An abridged composite of some of the more fundamental statistics is included, offering brief state profiles on population and economy, finances, and enrollment. Among the highlights provided by the data are the following: (1) residents of the 14 Southern states made up 30.6 percent of the total population of the United States in 1979; (2) per capita personal income in the region in 1979 was \$7,896, which was 91 percent of the U.S. level; (3) appropriations of state tax funds for higher education were 15.4 percent of state taxes in 1978; the national average was 13.5 percent; (4) fall 1979 enrollment in Southern institutions of higher learning exceeded three million, representing some 26 percent of the national collegiate student body; and (5) although the number of part-time students continues to grow, the region still enrolls a greater proportion of full-time students than does the nation. The Master of Education Program: An Assessment of Perceived Needs.

Pub Date—Jun 80

Note—104p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC05 Plus Postage.

Descriptors—Academic Achievement, Admission Criteria, Class Size, Courses, *Educational Demand, *Education Majors, Foreign Countries, Higher Education, *Masters Programs, *Needs Assessment, *Program Development, *Regional Planning, Scheduling, School Surveys, Student Educational Objectives, Student Needs

Identifiers—Canada, *Queens University of Kingston (Canada)

A survey was undertaken of residents within 300 km of Queen's University (Ontario) who would have an interest or stake in the Master of Education program to assess the needs for the program. Population strata were identified as: past and present students, employers of students and graduates, academic staff and faculty, and potential students. Results show that the most highly ranked courses were Curriculum Design, Measurement and Evaluation, Curriculum Implementation, Future Educational Needs, and Curriculum Related to Specific Subjects. There appeared to be a preference for courses with a specific work-place applicability. Present times of course offering appeared to be meeting respondents' needs. There was some support for some innovative approaches and increased flexibility. Other results revealed these respondent perceptions: admission requirements should be stringent, bureaucracy reduced, and high quality work demanded of students. The mean distance respondents would be willing to travel to take courses was 50 km, and the ideal class size was viewed as 11 and 15 students. Further study on regulations, motivation, and values affecting program planning and presentation is recommended. Appended are a list of sample boards and colleges, a sample letter of admission, the survey instrument and cover letters, and tables of survey result data. (MSE)

Descriptors—*Abstract Reasoning, *Cognitive Objectives, College Faculty, *College Instruction, College Students, Critical Thinking, *Diagnostic Teaching, Educational Objectives, Higher Education, Informal Assessment, Instructional Materials, Intellectual Development, *Logical Thinking, Nongraded Student Evaluation, Problem Solving, Teaching Guides, *Teaching Methods

Identifiers—*Piagetian Theory

The essentials of Piaget's theory and its application to teaching at the college level are described as part of the Learning and Evaluation Service workshop, Teaching Students to Reason, offered at Michigan State University. Objectives are to enable the teacher to: (1) diagnose and classify reasoning patterns of students; (2) evaluate current instructional materials and techniques in light of Piaget's theories; (3) redesign instruction to incorporate Piagetian concepts in order to facilitate the type of reasoning appropriate for the course; and (4) use guidelines for designing tools to evaluate reasoning skills. Examples are presented from various subject matters to enable the teacher to understand how many of the principles can be applied to college courses. After close examination of concrete and formal operation, a list of characteristics associated with each level of reasoning are presented, as are examples of student responses that can be classified accordingly. Some general teaching strategies that are useful to promote reasoning abilities in learning are presented for the following areas: when introducing a new topic, during instruction, when using the laboratory, when making assignments, and when testing. Descriptors—Academic Persistence, Access to Education, *Admission Criteria, Aptitude Tests, *College Admission, College Freshmen, Comparative Analysis, Ethnic Groups, Females, *Grade Point Average, Higher Education, Institutional Research, Males, Minority Groups, *Predictive Measurement, Predictor Variables, Simulation, Standards

Identifiers—*University of California Berkeley

Impacts of both the originally proposed and the recently adopted University of California freshman admissions formulas on the regularly admitted freshman at Berkeley in the fall of 1972 and 1973 were assessed. The sex, ethnic characteristics, and graduation rates are examined for students who would have been included and excluded by the formulas. Additionally, a simulation is made that permits a comparison of the newly eligible and newly ineligible groups. The simulation assumed the University used a 3.3 high school grade point average (HSGPA) cut-off instead of the actual 3.0. Among the results are the following: (1) for both classes, the level of HSGPA is only weakly related to whether a student graduates; (2) neither the new admissions formula nor the original one predicts graduation better than HSGPA, and frequently they do worse; (3) the formulas would have excluded slightly more Blacks and Chicanos than Whites and Asians; and (4) students made ineligible by the formulas graduated at a rate only slightly lower than the rest. Results of the simulation study show: use of the formulas results in a net loss in the enrollment of women and minorities, and application of the formulas results in few students graduating within four or five years. Implications of the new admission's formula are considered. (SW)

College Instruction: Four Empirical Views, Instruction and Outcomes in an Undergraduate Setting.

Pub Date—Apr 80

Note—24p.; Paper presented at the Annual Meeting of the American Educational Research Association (Boston, MA, April 1980).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150) — Tests/Questionnaires (160)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Classroom Communication, Classroom Research, Cognitive Objectives, College Faculty, *College Instruction, College Students, *Critical Thinking, Higher Education, *Interaction Process Analysis, Questioning Techniques, Student Behavior, *Student Participation, Student Teacher Relationship, Teacher Behavior, Teacher Effectiveness, *Teaching Methods, Verbal Communication

Limitations of past research on college teaching and a recent exploratory study are considered. The study focused on the degree to which teachers encourage, praise, or use student ideas; the degree to which teachers ask questions that encourage evaluative and divergent thinking; the degree to which students make higher levels of cognitive responses; and the degree to which there is peer interaction in the class. Twelve faculty members known for a variety of teaching styles in a variety of disciplines were studied. Questionnaires were distributed to students at the beginning and end of the semester, class sessions were tape recorded, and questionnaires were distributed to the faculty members. Though an adequate range of behaviors was observed across the 12 classes, less than 20 percent of class time was spent in student participation or in encouraging involvement. Student participation, encouragement, and peer-to-peer interaction were rather consistently and positively related to the outcomes under consideration (perceived value of the course in stimulating additional intellectual pursuits, critical thinking scores on the Watson-Glaser test, and increased time spent while studying in analyzing, synthesizing, and evaluating materials). Implications

for research, faculty development, and teaching are considered. References and a sample questionnaire are included. (SW)

Descriptors—College Curriculum, Curriculum Evaluation, *Educational Assessment, Educational Change, *Educational Development, Educational Planning, Educational Research, *Foreign Countries, *Higher Education, School Organization

Identifiers—Sweden

Approaches to analyze the reform of higher education in Sweden, and particularly the organization of studies in higher education, are considered. Three starting points are as follows: examining the intentions constituting the background to the present organization of studies, considering continuing developments and attitudes toward problems; and analyzing the educational structure existing when the reform is implemented. Aims of the new organization of studies were that a diversity of forms was to be superseded by uniformity, and that it would also be flexible for new developments. Uniformity was designed to provide greater clarity about the range of educational opportunities to assist prospective students and employers. The organization of studies was also designed to provide clearer documentation for the decision-making bodies. To elucidate the structure of the range of separate courses, a survey will be undertaken of courses at all higher education units in three higher education regions. Additional assessment areas are considered. (SW)

Identifiers—Northeastern Illinois University, Northwestern University IL, University of Chicago IL

Research and instructional role strains are identified, based on the use of large-scale mail surveys for college self-study that are used to teach introductory research methodology. The two organizational hierarchies, the research model and the instructional model, are examined. Experiences at Northwestern University, Northeastern Illinois University, and the University of Chicago illustrate how relationships are manipulated in response to different situational constraints. Critical resources identified for adequately gathering data are time, funding, and number and skills of students enrolled. The instructor acting as principal investigator must relinquish some control over the research process to both the university administration and student/staff. Accountability standards must be maintained or deviations explicitly noted concerning sampling, pretest, design of questionnaire, questionnaire distribution and return followups, and quality control of data processing. Measurement of research quality and instructional quality are examined. Recommendations are offered to reduce role strains and improve research and instructional relationships in subsequent experiential approaches to teaching survey research. (Author/SW)

Proceedings of a symposium that was designed to assess Catholic higher education are presented. Addresses of the five panelists are presented. In "Catholic Higher Education—An Overview," John H. Murphy considers historical developments in order to elucidate the current and future role of Catholic colleges and universities in the United States. The focus is the identity of the schools as Catholic. Alice Gallin considers "The Environment of Catholic Higher Education in the 1980s" in terms of enrollment, the location of numbers of Catholic colleges, population trends, student characteristics, and curricula. Edmund D. Pellegrino considers the present and future prospects concerning "Research and Graduate Studies in Catholic Universities," as well as some suggestions for Catholic foundations. Daniel E. Pilarczyk's "A Bishop Looks at the Contemporary Catholic College/University" discusses what the Church expects from Catholic universities in respect to the schools' theological activity. In "Catholic Universities as an International Community," Harve Carrier examines the present situation of Catholic universities in terms of numbers, location, cooperative efforts, identification, specific functions today, major problems that are emerging, and suggestions for combating these problems. Identifiers—Institutional Vitality

Results of a project initiated to explore the development of data and services to member institutions of the Association of Catholic Colleges and Universities to meet needs of the 1980s are presented. The project explored contemporary concerns of institutional viability as they affect Catholic higher education. Information is provided on enrollment, financial operations, and student financial aid. Data on the performance of Catholic higher education against the background of the remainder of private higher education are examined. It is suggested that Catholic colleges and universities are meeting the financial aid needs of their dependent aid recipients to a degree comparable with other private colleges and universities. It is concluded that expansion of graduate and first-professional programs, accommodations of part-time students, coeducation for some

colleges, and renewed strength in women's education are all indicators of institutional flexibility in Catholic higher education. Some areas for future concern regarding declining enrollments are considered. Data are presented that suggest the present ability of Catholic higher education to maintain current expenditures and revenues in balance. The rate of expenditure increase was slightly below the average in the doctoral universities and slightly above average in the other four-year institutions and two-year colleges. (SW)

Document Not Available from EDRS.

Descriptors—*Basic Skills, *College Instruction, *Course Objectives, *Diagnostic Tests, English (Second Language), English Instruction, Higher Education, Language Skills, Mathematics Education, Program Administration, *Program Development, Reading Skills, *Teaching Methods, Writing Skills

Detailed analyses are given of the most effective teaching techniques in each of four major basic skills areas: writing, reading, English as a second language, and mathematics. Six basic questions are addressed for each area: (1) What are the objectives of skills programs in this area? (2) What are the different skills levels of entering students, and how can these levels be determined? (3) What should be taught at each skills level? (4) What teaching methods are not appropriate for each skills level? (5) How can the scope and effectiveness of current skills teaching be determined? and (6) How should a skills program in this area be administered? The premise is that in basic skills education, practice has often surged ahead of research and theory, and that methods and procedures developed and tested in the classroom provide the strongest foundation for future progress in the field. This book is based on findings from the first comprehensive evaluation of teaching in the basic skills programs at the City University of New York. (Author MSE)

Teaching Values in College.

Pub Date—80

Note—189p.

Available from—Jossey-Bass, 433 California St., Suite 1000, San Francisco, CA 94104 (\$13.95)

Pub Type—Opinion Papers (120) — Reports - Descriptive (141) — Books (010)

Document Not Available from EDRS.

Descriptors—College Curriculum, College Environment, College Instruction, *College Role, *Ethical Instruction, Extracurricular Activities, *Higher Education, Interpersonal Relationship, *Moral Development, Moral Values, Student Development, *Values Clarification, *Values Education

During American colleges' current process of reexamining their commitment to fostering moral development in students, questions have arisen: What is the place of values education in higher education? Does the study of ethics improve moral character? Is it possible to teach values without indoctrinating students? What are the best methods for developing moral awareness in the classroom and in other settings? and How does the campus environment influence student values? In addressing these questions, a systematic analysis is undertaken of contemporary approaches to teaching ethics and values on campus, examining and comparing each of the major options, values clarification, values inquiry, moral education, and normative ethics. A comprehensive program is outlined for developing moral awareness and ethical competence in students within the current framework of liberal and professional education. Specific strategies for addressing moral issues in the classroom and other campus settings are detailed; the potency of human relationships in the campus setting as a form of values education is explained; and the opportunities inherent in daily campus activities for developing value awareness and commitment are highlighted. Descriptors—College Administration, College Planning, *Declining Enrollment, *Higher Education, *Marketing, *Public Relations, *Social Change, *Student Recruitment

Issues addressed at the conference are outlined in two introductory essays. It is suggested that marketing problems of colleges are not essentially admissions problems, but problems that involve both faculty and administrators. The marketing challenge for higher education is to define the quality and integrity of a college's educational services and then to represent these services accurately. The conference papers include the following: Undergraduate Admissions, Past and Future (Laurence Veysey); Uses, Abuses, and Misuses of Marketing in Higher Education (Christopher H. Lovelock and Michael L. Rothschild); The Current Marketing Environment in Higher Education (William Ihlantfeldt); Marketing Perspectives and Institutional Admissions Office Pressures for Meeting Enrollments (John C. Hoy); Marketing Perspectives: Student and National Interests (Stephen K. Bailey); Marketing, the Public Interest, and the Production of Social Benefits in Higher Education (Douglas M. Windham); Marketing and the Future of Institutions (Barbara S. Lehling); and Marketing Higher Education: A Reappraisal (Larry L. Litten). A list of conference participants is appended. (MSE)

Descriptors—Administrator Guides, Adult Education, *Community Services, *Continuing Education, *Counseling Services, Females, Higher Education, *Program Administration, *Program Development, Program Evaluation, Recentry Students, Testing, *Womens Education

Guidelines for continuing education programs for women are provided by Ruth H. Osborn, Helen O. Wollé, Abbie O. Smith, Marjorie M. Parks, and Marian S. Cosgrove. Chapter one outlines elements and issues of the administration of such programs: philosophy, program structure, management (staff selection, development, accreditation, research), and administrative procedures (budgeting, record-keeping, materials and equipment). Chapter two is devoted to counseling services: identifying populations, assessing community needs, options in curriculum development for various groups and needs, counseling service administration, and counseling techniques. The third chapter focuses on program development: elements of program planning and design, such as needs assessment, community contacts, collecting materials, and organizing an advisory board; selecting courses; personnel issues, such as instructor orientation, establishing rapport with adult learners, and classroom control; scheduling, registration, and recordkeeping; and financial considerations (class size, salaries, and fees and costs). Evaluation services are the subject of chapter four; a variety of individual tests are outlined, their administration discussed, and program and other evaluation functions (research, financial aid, and placement) are briefly noted. Chapter five addresses issues and types of community services, such as reaching the public, student services, and creating services for special populations. Sample charts and forms are appended. Identifiers—*Tennessee

This report is intended to be the vehicle through which the total results of a two-year planning effort by institutional personnel and Tennessee state board of regents staff are summarized and synthesized. By itself, this report provides little detail about the individual institutions; but, combined with the planning reports of the individual institutions, the set comprises the five-year comprehensive plan of the state university and community college system. Contents of this report include a brief outline of the development and implementation of the planning process; a description of national, regional, and state employment prospects for college graduates in various fields through the middle 1980's, used as a context for college planning; data on programs, enrollments, degrees conferred, and student characteristics in universities and community colleges; manpower, support service, and facilities needs; a summary of the impact of projected funding on program, staffing, services, supplies, equipment, and book acquisitions for 1980-81 through 1983-84 (three possible levels of funding are assessed); distribution of funds among functional and budget categories for 1979-80 through 1983-84; overall system goals and objectives; implementation of the comprehensive five-year plan; and appendices including state board data, summary mission statements of the institutions, statistical data, and system planning assumptions and guidelines. In most sections, data on universities and community colleges are provided separately. (MSE)

The need for a continuing and public review of the purposes, structure, and methods of higher education is discussed. The whole of British higher education is reviewed, its organization described, and its goals both for the individual and for society as a whole are identified. Changes needed in the next two or three decades in the content and methods of teaching, in the forms of examinations, in the commitment to research and public service, and in governance and finance of higher education are considered. Identifiers—Eisenhower College NY, Florida International University, George Williams College IL, Hampton Institute VA, Iowa State University, Johnson County Community College KS, Linfield College OR, Pacific Lutheran University WA, University of Maryland Baltimore County

The principal essay, by James E. Harf, describes the state of the art and prescriptions for the future in undergraduate international studies. It points out that undergraduates at some prestigious research-oriented universities and at small, prestigious liberal arts colleges have exposure to international education, but that at the overwhelming majority of higher education institutions there is little or no exposure to non-American experience. Implications the steady state in higher education are analyzed. Some notable programs at American colleges are highlighted with brief descriptions; expanding international programs at Linfield College (Oregon); a language immersion program in French and Spanish at George Williams College (Illinois); three programs to promote international understanding at Florida International University; the department of modern languages and linguistics at the University of Maryland, Baltimore County; a program to promote a "global perspective" in the overall curriculum at Johnson County Community College (Kansas); a cross-cultural explorations course at Iowa State University; the world studies program at Eisenhower College (New York); African cultural elements in language learning at the Hampton Institute (Virginia); and the foreign area studies program at Pacific Lutheran University (Washington). Additional programs are briefly outlined, and a list of resources is appended. (MSE)

Identifiers—*Research and Development

An examination of the findings of three national surveys reveals that several statistical academic science resource indicators reflected a period of growth during the mid-seventies. While this trend is expected to continue through the end of the seventies, the 9 percent increase in federal research and development (R&D) funding to universities proposed in the President's 1981 budget is seen to permit little if any real growth in the early eighties. These highlights are presented: in dollars, one-tenth of the R&D was spent by universities in 1979, as well as one-half of the basic research. Although annual growth in R&D expenditures averaged 9 percent between 1972 and 1977, real growth was only 1 to 2 percent. During this period the life science dominated academic science and engineering (S/E) resource increased. Graduate institutions increased their employment of S/E personnel by 3 to 6 percent. Overall in academe, part-time S/E personnel increased 35 percent, and full-time personnel increased 11 percent. S/E employees in R&D increased at a full-time-equivalent rate of 22 percent; those in teaching increased 14 percent. In addition, the mid-seventies was a period of increased participation by women in academic science programs. Despite an overall decrease in graduate level enrollments in 1974-77, graduate enrollment in S/E rose, with part-time enrollment rising faster than

full-time, and with women's and foreign student enrollment rising faster than the average. Data are presented in narrative and tabular form, with survey forms and instructions for fiscal year 1977 appended. (MSE)

Identifiers—*Education Amendments 1980, *Higher Education Act 1965, National Graduate Fellows Program, Public Law 96 374

A brief history and some observations are given of the federal Education Amendments of 1980, amending the Higher Education Act of 1965, which provides basic authority for a variety of federal student aid and college assistance programs. Much of the current legislation is extended intact, and most of the programs are reauthorized through fiscal year 1985. A few authorizations that have never been funded (such as community college assistance) are deleted from the Higher Education Act, some of the titles are reshuffled or consolidated, and a new Title XI authorizes grants to urban universities. A title-by-title review of the legislation is provided. Notable changes or new thrusts include these: Title I (continuing education) substantially reduces barriers to continuing education for adults, particularly those whose educational needs have been inadequately served in the past; Title III (institutional aid to developing institutions) tightens application and grant review procedures and specifies in detail many operational aspects of the program; the major student aid programs of Title IV are altered; Title VI boosts foreign language, area studies, and international education programs; and Title IX (graduate programs) consolidates several existing programs and authorizes a new National Graduate Fellows Program. Identifiers—*Aid to Families with Dependent Children, *Basic Educational Opportunity Grants

The interaction of public assistance and student aid is examined, and the effects of these uncoordinated yet overlapping programs on individuals enrolling in postsecondary education programs are assessed. Focus is on the major financial support program, Aid to Families with Dependent Children (AFDC), and the most important student aid program, Basic Educational Opportunity Grants (BEOG). The ways in which aid is distributed under these programs is reviewed, and how receipt of aid from one source can reduce a family's support from another is pointed out. The exact outcome of this interaction is found to vary by state because of differences in each state's treatment of student aid in determining eligibility for public assistance. However, the net effect of BEOG awards is likely to

be a reduction in the resources available to support the family, even when the student receives enough student aid to cover all direct and indirect educational expenses. In addition to these financial effects and their possible disincentives to college enrollment, the complex and uncoordinated systems of public assistance and student aid also hinder postsecondary planning. A number of changes in the programs are suggested, including uniform nationwide ADFC rules for treating student aid, making 18 to 21-year-old students independent of their families for student aid and ADFC purposes, ending ADFC policy of treating student aid funds differently according to their source, and providing better information to public assistance and student aid administrators about each others' programs and problems. Identifiers—Faculty Publishing

Using a questionnaire designed to elicit information on factors relating to career enhancement, 438 faculty members of departments of psychology in the southeastern United States were questioned concerning: major area of expertise; rank; tenure status; teaching load; opportunities for summer teaching; general tenure requirements; relationship of personal and directed student research to tenure, promotion, salary increases, and load reduction; number of publications in refereed journals; number of papers presented at professional meetings; recency of publications and paper presentations; availability of research equipment, space, and funds for personal and student research; availability of sabbatical leave; breakdown of workload; and major incentives for active programs of personal research. The response rate was 60 percent. Results are summarized in tabular form to permit comparison of the responses of faculty 40 years or older with seven or more years of teaching with the responses of younger, less-experienced, tenured and non-tenured faculty. Little narrative analysis is supplied. (Author/MSE)

Descriptors—Cost Estimates, Delivery Systems, *Federal Legislation, Federal Regulation, *Foreign Medical Graduates, Health Personnel, Health Services, Higher Education, Hospital Personnel, *Hospitals, *Medical Care Evaluation, *Medical Education, Medical Schools, Medical Services, Patients, *Public Policy
Identifiers—*Health Professions Educational Assistance Act 1976

The effects of Title VI provisions of the Health Professions Educational Assistance Act of 1976 on patient care services in hospitals were investigated. The law restricts the supply of foreign medical graduates in the United States. Interviews were conducted with representatives of the administrative, medical, and teaching staffs of 24 hospitals to determine the law's impact on: delivery of patient care services, the particular specialties and/or services affected; and the particular population groups served by these facilities. Attention was also directed to the effects of foreign medical graduate supply constraints on hospital costs and quality of care. The implications of strategies developed in response to Title VI restrictions were also consid-

ered in terms of changes in the cost, quality, and availability of patient care services. Policies and views of public and private organizations concerned with the Title VI restrictions were identified, and federal policy options relating to implementation of Title VI were developed. Data collection was preceded by the establishment of an expert advisory panel, a literature review, preparation of discussion guides for site visits, and site selection. The findings are presented under three interrelated categories: hospital perception of the problem, actual/anticipated hospital responses, and organizational perspectives. Policy recommendations based on both no change in the law and a change in the law are presented. (SW)

Identifiers—*Open University (Great Britain)

An induction program set up by the Institute of Educational Technology at the Open University (England) in 1977 for new members of the technology faculty is described and evaluated. Two principles were followed in the program: (1) documentation should be carefully selected so as not to overload the participants; and activity-based experiences are preferable to passive assimilation of ideas. It was set up to run over a few months rather than be an intensive session at the beginning of the faculty member's appointment. Program activities are outlined and the phases discussed. Workshops were offered in course unit writing, objectives and assessment, and course design. Participants were interviewed for their reactions to the program. The overall impression was that it was successful, and although some activities appeared more valuable than others, all activities were of some value to someone. The timing was felt to be inappropriate to some. Most participants felt that other faculty should have such programs. Specific suggestions for improvement, and recommendations for future induction programs, are provided. (MSE)

Identifiers—*USSR

This study, one in a series on education in the Soviet Union, focuses on the status of higher education in the system and in the state. In an introductory section, basic legislation and decrees and the education ladder, or organizational structure, are outlined. The second section describes the organization, functions, and institutions of the U.S.S.R. Ministry of Higher and Secondary Specialized Institutions, and the Republic Ministries of Higher and Secondary Specialized Education. Basic requirements for admission to higher education and admission to specialties are outlined in section three. The fourth section focuses on higher educa-

tion programs: types of institutions, undergraduate study, and graduate study. Teacher education and certification, including teacher-training institutions and curricula and certification procedures are considered in section five, and the growth of higher education in the 1970's is analyzed in the final section, where data on specialty group enrollments and enrollments of women and full- and part-time students are presented. Appended are lists of official Soviet specialties in higher education, the names of the higher education institutions especially recognized by the Soviet government for their achievements in training specialists and in research, and a list of references. Descriptors—Academic Education, *Access to Education, Adult Students, Continuing Education, *Delivery Systems, Educational Demand, *Educational Technology, Educational Television, *Extension Education, External Degree Programs, Graduate Study, Postsecondary Education, Public Opinion, *Regional Planning, *School Business Relationship, Surveys

Identifiers—*Illinois (Rockford)

In 1979 the Rockford Regional Academic Center formed a task force to examine the feasibility of providing upper division and graduate level instruction in the Rockford, Illinois area by "remote delivery." The objective was to gather information about: (1) what remote delivery instructional systems are available; (2) what the physical considerations and costs associated with these systems are; (3) what the public interest in these systems is for business and industrial use, individual use, and community use; (4) how the programs can benefit the specific geographic and demographic situation; and (5) how the existing educational institutions perceive their role in using these systems. Data were gathered by literature search, consulting manufacturers and their catalogs, a general opinion survey and interviews with businessmen and educational representatives, and visits to two universities providing remote instruction. It is recommended that institutions build on the university systems already in use, avoiding duplication when possible, expand the curriculum of available courses to those recommended by respondents, offer courses by a variety of remote methods, and consider applying for a grant to expand the systems available. Use of satellite delivery is rejected because of its cost, and an interactive television system with talk-back is the preferred method, though not the most practical. The general opinion questionnaires are appended. (MSE)

Descriptors—*College Environment, College Freshmen, *College Students, Comparative Analysis, Followup Studies, Higher Education, *Individual Development, *Interpersonal Competence, Longitudinal Studies, Parent Student Relationship, Personality Traits, School Surveys, Self Concept, Sex Differences, *Student Characteristics, *Student College Relationship, Student Development

Identifiers—*State University of New York Buffalo During the orientation program for freshmen at the State University of New York at Buffalo in 1973, students were surveyed by questionnaire. In 1976 a followup survey was sent to a random sample of 700 of those students, 40 percent of whom re-

sponded. The latter survey consisted of 301 multiple choice items, 127 of which are identical to the original questions. The survey covered student activities, interpersonal relationships (frequency of association, understanding the values of others, comfort in association with others, willingness to discuss most personal feelings, willingness to discuss important decisions), relationship with parents, and personal characteristics (self-description, positive traits, negative traits, ability to cope, and change and reasons for change). In each category, responses for freshmen and juniors, for men and women, and changes over the three years are analyzed. It is concluded that while interpersonal relationships seem to mature in college, certain personality characteristics seem to suffer; juniors were found to be more pessimistic, less open to ideas, less enthusiastic and self-disciplined, and less able to cope with success, competition, and loneliness than as freshmen. It is recommended that colleges and universities examine the ways in which their environments may hamper or foster this kind of personal development. (MSE)

Identifiers—*Institutional Advancement

This collection of 80 articles from "CASE Currents," a publication of the Council for Advancement and Support of Education, focuses on nine topics in sections entitled: (1) The Association: Building Your Base; (2) Finances: Making Ends Meet; (3) Activities: Bringing 'Em Back; (4) Chapters and Clubs: Reaching Alumni Near and Far; (5) Continuing Education: Life After College; (6) Alumni Travel: Going a Long Way; (7) Volunteers: Tapping Alumni Talent; (8) Involving Students: The Future Is Now; and (9) Keeping Records: Your Tie to Alumni. The first section covers long-range planning, association organization, surveying and serving diverse alumni, and association leadership. Section two looks at financial planning, cash use, merchandising, dues, and tax issues. Section three provides activity ideas. The fourth section discusses the issue of local clubs, and the fifth looks at alumni education programs. Section six covers alumni tour programs. Section seven contains ideas, experiences, and suggestions for successful volunteer involvement, and section eight presents ideas about involving college students in significant programs before they graduate. The last section addresses issues associated with computerized recordkeeping and mailing. (MSE)

This handbook is intended for use by institutions in marketing their continuing education programs.

A section on "Devising Your Strategy" looks at identifying a target audience, determining the marketing approach, and developing a marketing plan and promotional techniques. A discussion of media options looks at the advantages and disadvantages of direct mail, newspapers, national trade magazines, and radio; provides a form for promotion planning; and includes an outline of promotional copy strategies, a direct mail checklist, and guides to writing direct mail copy, broadcast public service announcements, and news releases. A section is devoted to designing the direct mail piece, including a checklist for promotion copy and a direct mail production schedule. A production primer for working with printers covers the ingredients of a printed piece, planning the printing schedule, preparing copy for the typesetter, sample copy guideline sheets, proofreader's marks, formats, printing types, costs and how the printer charges, evaluating the printing quality, and helpful hints on a variety of subjects. A section addresses moving the message through the mail, including sources for mailing lists and mailing tips, and the final section gives an outline for evaluating results. A list of references and sample forms are appended. (MSE)

The National Advisory Committee on Black Higher Education and Black Colleges and Universities was established as part of an effort to effectively administer federal programs for equity in educational opportunity. Its charter requires the examination of all approaches to higher education for Black Americans and the needs of historically Black institutions. In this annual report an overview is given of the committee: its purpose, functions, membership, meetings, and special activities. Highlighted in the report is the research the committee has commissioned: 16 studies are briefly outlined. In a brief description of the committee's plan of action, five major goals are outlined, including (1) access (increasing participation); (2) opportunities for success (quality improvements); (3) opportunity/options (institutional diversity); (4) national program objectives and system supports for research and needs assessment; and (5) development of a 25-year plan. Appended are lists of committee members and staff, the committee charter, a list of historically Black colleges and universities, a list of predominantly Black colleges, a list of commissioned research, and copies of official committee correspondence. Descriptors—*Black Colleges, Black Students, College Faculty, *College Role, Curriculum Development, Degrees (Academic), Enrollment Rate, Expenditures, *Federal Aid, *Financial Support, Higher Education, Income, *Institutional Characteristics, Library Expenditures, National Surveys, State Aid, Student Characteristics, Tables (Data)

Historically Black Colleges (HBC's) are identified

as a key component of a responsive and diverse postsecondary education system. Continuing HBC leadership in promoting equal educational opportunity and in producing Black graduates is still seen as necessary in spite of the integration process. Recent achievements of these institutions include: expansion of curriculum offerings outside the traditional areas of education and social sciences, reflecting new career opportunities for Blacks; enrollment of 16 percent of the Blacks in higher education, and a third of the Blacks in those states in which the HBC's are located; awarding of over a third of all degrees awarded to Blacks nationwide, in 1975-76; and employment of over a third of the Black faculty and administrators/managers in higher education nationwide. Fiscal constraints and lack of government support are noted: (1) expenditures for fiscal year 1975 were 99 percent of revenues; (2) in 1975, library holdings were considerably less, per capita student, than for higher education overall; (3) HBC's rely more heavily on federal funding, and receive less state funding, than other institutions; (4) in fiscal year 1979 the HBC's received only 4.4 percent of federal funds obligated to higher education institutions; and (5) HBC's continue to receive a very small portion of federal funds obligated for research and development. Appended are a list of HBC's and newer predominantly Black colleges, the President's directive on Black colleges, and the advisory committee's membership list, charter, and staff list. (Author/MSE)

Educational Policy, Enrollment Trends, Foreign Countries, Higher Education, National Surveys. *Part Time Students, Professional Continuing Education, Questionnaires, Reentry Students. *Student Characteristics. *Student College Relationship, Student Educational Objectives, Student Problems, *Success, Tables (Data). *Teacher Attitudes

Identifiers—*Australia, Monash University (Australia)

A study was undertaken, in 1976 and for the three following years, of adult students in Australian higher education. The study examined: (1) the phenomenon of adult students and the extent of their involvement in higher education; (2) the politics and practices of institutions towards these students; (3) staff attitudes in the courses; (4) adult student characteristics; (5) why these students came to higher education institutions; (6) their problems, costs, and benefits; and (7) their success as students. In some cases these issues were examined at the national level, and in some cases at the local level, using Monash University as a case study. The results of the study are presented in some detail, with extensive data tables and narrative analysis. It is noted that there are two broad groups of mature age people entering higher education—those needing re-certification and those re-entering the academic world—and that the needs of these part-time students must be put into an institutional perspective. The staff survey instrument is included. (MSE)

Identifiers—Institutional Advancement, *Time Management

Four essays address the issue of leadership in higher education institutions. "Leadership: The Presidential Imperative," by Hollis Moore, discusses the need and the ability of college presidents to exercise the considerable influence they possess. It is noted that perhaps the greatest danger today is that administrators feel so buffeted by various demands and events that they may fail to use that influence, and may react more than act. In "General Educational Reform," by Peter Diamandopolis, the issue addressed is: what philosophy of general education and concept of liberal arts and sciences best suits the efforts of college presidents in accepting leadership responsibility. Discussed are areas in which to seek advice and enlightenment, and problems that show the utility and value of general education. The focus of "The Condition of Advancement in State Colleges and Universities," by James L. Fisher, is institutions learning how to "shrink creatively" in the near future; that is, using a combination of sound academic programs and presidential awareness and sophistication in institutional advancement activities in order to succeed. The final essay, "A Systematic Approach to Self/Unit/Organization Time Management," by Lee H. Smith, is a condensation of a two-session seminar. In it individuals are encouraged to develop a time management philosophy in real settings. (MSE)

Faculty Morale and Career Choice in the 1980's.

Pub Date—28 Oct 80

Note—6p.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Career Change, *College Faculty, Employment Opportunities, *Faculty Fellowships, Higher Education, Retraining, Retrenchment, *Teacher Employment, *Teacher Morale, *Teacher Retirement

Identifiers—*Early Retirement

Midcareer change programs and alternatives for early retirement for college faculty are considered based on the current situation of declining or stable student enrollments, diminished faculty mobility, and increased numbers of tenured faculty. Midcareer change programs fall into two general categories: (1) retraining programs designed to enable faculty members to move from their current disciplines or specialties into other areas with newer and/or greater student demand; and (2) faculty internships and fellowships in private industry or government for a summer or year. Most early retirement programs are relatively unsuccessful, but one includes a reversible component enabling faculty members to try partial retirement with the option of reacquiring full-time faculty status if they determine that early retirement was premature. Three alternatives exist: (1) provision of direct front-end cash settlement before the age of mandatory retirement (i.e., to buy up a faculty member's contract with full or partial payment); (2) provision of early annuity programs, either individual or group-based and with or without partial employment; and (3) the reversible early retirement program. The effects of these options on faculty morale in times of retrenchment are considered. (SW)

Methods, *Time Perspective

The relationships among teaching techniques, definitions of curriculum, and time perceptions of male faculty members at a comprehensive state-supported university in the South were examined. The respondents were categorized into the three main academic areas of natural sciences, social sciences, and humanities. Curriculum definitions ranged from structured, mid-range, and nonstructured designations. Teaching techniques (formal vs. informal) were found to be significantly related to both time perceptions and definitions of curricula. Those faculty members who defined curriculum in structured terms also employed formal teaching techniques, and generally, these were professors in the natural sciences. Time perceptions (analytical, ambiguous, or synoptic) were also related to teaching technique. Those respondents whose view of time was analytical (mainly those from the natural sciences) utilized formal teaching techniques in their undergraduate classes. Those whose perception of time was classified as ambiguous (mainly respondents from the social sciences) tended to employ informal teaching techniques. However, time perceptions and definitions of curriculum were not related. It is suggested that such profiles of respondents can influence administrative decision-making and planning and the evaluation of teaching effectiveness. Administrators might use profile data to justify differentiated organizational patterns and flexible course assignment schedules. (SW)

Identifiers—Higher Education General Information Survey

Data on earned degrees conferred in the United States are presented. The data cover the period July 1, 1976 through June 30, 1977 and were collected from the survey instrument, "Degrees and Other Formal Awards Conferred," from the 12th annual Higher Education General Information Survey. Data on baccalaureate and higher degrees are presented in summary and detailed tables that show the numbers of degrees granted by level of degree, institutional control and level, sex of recipient, state, and discipline division and specialty. Information is presented on the purpose of the survey, the survey organization and methodology, and on trends from 1966-77 to 1976-77. A sample survey form is included. (SW)

Identifiers—*University of South Carolina

The University 101 concept as a method for im-

proving university teaching and learning is described, with emphasis on the faculty training program, although the approach also includes a three-credit-hour freshman orientation course. The structure, content, outcomes, and research findings on the University 101 program are examined. The approach was originally developed at the University of South Carolina and has been replicated at other institutions. University 101 has provided faculty training through its 40-hour training workshops for over 400 faculty and professional staff. The faculty training is divided into four phases: building group trust, identifying learning objectives, interaction with learning resources, and linking with experienced University 101 faculty. The program is designed to integrate faculty and professional staff in an effort that is both academic and humanistic in its orientation in order to reduce the barriers between them at the university. The program is also designed to sensitize faculty members to the needs and problems of students in general and freshmen in particular. Faculty members who have completed the 40-hour training teach the University 101 course. "The Student in the University," that is offered to freshmen. (SW)

 Identifiers—*Immigration and Nationality Act 1965

Congressional hearings on H.R. 7118, a bill to amend the Immigration and Nationality Act with respect to the admission of foreign medical graduates for graduate medical education, are presented. The bill would allow an extension of the time by which hospitals are required to reduce their reliance on foreign medical graduates. In particular the bill would authorize a two-year extension of the substantial disruption waiver authority for those hospitals that make a clear showing by means of a comprehensive plan that they are phasing down reliance on foreign medical graduates by recruiting U.S. medical graduates, improving the quality of the program, and attempting to use alternative health care providers. The bill suggests that the National Health Service Corps should play a prominent part in providing medical services while hospitals and programs develop and implement their plans. Testimony by representatives of the federal government, the City and State of New York, and the medical community are presented. Statements regarding the bill and alternative proposals are appended (SW)

 Descriptors—*Academic Achievement. *Cognitive Style. *College Faculty. *College Students. Higher Education. Interaction Process Analysis. Questionnaires. *Research Methodology. Student Characteristics. *Student Teacher Relationship. Teacher Characteristics. Test Reliability. Test Validity

A theory of interaction between college students and college faculty based on similarity in style of intellectual functioning was proposed, instruments

to measure student and teacher characteristics were developed, and the relationship between achievement and intellectual style similarity was studied. Studies that focus on the impacts of physical, social, and intellectual environments on the interaction between student and teacher are reviewed. Two scales were developed to measure cognitive style: Student Goal Orientation scales and Staff Role Orientation scales. Pilot testing of the scales and reliability, validity, and other measures of their quality are described. The study was conducted with 287 students and 30 staff of a university physics department. It was found that the greater the degree of similarity in student goal orientation between student and lecturer, the greater was the student's achievement, as measured by that lecturer. Additionally, there was no relationship between similarity in staff role orientation between student and lecturer and that student's achievement, as measured by that lecturer. Implications of the findings for further research and for tertiary teaching are considered. Study instruments and related articles are appended. (SW)

Westerman, Melvin Elliott
Planning for Reduction in Force in Institutions of Higher Education.

Pub Date—80
 Note—15p.; Not available in paper copy due to marginal legibility of original document.

Pub Type—Reports - Descriptive (141)
EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—Administrator Responsibility. *College Administration. *College Faculty. *College Planning. *Employment Practices. Higher Education. *Personnel Policy. *Reduction in Force. *Retrenchment. School Personnel. Systems Approach

Identifiers—*Pennsylvania State University
 A description of reduction in force (RIF) planning as undertaken by Pennsylvania State University is presented. It is suggested that because a university is a system, adjustments to personnel functions must follow systemic rationale to be successful. It is proposed that RIF planning is a personnel planning process that can be evaluated by using universal values, responsibilities, and differentiation of personnel systems. Responsibilities of the university president, budget office, and academic units for implementing RIF, values that shape personnel systems, and the needs for adjustments in personnel forces at all levels are considered. It is noted that although specific circumstances vary from one college or organization to another and from one time to another for each organization, the formulation of plans and their continued revision and updating are indispensable activities for organization executives. A large organization, such as the Pennsylvania State University, can have departments with especially trained staff to provide planning data and analyses. (SW)

Costs Per Student Credit Hour: A Comparison of Two Allocation Methods.
 Montana State Univ., Bozeman.
 Report No.—MSU-80-03
 Pub Date—Jun 80
 Note—10p.; Prepared through the Office of Institutional Research.

Pub Type—Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Budgeting. College Administration. College Faculty. Comparative Analysis. *Cost Estimates. Departments. *Educational Finance. Higher Education. *Instructional Student Costs. *Research Methodology. *Resource Allocation. Teacher Salaries. Teaching Load

Two allocation methods for studying costs per student credit hour at Montana State University are compared. Both a long method and a short method, using the same source of data, were proposed prior to the study. The long method required much more effort, in that it considers every individual faculty member's salary and, for each faculty member, requires a series of calculations to allocate salary costs based on the person's individual teaching load. These individual calculations are then added to determine salary costs by level for each department. The shorter method differs only in that total teaching loads for each department are used to allocate total department faculty salaries, thereby eliminating individual calculations and directly arriving at departmental salary costs distributed to levels of

instruction. The rationale for use of the long method is examined. However, the university also maintained an additional worksheet so the short method could be used on exactly the same data. The comparison of the two methods shows not only that both methods produce similar results, but that the short method may even be more valid. (SW)

Success or Failure of Communication Technology in the Third World: By What Criteria Shall We Judge?

Pub Date—Jun 78

Note—23p.; Paper prepared for the conference "Economic Analysis for Educational Technology Decisions" (Dijon, France, June 19-23, 1978).

Pub Type—Information Analyses (070)—Opinion Papers (120)—Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Communications, *Cultural Context, *Developing Nations, *Educational Planning, *Educational Technology, Planning, Program Development, *Success

The successful application of communication or educational technology in developing nations is dependent upon a favorable mix of planning factors and the more predominant contextual factors of local settings. Planning strategies should be adopted to search for those contexts that promise the best results from a rationally planned application of technology. This would avoid the planners' often irrational hope that technology can overcome the major social problems faced by a society, offering instead a useful tool for societies who have already attacked these problems. Examination of recent technology projects in developing nations, including the planning and implementation stages, indicates that these internal and external factors are the most likely to constrain the achievement of benefits: (1) criteria for successes are based on an implicit or explicit set of values; (2) in the past, judgment has been too restricted to internal efficiency standards; (3) contextual factors have largely been ignored; (4) equity as a criterion for success imposes its own criteria; and (5) a mix of contextual and planning factors is required. A bibliography of 27 references is included. (RAA)

Assessment and the Control Function in Systems of Continuing Education.

Pub Date—24 Apr 80

Note—19p.; Paper presented at the Annual Meeting of the Association for Educational Communications and Technology (Denver, CO, April 24, 1980).

Pub Type—Speeches/Meeting Papers (150)—Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Continuing Education, Feedback, *Instructional Development, *Models, *Needs Assessment, *Systems Approach

Continuing education can be looked at as a living system and, as such, assessment is viewed as an integral part of the control function. The use of control functions models of assessment provides a living systems point of view and allows for such new and different questions to be posed as: (1) What are the significant levels of perception and control in our systems? (2) What are the significant controlled quantities? (3) What biases are input functions, directing our attention or enabling us to sense (or ignore) conditions? (4) How do we bias the input functions to detect the controlled quantities more effectively? (5) What are the sources of our reference signals and what effect do they have on our systems? (6) How does continuing education become more responsive to real problems? (7) How are lower levels of control tapped to provide higher levels of control with more direct perceptions of controlled quantities? (8) What is the range of control of our educational interventions? and (9) How much error will our systems tolerate? Such an approach will, hopefully, enable the development of new approaches to studying and applying needs assessment methodology. (CHC)

An Annotated Bibliography of Literature Dealing with the Impact of Television Viewing on the Behavioral Patterns of the Young Child.

Pub Date—Jun 80

Note—20p.

Pub Type—Reference Materials - Bibliographies (131)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Aggression, *Annotated Bibliographies, Antisocial Behavior, *Behavior Patterns, Periodicals, Prosocial Behavior, Socialization, *Television Viewing, Violence, *Young Children

This annotated bibliography cites 36 articles dealing with the influence of television viewing on the attitudes and values of the young child. Articles are listed in three categories—negative, ambivalent, and positive. The material contained in the "negative" approach indicates that television has increased unfavorable reactions among young children, while the "ambivalent" articles describe both positive and negative effects. Articles taking a "positive" approach dispute the antisocial effects and emphasize the prosocial effects of television viewing. (CHC)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Comparative Analysis, *Computer Assisted Instruction, Formative Evaluation, Intermode Differences, *Lecture Method, *Medical Education, *Programed Instruction, Summative Evaluation

This report contains a comparative analysis of the differential effectiveness of computer-assisted instruction (CAI), programmed instructional text (PIT), and lecture methods of instruction in three medical courses—Medical Laboratory, Radiology, and Dental. The summative evaluation includes (1) multiple regression analyses conducted to predict learner performance; (2) 2x3 analyses of variance conducted to investigate treatment (CAI, lecture, and PIT) and aptitude effects; and (3) discriminant analyses of high-fast and low-slow achievers in each group to determine the characteristics of learners for whom the particular treatment was effective. The data for each course are presented, including charts and graphs, followed by a section providing discussions of the instructional effectiveness of the three treatments within each course: decision strategies; learner characteristics; characteristics of high achievement-fast CAI learners, high-fast vs. low-slow PIT students, and high vs. low achievement lecture students; post instructional attitudes; learner media preferences; and attitude change. Conclusions, recommendations, and a list of references conclude the report. (CHC)

More Than Meets the Eye. The Effectiveness of Broadcast Audio and Two-Way Audio Instruction for Distant Learning.

Wisconsin Univ., Madison. Univ. Extension.

Pub Date—80

Note—96p.

Pub Type—Information Analyses (070)—Reference Materials - Bibliographies (131)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—*Educational Radio, *Evaluation, *Teaching Methods, *Teleconferencing

Identifiers—*Subsidiary Communications Authorization

This report on the effectiveness of radio instruction and teleconferencing is presented in three chapters: (1) One-Way Audio Instruction-Radio, (2) Two-Way Audio Instruction-Teleconferencing, and (3) Comprehensive Bibliography on Teleconferencing (annotated). Chapters 1 and 2 include sections on determining effectiveness, research, functions, implications, advantages, and selected bibliographies on radio instruction or teleconferencing. Chapter 1 also provides a description of the Subsidiary Communications Authorization. (CHC)

Harvey, Lisa St. Clair

Reality Presentation and Communication: A Comparative Discussion of the Smithsonian Institution and The Washington Post as Communications Structures.

Pub Date—79

Note—99p.; Best copy available.

Pub Type—Opinion Papers (120)—Reports - Research (143)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—*Communication (Thought Transfer), Community Influence, Comparative Analysis, Information Dissemination, *Information Processing, Interviews, Mass Media, Media Research, *Museums, *News Media, Social Responsibility

Identifiers—Gatekeeper Role, *Smithsonian Institution, Washington Post

A comparative study of two types of media, a newspaper and a museum, reveals substantive differences in the ways each of these communications organizations alters the information which it presents to the public. Interviews conducted with spokespeople from the Washington Post and the Smithsonian Institution focused on three major

theories of communication which account for ways in which reality is transformed by the media: (1) the gatekeeping theory, which says that as witnesses, reporters, editors, etc., each leave their own mark on the initial news item, it is changed; (2) the community interaction theory, which says that the audience sometimes has the power to determine what form its media may assume; and (3) the social responsibility theory, which says that since the press enjoys a privileged position under the government, it has certain obligations in presenting the news. References and a 46-item bibliography are attached. (LLS)

Descriptors—Broadcast Television, *Cable Television, Communications Satellites, *Cultural Opportunities, Marketing, Needs Assessment, Programming (Broadcast), Program Proposals, *Public Television, *Technological Advancement, *Telecommunications, Theater Arts

Identifiers—Videotext

Since the publication in April 1979 of the Carnegie Commission's report on the future of public radio and television in the United States, the accelerating pace of technological change has become even clearer, and this study was undertaken to provide a more detailed review of new marketplace developments, examining both service and revenue possibilities for the public television industry. The first section of this report focuses on a proposed nonprofit cable network for performing arts, culture, and entertainment (PACE). The five industry reports which follow discuss the current status of domestic satellite communications, the cable television industry, pay television, the home video market, and videotext services. A financial projection and a prototype program schedule for PACE, a glossary of acronyms, and an index are also provided. (MER)

Descriptors—*Audiovisual Aids, *Audiovisual Instruction, Cross Cultural Training, Developing Nations, Equipment, Films, *Industrial Training, *Instructional Design, *Production Techniques, Slides, Systems Approach, Training Methods, Videotape Recordings

Intended for use by persons in developing countries responsible for initiating or expanding the use of audiovisual facilities and techniques in industry; this manual is designed for those who have limited background in audiovisuals but need detailed information about how certain techniques may be employed in an economical, efficient way. Part one, which focuses on the use of audiovisuals, includes a brief introduction and discussions of factors involved in the selection process and in the actual use of such materials, including cost effectiveness and facilities. Under the heading Techniques and Tools, the second part presents some basic considerations in preparing artwork for projected materials; brief descriptions of such non-projected aids as storyboards, flipboards, and flannelboards, together with their advantages and disadvantages, construction, and advice on use; general instructions for voice production; equipment for projected still pictures and guidelines for producing effective presentations; information on motion picture projectors and production techniques; and an overview of the types of videotape recorders available with suggestions for using VTR equipment and closed-circuit television. Procedural diagrams, pictures, and figures supple-

ment the written text, and an international directory of institutions and organizations concerned with film making or educational media is attached. (MER)

Library Services for the Blind and Print Handicapped and the United Nations International Year of the Disabled.

Pub Date—80

Note—8p.: Paper submitted to the Round Table on Library Services for the Blind, International Federation of Library Associations (Boston, MA, June 1980).

Pub Type—Opinion Papers (120)—Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Blindness, *Books, Disabilities, Information Needs, *International Programs, *Library Services, *National Programs, Reading Difficulties, *Visual Impairments

The United Nations 1981 International Year of Disabled Persons offers a unique opportunity for broadening the basis of understanding of the library needs of the blind and print handicapped. There is room for both national and international development if traditionally publicity-shy and mostly nonaggressive librarians come forward and seize the opportunity of educating governments and the public at large. They must convince these audiences that books and library services are equally as important for the blind and print handicapped as ramps, crutches, and wheelchairs for the physically handicapped. These needs have not been specifically addressed in the early and medium stages of planning for 1981. We must not, at this stage, let the opportunity pass to become involved on a continuing basis as a legitimate part of this universal focus on the needs of the disabled. (Author/RAA)

Instructional Media Programs in the State Library Network. A Policy Statement.

Wisconsin State Dept. of Public Instruction, Madison.

Report No.—WSDPI-Bull-0394

Pub Date—80

Note—9p.

Available from—Publication Sales, Department of Public Instruction, 126 Langdon Street, Madison, WI 53702 (free).

Pub Type—Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Educational Policy, *Learning Resources Centers, *Library Cooperation, *Library Networks, Position Papers, *School Libraries, Statewide Planning

Identifiers—*Wisconsin

This policy based on the principle that all types of libraries and users stand to benefit from increased cooperation was adopted by the Wisconsin Department of Public Instruction in 1979. The development and support of both formal and informal cooperative arrangements is encouraged as a means to facilitate resource sharing among all schools within a district. Also stressed is the development of cooperative activities between school media programs and other types of libraries, depending upon local needs. Some suggested activities are: (1) centralized cataloging and processing, (2) reference and referral services, (3) interlibrary loans, (4) shared publicity programs, (5) newsletters, (6) coordinated acquisition programs, and (7) continuing education. Cooperative organizations where staff from all types of libraries work together are also recommended. School media programs are urged either to participate in any existing cooperative activities, or to take responsibility for forming appropriate organizations where none currently exist. (BK)

Identifiers—New York

This guide was designed with three purposes in mind: (1) to build a greater awareness among trustees of library organization in the state and of the

support and services available to them through that organization; (2) to stimulate greater interest in and knowledge of the many duties and responsibilities of library trustees; and (3) to encourage closer cooperation with the public library system of which they are members. The following topics are covered: libraries in New York state, selection of trustees, trustees' responsibilities, library board organization, library policies, public relations, library laws, budgets and finance, trustees' relations with librarian and staff, planning and evaluation, library construction, and continuing education. Appendices include a checklist for trustees; a glossary of selected terms, acronyms, and abbreviations; a diagram of library development; and the Library Bill of Rights. (FM)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Annotated Bibliographies, *Attitudes, Cataloging, *Classification, Indexing, *Racial Bias, *Sex Bias, *Subject Index Terms, *Vocabulary

Identifiers—Dewey Decimal Classification, Library of Congress Classification

Directed toward the eradication of sexual and racial bias in bibliographic systems, the subcommittee reports its progress in the identification of areas of classification systems and subject headings requiring change. A policy statement and six guidelines establish a framework for three categories of projects: (1) the need for changes in Library of Congress (LC) subject headings applied to materials on a wide range of racial, ethnic, and lifestyle groups; (2) the analysis of placement and terminology used to classify women and racial and ethnic minorities in both LC and Dewey schedules; and (3) the compilation of annotated bibliographies citing research already done in the area of subject analysis and terminology relating to women and Afro-Americans. Summary reports of the six subcommittee projects are followed by a listing of further research needs, general recommendations, and a summary of all subcommittee recommendations. Full reports of the subcommittee projects are attached. (RAA)

University Libraries Task Force to Study the Issue of Release Time. A Report to the Library Faculty Executive Committee.

State Univ. of New York, Buffalo. Univ. Libraries.

Pub Date—Nov 79

Note—32p.

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Higher Education, *Librarians, *Library Education, Library Surveys, *Professional Continuing Education, *Professional Development, *Released Time, Research

Based on the responses of 40 library faculty members to a questionnaire exploring the area of professional development activities, seven policy recommendations on release time for professional development and research were developed by a task force. These recommendations urge (1) recognition by library faculty of developmental opportunities and responsibilities; (2) recognition by the administration of its obligation to further professional development; (3) establishment of a policy for professional development and release time; (4) formal establishment of minimum opportunity levels for professional development; (5) flexible work schedules for library faculty; (6) equality of opportunity for all librarians regardless of work unit; and (7) the provision of resources to support the program. This report analyzes the questionnaires and presents detailed graphs depicting work, research, and professional development time utilization. An appendix presents the questionnaire and tabulated results. (RAA)

Answering the Challenge of Teletext, Viewdata Systems and Other Fast Growing Communications, Such as Home Computers.

Pub Date—21 Jun 80

Note—16p.; Paper presented at the Summer Workshop of Arizona Newspaper Association (Flagstaff, AZ, June 21, 1980).

Pub Type—Opinion Papers (120) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Delivery Systems, *Futures (of Society), *Information Dissemination, *Marketing, Microcomputers, *Newspapers, Online Systems Identifiers—*Teletext, *Videotext

Newspapers are facing challenges from the new media of teletext, viewdata systems, and home computers. Teletext, which provides formatted pages of text broadcast for viewing on a television screen, provides news immediately, simply, conveniently, and inexpensively. However, it does not provide the browse and scan options of newspapers. Of greater potential impact is the development of viewdata systems which use the television, telephone, and computer so that online searching can be done from the home. The system can also be modified to use a home computer rather than a television screen. Changes in how people spend their leisure time and their disposable income, combined with the stagnation of newspaper readership and the increasingly important role of information in society, suggest that newspapers should look into new options. If newspapers would utilize their information collection, analysis, storage, and dissemination capabilities, the production of a newspaper could be only one part of their business. Information marketing possibilities for both the business and the home in the future include using electronic news records to develop online databases, selling information in both electronic and clipping forms, and providing research services. Application of Computer Simulation Techniques in Military Exercise Control System Development: 1. NETMAN Model Sensitivity Test and Validation. Technical Report 407.

Applied Psychological Services, Inc., Wayne, Pa. Spons Agency—Army Research Inst. for the Behavioral and Social Sciences, Alexandria, Va. Pub Date—Sep 79

Contract—MDA903-78-C-2013

Note—115p.

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC05 Plus Postage.

Descriptors—*Computers, Management Systems, *Mathematical Models, *Military Training, *Simulation, Systems Analysis

The methods, procedures, and results of a sensitivity test on NETMAN, a stochastic digital computer model designed to simulate the information collection and scoring control systems used in tactical warfare training exercises, are described. NETMAN enables its users to obtain information such as personnel requirements, training requirements, and workload alternatives in such systems as the Marine Corps' Tactical Warfare Simulation, Evaluation, and Analysis System (TWSEAS). The model had received preliminary sensitivity testing, and a more thorough program was required. Consequently the Army Research Institute instituted a program to complete a formal model sensitivity test and validation, and define the role of such exercise control models in system design and redesign. This report summarizes the first year's effort and provides the model validation results, including selection and collection of criterion data from actual military exercises and the comparison of model re-

sults against these measures. Conclusions indicate that the model can be used with increased confidence to predict the performance of training exercise control systems up to battalion level. (Author/LLS)

Identifiers—Open University (Great Britain)

Examination of the Open University's use of educational broadcasting indicates that it is a valuable resource but a continued emphasis on the hardware, together with a failure to recognize the problems which users may face, will mean that in many cases the results will not match the expectations. The emphasis is too often placed on the hardware when educational broadcasting systems are introduced rather than toward the individuals for whom it is intended, and students often do not possess the skills necessary to make full use of the educational broadcasting programs. Examples are provided from the Open University's experience. (CHC)

A series of six experiments was conducted to increase understanding of human performance on diagnostic tasks, and in the process to investigate the feasibility of using context-free computer-based simulations to train troubleshooting skills. Three simulated diagnostic tasks were developed: a simple context-free task, a complex context-free task, and a context-specific task (simulation of aircraft powerplants). The six studies evaluated the effects of computer aiding on the performance of each task and on subsequent unaided performance, using different task mixes, subjects (4 to 48 engineering or technical trainees), and conditions (self-paced vs. forced pacing, feedback loops). Computer aiding reduced the number of tests required to diagnose simple problems and enhanced subsequent unaided performance except when subjects were under time pressures. Training on the simple task with computer aiding first inhibited and then enhanced performance on the complex context-free task. Training on the context-free tasks improved performance on the context-specific task. Results provide a database for both theoretical issues in fault diagnosis and practical application of computer aiding to live system performance. (Author)

Identifiers—*Student Information System

Intended to assist school administrators in developing both student information systems and total information systems, this guide contains suggestions which, when considered in terms of local characteristics and concerns, can be used to create such systems to support administrative decision making, state and federal reporting, guidance, research, and strategic planning. Fifteen activities in the development of basic information systems are detailed: (1) obtaining the necessary local education agency (LEA) commitment; (2) establishing a relationship with the LEA; (3) appointing the LEA coordinator; (4) advisory committee selection; (5) forms needs assessment; (6) identification of data needs; (7) refinement of data needs; (8) input-output forms preparation; (9) input-output dictionary preparation; (10) developing procedural materials for data collection; (11) field testing; (12) materials revision; (13) creating file systems; (14) writing operating procedures for data retrieval; and (15) formatting final orientation sessions. Appendices contain worksheets for each activity. (FM)

Guidelines for library media services for the North Clackamas School District were developed by two teams representing the elementary, junior high, and senior high schools. These minimum standards describe the goals and objectives for library media services to students, staff, and community; the operation of the media centers; and the audiovisual equipment and facilities required. The role of district media services is also covered. Specific policies and procedures are outlined for: (1) managing the library media center; (2) staffing and budgeting; (3) composition of a basic media collection; (4) selecting material for the center; and (5) furnishing and equipping the center. One of 15 members of the Northern Illinois Learning Resources Cooperative (NILRC), Elgin Community College served as host institution for a project to design, develop, test, and install computer programs in a community college resource center environment. The service functions identified for systems development included circulation, serial holdings, equipment scheduling, materials preview and rental control, and media production. The development for the project took place within an IBM technical environment (Model 370/125 computer) and is designed for ease of transfer to other medium-sized or larger IBM computer systems. Special technical features include modular programming, COBOL coding, online documentation and programming, database management system design (DL/I), CICS teleprocessing with command level coding, and the extensive use of tables in the system design. The project report includes results of the activities, problems encountered, and extensive appendices. (Author/MER)

A 2-year project at the University of Aberdeen focused on the production of learning materials and the planning of audiovisual based instruction. Background information on the project examines its origins, the nature of course teams, and the evaluation of the five text-tape programs produced. The report specifies three project aims: (1) to produce a series of learning packages of videotape and accompanying text material; (2) to encourage widespread use of such packages by a process called action research or "team planning"; and (3) to publicize the various development stages to encourage others to try these techniques. Sample materials appended include two television scripts, a botany self assessment exercise, a scenario for law programs, an evaluation (botany), and notes for viewers (law). (MER)

A Review of the Literature on Memory Enhancement: The Potential and Relevance of Mnemotechnics for Military Training. Technical Report 436.

Army Research Inst. for the Behavioral and Social Sciences, Alexandria, Va.

Pub Date—Dec 79

Note—67p.

Pub Type—Information Analyses (070)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—*Learning, *Memory, *Military Training, *Mnemonics, *Training Methods

An analysis based on an extensive review of the scientific and popular literature indicates that memory enhancement techniques (mnemotechnics) can be used to increase the effectiveness of military training. An overview of the most common memory enhancement techniques provides background for an assessment of the general utility of such techniques based on a review of the experimental research. A strategy for applying mnemonics and mnemotechnics to military training is then given. It is concluded that mnemonics and mnemotechnics have the potential to significantly enhance training effectiveness. However, if they are not carefully researched and implemented, it is likely that their training potential will be mitigated, if not entirely lost. Intended primarily for professional researchers

to identify areas of needed research, this report can also be used by the military training community to assess the training potential of mnemonics and mnemotechnics. (Author/LLS)

Identifiers—*Elementary Secondary Education Act

Complementing a 1973 survey of management information systems in state departments of education, the conclusions developed in this study present an overview of MIS development and implementation in six states: Georgia, Iowa, Maryland, Oregon, Texas, and Utah. In-depth case studies examine the concerns of MIS personnel and provide insights developed by experienced persons regarding MIS problems and their potential solutions. The departments of education responded to interview questions concerning understanding and planning of MIS, determination of user needs, identification and procurement of resources, scheduling MIS development, accountability and MIS, and evaluation of MIS. Appendices include the interview schedule and a taping agreement. (Author/RAA)

This report describes a study conducted by the Audio-Visual Media Research Group of the Open

University to investigate student attitudes, over time, to the value of radio as a course component. Results of a January 1979 survey using a questionnaire are reported with tables and analyzed according to (1) whether a student had access to a VHF radio at home, (2) the way in which a student already used radio, (3) any experience a student may have had with Open University radio before beginning a foundation course, and (4) any expectations students might have of the role radio could play as a course component and how confident they were that they could use radio in this way. The appendices include the questionnaire, data on the samples used, and the percentage of responses to individual questionnaire items. (CHC)

Descriptors—Case Studies, Computer Programs, *Computers, *Crime, Foreign Countries, *Identification, *Prevention, Problems, State of the Art Reviews, Tables (Data)
Identifiers—*Australia

Computer abuse is examined as both a general issue and as a specific problem. A statistical profile of computer crime lists distribution by country of reported cases, by industry of occurrence, and by amount of monetary loss. The characteristics of computer abuse are described along with the important categories of such crimes. Factors inhibiting reports of abuse, and the job positions of the perpetrators are also presented. Specific examples of abuse are cited from several countries, and nine Australian cases are briefly recounted. Prevention is discussed as a function of the types of controls employed in both the applications and the administrative areas. (Application controls cover all phases of data processing, while administrative controls deal with scheduling personnel, physical security, billing procedures, and maintenance and disaster procedures.) Problems in detecting computer crimes are also discussed, and some of the methods used are indicated. (BK)

Identifiers—Sweden

A psycho-ecological model is used as the basis for a simulation of interactive behavior strategies. The basic unit is an event, and each event has been recorded on closed circuit television videotape. The three basic paradigms of behavioral science—association, structure, and process—are used to anchor the simulations. The empirical foundation for each paradigm is described, as well as the simulator as an objective and reliable instrument. Exploratory evaluations of adaptive behavior simulation suggest that the main influence on development of behavior strategies has been the association paradigm. A brief list of references is attached. (Author/BK)

Pub Date—Feb 80

Note—67p.

Pub Type—Legal/Legislative/Regulatory Materials (090) — Opinion Papers (120) — Information Analyses (070)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—*Comparative Analysis, *Federal Legislation, Federal Regulation, *Telecommunications

Arguments for and against the major legislative proposals pertaining to the reform of the nonbroadcast part of the nation's telecommunications law which are pending before the 96th Congress are analyzed. Background information is given regarding (1) the structure of the domestic telecommunications industry, (2) the regulatory authority which oversees the industry, (3) pricing policies, (4) competitive pricing, (5) the effect of advances in technology, (6) legislative decisions affecting competition, and (7) antitrust enforcement suits. The five major bills pending before Congress are detailed along with the changes which the administration endorses. The goals of pending legislative proposals range from the reaffirmation of the universal service goal of the Communications Act of 1934 and a return to the provision of service by monopoly carriers to opening all aspects of nonbroadcast telecommunications to competition and drastically reducing the level of regulation. A substantial list of notes and references is provided. (Author/LLS)

Note—233p.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC10 Plus Postage.

Descriptors—Instructional Innovation, *Professional Training, *Telecommunications, *Teleconferencing, *Vocational Rehabilitation

The purpose of this national short-term training project was to provide trainers of rehabilitation personnel with the knowledge and skills necessary to make informed choices when considering telecommunications technology as a delivery approach in training. Training content was designed to provide both an overview of the telecommunications technologies available and an in-depth coverage of an experience with the technology which would be the most immediately accessible to the trainers. The telephone was chosen for in-depth coverage, and a teleconferenced approach was subsequently used to deliver the training in 21 locations throughout the United States. Curriculum content included an overview of existing telecommunications technologies and current applications in the delivery of continuing education and human services. Results of a post-program survey showed that 70 percent of the participants were "likely to very likely" to use teleconferencing in their work. Participants also indicated that they were able to learn new information from the teleconferenced instructional approach. (MER)

Descriptors—*Computer Programs, Design, *Evaluation Methods, *Evaluation Needs, *Formative Evaluation, Guidelines, *Program Development, Program Evaluation, Programming, Program Validation, Testing

Guidelines are given for program testing and verification to ensure quality software for the programmer working alone in a computing environment with limited resources. The emphasis is on verification as an integral part of the software development. Guidance includes developing and planning testing as well as the application of other verification techniques at each lifecycle stage. Relying upon neither automated tools nor formal quality assurance support, the guidelines should be appropriate for applications programmers doing small development projects. A brief bibliography is provided as an entry into the field of verification, validation, and testing. (Author/BK)

Descriptors—Audiovisual Communications, Behavioral Sciences, *Certification, *Definitions, *Educational History, Educational Methods, Educational Resources, *Educational Technology, *Educational Theories, Models, Professional Associations, *Professional Occupations, Social Environment, *Systems Approach

A total, systematic, integrative concept provides the framework for this definition of educational technology as a theory, a field, and a profession. The definition statement presents an historical perspective of attempts to define educational technology and a current theoretical framework for arriving at a definition. It also identifies the intellectual techniques and practical applications derived from the theoretical framework and describes the training and certification, the ethics and standards, the leadership, the association and communications, the acknowledgement as a profession, the concern of the profession, and the relationship to other professions that both derive from the theoretical framework and exist in the field today. An evaluation of the definition statement concludes this document by the AECT Task Force on Definition and Terminology; a list of references and a glossary of terms not defined within this definition statement are appended. Identifiers—Africa, Latin America, Two Way Communication

The application of lessons gained from rural ex-

perience with development communications to the problems of delivering social services to the poorer segments of the urban areas is described in a report on the squatter upgrading project in Lusaka, the capital of Zambia. A Project Support Communications Unit established to provide communication between the communities and the Housing Project Unit uses such media as videotape, slides, films, audiotape, photographs, posters and leaflets, and street theater and popular music to enhance the flow of information to and from project participants. Also included in this issue are articles describing a program for the social marketing of contraceptives in Mexico; a bilingual program in Austin, Texas, which is based on low-cost program and media production models developed in several Latin American countries; an independent service for pretesting media messages; a rural communication network in Liberia; a curriculum reform project in Honduras; a game for teaching literacy; the Laubach method for producing literacy primers; and a major project now underway to test whether radio can be used effectively to teach English language arts. Book reviews and ERIC resources are also included, as well as a regular feature, Dilemmas in Country X: Candid Discussions about Failures. (BK)

This summary report of the annual conference includes statements of delegate concerns prepared for the planning committee, presentations by three resource delegates on the promotion of educational technology at different levels, and reports from seven study committees. Lucy Ainsley discussed promotion strategies at the district level. K-12; Wesley Meierhenry, in higher education; and Jim Sucey, for business and industry. Topics covered by the committee reports are: (1) factors contributing to professional self-concept. (2) use of principles of learning in promotional efforts. (3) a planning model for marketing educational technology. (4) factors inhibiting promotional efforts. (5) use of support systems and management allies in promotional efforts. (6) leadership training for promoting educational technology, and (7) the role of political action in promoting educational technology. The report concludes with descriptions of the "Okoboji process" by Patricia Hunter, Peg Childs, and William Winn, and closing statements by Lee Cochran and Bill Oglesby. (BK)

Descriptors—Decision Making. Delivery Systems. Educational Theories. Evaluation Methods. *Evaluators. *Formative Evaluation. Instructional Design. *Instructional Development. Instructional Improvement. Models

This review of the state of educational evaluation, which is directed to both those who produce and those who consume evaluation data, suggests that certain prevalent evaluation practices are seriously out of step with, and inappropriate for, current mainstream instructional activity. Evaluation is recommended as not merely an appendage to instruction, but rather as essential for corrective feedback during the developmental stages of instruction. Further, evaluation is proposed as a process to deal singly and interactively with the various components of the system it serves. Some of the problems of changing the parameters of evaluation are described with emphasis on the need to evaluate the process of an educational program and not just the products. A common design framework is proposed for evaluators and instructional planners in theory based (e.g., behavioral, cognitive, humanistic) instructional evaluation. References and figures illustrating the model are attached. (MER)

Shall We Teach Structured Programming to Children?

Pub Date—79

Note—11p.

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Computer Programs. *Educational Games. Elementary Education. Feasibility Studies. Gifted. *Instructional Innovation. Intermediate Grades. *Programming. Programming Languages

To study the effectiveness and feasibility of using structured programming games at the elementary school level, this study presented one and one-half hours of programming instruction to a group of

gifted children between the ages of nine and twelve. Using a game called Antfarm and the programming language Pascal, the instruction introduced certain structured programming features such as basic commands, concepts of sequence, iteration, selection and refinement, and the notion of hierarchical structure. Results showed high motivation for the entire group. A few children were beginning to use top-down design, to define their own modules, and to give them names. Two problems noted were that the selection commands were difficult for the children to learn, and technical bugs sometimes caused the program to abort. A 19-item bibliography is attached. (BK)

Descriptors—*Audiovisual Instruction, *Competency Based Teacher Education, *Educational Technology, Higher Education, *Preservice Teacher Education

This brief description of the development of competency-based teacher education (CBTE) pro-

grams at the University of Toledo emphasizes the analysis of the kinds of competencies in educational technology most needed by preservice teachers and the interdisciplinary nature of the analysis. The two appendices which form the major part of the paper include a collection of competencies currently "in force" in the CBTE programs at the University of Toledo, and a set of competencies grouped by functions in the domain of educational technology. These competencies-by-function form seven clusters—theories of learning and instruction, systematic instructional planning and evaluation, information search strategies, evaluation and selection of instructional media, production of instructional materials, use of alternative instructional media, and understanding and operating audiovisual equipment. A 23-item bibliography is attached. (MER)

A six-week institute was held by Oklahoma City

University to fulfill the training needs of nine in-

dividuals employed in tribal and/or Indian organi-

zation information centers in the state of Oklahoma.

Goals of the institute were to: (1) provide the par-

ticipants with immediate skills necessary to make

American Indian information centers functional; (2)

develop a pool of American Indians who will con-

sider careers in library science; (3) encourage the

establishment of additional information centers; and

(4) provide the centers with trained individuals who

are capable of transmitting their knowledge to other

Indian groups. Emphasis in the institute curriculum

was placed on developing basic library skills, includ-

ing library materials acquisition, classification, cir-

culation, reference, and use of audiovisual equipment. The training schedule included an orientation period, skills workshops, field trips, guest speakers, and a week of field assignments at the participants' own information centers. The staff made follow-up visits to each of the six sites where participants were located, and the institute was evaluated by instructors, participants, and an outside evaluator. Included in the report are a detailed schedule of classes, assignments given to the participants, relevant correspondence, and evaluation results. (SW)

A 7-month training institute for librarians at American Indian reservation libraries is described in this report. Goals of the institute were to provide the 19 hours of coursework necessary for the participants to qualify for library certification, and to develop specific skills and competencies related to the special needs of area reservation communities. Curriculum profiles are provided for each of the courses; modifications, based on the institute policy of on-site training and a required two weeks per semester on campus, are explained. Also profiled are the staff and 10 participants in the institute. Photographs and brief descriptions are provided for the seven sites, where workshops and practical skills were supervised by visiting university staff, and special benefits of the program are discussed. A final evaluation report, registration information for the institute, and schedules for on-campus instruction are appended. (SW)

Reported in this document are activities of the third Graduate Library Institute for Spanish-Speaking Americans (GLISA). The institute is designed to provide coursework to fulfill requirements of the University of Arizona Graduate Library School, and to develop professional competencies in library services for Hispanic people. Participants and contents of workshops, special GLISA "seminars," and internships are described. Also reported are the academic status of the 14 participants, outreach activities, and graduate placement efforts. The evaluation component of the program, accomplished by external evaluators, advisors, and students, covered goals and objectives, curriculum, and support staff. Recommendations are made for the next GLISA institute. The appendices include participant data, the core curriculum, placement data, institute staff profiles, a list of seven objectives, and pertinent correspondence. (SW)

Identifiers—*Genealogy

An institute on ethnic genealogy for librarians held by Fisk University was designed to prepare librarians to collect, preserve, interpret, and disseminate materials on ethnic genealogy to meet the needs of pluralistic communities, and to create more widespread interest in collecting and preserving materials on ethnic genealogy to support future searches. The institute program included speakers who presented examples of genealogical searches, with emphasis on the special problems of such searches for persons of mixed heritage. Five local field trips and four out-of-town trips were held to explore archives and other sources of genealogical information. Appendices contain a detailed institute planning chart, list of staff and participants, and schedule of events. Emphasis was placed throughout the institute on evaluation by participants; the evaluation forms and results are appended. Also attached are progress reports on participants' follow-up activities, institute announcements in the press, and the institute guide for participants. (SW)

Descriptors—*Curriculum Development, Inservice Education, *Librarians, *Library Administration, *Professional Continuing Education, Program Descriptions, *Special Libraries, Workshops

This report outlines the Metropolitan Washington Library Council's 14-month program to develop and evaluate a continuing education curriculum designed to improve the managerial effectiveness of special librarians. Objectives included determining the management training needs of Washington area special librarians, developing a series of four courses to meet these needs, preparing a descriptive report, and exploring the feasibility of adapting course content to other types of libraries. In all, 89 librarians participated in courses which were developed by instructors, project staff, and an advisory committee made up of special librarians. Findings and recommendations include the following: (1) emphasis in the courses should be on the development of practical skills, (2) effective orientation of instructors is the most important step in developing this kind of project, (3) site visits were integral to instructor preparation, (4) meeting with members of the special library community was also important to instructor preparation, and (5) orienting instructors should take precedence over the development of instructional materials tailored to the library environment. This report contains a narrative and two evaluations of a week-long institute on media services for handicapped students which was held at Northern Illinois University. Purposes of the institute were to: (1) extend the abilities of school library media professionals to provide media services to handicapped children; (2) supply information on sources of materials especially pertinent for the handicapped; (3) provide institute participants with the expertise necessary to present in-service sessions for teachers on service to the handicapped; (4) help participants communicate with parents of handicapped children about available services; and (5) stimulate greater initiative and involvement in this aspect of school library media services. Participants in the institute were professionals involved in the application of library media services and materials in relation to special education. A short summative evaluation of the institute is followed by an in-depth program report by an external evaluator; the second report describes the evaluation design and findings from questionnaires distributed to participants before and after the institute. Lists of goals and objectives, consultants/speakers, institute participants, and the schedule of events are attached. (SW)

Infopass: Some Organizational Concerns of a Local Cooperative Reference Program. Occasional Paper No. 2.

Pub Date—Aug 80

Note—29p.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Cost Effectiveness, Information Retrieval, Information Seeking, *Library Cooperation, *Library Networks, *Library Services, *Reference Services, *User Satisfaction (Information), Use Studies

Identifiers—Michigan (Dearborn)

A 3-month trial of the Dearborn Area Libraries Infopass System (DALIS), a local library cooperative program coordinating the reference services of six libraries (special, public, and academic), suggests that further study is warranted to develop cost benefit data. Processes found to be of most importance for success in the multi-type library program include assessment of user needs, and the role of users in planning, decision making, and communication. Analysis indicates that document delivery and telecommunication use should be investigated to overcome low program acceptance by patrons. Appendices provide a reference form and tables of participating libraries, program development activities, referrals, referral estimates, and cooperative program activities. (Author/RAA)

The ideal traits for an online searcher, as identified in studies by online vendors and suppliers, are discussed: (1) curiosity and a desire to learn, (2) adaptability, (3) comfortableness with the machine interaction process, (4) ability to cope with instances of system failure, (5) patience and persistence, and (6) a logical, thorough, analytical mind. The paper also examines the fears and frustrations of beginning searchers, provides examples of human error and machine failure, and delineates the frustrations of database suppliers and vendors in educating searchers. The use of print tools in developing search strategies is stressed, and motivation for self-improvement is emphasized as a paramount goal of online training. A list of ranked recommended readings is appended. (Author/RAA)

Descriptors—Biographies, *Cataloging, *Classification, *History, *Library Catalogs, Library Collections, Library Science

Identifiers—*Focke (Rudolph)

Between 1900 and 1905, Rudolph Focke published a series of papers on classification theory and a draft of a code for the construction of classified catalogs. His work was the direct result of the reform of librarianship during the last decades of the nineteenth century. The large number of classification systems used by German university and research libraries was seen as an obstacle to the development of national systems of bibliographic control and access. The hope of standardization came to nothing: Focke's code may even have had the opposite effect of perpetuating local systems well into the twentieth century. His work was introduced to librarians in the United States at a time when subject cataloging and classification were in transition. His code is consistent with the general principles underlying the Library of Congress Classification, which may have been more influenced by nineteenth century German classification than has heretofore been recognized. Accountability, Competency, and Non-Teaching Faculty.

Pub Date—78

Note—13p.

Pub Type—Guides - Non-Classroom (055)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Competence, Elementary Secondary Education, *Evaluation Criteria, *Evaluation Methods, Faculty Evaluation, Library Administration, Media Selection, *Media Specialists, *Models, *School Libraries

This report illustrates the steps in the development of an evaluative model for non-teaching faculty, using the school media specialist as an example. The model measures how the professional applies knowledge of a given content area to improve learning in a particular school situation, and consists of three parts: (1) documentation developed by the media specialist (or other non-teaching faculty) and presented in a portfolio, (2) interview questions for randomly selected school personnel and students, and (3) a list of items to be checked by observations. The effectiveness of the media specialist would be evaluated in the areas of media

selection, management of the media program, and utilization of media resources by faculty and students. While the specifics of the model would change for other non-teaching faculty, the basic components are designed to evaluate solely those skills that influence the effectiveness of the program for which he or she is responsible. Pub Type—Books (010) — Reports - Research (143)

Document Not Available from EDRS.

Descriptors—*Educational Change, Graduate Study, Higher Education, Librarians, *Libraries, *Library Education, *Library Schools, Masters Programs, Needs Assessment, Surveys

An 8-year study of selected graduate library school programs, the state of the profession, and the needs of libraries reveals the necessity for educational reform. Three principal questions confront the profession: What is the responsibility of professional education to the library profession, its students, and society? How does the present system measure up to the accepted functions and responsibilities of professional education? and What reforms are needed to improve library education and bring it closer to accepted professional standards? Examination of standards and actual practice suggests major shortcomings in library education although it is fundamentally sound as it has evolved to the present. Principal reforms needed are reduction of the number of accredited graduate programs, lengthening and enrichment of master's programs, limitation of enrollment to highly qualified and motivated applicants, improvement of the quality and relevance of graduate programs, extension of graduate library schools' responsibility to programs in continuing education, strengthening the accreditation process as an instrument of reform, and systematization of reform through the establishment of a national forum for library education. A bibliography of 110 references is provided. (RAA)

Identifiers—*Research and Development Utilization Program

This set of case studies describes six local elementary and junior high school improvement projects. Chosen from the 30 comprising the Consortium Project's pool of target schools, these school sites represent a mix of urban, suburban, and rural districts in three of the project's six states. Each study describes (1) the social context, historical background, and educational climate of the school district; (2) facilities, organizational structure, faculty, and student body of the schools; (3) the school's involvement with the Consortium, including problem identification, program selection, training of faculty, and program implementation or adaptation; (4) decision making roles; and (5) outcomes. All six studies are followed by appendices and epilogues, and a discussion of cross-site themes and issues by members of the Harvard Graduate School of Education is presented. A bibliography is provided. (FM)

This directory of projects highlights research advances in the areas of library cooperation and networks, services to special target groups, administration and new technology, new types of library service, and improvement of training. Each

project record contains information about the institution, geographic location, principal investigator, duration, contract number, and dollar value. Also included are an informative abstract about the work and significant results, a bibliography of project products, and ED numbers for those documents that have been processed by ERIC. The project descriptions are listed in approximate chronological order with access provided by subject, principal investigator, institution, and contract grant indexes. Four statistical appendices provide information relating to annual funding levels, types of performing organizations, major subject areas funded, and operating centers-services that have resulted from funded projects. Descriptors—*Abstract Reasoning, *Artificial Intelligence, *Automation, Data Bases, Information Processing, Information Retrieval, *Information Science, Language Processing, Pattern Recognition, *Problem Solving

Identifiers—*Knowledge Based Systems

This paper discusses the theoretical problem of matching and abstraction of concepts as the processes occur in human minds, and the structures used to represent these processes for use in automated, knowledge based systems. A basic premise of the paper is that hierarchies play a crucial role in structuring knowledge and in solving problems. Data representation, knowledge bases, partial matching, information retrieval, and synthesis of novel semantic interpretations are explored. Finally, key research issues are identified. (SW)

Descriptors—*Automatic Indexing, Coordinate Indexes, *Failure, Information Retrieval, *Systems Analysis, *Thesauri

Identifiers—Natural Language

This study examines automatic indexing performed with a manually constructed thesaurus on a document collection of titles and abstracts of library science master's papers. Errors are identified when

122 Document Resumes

the meaning of a posted descriptor, as identified by context in the thesaurus, does not match that of the passage of text which occasioned the posting. Three major types of errors are discussed: term ambiguity, flaws in the thesaurus construction, and the automatic word matching procedure. The study concludes with a discussion of reasons for failure of each of the three error types, and an explanation of study limitations. Appendices contain an outline of the hierarchical structure of the thesaurus studied, a random sample of 100 index terms, and other subsets of the thesaurus which support the study. (Author/SW)

Black Periodicals and Newspapers. A Union List of Holdings in Libraries of the University of Wisconsin and the Library of the State Historical Society of Wisconsin. Second Edition, Revised.

Wisconsin State Historical Society, Madison.

Pub Date—79

Note—93p.; For related document, see ED 130 290.

Pub Type—Reference Materials - Bibliographies (131)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—Black Literature, *Blacks, Indexes, *Library Collections, *Newspapers, *Periodicals, Union Catalogs

This second edition of Black Periodicals and Newspapers is a guide to the holdings and locations of more than 600 periodical and newspaper titles relating to black Americans which were received before February 1979 in the libraries of the University of Wisconsin-Madison and in the Library of the State Historical Society of Wisconsin. The guide includes literary, political, and historical journals, as well as general newspapers and feature magazines of the black community. A comparison is made of the number of titles representing each state in this edition and in the original guide. Wisconsin libraries whose holdings appear in the guide are listed. The union list itself is arranged alphabetically by title, and a geographic index to the titles (by state and principal cities) follows. A subject index is also provided. (SW)

An Adaptive Model of Information Policy: A Methodology for Studying the Control of a Powerful Resource.

Pub Date—May 80

Note—14p.; Paper presented at the Mid-Year Meeting of the American Society for Information Science (9th, Pittsburgh, PA, May 1980).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Cybernetics, *Decision Making, *Information Science, *Information Utilization, *Models, *Policy Formation

In the policy making process, one of the important steps is the consideration of the consequences deriving from the alternative choices. For the case of information policy, the present research has begun the development of a methodology for doing so. The methodology chosen was modeling. Information policy modeling serves the dual purposes of further clarification of the phenomenon under study along with the provision of an avenue for quantitative analysis through computer simulation. Following an examination of three policy model configurations—maximization, optimization, and adaptive—the adaptive or cybernetic representation was chosen as the most appropriate way to represent the information policy making process. In addition to the intended role of modeling in this research setting, another perhaps more important function emerged. It was the use of modeling as a tool for better understanding of information policy itself. A list of references is attached. (Author/SW)

Descriptors—Clearinghouses, Data Bases, *Energy, Information Centers, *Information Dissemination, *Information Services, Microcomputers, Microfilm, Radiation, *Safety, *Teleconferencing Identifiers—Nuclear Industry, *Nuclear Power Plants

This paper describes the operations of the Nuclear Safety Analysis Center. Established soon after an accident at the Three Mile Island nuclear power plant near Harrisburg, Pennsylvania, its efforts were initially directed towards a detailed analysis of the accident. Continuing functions include: (1) the analysis of generic nuclear safety issues, (2) serving as a repository for information resulting from the effort to restore the Three Mile Island plant, and (3) serving as a clearinghouse for technical information related to the safety and licensing of nuclear power plants. Two operation support systems are explained: the NOTEPAD computer-conferencing system, which provides information exchange among organizations concerned with nuclear plant operations; and a records management scheme built around a microfilmed document collection and a ZYTRON computer system for online information retrieval. A flow chart of the computer system, a sample database entry, and a list of subject-specific files available to NOTEPAD users are attached. (SW)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—*Demography, *Family Planning, *Information Centers, Information Services, *Library Associations, *Population Education, Population Trends, *Special Libraries

Papers, workshop sessions, and official business of the Association for Population/Family Planning Libraries and Information Centers (APLIC) are presented in the proceedings of this annual conference. The presidential address by Richard Hankinson is followed by the keynote address, in which Ansley J. Coale discusses Malthus and the population trends in his day and the present. Topics of contributed papers include the future of American fertility, assessment of microform capacities in selected Southeast Asian information facilities, population information online, and networking of population information centers. Official APLIC presentations consist of a survey on access to population information centers and libraries, and a session on functions and services of these centers. Workshop topics are: the census as reference source, professional/staff development, selection and acquisitions, and resources for population information exchange. Appendices contain minutes of the annual business meeting, the organizational handbook, directory of members, committee and chapter reports, and guidelines for funding of APLIC projects. (SW)

Descriptors—*Cataloging, College Libraries, *Library Catalogs, Library Personnel, *Library Planning, *Professional Training, *Staff Development, Training Methods

Identifiers—*Anglo American Cataloging Rules

Developed in anticipation of the adoption of AACR2 by the library community, two plans reported by the General Libraries address the impact on the catalog and staff training. No conflict is anticipated in the absorption of AACR2 and the focus of the first report is on the mechanics of integrating

AACR2 headings with headings already in the catalog. This report provides sections on methods and principles, procedures, special problems, special recommendations, a timetable, costs, a bibliography, and appendices on corporate entries and serial identification. The second report examines staff to be trained and the structure of training; staff to do the training and preparation of training aids; user orientation and training; training methods for instruction of the staff; a training timetable; and utilization of external resources. An appendix provides a 1980-81 schedule of regional institutes sponsored in cooperation with the Library of Congress. (RAA)

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC05 Plus Postage.

Descriptors—Blacks, *Content Analysis, *Data Bases, Females, Hispanic Americans, Information Dissemination, *Information Sources, Justice, Mental Retardation, Methods, *Minority Groups, Physical Disabilities, Statistical Analysis Identifiers—Educational Dissemination Studies Program, *ERIC, *Information Equity

One of a series of the EDSP (Educational Dissemination Studies Program) interrelated studies, this report describes the content of the ERIC database for five equity groups including the physically and mentally handicapped, Blacks, Hispanics, and women; and addresses the question of how much can be learned if the analysis is confined to examination of citations and abstracts rather than the literature itself. Although questions of adequacy or relevance are not addressed, the study does provide much detail regarding the structural characteristics of the ERIC journal and document literature. Posting data for CIJE and RIE are examined for each of the five equity groups within topical areas of attitudes, employment, counseling, and curriculum. Each of the 20 resulting combinations is analyzed in terms of publication data classifications and comparisons are made based on content analyses among the five equity groups. RIE data are also examined in terms of cross classification of content dimensions. The study establishes significant relationships among the various dimensions and concludes that literature posted to each of the five groups is significantly different in most of the content categories. Identifiers—Ivory Coast, Mali

This report describes the ongoing activities of the Non-Formal Education Information Center during 1979, and details its first half-year of efforts to strengthen the capacity of selected NFE resource centers in Africa, Asia, and Latin America. The report first addresses the continued operation of a clearinghouse for user-oriented information and knowledge-building related to non-formal education and development. Included in this section is demographic data on the worldwide NFE network and a discussion of the various activities of the center including its program of publications, maintenance of an NFE resource base, and inquiry-response service. Second, the report examines the center's expanded scope of work under a new contract which began 31 August 1979. Included in this section is reference to visits made to the Institut Africain pour le Développement Economique et Social, Abidjan, and to the Institut du Sahel, Bamako. Finally, the report reviews the objectives of the center and assesses its accomplishments, problems encountered, responses and results, recommendations, and the agenda for the ensuing six months. Identifiers—United Kingdom

This paper describes the experimental implementa-

tion of BIROS (Bibliographical Information Retrieval Online Service) in the Lancashire Public Library. The project is designed to provide information on the potential use of an online service for the general public, with particular regard to professional and technical users; the implications for public libraries of operating such a service; and the implications for library school teaching. A discussion of the goals and expectations of the service, which provides access to the major commercial online systems and databases, is followed by descriptions of the preparation phase and the first seven months of a 12-month operational phase. Components of these phases include training, staff orientation, publicity, demonstrations, policies for charging fees and handling requests, and evaluation of the search activity. An assessment of the search service by the first 56 users is included. (Author/SW)

Descriptors—Learning Resources Centers, *Library Cooperation, *Literature Reviews, *Public Libraries, *School Community Programs, *School Community Relationship, *School Libraries
Identifiers—*School Public Library Cooperation

This review is presented as a response to major questions related to school and public library cooperation. Its specific objectives are to: (1) indicate the present status of cooperation between school and public libraries; (2) present a historical perspective within which to evaluate the progress of current efforts; (3) identify future trends and directions; (4) point out barriers to cooperation and factors leading to its success; (5) suggest outstanding sources which contain relevant insights about school/public library cooperation; and (6) identify some representative cooperative activities. As a structural framework, several functional categories are identified for the literature; in addition, a distinction is made between research-based and non-research-based documents. Major areas treated in the non-research-based literature include history, legal bases for school/public library cooperation, cooperative techniques, factors leading to success, barriers, and trends in school/public library cooperation. Research-oriented studies of cooperation between school and public libraries, conducted on a more limited basis, are discussed in the categories of combined school/public libraries and less formal cooperative activities between school and public libraries. An extensive bibliography concludes the review. (SW)

A Community Analysis and Service Development Plan for the Reference Department, Stark County District Library, Canton, Ohio.

Ohio State Library, Columbus.

Pub Date—Mar 79

Note—95p.

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—*Community Characteristics, *Community Information Services, *Community Study, *Information Needs, *Information Seeking, *Library Facilities, *Library Services, *Profiles, *Reference Services, *Tables (Data), *Use Studies
Identifiers—*Library Users

Goals of this analysis of the community and its library users in Canton, Ohio, were to: (1) examine the community served and not served by the district reference department; (2) examine types of services provided for users by the department; (3) design a service policy; (4) make recommendations for service improvements; and (5) formulate action plans to attain the service goals. Factors analyzed to arrive at a community profile were population growth

and characteristics, geographical features of the area, the economy, available mass media, and community groups and events. Resources and services available at the county's existing reference department are explained. A profile of users consists of findings from a random sampling of the library card registration file (to obtain an idea of where library users are located), and from a month-long survey of types of information requested and materials used for information. The final part of the report presents ten recommendations for an action plan of services responsive to the identified needs and interests of the community. The project report is accompanied by maps and statistical tables of findings, and a bibliography is included. (SW)

Descriptors—*Books, *Children, *Children's Literature, *Conferences, *History, *Nineteenth Century Literature, *Research

This collection of papers delivered at a symposium held in April 1979 explores the relationship between children and literature in the nineteenth century. The following titles are included: "The Researcher's Craft: Designs and Implements," and "Children's Books and Social History," by Gillian Avery; "Reflections on Histories of Childhood," by Walter L. Arnstein; "The Maxine Waldron Collection of Children's Books and Paper Toys," by Margaret N. Coughlan; "Lydia Maria Child and the Juvenile Miscellany," by Carolyn L. Karcher; "Idealization of the Child and Childhood in Frances Hodgson Burnett's Little Lord Fauntleroy and Mark Twain's Tom Sawyer," by Phyllis Bixler; "The Children of Sophie May," by Carol Doll; "First Appearances: Literature in Nineteenth-Century Periodicals for Children," by Harriett R. Christy; and "Poetry for Children of Two Centuries," by John Mackay Shaw. The proceedings of the conference are summarized in an introduction by the editor. (FM)

Descriptors—*Audiovisual Aids, *Equipment, *Guidelines, *Learning Resources Centers, *Library Acquisition, *Library Facilities, *Library Planning, *Media Selection, *Media Specialists, *Program Development, *School Libraries, *Secondary Education

This handbook is intended to assist school media specialists, librarians, and audiovisualists in planning for the development of a program that will guide students to become effective, independent learners and will help teachers to become stimulating and innovative instructors. The quantitative guidelines presented are arranged in three phases to enable Iowa schools to develop both short and long range goals for secondary media programs. Three goals or phases are specified for each of the following planning areas: professional and support staff, quarters and facilities, materials collection, professional staff materials collection, budget, equipment, and furniture. A bibliography is provided. (FM)

Checklist/Guide to Selecting a Small Computer.

Pilot Industries, New York, N.Y.

Pub Date—80

Note—33p.

Available from—Pilot Books, 347 Fifth Avenue, New York, NY 10016 (\$5.00).

Pub Type—Guides - Non-Classroom (055) — Reference Materials - Vocabularies/Classifications (134) — Tests/Questionnaires (160)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—*Business, Check Lists, *Computer Programs, *Computers, Equipment Standards, Glossaries, *Selection

This 322-point checklist was designed to help executives make an intelligent choice when selecting a small computer for a business. For ease of use the questions have been divided into ten categories: Display Features, Keyboard Features, Printer Features, Controller Features, Software, Word Processing, Service, Training, Miscellaneous, and Costs. To use the checklist, one reads through the entire list of questions, lining out those which do not apply to a particular business. The remaining items are then categorized to see if they are considered Essential (E) or Nice-to-have (N). Equipment from three different vendors can be compared by making checkmarks in the spaces provided to the right of each question. By completing this checklist it can be determined which computer company comes closest to satisfying one's needs. A glossary of computer terms containing 163 items of jargon frequently found in computer advertisements is included. (Author/LLS)

Descriptors—*Broadcast Reception Equipment, *Computer Graphics, *Computers, Foreign Countries, *Information Retrieval, *Input Output Devices, Methods, *Online Systems, Telecommunications, Video Equipment

Identifiers—*Canada, Telidon System, *Videotex. This report describes the videotex system, which allows access by the general public to large computer-based information sources, which contain pages of information to be displayed on suitably supplemented television receivers or newly designed videotex terminals. Some problems in introducing a videotex system suitable for today's technology

which also allows for future expansion are discussed, and one solution proposed by the Canadian Department of Communications is outlined. The overall system of Telidon, the Canadian approach to videotex systems design, is described, with illustrations of various options and their components. Picture Description Instructions (PDI's), the proposed method of storing and communicating visual images and textual information, are explained, and approaches to the design of terminals to operate from the PDI codes are presented. PDI interpretation and execution, character-oriented terminals, bit-map display terminals, and future developments are discussed. The conclusions summarize the strengths of the Telidon system, and a brief list of references is followed by appendices which include an introduction to PDI's and examples of videotex display pages. Descriptors—*Computers, Cooperative Planning, *Higher Education, Needs, Questionnaires, State Surveys, Tables (Data), *Use Studies

Identifiers—Missouri

The results of a year-long study on the use of computers at institutions of higher learning in Missouri are detailed. The task force which conducted this project was charged with the creation of an atmosphere of cooperation and resource sharing, the improvement of the cost effectiveness of computing services, and the identification of areas of unmet needs and consideration of new and/or innovative ways of using computing to meet those needs. To this end, existing information was reviewed, and five surveys of institutions in the state sector were conducted. Final recommendations focused on two main areas: the establishment of a facilitating organization and the sharing of computer resources. The task force recommended that the Coordinating Board for Higher Education create a state-wide higher education computer consortium in Missouri which would have four primary functions: (1) to serve as an information clearinghouse for higher education computing, (2) to facilitate the development and support of academic and administrative computing, (3) to provide a formal voice for higher education computing in the state, and (4) to encourage the development of appropriate levels of computing resources at all colleges and universities. Using Analogies to Develop Conceptual Abilities.

Pub Date—Apr 80

Note—13p.; Paper presented at the Annual Meeting of the Association for Educational Communications and Technology (Denver, CO, April 1980).

Pub Type—Opinion Papers (120) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Concept Teaching, Instructional Design, Metaphors, Teaching Methods

Identifiers—*Analogy

Because analogies are such powerful tools for communicating they should be exploited more consciously for instructional purposes. Unfortunately, analogies as a topic of investigation in the school curriculum tend to surface only as a subheading within a figurative language lesson in English class or as a test item on the SAT, MAT, or GRE. Analogy exercises can be used in a wide variety of other teaching situations. A student might be asked, for example, to think up an analogy for feudalism, prejudice, photosynthesis, or organizational behavior. Converting understandings of different subject matter concepts and processes and competing philosophies within a field into analogies can help students to better grapple with them and concretize their thinking. Also, analogies can provide teachers with a very effective, though perhaps not foolproof, way of gauging how information is being understood by a student. A bibliography and two exercises—one on teaching and the other on leadership analogies—are attached. (Author/LLS)

The Student Advancement in Learning (SAIL) project was instituted at Northwest Alabama State Junior College (NASJC) to increase the retention of high risk students through a combination of courses and services in the areas of academic and personal development, career exploration, individual counseling, and financial aid. During the planning stages of the project, the literature dealing with the application of learning theories and testing instruments in programs designed to aid underprepared students was reviewed; the strengths and weaknesses of NASJC's current developmental services were examined; and an improved program was designed within the limits of a \$50,000 grant. Objectives for each of the program's five developmental areas were then established, focusing on the improvement of basic skills through existing courses, the provision of personal potential courses to enhance motivation and self-esteem, the acquisition and dissemination of career information materials, the establishment of two full-time counseling positions, and increased efforts to inform students of financial aid opportunities. SAIL's implementation involved a pilot project and the gradual integration of SAIL's courses and services into the college's programs. The project report, in addition to describing the planning and implementation of SAIL, examines the instruments to be used in evaluating new students. (JP)

Student Affirmative Action Plan for the California Community Colleges.

California Community Colleges, Sacramento. Board of Governors.

Pub Date—Feb 79

Note—56p. Part of table 6 and the appendix have been deleted due to irreproducibility.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—*Access to Education, *Affirmative Action, American Indians, Ancillary School Services, Asian Americans, Basic Skills, Black Students, Board of Education Role, College Admission, College Role, *Community Colleges, Counseling Services, Disabilities, Economically Disadvantaged, *Educational Objectives, Enrollment, Females, Hispanic Americans, Legal Responsibility, Males, Older Adults, Outreach Programs, Remedial Programs, *School Holding Power, Staff Development, State Boards of Education, *Statewide Planning, Student Financial Aid, Student Recruitment, Tutorial Programs, Two Year Colleges, Two Year College Students, White Students

Identifiers—*California, Extended Opportunity Programs and Services

Policies, relevant enrollment data, and plans of action for recruiting and retaining minority students are presented in a student affirmative action plan for the California community colleges. After introductory material outlining the goals of student affirmative action and the legal responsibility of state and district educational authorities to achieve these goals, the Plan examines the underrepresentation of ethnic minorities, women, those with low incomes, handicapped individuals, and older adults in community college enrollments. The need to correct this underrepresentation through improved access, retention, and institutional commitment is then discussed, followed by suggested plans of action for: (1) expanded efforts in outreach, recruitment, and admissions; (2) more responsive counseling, student affairs, basic skills, and tutorial services; (3) the continued development of special programs and financial support for underrepresented students, such as the Extended Opportunity Programs and Services; and (4) improved faculty, staff, and student awareness of underrepresented students and their preferred modes of learning. The findings are presented of a study conducted for the California community colleges to describe and analyze accurate baseline data against which sex equity in vocational education programs could be measured. The components of the study are described first, including: (1) the use of Vocational Education Audit (VEA) form #48 to collect statistics from all California community colleges and secondary schools relating to 1977-78 vocational enrollments in terms of students' sex, ethnicity, program, and status—special emphasis was placed on nontraditional programs; (2) the use of VEA form #45 to collect data from the same schools relating to student completions and employment follow-up by program area; (3) the use of VEA form #47 to determine the sex and ethnicity of administrators and teachers in vocational education programs; and (4) on-site interviews with 95 randomly selected secondary school districts and 35 randomly selected community college districts to assess the reliability of the VEA forms and to collect additional information concerning support services for women and other nontraditional vocational students. Results for each of the study components are graphically and textually analyzed. Recommendations are presented for the improvement of VEA data collection and for increasing the enrollment of women and minorities in vocational programs. (Author/JP)

Identifiers—*California

Based upon data collected in a survey of students (N=500) and administrators (N=100) at 12 California community colleges, this guidebook provides background information and implementation strategies for the improved recruitment, retention, and placement of male and female students in non-traditional vocational programs. Part I examines legislation related to occupational sex discrimination and then: (1) differentiates between sex discrimination, sex bias, and sex stereotyping; (2) outlines the California community college vocational programs with imbalanced enrollments, that is, programs where over 79% of the students are of one sex; and (3) presents a model and guidelines for planning, implementing, and evaluating changes within vocational curricula. Part II examines survey findings as they relate to students enrolled in non-traditional pro-

grams. This section describes the demographic make-up of the students, their reasons for enrolling in non-traditional programs, the support services they require, and the seriousness of their intentions to find employment in their fields of study. Part III presents strategies for gaining institutional commitment to sex equity, improving student recruitment through increased public relations activities, enhancing student success using support and counseling services, and providing job market information and placement services. Implementing a Coordinated Planning Process.

Bucks County Community Coll., Newtown, Pa.

Pub Date—80

Note—105p.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC05 Plus Postage.

Descriptors—College Administration, *College Planning, College Role, Committees, *Community Colleges, *Needs Assessment, *Organizational Objectives, Program Evaluation, Questionnaires, *Teacher Participation, Two Year Colleges

The participative management procedures used in establishing goals, objectives, and priorities at Bucks County Community College (BCCC) for 1978 and 1979 are described in this report. BCCC's mission statement is examined first as adopted by the Board of Trustees in 1977, and then the steps involved in securing staff participation in the implementation of that mission are described. These steps included: (1) the collection of suggestions for institutional goals from all college employees and the summarization of these suggestions into 19 separate goal statements; (2) the collection of suggestions for college objectives from employees and the matching of these objectives with the 19 goal statements; and (3) the establishment of priorities for these goals and objectives based on a survey of employees. Problems encountered in the planning process are then examined; they included a lack of sufficient time for discussion, a disagreement over the meaning of goals and objectives, and the inability of individuals to follow the impact of the planning process through the budgeting process. A discussion of a revised planning process is presented next, and it is noted that while the revised process involves individuals in the development of college-wide goals, it also limits faculty involvement to the departmental level. Memos, questionnaires, and charts used in both processes are appended. (JP)

Identifiers—*Illinois

This manual outlines the administrative procedures to be followed by the Illinois community colleges in implementing state policies concerning audit and recognition evaluations, which are conducted periodically by the Illinois Community College Board (ICCB). The sections of the Illinois Public Community College Act that grant the ICCB the legal authority to set standards for individual colleges and to issue recognition certificates to institutes meeting those standards are presented first. The manual then outlines the steps in the recognition process; these are: (1) formal application to the ICCB; (2) collection of data in the areas of administration, instruction, public service, finance, facilities, and institutional research; (3) formation of a recognition team consisting of ICCB personnel and peer representatives from other colleges; (4) the recognition visit itself; and (5) the compilation of a recognition report to be presented no later than three weeks after the visit. Appended to the manual are a tentative schedule of recognition visits for 1981 through 1986, an outline of the information needed in the recognition process, a description of the categories of recognition that can be awarded, and the policies for review and appeal. Wanted for Breaking with Tradition and Entering

Today's Careers: Summary Report.

Houston Community Coll. System, Tex.

Pub Date—Jun 79

Note—41p.

Pub Type—Tests/Questionnaires (160) — Reports — Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Career Choice, College Students, Community Colleges, Enrollment Influences, Females, Males, *Nontraditional Occupations, *Occupational Aspiration, Parent Influence, Postsecondary Education, Secondary Education, Secondary School Students, *Sex Stereotypes, *Student Attitudes, Student Recruitment, Surveys, Tables (Data), Teacher Influence, Two Year College Students, Vocational Education Identifiers—Texas (Houston)

A career aspiration profile was administered to 1,350 randomly selected students from Houston area high schools, two-year colleges, and four-year institutions in order to determine the factors which still function as barriers to the entrance of both women and men into non-traditional careers. The career profile solicited information concerning: (1) student occupational aspirations; (2) the salaries students expected to earn; (3) their future educational plans; (4) the role of parents and other adults in influencing occupational choice; (5) the occupational training desired by students; (6) the job-seeking skills they needed to develop; (7) student attitudes concerning the sex-appropriateness of 22 occupational-technical fields; (8) the reasons students felt certain occupations were not appropriate for their sex; (9) the reasons they would be reluctant to enter a non-traditional career; and (10) student perceptions of the usefulness of various methods of recruiting students into non-traditional careers. Summary findings, based on responses from 553 men and 736 women, indicate that while students at all levels felt that most occupational fields were suitable for both sexes, the majority of the respondents still expected to enter occupations traditionally associated with their sex. The survey report details findings for each questionnaire item and provides summary conclusions and the questionnaire. (JP)

Early Identification of the Potential Dropout: An Exploratory Study Based on Fall 1979 New Students. Student Flow Program, Report 6.

Hawaii Univ., Honolulu. Kapiolani Community Coll.

Spons Agency—Department of Education, Washington, D.C.

Pub Date—Jul 80

Note—21p.; Tables may not reproduce clearly.

Pub Type—Numerical/Quantitative Data (110) — Reports — Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Academic Achievement, Academic Failure, *Academic Persistence, College Freshmen, *Community Colleges, *Dropout Characteristics, Liberal Arts, Multiple Regression Analysis, *Predictive Validity, *Predictor Variables, *Student Characteristics, Two Year Colleges, *Two Year College Students, Vocational Education

Based on data collected from the 1,288 students who enrolled at Kapiolani Community College as first-time freshmen in Fall 1979, a study was undertaken to determine the characteristics of new students that are predictive of two dependent variables: (1) second semester enrollment, and (2) a first semester grade point average (GPA) of 2.0 or above. A stepwise regression analysis was applied to assess the predictive value of the following independent variables: full- or part-time enrollment status, educational objectives, scores on English and math placement tests, sex, age, marital status, high school GPA, employment status, basic skills competency, educational goals, college choice, financial worry, defined career plans, and degree of student self-confidence. Study findings, based on two separate regression equations for vocational and liberal arts students, indicate that while academic characteristics seemed more highly correlated with GPA and academic persistence than did personal characteristics, none of the independent variables could account for more than 20% of the variance in either of the dependent variables. Data tables and summary conclusions and recommendations are included in the study report. (JP)

Wood, William H.

A Practical Guide to Freshman Composition Texts.

Pub Date—80

Note—16p.

Pub Type—Opinion Papers (120) — Guides — Classroom — Teacher (052)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—College Freshmen, Community Colleges, Grammar, *Introductory Courses, Publishing Industry, Rhetoric, *Teaching Methods, *Textbook Content, Textbook Evaluation, Textbook Preparation, Textbook Publication, *Textbooks, Two Year Colleges, *Writing (Composition)

An examination of current textbooks for freshman English composition courses reveals that authors, editors, and publishers continue to perpetuate outmoded techniques which frustrate, rather than enhance, student writing ability. Most notable of these techniques is the unnecessary emphasis placed on complicated rules of grammar. Such an emphasis assumes a mastery of rhetorical terminology on the part of today's television-oriented student and promotes the fallacy that students will learn through the discussion of writing rather than through actual writing experience. Other questionable features of these texts include the utilization of meaningless study questions and fill-in-the-blank exercises; the overuse of jargon, such as the euphemism "prewriting" for "outlining"; the inclusion of filler, such as tips on how to buy paper; and the tendency of authors to indulge in philosophical ruminations on irrelevant topics. While some students will try to write and read in spite of these texts, others will be made to feel that writing is a massive undertaking for specialists. Such discouragement may lead some students to abandon English studies, writing, and perhaps even college. Texts should be developed which approach writing as though it existed outside the classroom by, for example, asking students to write about events in their lives, providing realistic writing models, and de-emphasizing grammar rules. Societal Factors which Influence Adults to Complete High School.

Pub Date—5 Mar 79

Note—29p.; Ed. D. Practicum, Nova University

Pub Type—Reports — Research (143) — Dissertations/Theses — Practicum Papers (043)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Adult Students, Community Colleges, *Enrollment Influences, *High School Equivalency Programs, Literature Reviews, Questionnaires, School Surveys, *Student Motivation, Student Recruitment, Two Year Colleges Identifiers—Surry Community College NC

A survey of 30 randomly selected adult students enrolled in Surry Community College's (SCC's) high school completion program was conducted to determine the societal factors that motivate adults to complete high school diploma requirements. The survey instrument was based upon the findings from a review of the literature, interviews with three instructors in the high school completion program, and interviews with three adult high school completion students. The survey participants were asked to indicate those factors that had influenced their decision to enroll in the SCC program on a 40-item checklist of potential influences. The items on the checklist fell into one or more broad categories, reflecting: (1) the desire to complete high school for personal satisfaction; (2) the desire to improve job skills; (3) the flexibility of the schedule offered at SCC and the convenience of its location; and (4) the fact that the program is offered free of charge. Of the items on the survey instrument, 24 were checked by ten or more students. The most commonly selected reasons were: "I want to be able to say that I have completed high school," "I always wanted to finish high school and now I have an opportunity," and "I want a better education." The survey report reviews related literature and presents conclusions about the applicability of the findings to student recruitment. The questionnaire is appended. (JP)

Descriptors—*Associate Degrees, Attendance Patterns, *College Graduates, *Community Colleges, Females, Liberal Arts, Majors (Students), Males, State Colleges, State Surveys, Technical Education, Two Year Colleges, Vocational Education Identifiers—Hawaii

A study was conducted to determine the major characteristics of those students who graduated from the seven Hawaii community colleges during fiscal year (FY) 1980. The study revealed that a total of 2,183 students graduated between July 1979 and June 1980, representing an 8% decrease over the previous year. Factors contributing to this decline included an increased proportion of part-time students, a lighter credit load carried by both full- and part-time students, and an increased proportion of non-classified students. Of the diplomas awarded, 48% were for Associate in Science degrees, 31% were for Associate in Arts degrees, and 21% were Certificates of Achievement. Liberal arts was the most popular program (709 diplomas were awarded), followed by secretarial science (122 diplomas), accounting (120), auto mechanics (108), food service (93), clerical (90), mid-management (80), practical nursing (67), hotel operations (54), and electronics (53). Distribution of graduates by sex varied by campus and program: females comprised 86% and 99% of the graduates in health and secretarial programs, respectively, and males comprised 84% of the graduates in technology programs. Data tables provide a breakdown of findings by campus and by student sex and program. In addition, figures are compared with similar data collected annually since FY 1976. (JP)

Descriptors—Citizenship Education, *College Role, *Community Colleges, Comprehensive Programs, *Core Curriculum, *Curriculum Design, *Curriculum Development, *General Education, Nontraditional Students, Open Enrollment, Teacher Participation, Two Year Colleges, Undergraduate Study

Identifiers—Cedar Valley College TX. Miami Dade Community College FL

Revised general education (GE) curricula at two community colleges are described in an effort to illustrate the outcomes of a "telic" curriculum revision based on: (1) the collective identification of the purposes of GE by an institution's faculty, and (2) the design of a GE curriculum which reconciles those identified purposes with the needs and preferences of non-traditional students. The report first discusses the desirability of curriculum reform based on institutional self-evaluation, rather than on simple comparisons with other colleges, and then examines the problems involved in matching curriculum design with the diverse student bodies associated with open enrollment. This is followed by a description of the GE curriculum developed at Miami-Dade Community College to further its commitment to open enrollment and, at the same time, to meet external demands for career-oriented courses, increased emphasis on basic skills, and higher academic standards. This section also includes an examination of student assessment procedures used to determine the appropriate balance between core courses and basic skills courses. Finally, the report describes the revised GE curriculum developed at Cedar Valley College (Texas) to support the college's commitment to education for citizenship through a sequence of "Skills for Living" courses stressing the individual's role and re-

sponsibility in society. (JP)

A Course Approach to Academic Advising.
 Mesa Community Coll., Ariz.
 Pub Date—Oct 79

Note—41p. Paper presented at the National Conference on Academic Advising of the National Academic Advisory Association (October, 1979) and accompanying workbook

Pub Type—Guides - Non-Classroom (055) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Career Choice, Community Colleges, *Course Content, Course Evaluation, *Educational Counseling, Locus of Control, Pilot Projects, *Planning, *School Orientation, Self Evaluation (Individuals), Sequential Approach, *Student Development, Student Educational Objectives, Student Motivation, Two Year Colleges, *Two Year College Students, Workbooks

The first section of this two-part paper presents a brief discussion of the planning, pilot implementation, and benefits of Assessment and Advise ment 100, a one-unit, self-paced, student development course offered at Mesa Community College. The course was designed to help entering students define why they are in college, determine what they want from the college experience, develop a plan to achieve their educational goals, and correlate their educational goals with career selection. The benefits of the course, determined through various pilot tests conducted during 1979, include improved retention, an increasingly internalized locus of control, and enhanced intrinsic motivation. Following this discussion, the six-unit workbook used by students enrolled in the course is presented. In the workbook, sequential units provide information and exercises which require students to: (1) familiarize themselves with college services in the areas of advisement, financial aid, career planning, counseling, library resources, and job placement; (2) assess their academic skills and weaknesses; (3) learn to allocate their time effectively; (4) articulate their expectations of the college and their tentative career choices; (5) delineate their educational goals; (6) establish a plan to achieve those goals; (7) select relevant courses; and (8) develop a tentative schedule for the following quarter. MISIS Results of Student Education Intent Survey [and] Supplement to MISIS Results of Student Education Intent Survey. Institutional Research Reports 79/80-2 [and] 79/80-2A.

Mississippi Gulf Coast Junior Coll., Perkinston.
 Pub Date—79

Note—20p.

Pub Type—Reports - Research (143) — Numerical/Quantitative Data (110)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Associate Degrees, Comparative Analysis, *Employment Experience, Multicampus Colleges, State Surveys, Statewide Planning, *Student Educational Objectives, Transfer Programs, Two Year Colleges, *Two Year College Students, Vocational Education

Identifiers—Mississippi, *Mississippi Student Information System

A survey of the academic, vocational, and technical students enrolled at Mississippi Gulf Coast Junior College (MGCJC) during Fall 1979 was conducted as a contribution to the Educational Intent component of Mississippi's state-wide student information system. The survey instrument, administered during registration, solicited information concerning the students' current employment and overall educational goals. Major findings, based on 5,030 responses, indicate that 44% of the vocational/technical students and 62.4% of the academic students were currently employed; 21.8% of the respondents were working over 40 hours per week; and 41.3% indicated that they had work experience in their field of study. Responses concerning educational goals reveal that 8.8% of the students were enrolled for personal enrichment, 11.6% were preparing for personal transfer, and 56% were enrolled for job preparation and/or improvement. Approximately 44% of the students indicated that their educational goals could be met through participation in selected programs, and 41.1% intended to obtain an associate degree. While 63.9% of the respondents said they would re-enroll in the Spring semester, 5% indicated that they would re-enroll at a later date, and 12.2% were

undecided. The survey report summarizes findings by educational program and compares results with statewide figures. (JP)

Analysis of Presidents' and Superintendents' Salaries. Institutional Research Report No. 79/80-8.

Mississippi Gulf Coast Junior Coll., Perkinston.
 Pub Date—18 Jun 80

Note—13p.

Pub Type—Reports - Research (143) — Numerical/Quantitative Data (110)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*College Presidents, Comparative Analysis, *National Norms, Promotion (Occupational), *Salaries, State Colleges, *State Norms, Superintendents, Teacher Salaries, *Two Year Colleges

A study was conducted at Mississippi Gulf Coast Junior College (MGCJC) to determine the propriety of the salary earned by MGCJC's president. The president's salary and recent salary increases were compared with the salaries and increases earned by: (1) the chief executive officers of the other Mississippi junior colleges; (2) the presidents of comparable two-year colleges across the country; (3) the presidents of eight Mississippi state universities; (4) the faculty and staff at MGCJC; and (5) the superintendents of selected Mississippi school systems. Major findings indicate that while the salary earned by MGCJC's president was the highest of any Mississippi public junior college, the percentage increase earned by the president between 1977 and 1979 was only the seventh highest in the state. In addition, a comparison with national figures revealed that the president's salary fell within the bottom 25% of all two-year college presidents in the country, and that the salaries of presidents of colleges with enrollments of 10,000 or more were all above that of MGCJC's president. The salary increases earned by the president from 1975 through 1979, though lower than the increases of MGCJC faculty and staff, were comparable to the increases earned by superintendents and state university presidents. The study led to the conclusion that the president's salary was appropriate. (JP)

Discipline Cost Analysis Manual. Maryland Community Colleges.

Maryland State Board for Community Colleges, Annapolis.

Pub Date—Jun 80

Note—68p.

Pub Type—Guides - Non-Classroom (055)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—*Community Colleges, Computer Oriented Programs, Cost Effectiveness, *Cost Estimates, *Courses, *Data Collection, *Intellectual Disciplines, Program Costs, *State Standards, Statewide Planning, Teacher Salaries, Two Year Colleges, Unit Costs, Worksheets

Identifiers—*Maryland

As an aid to Maryland community colleges, procedures are outlined for approximating and reporting discipline cost data required for internal decision-making and for the statewide coordination of community college planning. A discussion of the development of costing standards, which are based on a cost analysis model developed by the National Association of College and University Business Officers, is followed by an enumeration of the management benefits accrued through the state's uniform discipline cost analysis (DCA). The manual next describes the procedures for assigning Higher Education General Information System (HEGIS) codes to community college courses and then defines the costs to be estimated for each course and for each aggregate of courses with the same HEGIS code. An explanation is then provided of the use of standardized worksheets in determining costs for faculty compensation, additional direct instructional costs, and indirect costs. The final Discipline Cost Report is then described as it is to be submitted to the Maryland State Board for Community Colleges by each institution. The manual concludes with a description of the computer programs available to the colleges in the preparation of DCA reports and an outline of the management information reports prepared by the Board on the basis of DCA findings. Worksheets and sample reports are appended. (JP)

Descriptors—Accountability, Classification, *Community Colleges, Computer Oriented Programs, Courses, Disabilities, Educationally Disadvantaged, *Followup Studies, *Information Utilization, *Institutional Research, Models, Program Evaluation, Questionnaires, Sampling, Student Characteristics, Two Year Colleges, Two Year College Students, *Vocational Education

Exemplary adaptations of the California Community Colleges' Student Accountability Model (SAM) are presented, based upon interviews with administrators at 37 colleges or districts known to have implemented SAM practices. After a description of SAM (a set of procedures for the follow-up of occupational students), the report examines the criteria by which the exemplary adaptations were selected. Most important of these was the effective use of data generated through SAM to make needed modifications in programs or courses. Descriptions, costs, outcomes, and "how to do it" suggestions are then provided for each of the selected SAM implementation models. These models are designed to: (1) achieve inter-college consensus on coding conventions in a multi-college district; (2) classify new courses and review course classifications; (3) effectively identify a student's major and objectives; (4) process student applications for closed programs; (5) through 9) effectively collect and use data concerning disadvantaged and handicapped students; (10) provide for the manual operation of SAM when computer time is not available; (11) effectively collect employment information on non-returning students; (12) identify potential dropouts; (13) conduct follow-up studies and evaluate data collection practices; and (14) use SAM data for curriculum evaluation. The Status and Future of Community Services in the Los Angeles Community College District.

Los Angeles Community Coll. District, Calif.

Pub Date—Aug 80

Note—30p.

Pub Type—Information Analyses (070) — Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Community Colleges, *Community Services, Courses, Educational Objectives, Enrollment, *Financial Support, Multicampus Districts, *Program Development, Reduction in Force, *Retrenchment, State Aid, Statewide Planning, Student Recruitment, Two Year Colleges

Identifiers—*Los Angeles Community Colleges CA

The future of community services in the Los Angeles Community College District is examined in light of current fiscal constraints and reductions in force. The report first examines the impact of Proposition 13 on community services throughout California and within the District. The increased reliance on permissive fees and self-supported programs is noted, as are concomitant changes, both positive and negative, in community services programming, enrollment, and staffing. A description of the community services program strengths at each of the nine colleges in the District is followed by an examination of four challenges facing community services in the 1980's. These challenges are to gain acceptance of community services as an integral function of the college, determine ways of providing maximum service, define appropriate goals for community service programs, and develop adequate mechanisms for program funding. The report then discusses the outreach/community development philosophy behind community education and examines, among other possibilities, the use of fee-supported community services as a means of providing programs that might otherwise be curtailed in times of economic constraint. Finally, guidelines are provided for determining the mission of community service programs, staffing them, and assuring adequate funding through a combination of fees, District appropriations, and governmental support. Descriptors—College Administration, Community Colleges, *Educational Finance, *Educational Legislation, Governance, Government Role, Lifelong Learning, National Surveys, Postsecondary Education, State Action, State Aid, *State Legislation, Statewide Planning, Trend Analysis, *Two Year Colleges

Based upon a survey of the community and junior college state directors in all 50 states and Puerto Rico, this five-part report presents an analytical and descriptive review of state legislation affecting community colleges. Part I discusses study methodology and describes the two survey instruments—one soliciting information on relevant legislation enacted or proposed during 1979 and another requesting supplementary information on the statewide coordination of lifelong learning programs. Part II analyzes findings as they relate to legislation in seven topical areas: (1) financial matters, such as appropriations and capital funds; (2) administrative affairs, including governing boards and institutional research; (3) procedures and regulations regarding physical facilities and their construction; (4) institutional expansion and name changes; (5) personnel benefits and collective bargaining; (6) student services and tuition; and (7) curriculum, accreditation, and certification. Part III analyzes the legislative intent of the bills affecting community colleges, and Part IV presents summary conclusions, noting, among other findings, the growth of legislation dealing with finance. The report concludes with an analysis of responses to the lifelong learning questionnaire. Abstracts of relevant 1979 state legislation are appended. (JP)

Descriptors—College Administration, *Community Colleges, Computers, Consultants, Cost Effectiveness, *Data Processing, *Decision Making, Equipment Evaluation, Equipment Utilization, *Governing Boards, Guidelines, *Information Systems, Long Range Planning, Needs Assessment, Professional Services, Staff Utilization, Two Year Colleges

Decision-making guidelines are presented as an aid to community college boards faced with the problem of acquiring and implementing a data processing system for administrative and/or instructional use. After introductory material noting the increased demand for data processing education and the desirability of using computer technology in the collection of data for reporting purposes, the guidebook outlines factors to be considered in a seven-step, decision-making sequence. This sequence involves: (1) assessing computer technology currently in use at the institution and determining future needs; (2) preparing a short- and long-range computing services master plan; (3) establishing objectives and priorities for the tasks to be completed by the academic and administrative segments of the data processing system; (4) determining personnel needs; (5) establishing a governance structure for the system; (6) choosing needed hardware; and (7) determining the system's cost effectiveness. The guidebook concludes with a discussion of the use of consulting firms specializing in educational computing services. (JP)

Community College Students, Costs and Finances: A Review of Research Literature.

Education Commission of the States, Denver, Colo. Education Finance Center.

Spons Agency—National Inst. of Education (DHEW), Washington, D.C.

Pub Date—Sep 80

Contract—400-79-0072

Note—121p.

Pub Type—Information Analyses (070)

EDRS Price—MF01/PC05 Plus Postage.

Descriptors—Adult Students, *Community Colleges, Community Services, *Educational Finance, Educational History, Educational Needs, *Enrollment, Enrollment Influences, Financial Problems, Financial Support, Full Time Students, Literature Reviews, Needs Assessment, Nontraditional Students, Part Time Students, Predictor Variables, *Student Financial Aid, Surveys, Tuition, Two Year Colleges

Based on a review of the literature and ongoing research, this four-part monograph provides a composite profile of the enrollment and financial status of the nation's community colleges. After introductory material describing research methodology, Part I analyzes community college enrollment by sex, examines the increase in the number of adult students, and discusses the relative participation of full- and part-time students. Part II discusses prospective student enrollment behavior and educational needs based on needs assessment survey reports and econometric models designed to identify, through regression analysis, enrollment influences. Reasons for attending a community college as opposed to other post-secondary institutions are discussed, as are the problems involved in using surveys and modeling for predicting enrollment. Part III examines financial aid at community colleges and discusses the difficulties of defining and measuring an institution's "fair share," the dearth of empirical data on the distribution of financial aid to community college students, and the management of financial aid at the colleges. Finally, Part IV reviews the history of community college finance and examines current fiscal problems, criteria for assessing community college financial systems, tuition policies, community service funding patterns, and the impact of tax limitations. Data tables and an extensive bibliography are included. (JP)

Vocational Learning Centers: A Link to Business and Industry.

Wisconsin Indianhead Technical Inst., Ashland.

Pub Date—[80]

Note—16p.

Pub Type—Reports - Research (143) — Tests/Questionnaires (160)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—Community Surveys, Cooperative Programs, *Educational Media, Educational Responsibility, *Inservice Education, Instructional Materials, *Learning Resources Centers, Needs Assessment, On the Job Training, *School Business Relationship, *Shared Services, Technical Institutes, Two Year Colleges

The Learning Resource Center at Wisconsin Indianhead Technical Institute (WITI) conducted a survey of 100 businesses and industries in Ashland, Wisconsin, in order to determine the perceived need for a shared informational media center to be used for workshops, training sessions, and in-service meetings. The survey instrument solicited information on current and projected staff training efforts, the use of audio-visual materials in staff training, periodical subscriptions, the purchase of reference materials, interest in resource speakers and/or the provision of meeting rooms for training purposes, and the amount of money spent annually for educational materials. Major findings, based on an 80% response rate, indicate that 72.5% of the businesses were engaged in staff training and that 34.8% anticipated an expansion of this role. Most respondents (68.1%) favored the use of audio-visual materials if available, but 34.8% owned no audio-visual hardware or software. While 87% subscribed to professional magazines and 84% purchased technical reference materials, only 14.5% spent over \$799 per year for educational materials. In addition to presenting the survey findings, the study report examines the growing need to train employees in their work duties and in safety procedures. The materials and facilities of WITI's Learning Resource

Center that could be used in developing the shared center are also described. (JP)

Educational Needs and Perceptions of Amarillo College: A Community Survey.

Amarillo Coll., Tex.

Pub Date—Sep 80

Note—77p.

Pub Type—Reports - Research (143) —

Tests/Questionnaires (160)

EDRS Price—MF01/PC04 Plus Postage.

Descriptors—Ancillary School Services, Blacks, *Community Characteristics, *Community Colleges, Community Surveys, Demography, *Educational Demand, High School Seniors, Information Sources, *Institutional Evaluation, Mexican Americans, Needs Assessment, Parent Attitudes, Questionnaires, Secondary School Teachers, Student Attitudes, Student Costs, Teacher Attitudes, Two Year Colleges

Identifiers—*Texas (Amarillo)

In order to provide the information needed for long-range planning, Amarillo College (AC), Texas, conducted a survey of eight selected community groups during Fall 1979 to determine the socioeconomic characteristics of area citizens, their perceptions of AC, and their interest in obtaining further education. Survey respondents included 227 area high school seniors, 72 Chamber of Commerce members, 48 self-employed professionals, 399 randomly selected Amarillo residents, 106 randomly selected parents of full-time AC students, 292 area high school teachers, 47 randomly selected Black residents, and 50 randomly selected Hispanic residents. All but the last two sample groups were representative of their respective populations. Three survey instruments were designed: a high school student questionnaire, a basic adult questionnaire, and an interview form modified to collect information of special relevance to the Black and Hispanic respondents. Respondents were asked to: (1) provide demographic information related to ethnicity, residence, sex, age, marital status, employment, and income; (2) rate college facilities and services; (3) identify the sources from which they obtained information about AC; (4) indicate whether the cost of attending AC should be changed; (5) indicate the services that should be added; and (6) identify educational goals. The survey report analyzes findings by respondent group. (JP)

Identifiers—*Florida, Florida State Department of Education

Uniform procedures, terminology, definitions, forms, and instructions for the completion of state reporting requirements are presented as a management aid for the individual Florida community colleges. A calendar of required reports is presented first, along with an explanation of the Community College Information Classification Structure (CCICS) by which data from the 28 colleges are uniformly organized according to a hierarchy of functions and activities. The statewide course numbering system and its relationship to the CCICS are then described, followed by an examination of the purposes, procedures, and forms for each of 17 reports required by the State Division of Community Colleges. These reports cover the college operating budget, annual finance, quarterly finance, cost studies, student fees and waivers, facilities inventories, space utilization, personnel and salaries, full-time equivalent enrollment, opening fall headcount, fall headcount by age groups, annual enrollment headcount, teacher-staff utilization, placement and follow-up of graduates and leavers, community instructional services, annual credit outputs, and staff and program development. Included in the appendix are reports and references to reports which

were collected from the community colleges by other Florida state agencies. (JP)

Faculty Tenure in Community Colleges of Texas: Where It Came from—Where It Is Going.

Pub Date—80

Note—26p.

Pub Type—Historical Materials (060) — Opinion Papers (120)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Academic Freedom, Collective Bargaining, *College Faculty, *Community Colleges, Contracts, Court Litigation, Due Process, Grievance Procedures, Legal Responsibility, State Legislation, State Standards, Teacher Dismissal, *Tenure, Two Year Colleges
Identifiers—*Texas

Literature and litigation are reviewed in a three-part study of the problems that exist in the administration of academic tenure: the history of faculty tenure at Texas community and junior colleges; and possible alternatives to faculty tenure. Part I outlines the general features of tenure operation in the United States and discusses trends toward the declining popularity of the tenure system. This section examines the percentages of colleges and faculty under the tenure system and discusses the fiscal and public relations problems caused by the difficulty of dismissing tenured faculty. Part II examines tenure policy articulated by the Coordinating Board of the Texas College and University System which sets non-binding standards concerning probationary periods, notices of intention not to reappoint, and grounds for the dismissal of tenured faculty. Finally, the techniques of procedural due process and contract negotiations are proposed as alternatives to the tenure system, especially in light of current legislative attempts to abolish tenure in Texas. Part III also reviews pertinent litigation, focusing on the procedural safeguards in due process, the types of issues that may be negotiated between faculty and administration, and the components of a formal grievance procedure. A bibliography and an American Association of University Professors statement on academic freedom and tenure are appended. (JP)

ED 192 846 JC 800 533
Articulation.

Identifiers—*Florida

A series of data tables are presented, detailing the demographic makeup and academic success of those students at the Florida state universities who had transferred from the Florida community colleges. The tables, which include fall term data for 1977, 1978, 1979, classify the transfer students by age, sex, race, date of entry into the university, number of quarter hours transferred from the community college, number of quarter hours earned toward a degree, community college of origin, grade point average (GPA), and academic major. Selected findings, based upon a comparison of the three years, indicate that the percentage of females transferring to the universities increased steadily, and that the percentage of Blacks and Hispanics, while rising between 1977 and 1978, decreased slightly between 1978 and 1979. Most students earned more than 90 quarter hours at the community college before transferring to the university. While at the university, 85% of the transfer students earned a GPA of 2.0 or higher. This average varied from major to major, but was consistently higher for those transferring after earning 90 quarter hours than for those transferring with less than 90 hours credit. The total mean GPA of the transfer students decreased only slightly from 1977 to 1979, while the standard deviation remained constant. The tables present data by university and, in some cases, by college of origin. (JP)

Identifiers—*Market Segmentation

A marketing program for Chattanooga State Technical Community College (CSTCC) is presented as a guide to be used by the college in increasing its share of the traditional college-age market and in expanding the college's target audience to include more non-traditional students. The report first presents a review of the literature concerning educational marketing and student retention, and then outlines major findings for five studies conducted by CSTCC. These studies sought to determine characteristics of entering students, CSTCC's impact on the community, graduate satisfaction with the college, the factors influencing students to drop out, and the relative enrollment contributions of area zip code tracts and high school districts. The implications of the studies for planning are then enumerated and marketing strategies to be used in dealing with 15 target audiences are outlined. These audiences are the general population, applicants, currently enrolled students, transfer students, program leavers, graduates, high school students, high school seniors, area employers, public agencies, area educational institutions, hospitals, churches, volunteer agencies, and civic organizations. For each strategy, time schedules are provided and the persons responsible for implementation are identified. An outline of the goals and activities of CSTCC's marketing task force and a description of the college's attrition reduction program are appended. (JP)

Telephone Interview vs. Mass Mailing for Student Follow-Up: Final Report.

Los Angeles Pierce Coll., Woodland Hills, Calif.

Pub Date—77

Note—19p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Community Colleges, Comparative Analysis, Cost Effectiveness, *Followup Studies, Questionnaires, Reliability, *Research Methodology, Research Problems, Sampling, Surveys, Two Year Colleges

Identifiers—*Mail Surveys, Response Rate (Questionnaires), *Telephone Surveys

A study was conducted at Los Angeles Pierce College (LAPC) to test the relative reliability of small-sample telephone interviewing and large-sample mailings with postcard and telephone reminders for student follow-up. The study involved conducting a telephone survey of 245 former students who had enrolled at LAPC in four program areas, and a mail survey of 625 former students from the same program areas. Results indicate that 18% of the sample surveyed by mail returned questionnaires spontaneously. The postcard reminder added less than 2% to the response rate and the subsequent telephone reminder yielded an additional 1%. The telephone survey, conducted by student workers, produced a 50% response rate. Of those who did not respond, 16% were not available, 3% refused to participate, and 30% had disconnected phones or had moved. Cost estimates indicate that 100 returns would require an expenditure of \$20 more for telephone interviewing than for mass mailing. Despite the cost advantage of the mail survey, it was determined that the telephone interviews were more reliable, in that the response rate was higher and because conclusions or generalizations based on low, volunteer mail returns were hard to justify. The study report details the sampling procedure utilized during the course of the study and provides data tables and the questionnaires. (JP)

Descriptors—*College Administration, College Programs, *Community Colleges, Educational Finance, Educational History, Enrollment Trends, Governance, Multicampus Districts, Public Opinion, Questionnaires, School District Reorganization, State Colleges, State School District Relationship, State Surveys, Tables (Data), *Technical Institutes

Identifiers—Olympia Technical Community College WA, *Washington

The history, administration, and governance of the Washington Community College System (WCCS) are analyzed in this seven-part report prepared for the state legislature. Part I presents background information on the WCCS's role and mission, history, students, programs, personnel, facilities, finances, student costs, and future. Part II discusses public opinion of WCCS's performance based upon a 1980 survey of 1,173 households, which sought information about past attendance, satisfaction with programs and services, awareness of and participation in vocational/technical institutes, degree of confidence in various educational systems, and demography. Part III examines the configuration of district boundaries and the effects of boundary modifications. The functions of multicampus district offices are described in Part IV, and their relationships with individual colleges and the State Board for Community College Education are considered. Part V analyzes the governance of the WCCS and describes each of the statewide organizations, committees, and agencies that influence decision-making at community colleges. Part VI analyzes the question of the desirability of maintaining a dual system of vocational education, under which community colleges and vocational/technical institutes operate separately. The final section provides a special report on Olympia Technical Community College. (JP)

Descriptors—Administrative Organization, *College Presidents, *Community Colleges, Educational Legislation, National Surveys, Personnel Needs, *Professional Associations, Professional Development, *Staff Utilization, *Trustees, Two Year Colleges

In order to determine if paid professional staff should be added to its organization, the Arizona Association of District Governing Boards conducted a study involving: (1) a review of the literature concerning state associations for community college presidents and trustees; and (2) a survey of these organizations within the 25 states that, like Arizona, provide community colleges with locally elected or appointed governing boards. The objectives of the study were to examine the organization and staffing patterns of the state associations and to determine the range of activities engaged in by those organizations with paid professional staff. Major findings indicate that associations within states having a large number of colleges were more likely to hire professional staff. The activities engaged in by these professionals varied with the size of the budget, but centered around six categories: arranging state association meetings and conferences; coordinating and/or conducting professional development workshops; directing annual orientation sessions for newly appointed governing board members; preparing informational newsletters; serving as a liaison with other state educational constituencies; and monitoring legislation. The survey report presents summary conclusions and brief descriptions of the community college system in each of the 25 states examined. (JP)

Clovis, George A.

Services for Evening Students: Final Report of a

Survey Conducted in the 1979 Fall Semester.

Parkersburg Community Coll., W. Va.

Pub Date—Jul 80

Note—44p.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Ancillary School Services, *Community Colleges, *Evening Students, *School Schedules, *Student Attitudes, *Student Characteristics, Student Needs, Student Personnel Services, Two Year Colleges

An in-class survey of 1,198 students attending evening classes at Parkersburg Community College was conducted to determine: (1) the students' awareness of nine college services available during evening hours; (2) the additional services needed by evening students and the hours during which they should be provided; (3) the demographic and attendance profiles of the students; and (4) the preferred times for evening instruction. Major findings indicate that while over 70% of the students were aware of the cafeteria, security, and childcare services provided during evening hours, only 26.6% were aware of the existence of an Evening/Weekend Coordinator on the college's staff. The services most needed beyond their regular hours were the bookstore, the admissions/records office, the cafeteria, and the business office. Many respondents indicated that they desired to have services available at times when the services were already offered. Demographic data indicate that 51.5% of the students were female; that 61.2% were over 25 years of age; that 72% travelled 15 miles or less to the campus; and that 72% were employed full-time. The times preferred for the evening classes by the largest percentage of the respondents were 5:30-7:00 p.m. and 6:00-9:00 p.m. The survey report bases recommendations for improving service to the evening students upon study findings. The questionnaire is appended. (JP)

Cloud, Robert C.

Administrative Freedom and Responsibility in the

Community College: A Proposal.

Pub Date—20 Oct 80

Note—9p.

Pub Type—Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Academic Freedom, *Administrator Responsibility, Administrator Role, *Administrators, College Faculty, *Community Colleges, Professional Associations, Tenure, Two Year Colleges

Despite the strategic position the community college administrator occupies within the institution, there appears to be no definitive statement of administrative freedom and responsibility comparable to that available to faculty members. This is particularly surprising since many administrators are recruited from the ranks of faculty members, where they have historically enjoyed the support of academic freedom and tenure. This support, articulated and defended by the American Association of University Professors, has, despite abuses, assured freedom of teaching and research, as well as the economic security necessary in making the profession attractive to persons of ability. Although these tenets of freedom and tenure may not apply specifically to the administrative endeavor, it is generally accepted that administrators should be free to seek the truth in their specialty, carry out the duties prescribed in their job descriptions, and implement decisions consistent with governing board policy. While the American Association of University Administrators has adopted a statement of Professional Standards for Administrators in Higher Education, this statement focuses primarily on the university setting. A statement of principles emanating from the national level would help clarify the issue of administrative freedom and deter the erosion of authority and influence currently experienced by college administrators. Whitworth, L. L.

Task Level Articulation in Welding between the Community College of Allegheny County, College Center-North, and Parkway West Area Technical School. Final Report.

Allegheny County Community Coll., Pittsburgh, Pa.

Spons Agency—Pennsylvania State Dept. of Edu-

cation, Harrisburg. Bureau of Vocational and Technical Education.

Pub Date—Aug 79

Note—33p.; For related documents, see JC 800 548-551.

Pub Type—Reports - Descriptive (141) — Tests/Questionnaires (160)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Advisory Committees, *Articulation (Education), College School Cooperation, *Community Colleges, *Competency Based Education, Employer Attitudes, Program Development, Questionnaires, *Secondary Schools, Student Evaluation, Surveys, Two Year Colleges, Vocational Education, *Welding

Identifiers—Community College of Allegheny County PA

A cooperative project was undertaken by Parkway West Area Technical School (PWATS) and the Community College of Allegheny County (CCAC) to plan and develop a task level articulation agreement for the welding sequences extending from the high school to the post-secondary levels. Project procedures, coordinated by a Welding Craft Advisory Committee made up of instructors and employers, involved: (1) a survey of area employers to identify the task competencies required of welders; (2) the selection or development of performance objectives and criterion-referenced measures for each of the identified competencies; (3) the establishment of a hierarchy for these competencies; (4) the evaluation of existing courses of study; and (5) the reorganization of courses of study so that the two-year welding program at PWATS was directly equivalent to CCAC's Welding I and Welding II. These procedures overcome the shortcomings of traditional high school/college articulation agreements in that a student's subject mastery is proven rather than assumed and that the tasks are identified by employers rather than educators. The report evaluates the initial implementation of the agreement, examines CCAC's plans for articulation agreements in other vocational areas, and discusses the staff development efforts required in the state-wide implementation of such agreements. Descriptors—Academic Rank (Professional), Age, Behavior Change, College Faculty, Community Colleges, Correlation, Feedback, Females, Information Utilization, Males, *Student Evaluation of Teacher Performance, *Teacher Characteristics, *Teacher Improvement, Tenure, Two Year Colleges

A study was conducted at the Bronx Community College to: (1) test the hypothesis that instructors' knowledge of their ratings by students and of their relative standing among their colleagues in terms of these ratings is sufficient to produce a significant change in ratings over time; and (2) correlate the effects of instructor age, sex, tenure status, and rank, as well as knowledge of relative standing, on changes in student ratings over time. Data collected on a 13-item student evaluation of instruction form were analyzed for ten departments for Spring 1973, Fall 1973, and Fall 1975. Instructors in five departments were advised of their mean ratings for all of the sections they taught on each of the items on the rating scale and were informed of the mean ratings on each item for their respective departments. Instructors in the remaining five departments were given their own ratings and not the departmental means. Step-wise regression analyses were used to determine the relationships between the change in Spring 1973, Fall 1973, and Fall 1975 ratings and the five independent variables (sex, age, rank, tenure, and knowledge of relative standing). Findings indicate that none of the independent variables significantly accounted for variance in ratings after one semester or after the two-year period. (JP)

Descriptors—Age, Black Students, Community Colleges, *Demography, Family Characteristics, Family Income, Females, Language Dominance, Males, Parent Background, Puerto Ricans, *Student Characteristics, Student Educational Objectives, Student Employment, Tables (Data), Two Year Colleges, *Two Year College Students, Veterans, White Students

On a series of tables, data profile the affective and demographic characteristics of 1,500 regularly matriculated students who entered Bronx Community College (BCC) in Fall 1979. The data, collected on a specially prepared Freshman Information Form, indicate the level of satisfaction with the college curriculum, the primary language spoken at home, student educational objectives, the types of households students live in, the number of people living in students' households, household income, highest educational level attained by parents, the need for counseling services, marital status, and residency. Each of these areas is analyzed in terms of students' sex, ethnicity, veteran status, and employment status. Selected findings include the following: (1) 60% of the entering students were females; (2) 48% of the students were Hispanic and 40% were Black; (3) the median age of the students was 20 years; (4) 50% of the entering males were veterans; (5) 33% of the students spoke English as a second language; (6) 45% came from households with an annual income of less than \$5,000; (7) only 22% of the students expected to earn nothing higher than an associate degree; and (8) financial aid and career planning were the two most cited areas of counseling need. Included in the report is a discussion of the representativeness of the respondent sample. (JP)

Attrition and Student Progress at Bronx Community College for Entering Classes: Fall 1972 to Fall 1976 (Progress to Fall 1978).

Bronx Community Coll., N.Y.

Report No.—BCC-2-79

Pub Date—May 79

Note—134p.

Pub Type—Reports - Research (143) — Numerical/Quantitative Data (110)

EDRS Price - MF01/PC06 Plus Postage.

Descriptors—*Academic Achievement, *Academic Persistence, College Transfer Students, Community Colleges, Dropouts, *Enrollment Trends, Grades (Scholastic), *Graduation, Longitudinal Studies, Majors (Students), *Student Attrition, Two Year Colleges, *Two Year College Students

Data tables summarize the semester-by-semester persistence of each class of regularly matriculated students entering Bronx Community College (BCC) between Fall 1972 and Fall 1976 in terms of graduation and retention rates. For each entering class, the tables provide progress analyses up to Fall 1978 by curriculum group and high school grade average. Grade distributions at the end of Fall 1978 are also examined. Selected findings show a declining retention rate in the third and fourth semesters, indicating that approximately 66% of all entering students drop out, transfer, or temporarily discontinue enrollment by the beginning of the fifth semester after initial enrollment. Only business administration and nursing programs showed above average retention rates, while engineering technology showed a lower than average rate. Other findings indicate that, after the sixth semester, graduation rates stabilize for all programs at approximately 5% to 6% per semester. Students with high school averages of 75% or above were twice as likely to graduate by the end of 12 semesters as students with averages below 70%. The proportions of passing grades earned at BCC varied from program to program, ranging from 43% in mathematics and 46% in business to 81% in psychology and 86% in education. The report includes a discussion of study highlights and limitations. (JP)

*Eagle, Norman***The Academic and Remedial Placement Profile of Students Entering B.C.C. in September 1980, by Curriculum Group.**

Bronx Community Coll., N.Y.

Report No.—BCC-1-80

Pub Date—Oct 80

Note—30p.

Pub Type—Reports - Research (143) — Numerical/Quantitative Data (110)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Academic Achievement, Academic Standards, *Community Colleges, Enrollment Trends, Grade Point Average, Open Enrollment, Remedial Mathematics, *Remedial Programs, Remedial Reading, *Student Placement, Two Year Colleges, *Two Year College Students

The class entering Bronx Community College in September 1980 is described in this report in terms of high school averages (general, English, and mathematics); placement into remedial or pre-college level English, reading, and mathematics courses; and subsequent enrollment in these courses. The data, compared on a series of tables with findings from similar studies conducted annually since 1972, indicate that while 62% of the entering students were placed in remedial English or reading courses, 70% of the students actually enrolled in the courses. Conversely, while 71% of the students were placed in remedial mathematics courses, only 55% of the students actually enrolled in the classes. Of the 1,283 known high school averages, 31% fell below .70 and 14% fell below .65. Since the discontinuation of open admissions policies and the implementation of progress standards in 1976-77, the proportion of severely underprepared students (those with a high school average below .70) declined significantly in English and general academic achievement, but not in the areas of mathematics and foreign languages. The number of students taking college-level courses, rather than required remedial courses, increased steadily from 1977 to 1980. Each of the data tables contained in the study report provide a breakdown by 14 curricular areas. (JP)

While rapid shifts in the composition of student populations and increased governmental demands for accountability have underscored the importance of institutional research (IR) in community college management, most administrative literature still conceptualizes IR as a cybernetic, neutral, data collection function initiated in response to the decision-making process. Yet if IR professionals are to contribute effectively to the college, they should be free to suggest the administrative implications of research data and to participate in the policy-making process. While the IR office should leave policy implementation to others in order to avoid conflict of interest with its function as a policy evaluator, the office should be placed in the administration under the president's office and charged with initiating research and evaluation activities, planning institutional mission and goals development, and conducting cost-benefit and market analyses. IR practitioners should be trained in educational research techniques and they must be able to work closely with other members of the administration, serve as a linkage between the college and external information sources, and cooperate with the business office in establishing performance criteria for goal-related budgeting. Only through this active role will IR offices prove their cost effectiveness and their value to the institution. (JP)

Descriptors—Advisory Committees, Courses, *Educational Demand, *Labor Education, *Needs Assessment, Nonschool Educational Programs, Postsecondary Education, Questionnaires, Surveys, Technical Institutes, Two Year Colleges, *Unions, Universities

A survey of the leaders of the 124 union locals in southeastern Wisconsin was conducted by Gateway Technical Institute and the University of Wisconsin, Parksides, to identify the need for a structured, associate degree program in Labor Studies. The survey instrument solicited information on membership size, the practice of hiring an educational director, the types of educational programs that union members participate in, the willingness of local officials to serve on an advisory committee for the Labor Studies program, and the level of interest in such a program and in 17 Labor Studies topics. Major findings, based on a 50% response rate, indicate that while most locals, regardless of size, hire educational directors, membership participation in educational programs is more pronounced in larger unions. The School of Workers program was the most popular educational activity, followed by international and national education programs, and college courses. Only 14 of the respondents indicated that a member of their local would not serve on a college advisory committee, and 39 indicated that the Labor Studies program would be beneficial to the community. The educational topic generating the highest interest was leadership skills, followed by labor law, interpretation of labor agreements, administration, and collective bargaining. (Data tables and the questionnaire are provided.) (JP)

Descriptors—*Career Choice, Community Colleges, Females, *Food Service Occupations, Males, *Managerial Occupations, Questionnaires, School Surveys, *Student Attitudes, Two Year Colleges, *Two Year College Students, *Vocational Interests

Identifiers—*Hospitality Occupations

As part of a study sponsored by the National Food Brokers Association, a survey of Johnson County Community College (JCCC) students was conducted to determine their perceptions of hospitality management and the factors that might deter them from choosing careers in that field. The survey instrument, distributed in the college commons by members of JCCC's hospitality management program, asked students to rate the desirability of 31 management occupations in terms of working conditions, hours, pay, and interest level. The list included 14 hospitality occupations and 17 other management positions requiring two years of college or less. Additional questions focused on students' characteristics and experiences in the food service industry and asked which criteria were important in choosing a career. Selected findings, based on 139 completed questionnaires, indicated that 22% of the respondents were currently working in the food service industry, and that 56% of the women and 74% of the men had worked in this area at one time. Most respondents described their experiences negatively, and only 25% said they would consider a career in food service. Similarly, the students rated hospitality jobs relatively low, with the exception of "glamour" jobs, such as resort or country club management. Pay and interest were considered the most important factors in career selection. (JP)

Assessment of the Communications I Career Decision Making Course.

Johnson County Community Coll., Overland Park, Kans.

Pub Date—Jun 80

Note—50p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Career Exploration, Community Colleges, *Course Evaluation, *Outcomes of Education, Pilot Projects, *Self Evaluation (Individuals), Two Year Colleges, Two Year College Students, Values, Vocational Maturity, Withdrawal (Education), *Writing (Composition)

In order to provide entry-level students with an opportunity to explore career interests while receiving college credit, Johnson County Community College implemented a pilot course in Fall 1979 incorporating an emphasis on career decision-making in an English composition course. The course, which had an enrollment of 49 students in two sections, was subjected to a three-part evaluation involving: (1) student self-assessments conducted at the beginning and end of the course to determine life values, goals, motivations for working, and reasons for attending college; (2) student evaluations of the course itself; and (3) a comparison of the withdrawal rates of students in the special sections with the withdrawal rates of students in composition courses without the decision-making component. Findings of the self-assessment indicate that after taking the course, students were more specific about their career goals and were more aware of values and events affecting career decisions, personal skills that could be used in an occupation, and sources of career information. While the vast majority of the students (95%) gave the course an overall rating of 5 out of a possible 7, the attrition rate for the combined sections was comparable to that of the college as a whole. The study report examines findings for each of the two sections. (JP)

Descriptors—*College Curriculum, *College Faculty, Curriculum Research, Educational Media, *Humanities, Intellectual Disciplines, Liberal Arts, Mathematics, National Surveys, *Sciences, Social Sciences, Teacher Attitudes, Teacher Characteristics, *Teaching Methods, *Two Year Colleges

Based on research conducted by the Center for the Study of Community Colleges between 1975 and 1980, this monograph presents 11 articles on the role of humanities and sciences at two-year colleges. In the first three articles, Miriam Beckwith compares data on humanities faculty in Washington State with nationwide information; Joseph Marks correlates institutional variables, such as enrollment and finance, with the humanities' deteriorating position at two-year colleges; and William Clark compares the degree attainment and teaching experience of literature instructors with other humanities instructors. The next three articles deal with science instruction. Curtis Cox compares general education natural science courses with courses designed for science majors. Darrell Clowes examines the two-year college science curriculum, its functions, and the courses designed to serve these functions. Thomas Doe discusses the instructional materials and practices used in mathematics courses. The final articles deal with liberal arts in general: Veloris Hallberg compares instructor goals and student evaluations among disciplines; Yukie Tokuyama reviews the instructional practices of humanities and social science faculty; Rose-Lise Obetz examines the use of instructional media in liberal arts; Kenneth Green focuses on faculty hold-

ing doctoral degrees; and Callie Bowles examines instructional differences in the sciences and humanities. (JP)

Descriptors—Day Care, Discovery Learning, *Educational Games, Guidelines, *Learning Readiness, *Mathematics Curriculum, *Mathematics Instruction, Preschool Education, *Young Children

Identifiers—Cuisenaire Rods

These three colloquium papers focus on math readiness and the young child, the use of games in teaching basic math skills, and the teaching of math concepts through informal day care activities. The first paper discusses notions about math readiness. It points out that mental age has little to do with readiness to learn basic concept skills and that it is now widely accepted that infants as young as 6 to 8 months of age recognize and operate on basic math principles. Educators in the Froebel tradition recognized this fact and incorporated two of Froebel's basic tenets as the foundation of discovery learning activities. These tenets state that: (1) young children learn best through play, where motivation is high and curiosity prevails, and (2) young children need a predominance of first-hand experiences with concrete, three dimensional materials which allow them to explore, experiment and transform materials. The second paper gives guidelines for the selection and use of games involving basic math skills for young children, and explains procedures of adding, subtracting, multiplying and dividing with Cuisenaire rods. The third paper describes the background, classroom structure, and classroom activities of the Hilltop Child Development Center at the University of Kansas. Math concepts introduced to various age groups at the center are also discussed. (Author/SS)

Descriptors—*Adolescent Development, *Adolescents, *Family Problems, *Family Relationship, *Middle Aged Adults, *Psychological Patterns

Identifiers—Life Cycles

Changes in family relations that result from concurrent life-cycle changes of middle-aged parents and their adolescent offspring are discussed in this pamphlet. A perspective on the young adolescent's family is offered that conceptualizes the family as both systemic and developmental. Key changes in adolescence and mid-life are outlined and these are discussed in terms of disequilibria that may occur if the family system fails to alter in line with these changes. Problems occur in this period of disequilibrium if a family is unable or reluctant to modify patterns of interaction. For example, some parents insist on adhering to the child-rearing practices that served them well when their children were younger. Problems may also occur if a family becomes trapped in a phase of disequilibrium and is unable to move on. A short bibliographic essay on other writings on adolescence and mid-life is included in the pamphlet. (Author/SS)

Descriptors—*Agency Role, Delinquency, *National Programs, *Social Services, Social Workers, Vocational Adjustment, Youth, *Youth Agencies, *Youth Employment, *Youth Problems, Youth Programs

The present definition of social services for young people should be extended beyond the provision of counseling and therapy to include the provision of help for those who do not have psychological problems. For example, the role of probation officers should include helping probationers find a job and keep it, return to school, or obtain other needed services. It is a fact, however, that the dominant form of social services to youth is counseling. Such an emphasis seems misplaced when the single greatest need of millions of young people is in the area of employment. In this respect, the work experiences created for teenagers should be evaluated to see if they provide worthwhile experiences and the educational needs of these young people should be reviewed with renewed care. Many youth will need job readiness preparation in addition to skills and extensive support services while on a job, whether the job is subsidized or not. Additional problems demanding discussion are the role of social services in relation to the schools; the system of income maintenance and welfare assistance; juvenile justice policy; services to troubled youth at the community level; and federal foster care policy. Descriptors—*Adolescents, *Community Characteristics, Community Resources, Improvement, *Leisure Time, *Recreation, *Social Behavior

In this paper the physical characteristics of community sites that are common gathering places for adolescents are described and recommendations are given for improving their use. It is suggested that there are some common factors in the society and in the organization of many towns and cities in the United States that contribute to the appearance of a nationwide pattern in young people's choices and uses of public spaces in their leisure time. This pattern of choices includes places such as the street corner and corner store, the shopping center and shopping mall, the school yard and playgrounds, the libraries, museums and galleries, the streets and plazas, parks, old city streets and neighborhoods, new housing developments, automobiles and parking lots, and private places or public places out of public view. Comments on the advantages and disadvantages of each of these settings for the social use of teenagers are presented. (Author/SS)

Identifiers—Medical Play

Medical play can be used as a tool to aid children in coping with stress related to hospitalization, surgery, medical care, and illness. Providing children with adequate guidance and appropriate supplies necessary for medical play, prepares children for medical experiences by enabling them to express their thoughts and feelings. Before attempting to involve a child in medical play the clinician must develop a sensitive, trusting relationship with the

child and be aware of the child's individual needs, previous medical experiences, developmental stage, and treatment regime. When planning to use medical play to achieve a desired goal the clinician should choose the miniature hospital furniture, dolls, puppets, and medical supplies that can best facilitate the child's play. Once a child's medical experiences have been adequately worked through, the child will enjoy playing out other life experiences and will learn to adapt to the surrounding adult world. (Author/MP)

Identifiers—New York

This third annual report of The Temporary State Commission on Child Welfare deals with the origin, development and rationale of the provisions of the Child Welfare Reform Act of 1979 (chapters 610 and 611). The Child Welfare Reform Act addresses itself primarily to three discrete program areas which operationally are intended to alter radically the substance and direction of child welfare policies and administration in New York State. The three areas referred to above include the following: a series of fiscal incentives designed to encourage the provision of preventive and adoption services; a series of fiscal disincentives and accountability measures designed to discourage the failure to provide necessary preventive, adoption and foster care services; and a variety of requirements intended to ensure that the provisions of the Act are implemented in an appropriate way. In addition, the report deals with the Commission's current investigations in the fields of child abuse and alcoholism and also with the activities of the Subcommittee on Juvenile Justice. The text of the Act and other related legislation are provided in the appendix. (Author/MP)

Descriptors—Change, Emotional Experience, *Family Relationship, *Human Relations, Interpersonal Relationship, Interviews, *Parents, *Peer Relationship, Questionnaires, *Social Environment, *Social Influences, Stress Variables

Identifiers—*Social Networks

This exploratory study investigates social support systems available to and utilized by new parents and indicates those aspects of the systems that are most helpful to them. Forty intact couples whose first child was between the ages of 3 and 7 months constituted the final sample of this study. The mean age of mothers and fathers was 30.70 and 33.21, respectively. Data collection involved a personal interview with the mother and questionnaires for both parents. Interviews were focused on five relationships in the mothers' lives: those with old friends, other new mothers, her own parents, her husband's parents and her husband. Questionnaires provided demographic, social system and support functions data, as well as information on the degree of satisfaction with and change desired in social networks. Additional questions provided information concerning positive affect, anxiety, depression, somatic complaints, and feelings of inadequacy. In all but one case, preliminary results indicated that new parent's lives are better (in terms of greater network satisfaction, higher levels of positive affect and less symptomatology, higher self-rated role performance, and satisfaction) when networks are larger, offer more sources of support, include more individuals in the relationship categories and, for mothers, when their network change scores are positive. Descriptors—Administrator Role, *Child Development Centers, *Early Childhood Education, *Educational Administration, *Program Development, *Program Evaluation, School Administration

Business management theory and principles as applied to the administration of early childhood programs are presented in this workbook. Following a brief survey of the historical background of early childhood education and current early childhood programs, information and guidance to help plan, operate, and evaluate program facilities are provided. The duties of the program director are outlined and discussed in terms of the following: (1) the planning of the early childhood center (setting goals and standards, planning the learning environment, instituting and maintaining governing and operating policies, and formulating criteria for staff selection); (2) the operating of the center (including the budget and first aid systems, food service, public relations and leadership, and selecting and working with staff and families); and (3) the evaluating of the center. Suggestions for further reading are provided for each topic. (Author/SS)

Descriptors—*Costs, *Day Care, Family Characteristics, Family Financial Resources, *Family Income, Family Structure, *Parents, School Location, *Selection, Socioeconomic Status, *Values

Selected findings and policy implications from a statistical study of the amount and type of day care used by a national sample of parents are presented in this paper. For the analysis of hours used, the sample consisted of families (n=2,149) reporting use of at least one hour of care per week for whom complete data sets were available. For analysis of main method chosen, the sample was restricted to families (n=737) with at least one child in the 2 to 6 year age range, whose main method of care was being used at least 10 hours per week. Using multiple regression and discriminant function as the principal statistical methods to examine the relationship between use of day care and family characteristics, the following results were obtained. (1) No relationship was found between the family's annual income and the amount of care used (the family's choice of main method of care was found to be more related to values than to economics). (2) In choosing among types of home care, parents placed more emphasis on who provides the care than on the location of the home care. (3) In terms of the relationship between household structure and use of child care, there was no direct relationship between being married and amount of care used. (4) Age of the family's youngest child was related to hours of care used only when employment status was taken into account. (5) Cost of care was found to be highly related to both amount and type of care chosen. It was concluded that child care is an important service in the supporting of family functioning and that parent decision making on the amount and type of care used is a complex matter, subject to a range of household and individual characteristics. Descriptors—*Age Differences, *Children, *Community Characteristics, Community Involvement, *Community Responsibility, *Concept Formation, *Neighborhoods, Social Development

Three dimensions of the relationship between children and their communities that have been identified are (1) children's sense of community as it develops from infancy through middle childhood, (2) characteristics of a competent community, and (3) the interaction between children's developmental growth and community resources. Children's sense of community changes as children increase their mobility, their independence and take on responsibility. Their understanding broadens to include a sense of boundaries, distance, and location, as well as spatial relationships of resources and organizations, demographic characteristics and group identity. Competent communities are characterized as those that accurately identify the needs of their citizenry and recognize the importance of the experience of mastery and effectiveness for their citizens. Competent communities can be identified by their efforts in three areas: health and safety, responsiveness, and the enhancement of human potential. Involvement in and use of the environment depends on one's conceptualization of self within the context of the community. The more one understands one's own talents, aspirations, and motives, the more one seeks resources in the community to enhance or complement those elements of personality. In the adult stage of generativity, ideas about one's own needs and goals converge with one's understanding of the social community and interact to guide actions taken on behalf of future generations. Identifiers—*Home Schools

Homes should be our nation's primary education delivery system, but Americans are surrendering family education rights to vested interests and the state. Why? Social pressure, educational myths about children's achievement and sociability, and state laws that take authority over children away from parents but leave them accountable for their children's behavior are three reasons why. American parents believe the institutionalization of their children is right because that is what almost everybody is doing. There is no doubt that the academic achievement and sociability of children declines when they leave home to attend school. Somehow parents have been led to believe that teaching ability comes only with a teaching certificate. As a consequence parents have developed an overwhelming inferiority complex as teachers, when in fact even an ordinary home is a better educational nest than the best institution. Although across America, parents in several states are being charged with criminal neglect when they attempt to educate their children at home, perhaps a quarter to half a million American children are now being educated in home schools and the number is increasing rapidly. By way of conclusion, this discussion provides seven reasons for the growth in home schools and offers fifteen recommendations for effective home school programs. (Author/RH)

This monograph describes a year-long, retraining program for East Cleveland kindergarten teachers that was based on teacher involvement in group discussions and curriculum improvement activities. The program was developed in order to provide, with no additional funds, an education to inner-city children that compared favorably with the education received by suburban children. Theories and studies relevant to early childhood learning are reviewed in Chapter One in order to emphasize the importance of early educational intervention in children's formative years. Background information, and demographic and school achievement data that represent East Cleveland as a typical urban school system are provided in Chapter Two. Chapter Three describes how teacher retraining was accomplished through group discussions and curriculum design activities. Positive outcomes of the group discussions for teaching practice, such as improved self-esteem among teachers, are indicated. Chapter Four reports project evaluation efforts and data. Among the results it was revealed that the number of students who failed to achieve the minimum level for school readiness was greatly reduced and the performance levels of the inner-city, predominately black children substantially increased. In conclusion, Chapter Five briefly places the program in the broader perspective of educational problems that remain unsolved and emphasizes the potential of teachers for improving student outcomes. Descriptors—Adult Learning, Field Instruction, *Group Activities, *Group Dynamics, *Learning Activities, Trainers, *Training Methods

This resource manual provides learning activities for trainers who are trying to help others work effectively with adult learners. The activities emphasize mutual learning rather than teaching. These activities are grouped under five major categories: Becoming a Learning Group, Discovering Needs, Choosing and Using Methods and Materials, Evaluating Impact and Results, and Planning and Field-Testing Participatory Learning Activities. These activities can be used to explore participants' expectations, to increase cooperation and trust, to help the participants define needs and needs assessment, to encourage adults to take an active part in their own learning by adapting techniques and materials to their own purposes, to assess learning activities in terms of how well they fulfill learners' objectives, and to plan practice sessions to give feedback to trainees. The activities have all been used in field situations by World Education trainers or consultants. At the beginning of each exercise the particular occasion and the reason for use of the specific activity are described. (Author/SS)

Descriptors—Affective Objectives, Check Lists, Classification, *Educational Assessment, *Evaluation Criteria, *Interpersonal Competence, *Social Behavior, Social Development, Student Evaluation, Young Children
Identifiers—Project Head Start

This document presents the results of observations, interviews, and a review of the literature on assessment of children's social behavior. Categories of types of social behavior which can be observed easily and which seem to hold importance for most child care staff were selected. These categories are conversation, acquisition, social information, monitoring the environment, participation in activities, imitation of others, creative behaviors, expression of feelings, behaviors expressing self-concept, behaviors indicating security, changes in the child's own norm of social behavior, the teacher's feeling of how the child responds to him or her, peer teaching behaviors, ability to change the rules of a group, and adaptive behaviors. It is stressed that observations and assessments should be theory-guided. It is assumed that behavioral and pedagogical theory is always operative in selecting assessment categories, and that this theory must be made as explicit as possible. Implications of these observations and categories for the assessment of social competence, aspects of the evaluation process, and principles for implementing evaluation design are also discussed. Descriptors—*Early Childhood Education, Educational Principles, Educational Theories, *Emotional Experience, *Learning Experience, *Models, *Socialization, Teacher Role, *Young Children

Identifiers—*Consciousness

This discussion focuses on several principles and models of early childhood education which have been used to improve children's ability to live and work with others. Modern problems of socialization in early childhood are discussed in terms of the generation gap in industrial societies, the development of the "private" family with minimal neighborhood contacts, children's learning modalities, situational determinants of learning as well as the limitations of stimulus response and modeling theories of behavior and development. Human consciousness is discussed in terms of intentionality, self-awareness and motive-based developmental phases that begin with children's self-centered gratification of needs and progress to their awareness of problems. These discussions are linked by an emphasis on the importance of children's emotional experience for their social development. A match between the child's ability and need to love and a lovable outside world of experience is what is wanted but which, in educational practice, is frequently found wanting. The teacher's basic task is to provide the space, time, materials, and the careful, loving presence that lend themselves to positive encounters. The fact that, across history, some educators have been aware of these needs of children is seen in the works of Plato, Pestalozzi, Steiner, Montessori and Gmeiner, whose educational ideas and programs are discussed in this paper as successful models of early childhood education. Identifiers—*Scotland

The aim of this booklet is to stimulate informed discussion about the development of open-plan primary schools in Scotland. Background information is provided that focuses on the development of the design and construction of an early (1969) open-plan facility — the Kirkhill Primary School in Broxburn. How education authorities learned from their implementation of open-plan designs is indicated in discussions of Milltimber School in Aberdeenshire and other open-plan schools. Descriptions of three primary schools that vary in their design and internal organization (the Dean Park School in Balerno, Milltimber in Aberdeenshire, and Trinity in Hawick) are provided. Milltimber and Dean Park are both modern open-plan primary schools that were built to purpose. Trinity School, built in 1934, is a structure that now has a redesigned and radically altered interior. Teachers' accounts of their experiences in the buildings are included in the discussion. The author emphasizes that the booklet is not intended to be a formal research report. (Author/RH)

Descriptors—*Ability Grouping, *Admission Criteria, Age Groups, *Day Care, Disabilities, Grouping (Instructional Purposes), *Heterogeneous Grouping, *Homogeneous Grouping, Preschool Education, *Selective Admission

Factors used in selecting children for admission to preschool programs and factors that determine the way children are grouped within preschool programs are discussed. Factors that affect the composition and number of children admitted to a program are said to include funds, number of staff available, size of facility, current legislation and regulations about facilities, characteristics of children (such as age, handicaps, or success in toilet training), characteristics of parents (such as economic status or willingness to participate in the preschool program), priorities given to siblings, race, language, abilities and/or limitations of the staff or facilities. It is suggested that once children are admitted, considerations for grouping should depend on how to make best use of staff in meeting the individual needs of children in their growth and development. The two most familiar grouping patterns, mixed-age and same-age groupings, are described. Three advantages of the mixed-age pattern ("family grouping") are cited: (1) younger children show greater progress than in same-age groupings, (2) children can follow their own interests, and (3) teaching is continuous from year to year because the population tends to remain constant. Disadvantages of same-age grouping are noted. Other grouping patterns include developmental grouping based on ability level, grouping based on sex, grouping based on self-selection of the child, and grouping based on socioeconomic differences or disabilities. This description of the Erie Basic Educational Skills (BES) Program provides examples of the achievements made by the Erie Public Schools and Head Start toward BES and Responsive Educational Program goals. Staff positions, staff responsibilities, the curriculum, and programs initiated and carried out in the Erie Public Schools are described. The following programs have been initiated: (1) publication of a Basic Skills Curriculum Guide (BSCG) for use by teachers of reading, English, and mathematics; (2) participation of school teachers in a project designed to identify and incorporate into the curriculum basic life skills that today's students would need to live successfully in tomorrow's world; (3) provision of a workshop for teachers at feeder elementary schools focusing on how teachers could help students develop positive learning attitudes outlined in the BES guidelines; (4) development by teachers and principals of a "School Action Plan" intended to encourage school staff to identify areas of focus or emphasis for school activities; and (5) involvement of parents and community leaders in drafting recommendations for development of the BSCG. Additional topics covered in the program description include textbooks, organization and behavior regarding use of the BSCG, and needs assessment of parent involvement and teacher training. Pub Date—Aug 80

Note—23p.

Pub Type—Opinion Papers (120) — Information Analyses (070)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Behavior Standards, *Classroom Techniques, Cooperation, Discipline, Early Childhood Education, Group Activities, *Modeling (Psychology), *Peer Teaching, *Positive Reinforcement, *Prosocial Behavior, Research, *Role Playing, Young Children

This paper reviews research findings that are related to fostering prosocial behavior in the early childhood and elementary classroom. A collection of "experimental best bets" for increasing prosocial behavior in young children is outlined. This collection covers the role of reinforcement and modeling or imitation, the importance of group norms, use of role playing experiences, peer teaching, cooperative group activities, and the influence of child-rearing and discipline techniques. In addition, a short review of the history of research on prosocial behavior is given. Research has demonstrated that the frequency of prosocial behavior is situationally determined and is not a consistent trait of individuals. Also, prosocial behavior is only moderately related to moral behavior, empathy and cooperation. However, the child who is frequently prosocial is seldom likely to be aggressive. The relations between prosocial behavior and sex differences, age differences, birth order and family size are also mentioned. Factors which have been found to increase the incidence of prosocial behavior in children are positive reinforcement, nurturant models, moralizing or preaching by powerful figures, role-playing experience, assignment of responsibility for the welfare of others, cooperative group activities, and use of induction disciplinary techniques. This final report of the Family and Community Studies Project (part of the Southwest Educational Development Laboratory) presents an investigation of the impact of three types of parent education programs on the participant families. The study examines the underlying change philosophy of each program and the changes that families participating in the programs are undergoing. Three processes of change were proposed as a focus of study: cultural elaboration, cultural reorientation, and cultural reinforcement. Case studies were done of actual programs that exemplified these three processes. Researchers obtained data through participant-observation and interviewing methods. Conclusions about impact were based on self-reported statements by participants concerning changes in their ideas or behaviors, and on analyses conducted by researchers concerning the match and mismatch between changes intended by programs and changes that parents reported. Each case study discusses: (1) the history, community context, setting, goals, organization, recruitment procedures, and curriculum of each program; (2) the lives of the parents who participate in the program; (3) a summary of the participants' evaluations and conclusions about the impact of the program; and (4) generalizations about the program and its participants as instances of the models of cultural change proposed. In addition, field work at a school-community liaison program is described in the Appendices. (Author/SS)

Descriptors—*Childrens Games, Consumer Protection, *Educational Games, Evaluation Criteria, *Legislation, Libraries, *Research, *Safety, *Toys

Identifiers—Toy Industry, Toy Lending Libraries

This document reviews literature that is relevant to the evaluation and selection of educational toys. Information is summarized under the following topics: (1) the value of toys and manufacturers' claims; (2) basics of the toy industry; (3) toy hazards and accidents; (4) guidelines for toy selection; (5) toy safety legislation and protection; and (6) toy libraries. Information from the areas of education and psychology, business and marketing, consumer protection agencies and toy safety indicate that the toy industry has done little to develop methods for testing the educational value and safety of toys, but has relied instead on the opinions of professionals. A basic condition of the toy industry is extreme competitiveness. Consumer criticism is strong and has spurred the growth of toys marketed as safe and educational. Toy endorsements and labels which say "tested by research" are often misleading standards of toy safety. Statistics show that child injuries from toys are related to features such as the actions of the toys, damaged toys, and packaging. Toys which are inappropriate to the age and abilities of the child are also a major cause of injuries to young children. This factor should be taken into consideration in toy selection. Other criteria of toy safety and precautions are summarized and insights are offered about toy safety through analysis of toy safety legislation. Guidance in toy selection is also available through toy libraries. The operation, aims, resources, and potential uses of these are described. (Author/SS)

In 11 brief sections this document overviews provisions for preschool education in the Federal Republic of Germany. Topics discussed include the needs of young children; education from birth to 3 years and from 3 to 6 years of age; and the history of kindergartens. Problems of child-rearing and programs for parent education, as well as creches, child care services, foster families, kindergartens, mainstreamed kindergartens, costs to parents, and educational movements are discussed. Several models for early education thought to be worthy of consideration and emulation are described to illustrate efforts made by educators and politicians in Germany to improve preschool education and child-rearing practices. Kinderhauses and kindergarten programs designed to equip children to act independently in normal everyday situations and to think competently are among the models described. (Author/RH)

Descriptors—*Educational Environment, *Educational Equipment, *Educational Facilities Design, *Educational Facilities Planning, Guidelines, Preschool Education, *Site Selection, *Specifications

Securing the right environment for a preschool program requires planning and research. Administrators or searching parties are advised to study zoning codes to become acquainted with state sanitation and safety regulations and laws, to involve teachers in cooperative planning, to design facilities which discourage vandalism, facilitate mainstreaming, and promote sanitation, learning

and enjoyment, and to understand the extent of the operator's legal responsibilities. Planners must also consider the outside play area. Adequate play space, safe driveways and parking spaces, additional space for expansion of services, outdoor storage areas, fencing, and windside protection should be taken into account. Buildings should be evaluated in terms of areas available for wet and dry areas, adequate heat and lighting, permanent and moveable stations, and space for quiet and noisy activities. Additionally, characteristics and needs of children, the limits that the building places on children's behavior, and the relationship of activities to the building as a whole must be considered. While the building should be energy-efficient, solar heating may not be cost-effective. Renovation of existing structures provides some advantages but demands a detailed preliminary inspection of building roof and frame, electrical wiring, plumbing, heating and cooling, as well as exterior covering and interior finishes. Appropriate equipment should be purchased for durability, versatility and overall attractiveness. (Author/RH)

Descriptors—*Developmental Disabilities, *Educational Assessment, *Measures (Individuals), *Mental Retardation, Testing, Test Interpretation, *Young Children

Identifiers—Piagetian Theory, *Uzgiris Hunt Ordinal Scales of Psychological Development

The performance of two developmentally delayed Down's Syndrome children on the Uzgiris-Hunt Scales (UHS) of psychological development is discussed in detail to illustrate the applicability of the scales to developmentally delayed children. This work was carried out at the Garden Park School for trainable and multiple-handicapped children in Phoenix, Arizona. The children at the school, ranging in chronological age from 2 to 5 years, are seen two mornings a week for two hours. The UHS is theoretically based on Jean Piaget's proposition that simple, easily observed behavioral interactions in the human infant and young child reveal development, consolidation, and elaboration of cognitive structures. The UHS consists of a specified number of tasks in each of six scales. Each scale reveals an invariant sequence of developmental attainments. Researchers have demonstrated a relationship between performance on the Scales and adaptive behavior in young, developmentally disabled children. Administration of the scales with developmentally delayed children is best aided by the use of videotape replay and is best conducted by a teacher familiar with the children. The performance of the two Down's Syndrome children, recommendations for classroom follow-up of these children, and interpretations of Scales I, II, and III are discussed. (Author/SS)

Descriptors—*Age Differences, Cognitive Development, *Moral Development, *Preschool Children

Identifiers—*Intention, *Moral Judgment Task (Piaget)

The developmental sequence of preschool children's moral judgments, and their emphasis on intentions versus property damage was investigated. Eight moral judgment stories with drawings were read to twelve 3 1/2- and twelve 4 1/2-year-old children (mean ages = 46.6 and 54.0 months, respectively). The stories included either positive or negative consequences for damage directed against either a person or property. In the positive Intention/negative consequence stories, age groups

predominantly judged on the basis of consequence in all contexts. In the negative intention/positive consequence stories, however, 4 1/2-year-olds made consequence-based judgments only in stories of property damage [$p=.1T.01$], whereas 3 1/2-year-olds did not make consequence-based judgments in either context. The findings suggest that 3 1/2-year-olds respond to any negative event [either intention or consequence] in the story and that 4 1/2-year-olds conform to traditional Piagetian theory only when property damage is involved (Author/SS)

Descriptors—*Cognitive Development, *Infants, *Motor Development, *Predictive Measurement, *Premature Infants

Identifiers—*Bayley Scales of Infant Development, *Neonatal Behavioral Assessment Scale

This study investigated the ability of the Neonatal Behavioral Assessment Scale (NBAS), in combination with neonatal histories and developmental assessments, to predict mental and motor performance of 9-month-old infants on the Bayley Scales of Infant Development (BSID). Fourteen normal, full-term infants and 10 average-for-gestational-age, pre-term infants were studied. In all cases the NBAS assessments were completed when the infants were 40, 42, and 44 weeks gestational age. The BSID assessments were completed at 2, 4, 6, and 9 months gestational and chronological age for all infants. Also recorded at birth for all infants were Apgar scores, height and head circumference. Size and social-economic status of the family and birth order of the child were obtained via standard hospital procedures. Discriminate analysis yielded 100% of 9 month performance and pre-term or full-term group membership. NBAS subscales and neonatal histories provided three of four predictors of normal function and 11 of 11 predictors of abnormal function. (Author/SS)

Descriptors—*After School Day Care, *Childhood Needs, *Day Care, Elementary Education, *Elementary School Students

This brief paper discusses needs of school-age children and factors to consider in providing school-age child care. These needs and factors are explored in a discussion of five myths about school-age day care. The myths are as follows: (1) school-age children are old enough to fend for themselves, assume responsibility for their own welfare and arrange their own leisure time activities; (2) almost anyone, if friendly, can develop and carry out a good child care program for school-age children; (3) most communities have accepted the responsibility for planning, organizing, coordinating and implementing school-age child care services; (4) there is not enough money to support high quality school-age care; and (5) parents who need day care programs are not concerned about or interested in the quality of care their children receive. Anecdotal examples of children's comments are used to illustrate the need for child care providers to respect children as persons in their own right, to realize that no two children are alike, and to keep a sense of humor. Descriptors—*After School Day Care, *Day Care, Elementary Education, *Elementary School Students, *Policy

This paper briefly discusses several factors in providing high quality day care for school-age children. It is argued that parents have the power to influence public policy regarding provision of school-age day care services through voting, and that there is much more community support of day care when it is perceived as a program to serve all families, not just the traditional low income families. Further, public support for housing day care programs in existing school buildings is high because it provides a good reason for not closing down neighborhood schools that have declining enrollments. It is important that day care be structured as a child development program and not as a custodial service. (Author/SS)

Identifiers—*Massachusetts (Brookline)

Parent-run, day care programs existing in public elementary schools in Brookline, Massachusetts are described in this paper. This program model is put forward as an example of a successful negotiating process between parents and school officials that is an alternative to public school prime sponsorship of day care. Three critical elements as steps that must be taken in order to start day care programs in community facilities which may not be predisposed to house such services are discussed. These elements are documentation, persuasion, and collaboration. (Author/SS)

Descriptors—*After School Day Care, *Communication (Thought Transfer), *Community Organizations, *Consultants, Inservice Education, *Staff Development

This brief paper indicates three strategies that can be used by child care program directors to promote staff development. The first strategy involves the organization of community school-age child care programs into associations and support groups. The second strategy emphasizes the direct, frank and honest discussion of issues between the director and the center staff. The third strategy is to hire an outside consultant or mediator to reduce staff dependence on the program director. The importance of formally recorded progress reports, work evaluations, standards, job descriptions, and policy statements which are clear and explicit is indicated. Inservice education is seen as the most viable and flexible opportunity for staff training. The ability to mold a staff development program to the characteristics of a child-care program is also seen as an important key to successful staff development. (Author/RH)

Descriptors—*After School Day Care, Attitudes, Communication (Thought Transfer), *Communication Problems, Communication Skills, *Decision Making, *Improvement, Methods, *Parent Participation, Parent School Relationship, *Parent Teacher Cooperation

This paper discusses assumptions, purposes, obstacles and techniques of parent/staff interaction in a day care setting. Regular, goal-directed communication between parents and teachers can reduce the complexity of the environment children experience and facilitate their socialization. Why, then, do parents and teachers rarely communicate? Some barriers to effective communication are racial and class differences, staff attitudes about parents who choose day care, and attitudes about the roles of parents and child care personnel. Other obstacles are lack of societal support for day care services, lack of time to make shared decisions, the tendency of staff to monopolize information needed to make decisions, and the youth and non-parent status of many child care teachers. Techniques for improving interaction between parents and teachers include a shared belief in broad-based participation in child care and education programs, articulation of guidelines that set out formal decision-making procedures, organization of decision-making structures that are appropriate to the program's size and its members' style, and providing access to the facts and knowledge needed to make sound decisions. Further, parents and staff should be trained in skills needed for decision-making, parents' skills and areas of interest should be identified to establish a basis for parent participation, and informal activities that help parents and staff interact should be provided. Descriptors—*After School Day Care, Budgeting, *Day Care, Early Childhood Education, *Educational Finance, *Financial Problems, Fund Raising, *Money Management

The five most common pitfalls of money management in child care programs are described along with proposed remedies. These pitfalls involve: (1) failure to account for shortfalls in income due to declining enrollments; (2) failure to put cost-cutting efforts into perspective and to choose the most feasible areas for cost savings; (3) failure to perform cash-benefit analyses of proposed fundraising projects; (4) failure to use other than checkbook balance money management methods for keeping tabs on the program's financial status; and (5) reliance on controls such as double signing of checks for financial security. Helpful resources to avoid money management pitfalls are cited and a Financial Management Assessment Guide is provided in the appendix. (Author/SS)

This paper provides a very brief overview of an after-school day care center in New York City which cares for a maximum of 65 immigrant children 6 through 12 years of age. The population served consists of families from Hong Kong, China, Latin America, India, Pakistan, Puerto Rico, Korea and Nigeria. As most families served know little English, multilingual staff members work closely with bilingual children. In addition to snacks and many activities, the center provides homework assistance during the school year through daily tutorial periods. The center also assists parents in their contacts with teachers and school bureaucracies. (Author/RH)

This paper describes a model of an after-school program for low-income suburban children of different ages (3-14 years). Housed in an industrial park, the program serves the children of both working and non-working parents and accepts into the program all children who apply for whom funding can be found. (This includes non-English speaking children and children with special needs.) The physical environment was planned, arranged, and often built by the children themselves, with expert assistance from adults. Three activities occur every day of the program: dramatic play, child-adult conversation (particularly about things that trouble the children), and inter-age group activities. Some problems associated with conducting such a program are discussed. (Author/MP)

This paper provides portions of a workshop discussion at the Wheelock Conference on School-Age Child Care concerning the role of family day care for school-age children. The workshop participants included family day care providers affiliated with the day care system in the Greater Boston area, administrators of a family day care system which also operates a school-age day care program, and others working in the child care field who were especially interested in day care for school-age children. Issues discussed were: how well suited is the family day care home for the school-age child's growing need for autonomy and mobility? How much freedom can providers afford to allow an older child if they have their hands full with caregiving for preschoolers or babies as well as managing a household? What are the legal implications for a provider who may not be available to supervise an older child who is hurt in a playground accident or in a street fight with older children? Can a family day care home provide "creative programming" to meet the developing interests and skills of the older child? Participants concurred on several issues. Topics agreed upon included the following: the potential for nurturance that exists in a family day care setting; the importance of knowing the limits of one's ability to deal with special needs children; and the significant difference that the family day care home can make in the lives of children who experience stressful times in their development. Descriptors—*After School Day Care, *Elementary School Students, *Family School Relationship, Financial Support, Policy, *Political Issues, Program Costs, *Program Development

This paper comments on program and policy issues concerning school-age day care. The issues discussed are as follows: (1) what kind of day care provision do school-age children prefer? (2) what constitutes a high quality day care program? and (3) how can parents, the general public, and politicians be persuaded to support and finance day care programs? It is emphasized that school-age day care is economically feasible and that it is pro-family in that it supports rather than substitutes for the family. Pleas for extensive research on school-age day care and for high quality and universally accessible day care provision are made. (Author/MP)

This Home Start followup study was designed to determine the long-term impact of Home Start on program participants in sixteen states within the USA. Home Start was a three-year demonstration program which provided Head Start-type comprehensive services to young children (3- to 5-year-olds) and their families in their homes. In Chapter 1 background information is provided about the follow-up study design, including a brief description of the original Home Start evaluation and its results. The next two chapters address two key implementation issues. Chapter 2 reports on the tracking of Home Start and Head Start families who participated in the original evaluation. Also included in this chapter are descriptive profiles of the Home Start followup study sample and a report on sample attrition effects. Chapter 3 describes how the comparison group for the followup study was selected and compares the Home Start and comparison groups on a number of child and family characteristics to determine group equivalency. Chapters 4 and 5 present the results of the followup study. Long-term program effects on parents are examined in Chapter 4, followed by presentation of child outcomes in Chapter 5. The concluding chapter of the report discusses implications of the Home Start followup study design. (Author/MP)

Identifiers—*Home Start Program, Project Head Start

This paper provides a summary of a Home Start Followup Study (HSFS) which was initiated in 1976. An attempt was made to examine the durability of gains made as the result of families' (parents and their 3- to 5-year-old children) participation in the program. In addition, the study was designed to determine whether program duration (one versus two years) had a lasting effect on parents and children as measured approximately two years after the conclusion of the Home Start demonstration. The HSFS's sample consisted of 199 Home Start, 46 Head Start, and 137 comparison group families (families who were eligible for but did not participate in the program). Three sets of comparisons were conducted: (1) Home Start families versus the comparison group families; (2) Home Start families versus Head Start families; and (3) Home Start families who had participated in the program for one year versus a group of Home Start families who participated in the program for two years. Five measures were used to determine the long-term impact of the program on participants. Four of the measures were standardized tests for children and one was a personal interview with parents. Results indicated that: (1) while math and reading performance of the Home Start first graders was lower than the national average, the Home Start second graders were comparable with respect to the national norm; (2) no significant differences were found on any of the children's outcome measures between the Home Start and the Head Start groups; (3) no differences were found between the one-year and two-year Home Start groups; and (4) most families were pleased that they had been involved in the program and indicated that the activities concerning the child and learning about child growth and development had been most important for them. Descriptors—Classification, *Cognitive Processes, Creative Thinking, *Creativity, *Criteria, *Evaluative Thinking, *Psychological Characteristics, *Theories

Some of the most used, misused, and abused terms in contemporary education are the words "create," "creative," and "creativity." One way of understanding creativity is to reject the current practice of assuming that creative behavior is directly caused by some special kind of mental operation called "creative thinking." What can be accepted is the fact that individuals constantly produce unique and new behaviors and products. Inherent in this position is the assumption that it is not the mental operations themselves which automatically generate creative outputs; rather, it is external criteria applied to unique, novel behaviors which ultimately determine the degree to which a person's output is "creative." Educators should use the word "novel" to describe any new response or product by an individual. The word "creative" should be used only when very specific external criteria have been met. Eleven categories of psychological variables that may influence the production of novelty are accident, accommodation, reproduction, duplication, fabrication, imitation, transference, substitution, experimentation, innovation, and generation. Criteria for assessing the creativity of a product or person can be described in terms of the product itself as an entity, the problem which it resolves, the field in which it is presented, and its out-of-field effects. The Implementation of Photographic Visual Problem Solving Strategies to Enhance Levels of Visual Perception in Elementary School Art Students.

Pub Date—[76]

Note—27p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Art Education, *Design, *Elementary School Students, Perception Tests, Photography, Pretests Posttests, *Problem Solving, *Training, *Visual Literacy, *Visual Perception
This study investigates the relationship of teaching strategies emphasizing visual problem solving through the medium of photography to increased visual perceptual levels in second and third grade students. Twenty-five subjects from three classroom groups were randomly assigned to one of three treatment groups labeled Perceptual Principles Group 1, Elements of Design Group 2, and Control Group 3. Groups 1 and 2 were given 15 simple, self-processing still cameras and film. Both experimental groups received examples and classroom discussion that pertained to visual problem solving and perceptual principles. Treatment for Group 1 focused on five visual perceptual principles: point of view, space, motion, points of maximal information, and the perception of an event. Treatment for Group 2 emphasized five elements of design: line, shape, texture, space and color. As measures of subjects' visual perceptual ability, two standardized instruments and a rating scale were employed in a pre-test, treatments, post-test design. The instruments were (1) the Children's Embedded Figures Test (CEFT); (2) the Motor-Free Visual Perception Test (MVPT); and (3) the Dunn Photographic Rating Scale (DPRS). Among the results it was found that Group 1 made significantly greater performance gains on the CEFT than did Groups 2 or 3; that there were no significant performance differences on the MVPT and that there were significant differences on the DPRS between Groups 1 and 2, with Group 1 subjects performing at higher levels than Group 2. Context Effects on Children's Memory of Piagetian Concepts.

Pub Date—80

Note—16p. Paper presented at the Annual Meeting of the Western Psychological Association (60th, Honolulu, HI, May 1980).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Children, *Cognitive Processes, Elementary School Students, *Memory, *Mnemonics, Pictorial Stimuli

Identifiers—*Figurative Operative Distinctions, Horizontality (Concept), Meaningfulness, *Piagetian Theory, Seriation

This paper is concerned with two questions derived from Piaget and Inhelder's (1973) work on the relationship between memory and the developing intelligence of the child. First, can children retain operatively advanced information through the use of a non-operative mnemonic? Secondly, can the salience of operative versus non-operative information be manipulated through story context? To test the first question, grade one children were provided with a picture representing the concept of horizontality as embodied in the water level of a container. Within the context of a story, children were told it was important to remember the particular horizontal orientation of the water level. Two types of memory aids were provided. Half of the children were given a brief description and demonstration of how the water level of a container remains parallel to the supporting surface (an operative explanation). The remaining children were given a simple mnemonic strategy: it was pointed out that the belt of a woman (depicted in the picture) and the water level were perfectly aligned (the figurative solution). A second question investigated whether memory for figurative information could be improved with the provision of contextual background. A figurative and an operative context were provided for the operative concept of seriation as depicted by a clothesline of clothes. Memory for the seriation frame was tested by asking the child to recall the colour of the clothes and to reconstruct their arrangement using small cutouts. The results confirmed the hypothesized effects (Author/SS)

Infant Formula: Our Children Need Better Protection. Report Together with Dissenting Views by the Subcommittee on Oversight and Investigations of the Committee on Interstate and Foreign Commerce (H.R., 96th Congress, Second Session).

Congress of the U. S., Washington, D. C. House Committee on Interstate and Foreign Commerce. Pub Date—Feb 80

Note—37p.

Available from—Superintendent of Documents, U. S. Government Printing Office, Washington, DC 20408 (no price quoted).

Pub Type—Reports - Evaluative (142) — Legal/Legislative/Regulatory Materials (090)
EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Case Studies, *Consumer Protection, *Federal Regulation, *Food Standards, Hearings, Infants, Legislation, *Manufacturing, *Needs Assessment, Nutrition

Identifiers—Food and Drug Administration, *Infant Formula

This report of the Subcommittee on Oversight and Investigation focuses on issues raised by the marketing of commercially prepared infant formulas that were nutritionally deficient. In this context, the report examines the scope of FDA authority to protect the public and the manner in which the FDA carries out its responsibilities with respect to product recalls. Additionally, the report reviews existing standards and regulations for infant formulas, and reports findings of an investigation into the manner in which one manufacturer, Syntex Laboratories Inc. of Palo Alto, California, complied with these regulations. This investigation revealed that over 100 infants became ill, some severely so, as a result of having been dependent on the formula for a long period of time. In evaluating the actions of the FDA and this manufacturer, the subcommittee found that little had been done to minimize or prevent this affair. Consequently, it was recommended: (1) that congress enact legislation to create a separate category of food known as infant formula; (2) that infant formula contain all nutrients recognized as essential; (3) that the formula be tested at critical times for nutritional adequacy; and (4) that the FDA be given the ability to inspect records of infant formula manufacturers. Child Care in Wisconsin: A Planning Paper for the 1980s.

Wisconsin Early Childhood Association, Madison. Pub Date—[79]

Note—46p.

Pub Type—Guides - Non-Classroom (055) — Opinion Papers (120)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—*Administrative Principles, *Day Care, Divorce, Educational Facilities, *Educational Quality, *Family Structure, Labor Force, Mainstreaming, Mothers, One Parent Family, Parent Participation, Population Trends, *Preschool Children, Program Improvement, *Social Change, Wages

Identifiers—*Wisconsin

The purposes of this working paper are to analyze the changes in the family which necessitate substantial out-of-home care for Wisconsin's preschool and school-age children, and to propose a plan for action promoting high quality child care in the 1980s for these children. Section I documents changes affecting the family over the last thirty years, such as increases in mothers in the work force, divorce, and one parent families, which have led to the rapid growth of out-of-home care of preschool and older children. Section II explores the latest research on the effects of day care on child development. Based on the research, three conclusions are drawn: (1) there are no significant differences in the development of children of working and non-working families; (2) high quality child care can have lasting, positive effects on children; and (3) public support for high quality care is cost-effective. Section III sets forth eight principles for building a quality child care system and recommends actions to meet each principle. These recommendations call for parental access to high quality child care facilities, a sliding scale of fees for families enrolled in child care programs, a range of child care options for parents, an upgrading of the present quality of child care programs, adequate wages and working conditions for child care employees, the mainstreaming of hand-

icapped children into the programs, regulations to ensure the health and safety of children in the programs, and the implementation of a state child care unit to plan and develop child care policies and programs. (Author/MP)

Descriptors—*Classroom Environment, Classroom Research, *Comprehension, *Elementary School Students, *Justice, *Kindergarten Children, *Resource Allocation

Identifiers—*Distributive Justice, Human Ecology
This discussion explores children's understanding of the nature of distributive justice in classrooms and provides an initial model for further research. The issue of distributive justice arises in a situation when an individual assesses the fairness of the distribution of any limited resource, such as the physical, instructional and social opportunities present within schools. It appears that the understanding of distributive justice by children requires that they coordinate three domains of knowledge: (1) consequences of resource allocation; (2) criteria of deservingness; and (3) schemas which define fairness. Exploratory, semi-structured interviews were conducted among 25 children in a mixed kindergarten/first grade classroom and a mixed third/fourth grade classroom. The interview data indicate that children know the consequences of resource allocation and that they also know what resources and how much of a resource they and others will receive as a result of a distribution. Criteria for deserving consist of attributes of individuals. Findings suggest that children attempt to coordinate consequences of resource allocation with criteria of deservingness. Further, children apparently employ formal reasoning as well as substantive declarations to justify the fairness of the relationship between resource allocation and deservingness. Three areas for further inquiry are specified in the conclusion. (Author/RH)

Originally prepared by the U.S. Bureau of the Census, for the use of delegates and other participants in the 1980 White House Conference on Families, this chartbook provides a graphic overview of selected, recent family trends reflecting changes in Americans' personal lifestyles. Information and limited commentary are presented on family formation, family dissolution, and living arrangements of the U.S. population. The charts document: attitudes toward family life; trends in fertility; levels of first marriage, divorce and remarriage; changes in living arrangements of adults and children and in family and household makeup; developments in the economic aspects of family life including increases in the number of working mothers, income of families of various types, and trends in homeownership; and a description of the types of

families who reside inside or outside of metropolitan areas. (Author/MP)

Descriptors—Adopted Children, Child Neglect, *Day Care, Divorce, *Family Problems, *Legal Problems, *Legal Responsibility, Marital Instability, *Parent Responsibility, *Parent Teacher Cooperation

This bulletin, the third in a series on selected issues in day care, addresses two problems involving legal issues: (1) what are the implications for the day care program when parents or other legal guardians are involved in a dispute over the custody of children? and (2) what are the rights and responsibilities of day care programs when parents fail to pick up children at the end of the day? The discussion focuses in detail on how to develop a well thought out plan which concentrates on preventing unpleasant incidents before they occur. Legal definitions of custody, divorce, separation, adoption, child abuse, and child neglect are given and strategies and procedures concerning verification of parents' rights to custody, and settlement of disputes between parents over child visitation at the center are discussed. The problem of late parents and liability of the center in caring for children after closing hours is discussed in terms of the issues of supervision, responsibility, authority, and suspected child neglect. Identifiers—*Scotland

The results of an evaluation of an educational home visiting (EHV) program in Scotland that utilized home visitors (attached to nursery schools) to promote parents' involvement in their children's educational development are presented in this report. Two assessment strategies were employed. One strategy (S1) was used to investigate the practical operation and effects of the program. The second strategy (S2) compared answers to interview questions provided by visited mothers, non-visited mothers residing in the visited mothers' locale, and non-visited mothers whose socioeconomic status was higher than visited mothers' status. Part One of the report provides a brief overview of the EHV and the evaluation program plus EHV background and operations information. Part Two introduces S1, identifies theoretical issues of practical importance in such areas as language development, discipline strategies and cognitive development. Possible and probable long term personal and social effects of the program are also discussed. Part Three introduces S2 and assesses the impact of the EHV program on parents' attitudes, beliefs, expectations and perceptions of their problems, their role, their children, and if and how they can guide their children's development. The implications of the data for home

visiting and EHV program design are explored in Part Four. The concluding section, Part Five, provides recommendations for action and further research. (Author/RH)

One of a series of papers which focus on 10- to 15-year-old adolescents, this publication describes these young people as they work through developmental tasks in environments (families, communities, peer groups, and schools) that are part of their daily lives. This description is used as a basis to accomplish the following: (1) a further definition of the classic issues of adolescent development; (2) a brief and selective summary of what is and what is not known about development during adolescence; and (3) a placing of the issues of attachment, autonomy, intimacy, sexuality, achievement, and identity in a framework that helps to make sense of adolescence. These issues are defined, clarified, and discussed in relation to the primary changes (biological, reasoning, and social definition) that occur during adolescence. In addition, an annotated bibliography containing 40 references to papers of related interest is included. (Author/SS)

Family Day Care Classroom Training Guide.

Fairfax County Office for Children, Va.

Pub Date—[80]

Note—82p.

Pub Type—Guides—Classroom—Teacher (052)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—*Child Caregivers, Child Development, Course Descriptions, *Family Day Care, First Aid, Inservice Education, Learning, Observation, *Organization, Parent Participation, *Training

This training guide describes a 40-hour course for family day care providers. The course is designed to be given in 14 sessions to approximately 15 persons who voluntarily meet twice a week for 2 1/2 hours. A child care program for children aged 0 to 5 years located at the training site meets the need of working providers for alternate care while they attend training sessions. The program also demonstrates exemplary child care activities and aspects of good child care such as room arrangement, material selection and adult/child interaction. Topics discussed and explored in the training guide include organizing a day care home; working with parents; social, physical and emotional development; language; discipline; learning; learning activities; first aid; and observation skills. At least five additional hours are spent outside class doing individual observations and first aid programmed instruction. Sessions are organized around a statement of purpose, small group and/or individual exercises, a discussion, small group activities and follow up discussions. Central points to be emphasized by the trainer are indicated. Handouts and illustrative forms are frequently included. (Author/RH)

Schunk, Dale H.

Proximal-Goal Facilitation of Children's Achievement and Interest.

Pub Date—Sep 80

Note—18p. Paper presented at the Annual Convention of the American Psychological Association (88th, Montreal, Quebec, Canada, September 1-5, 1980).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Academic Achievement. *Arithmetic. Behavior Change. Comparative Analysis. *Elementary School Students. *Improvement. *Independent Study. *Interest. *Low Achievement. Motivation

Identifiers—*Proximal Goal. Self Efficacy

This experiment was designed to (1) test the effectiveness of proximal goals in promoting performance, developing self-efficacy, and fostering interest in activities, and (2) investigate the relationship between self-efficacy and interest. The focus of the study was children's mastery of arithmetic operations in which they had displayed low achievement. Subjects, drawn from six elementary schools, were 40 children with a mean age of 8.4 years. The treatment consisted of providing children with a packet of instructional materials and having them engage in self-directed learning over a series of sessions under conditions involving a proximal goal, a distal goal, or no explicit goal. It was hypothesized that the motivational effects of the proximal goals would lead to higher arithmetic achievement, self-efficacy, and interest, as compared to the other two conditions, and that self-percepts of efficacy would bear a significant, positive relationship to interest shown in arithmetic tasks. In accordance with the hypotheses the proximal-goal treatment produced more rapid mastery of arithmetic operations, a higher level of skill development, a stronger sense of self-efficacy, and greater interest in arithmetic than did the other conditions. The distal-goal condition did not differ from the no-goal condition in promoting change. Perceived self-efficacy concerning arithmetic competence was positively related to achievement and intrinsic interest in arithmetic. It was concluded that the study supports the idea that self-motivation generated through proximal goal setting can influence children's achievement outcomes. (Author/MP)

The purpose of this study was to examine the influence of different tasks on behavior in mother-child interactions. Five tasks, varying in degree of structure and difficulty, were used in mothers' interactions with their children at 24 and 36 months of age. Subjects were Mexican-American mothers and their children. All were participants in an extensive 2-year parent education program designed especially to meet the needs of low-income Mexican-American families. Families entered the project when the child was one year of age. Participants were randomly assigned to program or control groups and then each mother-child interaction was videotaped and rated at one minute intervals on the following scales: Affection, Praise, Criticism, Control, Reasoning, Mother's Verbal Encouragement, and Child Verbal Responsiveness. The Bayley Mental Development Index (MDI) was used to measure the children's abilities at 24 months of age and Palmer's Concept Familiarity Index (CFI) and the Stanford-Binet (S-B) were used when the children were 36 months of age. Results showed that: (1) program and control mother-child dyads differed

significantly on mean scores for Affection, Criticism, Child Verbalization, and Mother's Verbal Encouragement and that with the exception of Criticism, all differences favored the program group at both time intervals; (2) while significant correlations were found between mother-child interaction variables and measures of child cognitive competence, there were no distinct differences between tasks in these relationships; and (3) for both groups, the correlates with measures of child competence were similar for high and low structure tasks while the relative stability of high and low structure tasks across time was also similar. Descriptors—*Child Rearing. *Cognitive Processes. *Models. Parent Child Relationship. *Parent Education. Parent Influence. *Parent Role. Perspective Taking. *Problem Solving. School Psychologists

Identifiers—Accommodation Theory. *Parenting

This paper presents the rudiments of a constructivist conceptual framework which school psychologists can use to help parents develop positive parenting concepts. Problems arise if school psychologists rely solely on a mechanistic paradigm when they identify causes of unwanted behaviors and suggest specific remedial strategies. Operating within a constructivist framework, which assumes several cognitive processes such as anticipation, accommodation and assimilation in the child and sees parents as moderators of discrepancy or novelty and regulators of arousal, a sensitive parent (1) understands the child's characteristic ways of construing events, (2) presents the child with sensory input that is moderately discrepant from the child's existing cognitive organizations, and (3) provides the child with support in his efforts at accommodating his cognitive organizations to assimilate novel input. Parents can be taught to sensitively present an orderly world to their children. Experience in a parent training program based on constructivist principles of psychological functioning suggests the following hypotheses: parents who rely on coercive strategies to promote compliance operate on the basis of evaluatively negative, unidimensional constructions of the motives for their children's activities; parents who rely on persuasion and reasoning to promote compliance operate on the basis of less evaluative, integrated, multi-valent constructions of the motives for their children's behavior. Interaction of Self-Concept, Television, and Leisure Activities in Families with Young Children.

Pub Date—Jun 80

Note—11p. An earlier version of this paper was presented at the Annual Meeting of the American Home Economics Association (Dallas, TX, June 23-26, 1980).

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Parent Child Relationship. *Preschool Children. *Recreational Activities. *Self Concept. Socialization. *Television Viewing

This study provides a profile of preschool children's leisure time activities and examines (1) whether preschool children's self-concepts are related to leisure time activities and (2) whether parental involvement in the leisure activities of children, including television viewing, are associated with higher levels of self-concept in children. The time expenditures of 55 preschool children were identified through the use of a parent interview and a week-long chart of the child's activities recorded by the parent. Time expenditures were correlated with self-concept scores of the children as measured by the Riley Inventory and a teacher rating scale. Significant relationships were found between self-concept and amount of one-to-one parent/child interaction, and between hours of television viewing and the amount of the child's solitary activities. In addition, self-concept scores were negatively related to amount of television viewing for males.

The data were interpreted as indicating that the process of television viewing may not have a direct relationship to the child's self-concept. However, the data indicated that television may be related to other socialization processes in such a way as to indirectly influence self-concept and social development. (Author/SS)

As part of a larger, on-going study conducted through the Center for Child Development and Education at the University of Arkansas at Little Rock, this paper explores the influence of the home environment on children's psychological functioning in school and on their academic achievement. Data were obtained on home experience, classroom social competence and achievement measurements for 96 elementary school children in grades one through six. Measures of academic achievement were obtained from the standardized Science Research Associates test series for reading, language and mathematics. The 23 item Classroom Social Competence Scale (CSCS), reflecting the item content of the Kohn and Rosman (1972) Social Competence Scale was designed for this study to assess the children's classroom social competence, along the behavioral dimensions of withdrawal (non-participation and aggression), disruption, and task orientation. The Home Observation for Measurement of the Environment (HOME), designed by Caldwell and Bradley (in press), was used to measure the quality of stimulation, and the social, emotional and cognitive support available for the child's development. Multivariate multiple procedures were used to test the existence of associations between the three variables. Results revealed significant relationships across the three sets of variables. Patterns of these relationships suggest that early experience prepares the child to meet not only intellectual performance requirements but also social performance requirements. (Author/MP)

Primary Education in England: An Overview.

Pub Date—Oct 80

Note—56p.

Pub Type—Reports - Descriptive (141) — Information Analyses (070)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Accountability. Curriculum. Educational Policy. *Educational Practices. *Educational Trends. *Elementary Education. Enrollment Trends. Foreign Countries. Organization. Teaching Styles

Identifiers—*England

The present state of English primary education is depicted in this overview and possible future trends affecting primary schools are indicated. Primary schools in England and Wales are normally those with pupils between 5 to 11 years of age. The term Primary Schools encompasses Infant Schools (for children ages 5 to 7); Junior Schools (ages 7 to 11); First Schools (usually ages 5 to 8); and, in some cases, Middle Schools (usually ages 8 to 13). Numbering around 23,000, the English primary schools are co-educational, free and attended by over 95% of the nation's 4 million plus children. The paper first presents general background information concerning advisory/inspectorate bodies for policy and practice; physical plant, equipment and materials; teacher education and training; and primary school ideologies. Current trends and issues discussed include (1) the general organization within the primary school, (2) declining enrollment and changing school organization, (3) curriculum organization and teaching style, (4) curriculum content, and (5) accountability and assessment. Recent key publications in education are identified and emphasized in

order to discern possible future trends. Reports explored included the following: "Primary Education in England" (1978); "Assessment - The American Experience" (1978); "Local Authority Arrangements for the School Curriculum" (1978); and "Inside the Primary Classroom" (1980). In conclusion, 10 predictions for English primary education in the 1980s are briefly stated. A bibliography including selected recent and ongoing research is provided as well as two appendices that provide notes on the primary education report and chart trends in the school population. Children, Parents, and Siblings: Possible Sources of Variation in the Behavior of First Born and Only Children.

Pub Date—Sep 80

Note—17p. Paper presented at the Annual Meeting of the American Psychological Association (88th, Montreal, Quebec, Canada, September 1-5, 1980).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Behavior Change, Cognitive Ability, Comparative Analysis, *Infant Behavior, *Influences, Mothers, *Parent Background, Parent Child Relationship, *Personality, *Siblings, *First Born, *Only Children, Parent Behavior

This paper presents research findings on differences in the social and cognitive behavior of first born and only children at 3, 12, and 24 months of age as observed at home and in a free play laboratory setting. The sample consisted of 21 only children (children who did not acquire a sibling for at least the first 48 months of life) and 35 first born children (children who acquired a sibling between the ages of 24 and 36 months). Results indicated that differences in only and first born children were related to three possible sources of variation: (1) the birth of a sibling for first born children; (2) child characteristics; and (3) parent characteristics. The birth of a sibling was noted to change the cognitive performance of first born children and was related to a drop in skill performance. This finding suggests that first born children are different from only children as a result of experiencing the entrance into the family of a new infant. Possible differences in the temperament characteristics of first born and only children were reflected in the tendency of only infants to cry more and smile less at 3 months of age than did first born infants. Finally, parents of only and first born children may be different: mothers of only borns were more involved in their infants, expressed the desire for less children, were older at the birth of their first child and experienced a more difficult pregnancy than mothers of first borns. The Relationship among Localization Skill, Existence Constancy and Object Permanence.

Pub Date—Sep 80

Note—31p. Paper presented at the Annual Meeting of the American Psychological Association (88th, Montreal, Quebec, Canada, September 1-5, 1980).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Cognitive Development, *Infants, *Object Permanence

Identifiers—*Piagetian Theory

Two component skills of object permanence were studied: existence constancy - the infants' ability to expect that an object continues to exist after it is hidden, and localization skill - infants' ability to search in the correct place for a hidden object. Contradictions within the literature may occur because of task inability caused by failure to: (1) study the two skills within traditional object permanence tasks, (2) examine more than one task, (3) study the two skills intra-individually, and (4) examine modality effects. These design faults were corrected in the present study. Four conditions in which the amount of information available about the object varied were designed to test Piaget's theories about object permanence and evaluate results obtained in non-traditional object permanence tasks. Eighty infants, randomly assigned to one of four groups, were tested at 4 and again at 8 months of age. Three of the groups consisted of the following experimental

conditions: (1) Piaget's traditional test situation in which no sound emanated from the object; (2) sound emanating from the hidden object throughout the task; and (3) intermittent sound emanating from the object only while the object was in view. In the control condition, the object was never hidden from the infant's view. Infant behavior was scored from videotapes. Localization skill was measured by examining the order and location of infants' search. Existence constancy was measured by examining whether infants turned attention to the object after uncovering it. Data were consistent with Piagetian Theory. Existence constancy results were more similar to object permanence results than localization results. Haptic results were hierarchical (most individuals either passed or failed both skills), and infants made expected localization errors in invisible displacement trials. (Author/SS)

How Television Commercials Affect Children's Attitudes and Eating Behavior.

Spons Agency—Department of Agriculture, Washington, D.C.; Montana Univ., Missoula. Research Advisory Council.

Pub Date—Sep 80

Grant—729-46; 5901-0410-8-0070-0

Note—33p. Paper presented at the Annual Convention of the American Psychological Association (88th, Montreal, Quebec, Canada, September 1-5, 1980).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Age Differences, *Attitudes, *Children, *Food, *Influences, Nutrition, Sex Differences, *Television Commercials, *Television Viewing

Identifiers—*Food Consumption

The effect of various kinds of commercials on children's actual food consumption are examined in this study. Forty-eight 4-year-old children (mean age, 4.65 years), and forty-eight 9-year-old children (mean age, 9.78 years) comprised the sample. In both age groups there was an equal number of boys and girls. The variable investigated was type of advertisement (low-nutritional, pro-nutritional, non-food control), and the effects of the advertisement were assessed via a behavioral eating test, a food attitude scale, and an interview. Results suggest that both 4-year-old and 9-year-old boys seeing low-nutrition commercials did significantly increase their consumption of the low-nutrition foods but that girls were not affected. The pro-nutrition commercials had no apparent effect. Regardless of advertisement type, age did not mediate the effects of the commercials, and the self-report and behavioral measures correlated with one another in a low and inconsistent manner. Results are discussed with regard to methodological issues, developmental issues, and social policy implications. (Author/MP)

Developmental Differences in Elaboration: A Metamemory Explanation.

Pub Date—Apr 80

Note—16p. Paper presented at the Annual Meeting of the American Educational Research Association (Boston, MA, April 7-11, 1980). Best copy available.

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Adolescents, *Age Differences, *Children, Elementary School Students, *Memory, *Metacognition, Secondary School Students, *Study Skills

Identifiers—*Elaboration

This study investigates the hypothesis that during adolescence the developmental increase in the tendency to use elaboration as an associative study strategy is explained by increases in metamemory knowledge. Independent assessments of the metamemory knowledge and spontaneous strategic behavior of 32 fifth- and 32 twelfth-grade subjects were made. To assess metamemory knowledge subjects were presented nine hypothetical memory problems and asked for their opinions on strategies for best remembering the material. Scoring took into account choice of strategy and justification of that choice. Strategic behavior was obtained by asking the subjects to verbalize their thoughts while studying each of 36 pairs of concrete nouns by the study-test paired associate method.

Verbalizations for each of the pairs were classified into one of 15 categories by two independent raters on the basis of a transcribed record of the tape recorded study trial. Verbalizations were labeled "elaboration" if a direct interaction between the pair members was described. As hypothesized, grade-related advances in metamemory knowledge appeared to be a powerful predictor of grade differences in use of elaborative strategies. However, results indicate that relevant metamemory knowledge is neither a necessary nor a sufficient condition for elaboration. (Author/SS)

Self-Esteem and Academic Behavior Among Second Graders. Report No. 5081.

Texas Univ., Austin. Research and Development Center for Teacher Education.

Spons Agency—National Inst. of Education (DHEW), Washington, D.C.

Pub Date—Apr 80

Note—19p. Paper presented at the Annual Meeting of the American Educational Research Association (Boston, MA, April 7-11, 1980).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Academic Achievement, *Elementary School Students, Grade 2, High Achievement, *Individual Differences, Low Achievement, Self Concept, *Self Esteem, Self Evaluation (Individuals), Student Behavior

This paper reports the results of a study which examined the relationships of level and stability of self esteem to perceptual, behavioral, and motivational aspects of academic behavior among second grade students. These aspects are academic achievement, accuracy in assessing standing, and disruptive behavior. Self-esteem was assessed with the Piers-Harris Children's Self-Concept Scale. The instrument is composed of 80 items, to which the child responds yes or no. Subject's stability of self-esteem was assessed by a second administration of the Piers-Harris Scale four months after the first administration. To assess the accuracy of children's self-description of ability, subjects were individually interviewed and asked to rate their own reading ability in comparison with the rest of the class. Results show that (1) stability of self-esteem was found to be related to students' accuracy in rating their own reading abilities, indicating that children with stable self-esteem had realistic perceptions of their abilities; (2) both level and stability of self-esteem were found to be positively related to the students' level of achievement; and (3) both level and stability of self-esteem were found to be negatively related to disruptiveness. These results suggest that stability as well as level of self-esteem are affective dimensions related to the educational experience. (Author/MP)

Maternal, Neonatal and Mother-Infant Antecedents of Attachment in Urban Poor.

Pub Date—Sep 80

Note—18p. Paper presented at the Annual Meeting of the American Psychological Association (88th, Montreal, Quebec, Canada, September 1-5, 1980). Best copy available.

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Attachment Behavior, *Individual Characteristics, *Infants, *Interaction, Longitudinal Studies, *Mothers, Parent Child Relationship, Prenatal Influences, Risk, *Sex Differences, Stress Variables

Attempts to assess maternal and neonatal behavior and subsequent mother-infant interactions as potential determinants of the quality of attachment between mothers and their infants provide the focus of this paper. Several instruments and procedures that focused on (1) maternal and infant characteristics, (2) mother-infant interaction, and (3) life stress, were used to collect data from 212 high risk pairs of mothers and infants. The collection of data began during the prenatal period and continued through the infant's first year of life. Attachment was assessed when the babies were 12 months of age. Using the Strange Situation Procedure researchers classified infants as anxious/avoidant (Group A), securely attached (Group B), or anxious/resistant (Group C). Overall group differences among the three attachment groups were tested by a one-way ANOVA and the Student-Newman-

Keuls was used for post hoc comparisons. Results indicate that maternal, neonatal, and interactive factors contribute to the development of qualitatively different attachment relationships. Anxious-resistant infants appear to develop more slowly than others. Mothers of anxious/avoidant infants tend to be tense, irritable, disinterested in their babies, and react negatively to motherhood. Securely attached infants tend to have mothers who are sensitive to their needs and who encourage reciprocity. While male infants tend to be more vulnerable to caretaking differences, female infants may be more vulnerable to stressful life events than males are. (Author RH)

Carstensen, Laura And Others
Children's Attitudes Toward the Elderly: An Intervention.

Pub Date—Mar 80

Note—21p. Paper presented at the Annual Meeting of the Southeastern Psychological Association (Washington, DC, March 26-31, 1980).

Pub Type—Reports—Research (143)—Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Age Differences. Attitude Change. Childhood Attitudes. *Children. *Intervention. *Older Adults. *Perception

Six- to nine-year-old children's (N=14) initial perceptions of the elderly were reexamined following an intervention consisting of an increase in the frequency of beneficial contact that the children had with old people. Beneficial contact was provided when elderly persons (N=23) served for two months as tutors in a reading program for normal readers. Pre- and post-intervention measures of children's attitudes and reading skills and the morale of the elderly adults were taken. Evaluations of the program were also obtained from elderly and child subjects, school principals and teachers. Analysis of variance revealed a significant interaction effect of group by test, suggesting that a relatively brief intervention can modify children's perceptions of the aged. While there were no significant changes in the responses of the elderly subjects as measured by objective questionnaires, the majority of the tutors reported that they were happier and felt more involved in the community while working in the program. Developmental Changes in Imaginative Play and Cognitive Ability of Preschoolers.

Pub Date—Sep 80

Note—19p. Paper presented at the Annual Convention of the American Psychological Association (88th, Montreal, Quebec, Canada, September 1-5, 1980).

Pub Type—Reports—Research (143)—Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Classification. *Cognitive Development. Conservation (Concept). *Imagination. *Influences. Observation. *Preschool Children. *Pretend Play

Identifiers—Peabody Picture Vocabulary Test. Raven Progressive Matrices

This study tests the hypothesis that components of play such as imagination contribute to cognitive development. Twenty-four middle-class children attending a university-affiliated preschool were observed for 20 one-minute play observations during the Spring Semesters of 1978 and 1979. Play was coded using categories for both social (solitary, onlooker, parallel, and interactive) and cognitive (functional, constructive, and imaginative) components. Imaginative play was further scored for number and type of transformations (person, object, situations) and for thematic content (sociodramatic or fantasy). During each semester, children were administered the Peabody Picture Vocabulary Test (Form B) and the Ravens Progressive Matrices tests of intelligence, and a battery of classification (dichotomous sort, cross-classification, and class inclusion) and conservation (liquid substance, number, length, area, and weight) tasks. Pairing of play and cognitive test change scores from year one to year two revealed that, generally more children increased in cognitive ability without increasing in imaginative play than did those who increased in dramatic play without increasing in cognitive ability. Results suggest that directional influence between these two variables moves from cognitive ability to imaginative play and not vice versa. (Au-

Descriptors—Elementary School Students. *Moral Development. Rating Scales. *Social Cognition. *Young Children

Identifiers—*Moral Judgment Task (Piaget), Piagetian Theory. *Rule Breaking

This study investigates effects of perceived rule-breaking on the moral reasoning of young children. Thirty first-grade children (15 males and 15 females) were read 10 randomly ordered moral judgment stories by one of three experimenters. Each story was accompanied by a two-frame cartoon-like drawing depicting the action. Two stories of each of the following five types were included: negative intention/negative consequence (NN); negative intention/negative consequence with rule-breaking (NNrb); negative intention/positive consequence (NP); negative intention/positive consequence with rule-breaking (NPrb); and positive intention/negative consequence (PN). Following pre-training with the scale the children rated the story characters on an eight-point scale ranging from very bad to very good. Repeated measures analysis of variance revealed a significant story effect which, however, was not directly in accord with Piagetian theory. Individual comparisons via Tukey tests showed the NPrb stories were rated significantly different from every other story type. No other story comparison was significant. Further analysis of the findings suggests (1) that intention may be more salient to a child if the story portrays intended damage to another person rather than to property; and (2) a need for revision of Piaget's theory of moral reasoning that takes into account story content and perhaps incorporates the Piagetian notion of decalage. Descriptors—*Children. Cognitive Processes. Grade 1. Identification (Psychology). *Influences. *Moral Development. *Perspective Taking. Pretests Posttests. *Training

Identifiers—*Moral Judgment. Piagetian Theory

This paper reports attempts to alter children's moral judgments via short-term training of roletaking skills in order to assess the degree of relationship between moral reasoning and roletaking. In a three phase procedure, 40 first-grade children (20 males and 20 females) were assigned to one of four experimental groups (empathic, reciprocal, cognitive role training, and control). In the first phase, subjects' pretraining level of moral reasoning was assessed. Subjects were administered four moral judgment stories, two of positive intention/negative consequence and two of negative intention/positive consequence. Following the presentation of these stories, each child underwent one of the four 20 minute experimental treatment sessions. Immediately after the treatment session each child was administered four additional moral judgment stories as post-treatment assessment of moral reasoning. It was expected that those subjects undertaking role training would show a greater increase in maturity of moral reasoning than would the control group. Findings suggest that roletaking might be linked to the development of moral reasoning, although not directly, and that story content may be an important variable in analyzing the maturity of response. The finding of differences in judgment between role takers and non-role takers in the cognitive groups suggests a link between roletaking and moral judgment. In general, these findings provide further support for Piaget's basic theoretical notions concerning the

child's moral judgment. (Author/MP)

Descriptors—Comparative Analysis. Discourse Analysis. *Dramatic Play. *Play. *Preschool Children. *Verbal Communication

Identifiers—*Text Coherence

The process by which preschoolers construct cohesive oral text was studied in dramatic and constructive play settings. Four preschoolers, two boys and two girls ranging in age from 51 to 60 months, were videotaped for 30 minutes in their preschool classrooms. It was found that players in both contexts of play repeated introductory utterances to begin new play topics. Interlocutors in the dramatic play episodes often repeated the topic initiator's introduction and asked "Wh" and "Yes/No" questions as topic clarification strategies. Topic initiators, in turn, clarified their introductions. Such clarification strategies were not observed in constructive play. Entire social dramatic play episodes were found to be mediated by topic introductory utterances; the play themes defined in the introductions were referred to anaphorically and cataphorically throughout the text. A large number of exophoric references (21% of utterances) were observed in constructive play. Play in this context was less dependent on cohesive text for sustenance. Pedagogical implications are discussed. (Author/SS)

A Mental Health Preschool Program: Helping Preschoolers with Emotional and Behavioral Problems.

Pub Date—[76]

Note—10p. Best copy available.

Pub Type—Reports—Descriptive (141)—Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Behavior Modification. *Behavior Problems. Curriculum. *Day Care. *Emotional Problems. *Intervention. *Mental Health. Observation. Parent Participation. Play Therapy. *Preschool Children. Preschool Education

The advantages and elements of a therapeutic daycare program for preschool children with emotional and behavioral problems are described in this paper. The goal of the therapeutic preschool is to meet the needs of behaviorally disordered and emotionally disturbed children in a special education setting, and then to mainstream the children into less restrictive settings as soon as possible. Eight program elements that can be combined to create a therapeutic daycare program are as follows: (1) a developmental evaluation and behavior observation made prior to admittance in the program; (2) planned structure in the areas of space, time, relationships and knowledge; (3) use of behavior modification procedures at several levels; (4) a mental health curriculum designed to focus on identification of emotions, acceptance of feelings, and ways to cope with and solve social problems; (5) one-to-one remediation sessions with therapists; (6) a high staff-to-child ratio and staff relationships characterized by consistency, the ability to increase prosocial behavior and decrease inappropriate behavior, and the ability to reflect and interpret children's feelings; (7) parent involvement; and (8) follow-up procedures at several intervals subsequent to the child's discharge from the program. This sort of program can alleviate presently distressful symptoms for the child and his family, and can help prevent mental health problems from occurring at a later life stage. (Author/SS)

Descriptors—*Aggression, Cognitive Processes, *Elementary School Students, *Imitation, Individual Characteristics, *Modeling (Psychology), Observational Learning, *Reinforcement, Sex Differences, *Television Viewing

This study tests the hypothesis that children who viewed videotaped aggression would imitate aggressive behaviors more frequently than would children who were not exposed to aggressive displays. A cognitive factor, reinforcement value, was also hypothesized to be a significant variable in the behavior of the children. Prior to treatment, subjects rated 15 toys for reinforcement value by coloring either a "happy" or a "sad" face to indicate like or dislike, respectively. Ratings were used to match subjects in experimental and control groups. Thirty-two first and second grade boys and girls then viewed and rated for reinforcement value 15 videotaped vignettes in each of which an adult male used one of 15 toys to perform one of 15 different aggressive acts against a bobo doll. Control group children did not view the vignettes. Following the vignettes, combined vignette and pre-experimental toy ratings were used as a basis for selecting eight toys for placement in a play room which contained a bobo doll. Subjects were observed at play in the room for five minutes by trained observers who recorded aggressive behavior. Among the results it was found that experimental group children exhibited significantly more aggressive behaviors than did control subjects, that boys exhibited significantly more imitative aggression than did girls. Further, reinforcement value was a significant factor in the imitative behavior of the children. (Author/RH)

Identifiers—*Odawa (Tribe), Ontario

Participation structures in two classrooms of culturally similar children (Indian) taught by teachers with different cultural backgrounds (both experienced, one Indian, one non-Indian) were investigated in an Odawa reserve community in Northern Ontario, Canada. Data came from direct observation, videotaping in classrooms and in some children's homes, and interviews and collaborative research with school staff. "Work in progress" results indicate cultural difference in exercise of authority by the Indian and non-Indian teachers with the Indian teacher's participation structures showing more cultural congruence with interaction patterns customary for Indian children. At the level of Odawa daily life, there is virtual absence of central political authority. Specifically, comparing setting up a lesson (teacher movement, directives, relationship between movement and giving directives), the non-Indian teacher moved more rapidly, moved around the whole room, gave directions to the total classroom group and small reading group at the same time, and called out directions to individual children across the room, while the Indian teacher

proceeded slowly, exerted control over the whole class at once, singled out individuals only in small groups. In leaving-the-room comparisons, the Indian teacher exercised control more through movement, more indirectly, and less frequently than the non-Indian teacher. (RS)

Ranch hands gathered around a campfire and old folks rocking on the porch were some of the sources for the 10 folkloric tales presented in this volume. Written in both Spanish and English, this book of traditional tales from the Mexican American people of South Texas is the first of a series of three volumes. Five of the stories deal with the supernatural. One tells of a young man who picks up a beautiful girl by the side of the road, takes her to a dance, and discovers the next morning he spent the evening dancing with a ghost. Another tale discusses Dolores, a girl so beautiful and vain that she has little regard for the feelings of others. It tells how a handsome stranger at a ball asks Dolores for the last dance of the evening, spins her faster and faster, and at the end of the dance is gone, leaving smoke and sulphur fumes surrounding the corpse of Dolores. Two tales deal with clever animals, one a coyote and the other a honeybee. Two more tell of the feats of Don Pedro Jaramillo, a faith healer who lived in South Texas around the turn of the century. A list of vocabulary and cognates is added to each story, along with two questionnaires. The first questionnaire is related directly to the text and is intended for the younger students. Designed for more advanced students, the second questionnaire is suggested by the text. (DS)

Identifiers—*Bakke v Regents of University of California, Chicanos, *Supreme Court

As the decision in the Bakke case drew near, Chicanos addressed the question of what they and higher education could do to insure increased minority admissions into graduate and professional schools. Commonly suggested proposals of changing formal admissions criteria and direct intervention by the law and government often cause more problems than they solve and, at best, address only a small part of the difficulties and dialogue between minority applicants and higher education. As an alternative to those simplistic suggestions, a combination affirmative action approach could include, but not be limited to, some variation of an open admissions system, changes in the traditional ways of selecting faculty members, moving the direct responsibility for minority admission to higher levels of administrative responsibility, precisely defining service areas for different minority populations, recognizing and using the political profiteering that

accompanies present admission practices, retesting terminology to eliminate ambiguous phrases and ambivalent wording, and initiating a low budget commission to study the applicability of open access in graduate and professional training. (Author/NEC)

Biographical sketches of 37 American Indian adults who successfully completed high school equivalency programs are compiled in this booklet designed to meet the two-fold purpose of honoring adult Indian students who have overcome hardships to achieve their educational goals and improving the educational outlook for Indian children through encouraging Indian parents to participate in educational programs. The biographical sketches are arranged under 22 Indian adult education programs, many funded by Title IV of the Indian Education Act of 1972. The biographies, ranging in length from one to several paragraphs, report the educational accomplishments of Indian adults of all ages (from late teens to late sixties), representing over 15 tribes. Emphasis is placed on the individuals' reasons for dropping out of school, their motivation for resuming study, and the benefits from obtaining the GED (General Educational Development Test) diploma. Frequently reported benefits are feelings of personal accomplishment, better jobs, and the opportunity to enroll in higher education degree programs. The booklet includes photographs of many biographies and addresses, phone numbers, and contact persons for each of the participating programs. (JH)

In 1973 a global study aimed toward the development of criteria for establishing institutions for training home economists for rural development programs was initiated by the Home Economics and Social Programmes Services of the Food and Agriculture Organization of the U.N. As a first step, a survey was developed on the variety of roles appropriate to both intermediate and higher level rural home economists, the knowledge, skills and attitudes needed to perform these roles successfully, and suggested criteria for setting up effective training programs. Questionnaires covering these 3 areas were sent to men and women working in different areas and at different levels of rural development in some 100 countries. Although the 375 returned responses varied according to region, overall, there was strong agreement on the major importance or

lack of importance of certain criteria items at each level. For example, home economists with intermediate level preparation, considered knowledge of motivation, management of human and non-human resources available to families, and nutrition and food most important. The intermediate training level skills perceived as important included interpersonal communication, using a variety of teaching techniques, and interesting others in home economics. This document gives the results of the survey and discusses responses and comments made by respondents from the African, Far East, Latin American and Near East Regions. (DS)

Population education is the educational process which helps people understand the implications of population factors for the well-being of the individual, the family and society. Such education seeks to equip the individual with knowledge, understanding and skills that enable him to assess population situations and trends in terms of the problems they may pose and decide upon and take effective courses of action to help solve population-related problems. This kind of training is relevant to people working in agriculture and other areas of rural development because they should understand the impact of population factors on the programs they are seeking to initiate. Rural training institutes may include population education in their teaching program by (1) instituting a separate population course; (2) adding a population unit of study in existing courses, where appropriate; or (3) infusing population elements in relevant topics of existing courses. Depending upon the local conditions and available resources, one or more of these three alternatives may be employed. Population education could be integrated into the curriculum through teacher training, selection of courses containing the new element, potential resources, etc. Examples of courses fitting the three alternatives are appended. Identifiers—Urban Bias

In their role as change agents, rural development personnel often modify the environment in which they are operating when they introduce different technology, institutional modifications, etc. Because these actions can change the relationship between the rural population and its habitat and may encourage out-migration or in-migration, rural development personnel should become more sensitive to the relationship between rural development and migration. Intended for personnel working in the area of agriculture aid, this guide explores that relationship and points out needs for further research. Part I is designed to teach basic concepts, focusing on (1) conditions/measures which tend to act as disincentives to migration; (2) rural development

activities which tend to act as incentives to migration; and (3) rural development activities which tend to encourage migrants to rural areas to remain in their new destinations. Part II considers specific aspects of migration. Section I of Part II covers the urban bias, including its development, its effect on migration and rural development; the urban-rural dichotomy; and the urban-rural continuum. The second section discusses the significance of distance; its relevance to rural development agents; and several research approaches to distance, including physical, sociological, itemized, and global-comprehensive approaches. Section III considers human rights in relation to migration, and the final section outlines a theoretical approach to the role of development on some aspects of migration. (DS)

Learning From China. A Report on Agriculture and the Chinese People's Communes.

United Nations Food and Agriculture Organization, Rome (Italy).

Report No.—ISBN-92-5-100616-4

Pub Date—78

Note—112p.; By an FAO Study Mission (September 9-October 5, 1975).

Available from—UNIPUB, 345 Park Avenue South, New York, NY 10010 (\$6.75).

Pub Type—Reports - Descriptive (141)

Document Not Available from EDRS.

Descriptors—Agricultural Education, Agricultural Laborers, *Agricultural Production, *Change Strategies, *Collective Settlements, *Developing Nations, Human Resources, *Labor Utilization, Land Use, Living Standards, Organization, *Rural Development, Social Influences

Identifiers—*China

A nine-member Study Mission was organized by the Food and Agriculture Organization of the United Nations and visited China in 1975 to study Chinese approaches to agricultural and rural development in depth; to analyze the commune experience as an example of integrated rural development; and to try to determine in what ways the Chinese development experience—or some of its aspects—is replicable. Visiting 12 communes and 22 Mission-Related sites, the Mission found the Chinese waging a "total war" for agricultural production and against backwardness. All potential food sources were utilized; every sliver of land was cropped; even rooftop plots were used. Rivers and canals produced a harvest of organic matter, animal feed, foods, fish, ducks, and geese. Animal droppings, human excrement, crop wastes, and plant materials from city and household rubbish were all turned into compost and returned to the soil. They found that agricultural training was based on the needs of farmers, especially the poor and lower middle "farmers" and that agricultural students were guaranteed jobs upon graduation and returned, therefore, to the rural areas from which they came. This report describes the background of Chinese agricultural development, the Chinese approach to development, and their achievements as related to the commune system of organizing people for production. Implications for other developing countries are discussed. (DS)

Identifiers—*Limited English Speaking, Wisconsin

A detailed program description and evaluation are contained in the final report of a demonstration project designed to prepare certified teachers of limited English speaking ability students for bilingual bicultural education programs. The introductory section summarizes the purpose of the program, which offered traineeships to individuals intending to acquire a major or minor in bilingual education and to become proficient in both Spanish and English. The second section, the bulk of the report, presents objectives and courses for the four-year degree program leading to Wisconsin certification. Required and elective courses are listed by age levels (early childhood through secondary) and by program components (language, culture, professional preparation, and fieldwork in urban classrooms). Subsequent sections discuss selection of trainees, coordination between the university and local education agencies, and collaboration with the Center for Latin America. The final section contains the program evaluation, conducted by an independent evaluator and based on questionnaires administered to all staff and student members of the project. Appendices include a variety of project correspondence and the traineeship application and selection forms. (JH)

Identifiers—Department of Agriculture, *Small Farms

Information about small farms is valuable at federal, state, and local levels to program managers and community developers, researchers and educators, policy makers and farm families themselves. Adequate information can help in the assessment of small farm program needs, development of appropriate policies, and management of effective programs, thereby aiding the well-being of the small farm family and its role in agriculture as a whole. Research activity regarding small farms has increased in the 1970's and has included more reports, extension education directed to small farm families, legislation, small farm research agenda studies and workshops, activities of small farm advocates, and other initiatives of the United States Department of Agriculture. Future policy formation and program management requires information in seven main categories: small farm definition and criteria; the goals and goal achievement of small farmers; their problems and disadvantaged circumstances; available human resources; available farm resources; community institutions; and the family's current use of available resources to achieve its goals and solve its problems. No national or state-wide secondary data source adequately includes all this information. (Author/SB)

Identifiers—*Basic Indian Education Act, Bureau of Indian Affairs. *DINE Project, Native Americans

This collection of nine essays and reports which deal with issues of importance in the progression of Native American education was published by members of the Dine Teacher Corps Project '78 in an effort to stimulate the thinking of curriculum practitioners; content is aimed at affecting administrative styles and the construction and implementation of curriculum. An introduction relates a brief history of Indian Education and reports that the most fundamental need presently is for a change in point of view. Chapters one and two are devoted to the administrative leadership styles necessary for programming; the third and fourth discuss the administrator's role in the development of instructional programs; the fifth and sixth use specific bilingual programming to show the relationship a curriculum must have to particular Indian values, experiences, and needs; and the seventh, eighth and ninth chapters report studies on inservice, financial planning, and leadership programs which are designed to assist the administrator to successfully facilitate effective changes in Native American education. Identifiers—*Texas (South)

Included in this entirely bilingual (Spanish and English) text are 10 traditional tales from the Southwest intended to promote interest in bilingual/bicultural programs and to preserve the colorful folklore of the area. The stories, with black and white illustrations, involve folklore (The Poor Little Naked Bird, "The Devil Takes a Bride", "The Road Runner and the Coyote"); history (The Revenge of the Oppressed, "Stolen by the Comanches", "The Junipero Serra of Texas"); local legend (The Lady in Black, "The Headless Rider", "All or Nothing"); and a children's story (The Royal Beggar). The Spanish and English texts are presented side by side, although the translations are not literal. Following each story are about 20 questions in Spanish and English, some about the story itself and others suggested by the subject matter. Completing the book is a vocabulary section in which 30 to 40 words per story are presented as vocabulary words in both languages or as cognates. The book is second in a series of four. (SB)

Local history and legends of spirits appear often in this bilingual Spanish and English collection of 10 Southwest traditional tales, intended to promote interest in bilingual/bicultural programs and to preserve the colorful folklore of the area. Black and white drawings accompany the stories which deal

with animals ("A Parrot for Christmas", "An Eye for an Eye"); local history and legend ("The Rangers", "Don Pedro's Triumph", "The Cuddling Ghost", "The Voice", "A Watch from the World Beyond"); folklore ("The Magical Pears"); and the social problem of drinking ("Not Only One but Two Devils", "I Wanted to See Mama Also"). The English and Spanish non-literal translations of each story appear together, followed by a series of related questions, also in both languages. The Spanish-English vocabulary section which completes the book contains about 30-40 words and cognates per story. The book is the third in a series of four texts. (SB)

Fourth in a series of bilingual (Spanish and English) texts intended to promote interest in bilingual/bicultural programs and to preserve the colorful folklore of the Southwest, this text contains 10 traditional tales from the area. Accompanied by black and white illustrations, the tales concern local legends and personalities ("Thunder Ramirez", "In Love With a Dead Man", "Smoke for Christmas"); folklore, especially relating to wedding customs ("The Bride Said No", "Watch Out for Short Cuts", "Nothing but the Shoes", "A Devil in the Well", "The Perfume that Kills", "Crazy but Not as Much as All That"); and animals (The Jealous Barn Owl). English and Spanish versions of each story are presented side by side, followed by a series of questions (also in both languages) suggested by the subject matter and directly related to the story. The book ends with a vocabulary and cognate section, listing 30-40 words in both languages for each story. (SB)

Identifiers—Arizona (Phoenix), *National Indian Child Conference 2nd

Essential goals and related objectives for increased effectiveness are presented in conference addresses and in workshops to aid those involved in planning and implementing programs for Indian children. Roles and responsibilities are stressed in the conference addresses, which are titled: "Roles and Responsibilities of Family and Community in Indian Education," "Children and the Bureau of Indian Affairs," "The Robert Kennedy Foundation," and "Powerful Partners: The Role of Parents and the Federal Government in Improving the World of the Indian Child". In the workshops, emphasis is placed on identification of the major problems an Indian child faces and on replication of programs that have been successful in solving these problems. Topics which are addressed in the workshops are: Indian youth, general education, nutrition, career development, parent/child relations, government/legislative, community development, health, recreation, special programs, staff development, child abuse, and early childhood. Also included are a conference evaluation report and list of conference presenters with tribal affiliations. (CM)

Identifiers—Emergency Medical Coordinators, Emergency Medical Services, *Georgia

A pilot project to assess the usefulness of rural volunteer Emergency Medical Coordinators (EMCs) was initiated in 36 rural Georgian towns of less than 2,000 population. An EMC program was established in those 36 rural towns that had no physician or ambulance service, to provide a rapid response to accidental injuries in order to maintain life while professional help was on the way. Selected for the program by their communities according to certain criteria, the EMCs possessed two common traits—the realization that their town needed a "first responder" and the dedication to become an EMC. After EMC candidates had studied an assigned text and workbook, they attended class sessions in Atlanta for 40 hours of formal training. Large group presentations were reviewed and expanded in small group practice sessions. Trained EMCs have taken refresher classes and have maintained knowledge and skills by being observers in ambulances and hospital emergency rooms. As a result, volunteers have been praised for their lifesaving ability and 11 have received lifesaving certificates. While data collection has not been completed, it has been concluded that EMCs have been a viable alternative to the lack of health care manpower in rural areas and have been seen as an important element in rural development, with an expected high impact on the delivery of emergency medical services through the effective use of existing manpower resources. Identifiers—Appalachia, *Appalachian Regional Development Program

The Appalachian Regional Commission (ARC), established by Congress in 1965 as a means of relieving the chronic economic and social distresses of the Appalachian region, is composed of the governors of the 13 states that comprise Appalachia. Local development plans, based upon needs and priorities, are presented to ARC every year by the governor of each state. Abstracts of each state's development plan are presented in terms of objectives, needs and priorities, and investment programs for fiscal year 1980. Community Development, primarily in the areas of water and sewer systems, is named as the top priority objective by 11 of the 13 states involved. Health Care and Housing are

listed by nearly half of the states as the next most important areas of concern. Child Development, Education, and Enterprise Development are equally weighted as the third most important goal named. (CM)

Descriptors—Adult Farmer Education, *Agricultural Production, Agriculture, Economic Status, Extension Agents, *Family Characteristics, Family Financial Resources, *Farm Management, Homemaking Skills, Low Income Groups, Postsecondary Education, *Quality of Life, *Rural Extension, *Rural Family
Identifiers—Missouri, Off Farm Employment, *Small Farm Family Program

Records maintained by rural extension designers on the Missouri Small Farm Family Program, (initiated in 1972 by the cooperative extension service to help low income farm families learn to use available resources to improve their quality of life) provided data re: family characteristics, farm improvement progress, and improvement in the quality of life of participating families. About half of the heads of household and homemakers were 45 years old or less and had at least a high school education; approximately one-third of the reporting families had 5-10 years of farming experience, and the head of household also had off-the-farm employment. In order to increase income, most families had to expand present enterprises or add new ones. Raising swine and beef cows, dairying, and improving land use for hay and pasturing were among the primary enterprises. Forty percent of the families increased their net income, worth and savings over the previous year, indicating that better management can increase income. Improvement in the quality of life was appraised by assessing the increase in home gardening, which reduced food costs, improved diet and health, and provided enjoyable family activities; and the improvement of family resources, which increased food preservation and production, improved farm and home record management, and promoted home weatherization practices. Every Child's Right to Food: A Handbook on Federally-Funded Child Nutrition Programs.

Children's Rights Group, San Francisco, Calif.
Spons Agency—Community Services Administration (DHEW), Washington, D.C.

Pub Date—78

Note—75p.; Not available in paper copy due to colored paper.

Available from—Children's Rights Group, 693 Mission Street, Suite 500, San Francisco, CA 94105 (booklet, \$5.75 ea., information packets, \$3.00 ea., slides, \$25.00).

Pub Type—Guides - Non-Classroom (055) — Reports - Descriptive (141)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—*Breakfast Programs, *Child Advocacy, Day Care, Elementary Secondary Education, Federal Programs, Food, *Lunch Programs, *Migrant Children, Nutrition, Preschool Education, *Program Development, Resource Allocation, School Community Programs, *Summer Programs
Identifiers—*National School Lunch and Child Nutrition Act 1975

In recognition of the fact that food is an important step in the educational process and in order to generate new child nutrition programs in communities across the nation (especially in rural communities with significant numbers of migrant farmworkers' children), basic information is presented about four federally funded child nutrition programs. Details

offered on the National School Lunch Program, National School Breakfast Program, Summer Food Service Program, and Child Care Food Program include rules for participation, required foods, rates of reimbursement, non-food aid, federal commodities, and sponsorship. Ideas are discussed for developing a child nutrition program in any community (form a committee, visit the school superintendent, build a coalition, use the media, offer resolutions at various community meetings, speak individually to school board members, and make a strong presentation to the school board). One chapter is devoted to the special needs of the 680,000 migrant children attending public schools in the United States. It is noted that full implementation of the child nutrition programs would free those Title I Migrant Education funds now sometimes used for food and would assure better nourishment and a better education for migrant children. Order forms are appended for information packets, slide shows, and posters. (AN)

Descriptors—Advisory Committees, *Career Education, Community Involvement, Curriculum Development, *Elementary Secondary Education, Environmental Education, Home Economics, Industrial Arts, Interdisciplinary Approach, *Pilot Projects, Program Descriptions, *Program Development, Program Implementation, *Small Schools, Student Organizations, Vocational Education

Identifiers—Creative Career and Vocational Education Project, *Oregon, *Small Schools Career Education Development Project

Oregon offers this guide to assist educators in establishing career education programs in small schools. K-12. Section 1 gives suggestions for promoting awareness, exploration, and preparation and lists goals for incorporating career educational concepts into all areas of the curriculum. Emphasis is placed on vocational clusters and special programs, home economics, industrial arts, guidance, community involvement, advisory committees, vocational student organizations, and energy education. Section 2 contains an updated report on the results of the pilot project at Amity, Condon, and Lost River. Each school has developed a different approach based on local needs and resources. The Creative Career and Vocational Education Project (1977-1980), funded to assess difficulties in establishing career and vocational programs in schools with an enrollment of 75 or fewer students, is now in progress at 2 high schools (Alsea and Mitchell). Section 3 presents profiles of the current career and vocational programs and activities in Oregon's small schools. The profiles indicate that emphasis is placed on career awareness and exploration in grades K-8 and on development of career related skills and competencies in grades 9-12. High school programs are numerous and varied. Names of contact persons for each school are included, and inquiries and personal visits are encouraged. (CM)

Descriptors—*Adjustment (to Environment), American Indians, Blacks, Coping, Cultural Influences, *Emotional Response, *Ethnic Groups, Hispanic Americans, *Minority Groups, *Older

Adults, Social Science Research, Socioeconomic Influences, Stress Variables

Identifiers—*Life Threatening Events

A review of pertinent research on the adaptation of ethnic minority elderly to life-threatening events (personal, man-made, or natural) exposes voids in the research, presents methodological considerations, and indicates that ethnic minority elderly are disproportionately victimized by life-threatening events. Unusually high numbers of fatalities/injuries are found among the aged and minorities after natural disasters. This fact may be partially attributed to physiological deficiencies, sociocultural factors, and/or economic circumstances of the elderly and minorities. However, there is conflicting evidence regarding the psychological impact of disasters on the elderly, therefore other mitigating variables need to be explored before age differences in emotional adaptation can be more fully understood. In addition to natural disasters, life-threatening events may take the form of illness or injury of self or loved one, war, vehicular accidents, explosions, collapse of buildings. This research review manifests some methodological concerns (issues of cultural encapsulation, culturally sensitive classifications, the influence of folk beliefs on decision-making, and appropriateness of survey instruments/ items/scaling procedures) and underscores the need for future studies of the aging process, ethnicity, and adaptation to the stresses in life. A Guide for Evaluating and Selecting Multicultural Instructional Materials.

Illinois State Board of Education, Springfield.

Pub Date—[74]

Note—30p.

Pub Type—Guides - Non-Classroom (055)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Cultural Pluralism, Elementary Secondary Education, *Ethnic Bias, Evaluation Criteria, *Evaluation Methods, Guidelines, *Instructional Materials, *Media Selection, *Multicultural Education, *Racial Bias, State Legislation, Stereotypes, Textbook Selection
Identifiers—Cultural Contributions, *Illinois

Designed for both school and community personnel, this guide provides assistance in the evaluation and selection of ethnically valid instructional materials which reflect the role and contributions of the diverse racial and ethnic groups in American society. There is a list of 10 criteria for the selection of instructional materials and a statement of the major considerations involved in choosing textbooks that are racially unbiased. The principal method of evaluation described consists of a series of questions with examples which teachers, educators, publishers, or parents can use to examine the content of either individual passages or an entire text for ethnic or racial bias. The questions focus on omissions, stereotypes, distortions, impositions of standards, contributions, and derogatory language. The guide also suggests a method for correcting unacceptable passages. Finally, there are content analysis questions to be applied to the work as a whole. The appendices include names and addresses of the Illinois regional advisory committees, names and addresses of textbook publishers, and a plan for the effective use of these guidelines. (CM)

Indian Youth Leadership Conference Report.
Arizona State Dept. of Education, Phoenix.
Pub Date—Sep 79

Note—40p.; Report of the Arizona Johnson-O'Malley Indian Youth Leadership Conference (White-river, AZ, September 28-30, 1979).

Pub Type—Collected Works - Proceedings (021) — Reports - Descriptive (141)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*American Indian Education, American Indians, Failure, *Group Dynamics, Leadership Styles, *Leadership Training, *Problem Solving, Secondary Education, Self Concept, Success, Summative Evaluation

Identifiers—Arizona, *Del Becq Model

Participating in an Indian youth leadership conference which used a group interaction model were 125 persons from various school districts, tribes, and Indian organizations throughout Arizona. Goals of the conference were: (1) to give Indian students the opportunity to express needs and exchange resources and ideas leading to possible solutions and plans for action in Indian education; (2) to provide opportunities for Indian student leadership skills; and (3) to encourage Indian students' participation in problem-solving activities. A pre-conference training session conducted in the Del Becq model for group activities was held for 25 student facilitators. Conference participants prioritized their concerns for Indian education and arrived at possible solutions for alcohol and drug abuse, lack of good self-concept and pride, lack of participation in school activities, dropouts, peer pressure, and lack of encouragement at home. Workshops were held on counseling and various aspects of leadership. The workshop speakers all referred to the Blueprint for Success/Failure which indicated the needs, possible solutions, and plans for action in which Indian students can participate. Participants evaluated the conference and made recommendations for future conferences in this area. (AN)

Utilizing data from several studies done at Texas A&M University during the last 12 years, this paper develops a systematic interpretation of the idea of "minority-group orientation" and tests the adequacy of these concepts as an aid to understanding potential diversity among rural Mexican American youth with regard to intergroup fusion. The paper lists three major levels of interpenetration (cultural, social-structural, and psychological) and elaborates on four subtypes under each major level. An assessment of the data as it relates to the interpenetration levels produces these conclusions: (1) few rural Mexican American youth desire extreme ethnic differentiation; (2) a substantial amount of diversity exists in both nature and degree; (3) the major type of orientation desired across the level-type in each case represents "substantial" but not "complete" fusion; (4) in terms of cultural and social-structural fusion, subjects were possibly not uniformly in favor of comprehensive intergroup fusion; (5) females are more likely to be assimilation-oriented than males. Descriptors—Biculturalism, *Disadvantaged Youth, Employment Counselors, *Employment Opportunities, *Individual Differences, *Mexican Americans, Minority Groups, Needs Assessment, Occupational Aspiration, *Program Development, *Rural Youth, Sex Differences, Sociocultural Patterns, State Federal Aid

If youth employment programs for rural areas are to be successful in helping rural youth to find employment that is both desirable and developmental, the diversity of ability, skills, needs, life goals, and particular circumstances of these young people must be taken into consideration. According to a 1976 study by Kuvlesky and Edington, there is a strong tendency for particular ethnic patterns to exist in the occupational aspirations of rural disadvantaged youth. There is also great intracategory variability for each ethnic-gender type. Findings over a 10-year period indicate that Mexican American youth are socially, culturally, and psychologically bi-ethnic but that they vary in terms of what ethnic subculture traits they want to maintain and in what social contexts they desire to interact with Anglos. In general, Mexican American girls are more comfortable in bi-ethnic work situations than are many Mexican American boys. Though youth vary in the type of employment they want and need, they are very concerned about getting employment and earning money. There is a shortage of jobs for disadvantaged rural youth and a lack of diversity in those jobs that are available. A state and federally funded national policy aimed at improving employment opportunities, social and work skills, and counseling services for disadvantaged rural youth is one means of correcting this situation. Identifiers—*Experimental Schools Program

Abt Associates' concluding report on its research of the federally funded Experimental Schools (ES) program identifies educational needs in rural schools, introduces the substance of the ES program, and presents the major findings of the research in terms of the dynamics of rural school districts and the design and implementation of federal programs to facilitate rural school improvement. The report discusses 9 areas of concern in understanding the sociocultural context of rural schools which can both facilitate and constrain the educational change process, and defines 12 problem areas likely to be faced by program planners and project officers involved in designing and implementing federal programs in rural school districts. The researchers conclude that programs and procedures which are successful in urban and suburban districts should not arbitrarily be applied to rural school districts, and suggest that the federal government reconsider the special needs and characteriza-

tions of rural school districts in light of the findings of the ES research. Appendices include bibliographies of project reports, writings, and papers, as well as a description of each of the 10 rural ES districts. (JD)

Identifiers—*Experimental Schools Program

Compiled for school administrators who must initiate or respond to external mandate for change, this guide draws on the experiences of 10 rural school districts that participated in the federally funded Experimental Schools (ES) program for perspectives that can be used in the successful management of change efforts in school districts. Organized around four areas of knowledge which administrators need in order to promote, guide, and survive changes, the booklet emphasizes the importance of understanding: (1) an accurate and realistic image of organizational settings; (2) the change process and its important stages; (3) the pitfalls and opportunities that previous efforts have revealed; and (4) ideas for designing strategies which can be effectively used in a particular local context. Discussions of case studies of the ES districts reveal how the change process unfolds and how conflicts can be resolved; outline an image for viewing change in educational organizations; and offer specific guidelines for approaching change in small school districts. Forecasting Repeat Child Abuse from Initial Social Worker Reports: A Metropolitan and Non-metropolitan Comparison.

Pub Date—20 Aug 80

Note—18p.; Paper presented at the Annual Meeting of the Rural Sociological Society (Ithaca, NY, August 20-23, 1980). Best copy available.

Pub Type—Reports - Research (143) — Speeches - Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Behavior Patterns, *Case Studies, *Child Abuse, *Comparative Analysis, Demography, Injuries, Metropolitan Areas, *Prediction, *Rural Urban Differences, Social Science Research, Social Services

Identifiers—Nonmetropolitan Areas, *Wisconsin

Since the phenomenon of reabuse is postulated as being more probable after initial child abuse than is the probability of an initial abuse and since only modest inquiry has been directed at this phenomenon, research was conducted to answer two questions: Is there patterning to reabuse? And if so, is this different in metro and nonmetro environments? Data were derived from the official Wisconsin Central Registry of Child Abuse reports for January 1973 - May 1978, during which time a very structured instrument was used for 10,666 reports. General variable areas investigated were geographical environment, abuse incident characteristics, demographic characteristics, and case management by the social worker. Of the certain or legally established cases, 2,439 (56.5%) were metro and 1,874 (43.5%) were nonmetro cases. This constituted an averaged annual abuse rate of 48.3 metro and 54.1 nonmetro per 100,000 children. Retained for analysis were 310 reports (152 metro/158 nonmetro) where reabuse had occurred and had been recorded. This constituted an averaged annual reabuse rate of

0.30 metro and 0.46 nonmetro per 100,000 children. It was concluded that there was patterning but not very strong and that the patterning was somewhat different in metro/nonmetro areas. It was also concluded that the model developed for forecasting was only slightly better than chance. (AN)

The transcript of the March 28, 1980, Senate hearing on the Indian Health Service (IHS) and reauthorization of the Indian Health Care Improvement Act (Public Law 94-437) held in Billings, Montana, is presented with testimony from the Three Affiliated Tribes of North Dakota, Montana Indian Association, Montana Indian Health Board, Fort Peck Tribe, Crow Tribe, Omaha Tribe of Nebraska, Northern Cheyenne Tribe, Fort Belknap, Flathead Tribe, and Devils Lake Sioux Tribe. Testimony is included on Public Law 93-638 (the Indian Self-Determination and Education Assistance Act), various aspects of IHS, Indian health services/facilities/programs, problems of reservation Indians and of Montana's urban Indians. Testimony includes requesting renewed funding for the American Indians Into Medicine (INMED) Program under Title I of Public Law 94-437, which provides for Indian health manpower development. Details are included on INMED, which is based at the University of North Dakota, and serves 22 reservations in North Dakota, South Dakota, Montana, Wyoming, and Nebraska. INMED is described as a program which identifies prospective medical career students from all grade levels and aids them in obtaining an advanced degree in the medical field. Appended are statements from Wind River Arapahoes and the National Urban Indian Council. (AN)

A Critique of the Freudenberg Energy Boomtown Study from a Field Theory Perspective.

Pub Date—20 Aug 80

Note—14p. Paper presented at the annual meeting of the Rural Sociological Society (Ithaca, NY, August 20-23, 1980).

Pub Type—Information Analyses (070) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Change Strategies, Citizen Participation, *Community Characteristics, *Community Coordination, Community Development, *Cooperative Planning, Educational Facilities Planning, Facility Planning, Problem Solving, Quality of Life, *Rural Development, Theories

Identifiers—*Boomtowns, Colorado, *Field Theory The persons and groups who held lead roles in the development of an electricity generating plant near Craig, Colorado, and/or aided in problem solving activities are the concerns of this examination of boomtown studies in which field theory is employed as a framework for assessing Craig's community structure characteristics. The usefulness of field theory is assessed in regard to enhancing a locality's capacity to deal with the boomtown phenomenon. A segmented community structure in Craig is exposed by an analysis of the actions taken by various persons and groups (including constructing new schools); and a common theme is revealed by a re-

view of other boomtown studies, namely, that managing rapid change in a community is possible if local residents and groups can work cooperatively in identifying and solving common problems. It is concluded that field theory can provide a framework for the development of a local structure which can effectively plan for change, a structure that establishes programs which are comprehensive as to interests and coordinated as to effort. It is also concluded that if Craig and other boomtowns could have developed this type of coordinated local structure, the negative consequences of the boom on the host community would have been minimized. The Population Turnaround in Central Appalachia: A Focus on Eastern Kentucky Coal Counties.

Pub Date—19 Aug 80

Note—26p. Paper presented at the annual meeting of the Rural Sociological Society (Ithaca, NY, August 19-23, 1980).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Area Studies, Comparative Analysis, Educational Status Comparison, *Employment Opportunities, *Extended Family, *Migrants, Migration Patterns, *Motivation, Quality of Life, Regional Characteristics, Rural Areas, Rural Population, Sociocultural Patterns, *Socioeconomic Status, *Urban to Rural Migration

Identifiers—Appalachia (Central), *Kentucky (East)

Examining the reversal in out migration since 1970, this study of seven coal-producing, non-metropolitan counties in Eastern Kentucky explored employment related reasons for moving and compared socioeconomic characteristics of residents and migrants. Viewed as typical of major social and economic trends in central Appalachia, Kentucky was chosen for the mail questionnaire survey involving a sample of 2,958 registered voters, whose response rate was 68.9%. Results indicated: (1) strong kinship networks existed in the area; (2) the main reasons for moving to the area were family ties, employment, environment, and retirement; (3) migrants returning because of family ties were younger, less educated, more likely to hold blue-collar jobs, and had lower income; and (4) Kentucky residents were older, less educated, and more likely to hold white-collar jobs than migrants. Conclusions were: (1) kinship ties were seen as a major auspice of migration that may provide a social organization within which migration occurs, even among people who are seeking employment; (2) recent improvements in the coal industry have not been the major stimulus for migration, as quality of life and extended kinship ties were deemed more important reasons for return migration; (3) the "revival of non-metropolitan America" should be seen as a multifarious phenomenon. PURE's (People United for Rural Education) third national rural education conference focused on the survival of rural education in the 1980's. The conference was divided into 4 general sessions and 15 concurrent sessions. Topics addressed in the general sessions were: projections for rural education in the Midwest; considerations for financing rural schools; design of a non-graded, individualized school in Utah; the need for cooperative action in strengthening rural education; community schools versus consolidation; encouragement of federal concern with rural education; and congressional points

of view. Subjects which were presented in the concurrent sessions included: the role of the woman administrator; activity time and generation of teacher enthusiasm; sharing professional services (Iowa's small school project); college involvement with teacher preparation for rural education careers as implemented by Luther College (private) and the University of Northern Iowa; competitive federal grants (characteristics of successful applications); rural telecommunications service systems; use of public television to enhance curriculum; ERIC (Educational Resources Information Center) for librarians; Public Law 94-142; the impact of special education on small schools; equalization of educational opportunities; local chapters and community involvement; community education in rural schools; an alternative, delivery system for rural education; and congressional points of view concerning the survival of rural education. Descriptors—Adult Vocational Education, Affirmative Action, *Bilingual Education, Educational Policy, Elementary Secondary Education, Federal Aid, Government School Relationship, *Hispanic Americans, Multicultural Education, *Parent Participation, Politics, Problems, *Program Development, Relevance (Education), *Teacher Education, Test Validity, Tutoring

Identifiers—*Lau v Nichols, United States (Southeast)

Focusing on the problems of and recommendations for identified areas of concern in the education of Hispanics in the Southeast, this conference report has three major sections. Section I, "Conference Report," outlines the conference proceedings and presents a compilation of critical issues and recommendations concerning affirmative action, linguistically and culturally relevant program delivery, special needs, tests and research, bilingual instruction, access to Federal funds, parent and community involvement, and politics and Hispanic education. Section II, "Hispanic Educational Concerns," lists 13 issues and recommendations presented to the United States Secretary of Education. Broad major areas of concern include Hispanic representation in the Department of Education, bilingual education, effective programs for the disadvantaged, the Lau Remedies, recognition of foreign degrees, and the role of advocacy offices in the Department of Education. Section III, "Hispanic Parents and the Schools," recounts the extent to which Hispanic parents have been involved in the educational processes of their children, describes a program to promote parental involvement in the tutoring of their own children in the basic skills, and proposes a set of recommendations for those individuals involved in parental programs. Descriptors—*Advertising, Bibliographies, Books, Case Studies, *Community Coordination, Community Information Services, Community Involvement, Librarians, *Library Extension, Outreach Programs, Periodicals, Public Libraries, *Public Relations, *Reference Materials, *Rural Areas, School Libraries

Though the major emphasis of this bibliography is public relations in general, reference is made to titles concerned with specific ideas for establishing a public relations program for a library. Among ideas suggested for use in establishing a library public relations program are: (1) educating the community in terms of what the library has to offer it; (2) advertising the library (radio, television, newsletters, newspapers); and (3) developing programs, exhibits, and

projects. Compiled in relation to the rural library, the bibliography offers 172 articles and books published between 1959 and 1979 for use by public and/or school librarians. Reference is made to specific case studies of library public relations programs. The entries are arranged alphabetically by author, but do not offer annotations for each entry. (MJO)

Identifiers—Africa (West), Brazil, India, Iran, Japan, Middle East, *Rural Sociology

Published in order to further a better understanding of how work in the field of rural sociology is carried on in various places, the six papers describe pedagogical and research activities relating to the sociological concern for rural people in West Africa, Brazil, Iran, the Middle East, Japan, and India. Each paper describes the evolution of rural sociology in one of the six areas, the nature of that area's rural sociology, the institutions in the area which can or do teach and/or undertake pertinent social research, and the current status of rural sociology in the area. In addition, "The Development of Rural Sociology in West Africa" and "Position of Rural Sociology in India" note problems with personnel training and "Rural Sociology in Japan: Milestones in Development" critically compares contemporary Japanese rural sociology with the discipline in other countries. "Rural Sociology in Brazil" notes a trend toward urban studies, while "History and Development of Rural and Peasant Studies in Iran" outlines many early village studies. "State of Agricultural Social Science and Related Fields in Selected Countries of the ECWA Region" assesses the related but generally insufficient academic offerings of 42 national universities and other educational institutions in 12 Middle East countries. Language Attitudes of and Toward Spanish/English Bilinguals.

Pub Date—80

Note—23p.

Pub Type—Information Analyses (070)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Anglo Americans, *Bilingual Education, *Bilingual Students, English, Ethnicity, Immigrants, *Language Attitudes, *Mexican Americans, Social Attitudes, Sociolinguistics, Spanish, *Teacher Attitudes

Identifiers—Chicano Movement, *United States (Southwest)

The causes and effects of resistance to the acknowledgement and appreciation of the language skills and characteristics of United States Southwest bilinguals can be seen in both the Hispanic and Anglo communities. The cultural inferiority ideology of Americans to Mexicans is a historical cause of this resistance, and it is reflected in the bilingual's attitude towards his own speech. Many studies have indicated an inverse relationship between the bilingual's use of the ethnic language and his attitude towards it. The Chicano movement has deepened the anti-Spanish-language attitude observed especially within the less assimilated portion of the bilingual community. The attitudes of public school teachers also play an important role in students' acceptance or rejection of their mother tongue and heritage. Teacher attitudes, often less than objective, can result in low academic achievement for bilingual students. Teacher attitudes are but a small part of the greater Anglo ethnocentrism which has characterized United States opinion, policy, and practice. Bilingual education, in the sense of bilingual maintenance programs, is seen by many as a

solution to the problem of accepting linguistic diversity. Another is recognition by both Anglo and bilingual communities of the value of linguistic diversity. (SB)

Emphasizing developmental problems caused by the rapid population and employment growth in rural America during the 1970's, this document describes social, economic, and governmental trends in rural America and suggests some federal policy choices that might be made in support of rural development. Problem areas and policy suggestions are presented as follows: (1) diversity and isolation cause rural poverty to differ from urban poverty, and policy development must acknowledge this difference; (2) changing patterns in rural growth and settlement necessitate the application of new forms of organization and technology for more effective planning and services in rapidly growing isolated areas; (3) the increasingly nonagricultural character of rural areas effects rural economy (therefore, economic development policy should address the needs of the entire rural population); (4) economic and political natures of local governments must be understood in order to correlate their actions and effectiveness in the framework of federal capacity building; and (5) 1976 analysis of federal spending in rural America illustrates difficulties in assessing the equity of federal spending for rural health, education, and manpower programs. More study is needed regarding urban bias and federal policy for adequate rural programs. (JD)

Quinones-Sierra, Sylvia

Rape Within the Hispanic Family Unit.

Pub Date—Mar 80

Note—10p.

Pub Type—Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Beliefs, *Cultural Influences, Cultural Traits, *Family Attitudes, *Females, *Hispanic Americans, *Rape, Religious Factors

Because problems such as rape are often viewed as personal concerns of "la familia" there is great tendency on the part of Hispanics to accept this crime as something that must be resolved without intervention from the police, the hospitals or the courts. Seldom will much needed therapy and auxiliary type services be sought due to the extreme sense of embarrassment that such an act has caused the entire family. Historically and even today, Hispanic families seem to have responded to this threat by keeping female members close to the home or with an official escort. Thus, the Hispanic woman is taught to see the world as threatening and to maintain a cautious attitude. Reactions of Hispanic rape victims are consistent with their cultural and religious heritage and their own personal belief systems. If women are to fully combat this social cancer then they must do so with understanding, determination, vigor and unrestrained perseverance. Hispanic intensity must be seen in the eyes and felt in the hearts of every Hispanic "mujer" who feels for her sisters who have been rape victims. Women can help themselves and the time for action is now. (AN)

Intended to aid teachers, librarians, and others in the selection of Spanish-language books for children in grades K-12, the annotated guide includes books by Hispanic authors which highlight the lifestyle, folklore, heroes, history, fiction, poetry, theatre, and classical literature of Hispanic cultures. Most books included in the guide have been published since 1973. Still in print as of January 1978, all the books are readily available and widely read by children in Spanish-speaking countries. Textbooks and translations are not included. The books in the guide have their origins in Argentina, the Caribbean region, Chile, Colombia, Costa Rica, Cuba, Ecuador, Guatemala, Mexico, Peru, Puerto Rico, Spain, Uruguay, and Venezuela. The listings are organized by country; within country, by genre; and within genre, by author. Each citation includes: publishing date; a tentative grade level assignment; a descriptive and evaluative annotation; and a designation of the book as outstanding, marginal, or not recommended. Appendices list the names and addresses of book leaders in Spanish-speaking countries and of United States book dealers specializing in books from Spanish speaking countries. Author, title, and subject indices are included. (SB)

This resource for teachers and librarians who seek to use literature to expose students in grades K-12 to Mexican and Mexican American culture is organized in five major theme areas: customs, lifestyles, heroes, folklore, and key historical developments. Within each major area is a 4-part learning plan for each of three grade levels: K-2, 3-6, and 7-high school. Part one consists of specific learning objectives related to the theme area. Part two is a list of pertinent books organized alphabetically by author. An attempt has been made to include as many as possible of the books about Mexican and Mexican American children that are currently available in United States school and public libraries. Part three contains a brief discussion of each learning objective and an evaluation of each book as it relates to the objectives, specifically noting strengths, weaknesses, and examples of cultural bias. Part four contains suggested follow-up and evaluation activities. A pre- and post-test student attitude survey is included as are three previously published articles dealing with the selection of non-culturally biased Spanish-language children's literature, the scarcity of children's literature in Mexico, and the wealth of children's literature in Spain. Author and title indices are provided. (SB)

Identifiers—Bureau of Indian Affairs, *Education for All Handicapped Children Act

Recognizing the need for a new approach to the problem of federal/state jurisdictional overlaps in delivery of services to Indians, the Bureau of Education for the Handicapped contracted with the National Association of State Boards of Education and Indian Education Training, Inc. to conduct a series of national and regional conferences which would identify problem areas, make recommendations, establish linkages, and create communication networks among the major providers of educational services to handicapped Indian children. A national conference was held in Washington, D.C. in November, 1977, which brought together knowledgeable representatives from Indian tribes and a number of federal and state agencies. These experts discussed the problems confronting the provision of a free, appropriate public education to handicapped Indian children and identified five broad areas of concern: child-find, due process, evaluation and testing, training and program development, and support services. These issues were examined in detail by state and federal agency personnel, representatives of Indian tribes, and advocates at the regional conferences held later in the year. Findings of the regional conferences were summarized and 11 recommendations were specified. (Author/AN)

Identifiers—*Supportive Services Program

Operating within the New York City Public School System for the past four years, this program offers direct services to Native American students and their parents by providing: (1) instruction in Native American history and cultural activities; (2) academic tutoring; (3) school/neighborhood liaisons; and (4) a resource center for information about Native Americans which includes a research library and telephone information service. Emphasis is on staff development and parental involvement. An evaluation based on data obtained from interviews with staff and participants, observations of various program activities, and examination of records indicates that the program has been successful in accomplishing its objectives, particularly in its school/neighborhood liaison component, in dissemination of information through the resource center and curriculum guides, and in its after school instructional program in Native American history and culture. Recommendations for next year include refinement of the history/culture tests and of the tutorial program, formulation of realistic competency standards in obtaining an Indian language instructor, implementation of better ways to collect needed information, and clarification and improvement of working relationships among the staff, the

project director, the Board of Education, and the Parents' Committee. (CM)

Identifiers—*Thy Project (Denmark), *United Nations University Centres

Inspired by a United Nations effort to establish a worldwide university, the four and one-half year project carried out in Thy (Denmark) is explained in this final report, from its historical beginnings in 1973 to its official completion in 1978. Dedicated to the solution of problems which could be considered universal, the project goals are described as: finding alternative energy sources and technologies and utilizing the untapped reservoir of lifelong educational resources and out-of-school learning activities. The work themes, arrived at by local task force participants and aided by international assistants, are presented as a "regenerative farm" and a "learning community". Developments, settings, implementations, and practices of the two-fold project are examined, and local, national and international participation and collaboration are reviewed. Outcomes are evaluated as positive and constructive, both in terms of accomplishing local goals for community development and educational improvement, and in initiating an internationally transferable model for meeting human global needs. Identifiers—*Colorado, Elementary Secondary Education Act Title I

The evaluation report of the 1977-78 Colorado Migrant Education Program (federally funded through ESEA Title I) describes the supplementary programs, summer programs, and support services employed to provide educational services to migrant children throughout the state. It is reported that the program, operated by school districts and boards of cooperative services, emphasized basic skills in reading, language arts, and math, in addition to a full range of instruction. Fifteen regular year programs which were held in 40 school districts for 1,429 migrant students are identified, as well as the 16 summer programs in 36 districts for 2,336 students. The document describes the instructional, administrative and support staff of 122 full- or part-time persons for the regular year programs and 362 full- or part-time personnel for the summer programs. The evaluation reports significant gains in reading and math skills of students participating in the program, as judged by teachers, pre/post standardized tests, and pre/post objective referenced tests. It is recommended that the state staff review local operations and support services. The report covers: state program administration, local program description, program results, support services, program costs, conclusions, and recommendations. (JD)

Identifiers—*Colorado, Elementary Secondary Education Act Title I

The 1978-79 evaluation report describes projects, participants, personnel, and services involved in the state's efforts to provide comprehensive educational services to migrant children throughout the state. The program, operated by 10 school districts and 10 boards of cooperative services, highlights 3 projects on the basis of their innovative techniques and high attainment of objectives: (1) a student publication; (2) pesticide safety education programs; and (3) the Colorado identification and recruitment program. The report identifies the 2,014 regular year and 2,415 summer term students and indicates that the programs in general are resulting in gains in reading, language, and math skills for the majority of the students. A program critique recognizes the major strength of the local projects as being the quality and commitment of local staff, and the major weakness as inadequate number of staff. The recommendations include: (1) increased use of comparable outcome measures of program impact; (2) coordinated efforts to determine appropriate testing for this special population group; and (3) streamlined evaluation reporting process. The report also covers: teacher-pupil ratio, interrelationships with other programs and agencies, inservice training, dissemination, community involvement, and objectives. (JD)

Identifiers—*Colorado, Elementary Secondary Education Act Title I, *Migrant Student Record Transfer System

Developed within the Colorado Migrant Education Program as a workable manual for non-classroom personnel (recruiters, clerks, and terminal operators) involved with migrant education, this guide also functions as a training manual. The manual may also be used to assist local education agencies in planning and organizing migrant education programs. Each of three sections for recruiters, records clerks, and terminal operators defines job qualifications, duties, and responsibilities and includes forms, reports, charts, maps, and lists used in carrying out that particular job role, as well as discussions of policies, procedures, and problems involved in each particular area. A fourth section contains forms, reports and explanations used in the Migrant Student Record Transfer System (MSRTS). MSRTS Oral Language Outlines are presented in English and Spanish. (JD)

Identifiers—*Migrant Head Start Programs, *Migrant Home Base Centers, Project Head Start

The report provides Indian and Migrant Program Division managers and specialists in each of the 5 Head Start component areas with a comprehensive picture of the 43 home base learning centers operating between October 1978 and May 1979, with a total enrollment of 3,108 migrant children. Using data collected from the Head Start and center directors, the staff responsible for service delivery in each program component, and the parents, this Phase I report presents detailed, component-specific information on program activities, interactions between program staff and users, and special problems which arise in the areas of education, health, nutrition, social services, and parent involvement. Specifically, the report (1) describes the organizational structure and the administrative and support functions of the 6 grantees which run the 43 home base programs; (2) provides profiles of the service delivery systems operating at the home base sites—program design, staff characteristics, resource inputs and service outputs of each program component; (3) provides profiles of the children and families using home base programs—demographic characteristics, mobility, previous exposure to Head Start programs, use of other social service programs, contacts and interactions with current programs; and (4) develops measures of special needs of program users and program efforts to meet these needs. Utilizing specially designed interview schedules to evaluate the kinds of services children and families receive from various Migrant Head Start programs throughout the country, this preliminary report on home base findings consists of questions asked of the staff at every Migrant Head Start site across the country and questions asked of parents who have children enrolled in the program. The report includes a frequency distribution table for each question asked. Section I, "Program Instruments and Data," contains staff interview questions on the following modules: center director, education, health, nutrition, service, and parent involvement. It also contains topical guides for program and staff record review and for a surveyor's walk-through and check list. Part II, "Family and Children Instruments and Data," provides the parent interview schedule (home base) and a topical guide to children's records. (CM)

Descriptors—Agricultural Production, Capitalism, *Definitions, *Economic Factors, Regional Characteristics, *Rural Areas, *Rural Urban Differences, Social Influences, Social Systems, *Sociology, Space, *Theories

Identifiers—Mode of Primary Production, *Rural Sociology

To be scientific, rural sociology must have a distinctive conceptual basis; therefore, defining "rural" has long been a major concern of rural sociologists. Recently faced with similar problems, political economists have revitalized the field of urban sociology by looking beyond the city to the social production of spatial forms under capitalism. This study applies a related critique to rural sociology, which has traditionally defined "rural" as cultural, ecological, or occupational. The two main explanations of rural culture are inadequate. "Gemeinschaft" is essentially non-capitalist and also not specifically rural; the same conceptual tools offered by the new urbanists can be used to analyze all types of contemporary communities. Human ecology reduces culture to an outgrowth of settlement patterns, thus obscuring the structure of social and economic relations. The current proposal for a comprehensive rural ecology identifies some definite objects of study, but its theories of space and society fail to consider underlying political-economic determinants. Two suggested constituents of rural are: "capitalist space" in the form of exploited, peripheral regions; and the "mode of primary production," distinguished by its unique, direct interaction with the natural environment. Rural sociologists are now beginning to treat agriculture, the other extractive industries, and regional underdevelopment as crucial elements in the larger capitalist social system. (Author/CM)

To examine the question of how and to what extent Mexican American and Anglo mothers differed in their assessments of desirable role behavior for the teachers of their children, a 27-item Likert-type scale was devised and used to interview 10 Mexican American and 10 Anglo mothers. The questionnaire, written in both Spanish and English, was designed to examine several different dimensions of the teacher's role. While some of the results were in accord with published literature concerning linguistic and cultural differences between Mexican American and Anglo populations, some literature based differences which might have been expected did not appear in this sample. Both Mexican American and Anglo mothers made "field sensitive" choices concerning teachers' warmth, friendliness and affection with students and praises of students. Both groups of mothers placed high importance on rigorous and demanding teaching standards. More Mexican American mothers stressed competitiveness than did Anglo mothers. Though this research was preliminary in nature, was not based on random sampling, and may have been influenced by uncontrolled socioeconomic variables, the survey method provided questions for future study. Table 1 details the study's results. (CM)

Identifiers—3-b Titles

Designed to help educators improve equity in language and illustrations in their teaching materials, the guidelines in this booklet focus on equality toward men and women, racial and ethnic minority group members, and handicapped persons. The narrative portions of each section are enhanced by specific examples to use ("The average school principal works closely with teachers") and to avoid ("The average school principal works closely with his teachers"). In addition, ideas are delineated on how to apply the guidelines. The section on nonsexist treatment of men and women includes two subtopics, language (the generic "he", occupational titles, parallel language, and letterwriting) and sex roles and traits (emotional traits of women/girls and men/boys, family patterns, occupational roles, role models, parenting roles, historical references, and physical appearances). The section on minority groups contains discussions on language and roles/traits of minorities. The section on representation of handicapped persons suggests that in developing education materials, one might ask, "Are stereotypes, such as portraying the blind as helpless, avoided?" The section on avoiding stereotypes in graphics and audiovisuals deals with a numerical balance of the sexes, sex stereotypes, physical types and handicaps, and racial or minority stereotypes. (AN)

Descriptors—American Indians, Asian Americans, Blacks, *Criteria, *Cross Cultural Training, *Cultural Interrelationships, Curriculum Development, Elementary Secondary Education, *Ethnic Groups, *Inservice Teacher Education, Mexican Americans, *Multicultural Education, Program Administration, Thematic Approach, Whites

Important steps in building a multicultural curriculum are the development of specific criteria for cultural inclusion, use of different methods of instruction in the classroom, and implementation of in-service programs for the continual retraining of teachers. Various state departments have developed criteria for inclusion, and these can be used by school systems as a basis to develop their own criteria. However, school systems should go directly to the ethnic communities, where possible, for direction in the cultural concepts to be included in the curriculum and for examination of texts and other resource materials based on the criteria. Where ethnic groups are not available, the school system can use criteria written by other people or organizations of that same cultural group. A theme approach to teaching is preferable to a chronological approach, but course content may need to be reorganized before it is possible to use the theme approach. Schools should develop programs to retrain teachers in both knowledge and methodology so that teachers can successfully include all cultures on an equal basis in their classrooms. In addition to being more beneficial to diverse ethnic groups, multicultural programs also are more likely to be permanent than are more narrow based programs. (CM)

Identifiers—Washington (Seattle)

Emphasizing community resources which are most accessible to Seattle's Indian population, this manual is designed to aid Native Americans in their explorations of vocational training and occupational choices. In the information sources section, six Seattle organizations along with program services offered by each are listed. It is noted also that high school counselors are excellent resources for vocational training and career search. Listed in the training sources section are six community colleges and two vocational technical institutes with specific vocational courses offered. Also detailed are the following: Seattle Opportunity Industrialization Center, the Lummi Indian School of Aquaculture and Fisheries, El Centro de La Raza, apprenticeship information, Comprehensive Employment Training Act (CETA) office locations, Job Corps, Work Incentive Program (WIN), Manpower Development Training Act (MDTA), Washington Division of Vocational Rehabilitation, the Vocation Resource Center, health occupations, and 28 private vocational schools. The money sources section details federal loans, work-study, special benefits, Bureau of Indian Affairs aid, and tribal scholarships and loans. Special programs are listed for veterans, handicapped persons, ex-offenders, women, and for testing. (AN)

Descriptors—*American Indian Education, American Indians, Career Choice, *Career Guidance, Conservation Education, *Educational Opportunities, *Job Search Methods, Life Style, Measures (Individuals), Secondary Education, *Self Evaluation (Individuals), Tribes, Vocational Interests

To help Native Americans discover what careers might interest them, the exercises in this workbook manifest the user's needs, beliefs, likes and dislikes, thereby enabling a better choice of a suitable career. Following the first section on pronunciation and meaning of certain words necessary to a school or job search is a section on job dreams and possible roadblocks. Exercises on determining life-style and focusing on oneself follow. A self-inventory helps the user determine likes and dislikes in six areas: artistic, business, inquiring (read scientific books, work in a lab, take physics, chemistry, or geometry course), social (help others with their personal problems), vocational (fix electrical things, take a shop course), and enterprising (influence others, sell something, work for Indian causes). Instructions are included for scoring the self-inventory, matching interests with specific jobs in each area, and finding more information on job(s) chosen. The final section deals with tribal careers (landplanners, engineers, mechanics, clerical workers, accountants, legal attorneys, resource researchers, resource managers) and training opportunities (special programs in

Natural Resources for Native Americans at Humboldt State University, University of Wisconsin, University of Albuquerque, and the Lummi Indian School of Aquaculture and Fisheries). (AN)

The bilingual Spanish-English book contains 61 learning activities and educational games that parents can use to help their preschool children develop readiness skills. The activities are generally intended to develop gross and small motor skills, an awareness of the world around, independence, social awareness, and curiosity, although some are specifically designed to acquaint preschoolers with basic concepts, colors, numbers, and letters. Activities such as sorting clothes; making puzzles, instruments, and books; conducting simple experiments; pasting; and lacing are organized according to 13 major skill areas: categorizing; listening; touching; matching; sequencing; speaking; shapes; colors; music; numbers; letters; art; and science. Each activity or game is presented in large print on a separate page and is illustrated with cartoons and drawings. The Spanish translation of the activity appears on the facing page. A list of interrelated skills is included for each activity in both Spanish and English. (SB)

Descriptors—Administrative Policy, *Case Studies, Comparative Analysis, *Educational Change, Educational Planning, *Educational Strategies, Elementary Secondary Education, Experimental Programs, Needs Assessment, *Program Development, *Program Evaluation, Rural Areas, *Rural Education, Rural Schools, Rural Urban Differences, School Community Relationship

Seeking an understanding of rural communities in order to gain insights into opportunities for improving rural schools, this 2-year project examined 14 case studies and presented implications for future use. Selected as exemplary of particular strategies and representative of diverse populations of rural America, the case studies were examined through: (1) a design session involving six professional consultants; (2) a review of existing reports, evaluations, and related documents, and (3) site visits which involved observations and interviews with key participants. Each strategy was identified as addressing variables within the educational system or as external to the educational system. The 14 rural school improvement strategies were analyzed in terms of the success of each community project, as determined by the durability of the program over time and its continuing contributions to its original objectives. Conclusions were that improvement efforts in rural schools must be based on the reality of rural circumstances, and must include problem defining, planning, and implementing at the local level, as well as incorporating assistance from professionals and agencies outside the community. Identifiers—Faith Healing

Reviewing the research findings and issues which have been generated around the topic of Mexican American underutilization of mental health services, this paper discusses five major concepts: (1) the epidemiological paradox of Mexican American underutilization of services; (2) explanation offered for the paradox; (3) elaboration on the explanation of incompatibilities of services; (4) examination of the conceptual problems involved in underutilization; and (5) discussion of recommendations for change. The paper discusses the findings which revealed that underutilization is not homogeneous: the concept of utilization is quite complex, and measures of need, accessibility and quality of services are needed to interpret utilization rate findings; and the concept of the existence of incompatibilities between the service delivery system and the characteristics of the clients holds the most conceptual promise. A two-tier approach is suggested which emphasizes both the concepts of equity and compatibility between clients' needs and the services provided. It is recommended that more research be done on total systems, including com-

munity involvement, funding agencies, service facilities, providers, and clients. (Author/JD)

Identifiers—*Texas

One of a series of studies, this monograph presents descriptive information to provide an understanding of the present budgetary system for Community Mental Health Centers (CMHCs) as it relates to Mexican Americans in Texas. The document: (1) provides a description of federal and state laws and their historical evolution germane to the funding of CMHCs; (2) explains the appropriation system that Texas follows for its biennial budget; and (3) describes the sources of funds and the methods of securing them. An explanation of the grant-in-aid process employed by Texas is given indicating that no policy currently exists in the funding criteria that specifically creates policy which addresses the mental health needs of Mexican Americans, the state's largest linguistic minority group; however, information is presented which reveals an effort to reformulate this policy as of May, 1980. The paper also examines the relationship between the amount of a center's aid and the Mexican American population in the center's catchment area, and between the aid and the ethnic content of the centers' programs. No direct relationship is indicated, and further research is recommended to identify the variables and values needed to be included in budgeting systems to ensure that all populations, including special linguistic ones, are adequately and appropriately served. Identifiers—*Texas

Part of a series of studies designed to lead to policy recommendations to improve mental health services to Mexican Americans in Texas, this monograph explores the availability and accessibility of community mental health centers (CMHCs) throughout the state. In hopes of explaining the underutilization of the centers statewide, the locations of CMHCs in relation to the Mexican American and Anglo population clusters are plotted and the major

highways connecting the populations and the centers are traced. Because of the heavy concentration of the state's population in five major metropolitan areas (Houston, Dallas, San Antonio, Fort Worth, and El Paso), a second description of CMHCs in these cities is given in an effort to determine whether ethnicity affects accessibility to the centers. A series of questions examines: (1) locations of services; (2) relation of population clusters to CMHCs; (3) accessibility to the greatest number of people; and (4) locations of centers in relation to Mexican American neighborhoods. Conclusions suggests that statewide accessibility from Mexican American regions to CMHCs is poor; the metropolitan accessibility is somewhat better, but there are hints of a tendency to locate centers in the middle class Anglo neighborhoods. It is suggested that this preliminary study should generate more research into the reality of this descriptive archival research. (Author/JD)

Jackson, Dean C.

Navajo Community College—The President's Report, 1979-80.

Navajo Community Coll., Tsaile, Ariz.

Pub Date—80

Note—15p.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*American Indian Education, American Indians, Biculturalism, *Community Colleges, Continuing Education Centers, Cultural Awareness, Educational Legislation, *Educational Philosophy, Education Service Centers, Enrollment, *Instructional Systems, Relevance (Education)

Identifiers—*Culture Based Curriculum, Navajo (Nation), *Navajo Community College AZ, Tribally Controlled Community College Act, Tribally Controlled Education

An overview of the Navajo Community College (NCC) is presented with a message from the president and facts pertaining to both the Tsaile and Shiprock campuses. NCC President Jackson states that the uniqueness of NCC lies primarily in the instructional area which promotes the use of educational concepts contained in the Navajo culture to reinforce the standard academic program. President Jackson then discusses accomplishments, hopes, and plans (including working for an amendment to PL-95-471, the Tribally Controlled Community College Act of 1978). The main portion begins with the school's purpose which is to use the Navajo culture as a base from which to acquire the knowledge, skills, and technology of the dominant society in turn resulting in a fuller participation in the economic, social, and political world of the two prevailing cultures. The Tsaile campus is highlighted in the following areas: faculty/staff accomplishments, research in progress, technical aid, the 45 instructional programs offered, continuing education, student services, support services (including access to computers with 200 data bases), athletics (varsity team in archery ranked eighth nationally), and student recruitment. The Shiprock campus is similarly highlighted. Total student enrollment is discussed (2,021 for Spring/1980) as well as long-range planning and financial operations. (AN)

Descriptors—*American Indian Education, American Indians, Criteria, *Cultural Enrichment, *Curriculum Development, *Educational Objectives, Elementary Secondary Education, Family School Relationship, Field Trips, *Home Visits, Parent Participation, *Program Evaluation

Identifiers—Indian Education Act 1972, *Michigan (Saginaw)

In its fourth year the Cooperative Project in American Indian Development focused on the completion of Objectives 1, 2, 3-A, 3-B, 4, and 8. This report restates those objectives and the criteria used for each and includes an evaluation of the results based on data submitted by the project supervisor

and/or home liaison specialist and on data gathered by the evaluator. A chart summarizes the attainment status and relevant comments for the following six product objectives: (1) Objective 1 - to conduct activities during the school year to meet the special needs of Indian students for cultural awareness and enrichment; (2) Objective 2 - to involve at least seven new children in cultural enrichment sessions; (3) Objective 3-A - to finalize the K-2 or 3-5 unit of the American Indian curriculum; (4) Objective 3-B - to disseminate the finalized American Indian curriculum unit; (5) Objective 4 - to make 30 parental contacts per district through a home school liaison specialist; and (6) Objective 8 - to conduct 3 field trip experiences involving 30 students. Data indicates that Objectives 1, 2, 4, and 8 were attained. Appendixes detail objectives, workshop agendas, a curriculum rating scale, an evaluation form for the cultural awareness enrichment program, and a newsletter. (CM)

Identifiers—*Florida

Volume I of this 4-volume report contains the research instruments used in an 18-month project which was designed to understand the rural poor in terms of their information-seeking and information-utilization behavior patterns. Randomly divided into 3 groups, 840 families from 7 target counties in northwestern Florida were studied by a group of trained research investigators who had rural backgrounds. Treatment groups one and two of the population sample were issued information packages which contained descriptions of federal and state programs for low income families, and group one received explanations of the information, followed by visits to determine the use of the programs. No information was given to the control group (group three). All groups were administered bench-mark questionnaires, three pre-tests and three post-tests. A follow-up questionnaire was developed and administered to respondents in five of the counties. All data were coded for analysis purposes. Instruments included in this document are: the bench-mark survey questionnaire, a record sheet for information package follow-up visits, the three pre- and post-tests, and the follow-up questionnaire. The appendix presents lists of the programs included in each of the three information packages. (JD)

Identifiers—*Florida

Compiled as part of a 4-volume comprehensive report of a Florida project designed to understand the rural poor and their information-seeking and

information-utilization behavior patterns. Volume II served as a background document, describing the sample and providing basic information about the respondents. The sample population consisted of 840 low income respondents, approximately 66% black and 33% white, with almost 66% being females and slightly over 33% being males. Overall, this low income sample exhibited strongly positive attitudes towards other people, education, and religion, and felt that marriage and family were important influences in their lives. The median number of school grades completed for the sample was 6.04 years. The respondents were considered to be more politically than socially participative, with blacks being more involved than whites. A high level of motivation to work and desire to do a good job was indicated. Authoritarianism and alienation were characteristic of the sample. A sense of community solidarity was generally lacking. Blacks were seen as holding significantly higher present and future levels of aspiration, while whites had significantly higher past aspirations. (JD)

Descriptors—Community Information Services, Federal Programs, Information Dissemination, Information Utilization, Knowledge Level, Low Income Groups, Needs Assessment, Poverty Programs, Program Attitudes, Rural Education, Rural Population, State Programs, User Satisfaction (Information), Use Studies

Identifiers—Florida

Presented as part of a 4-volume comprehensive report of a Florida project designed to understand rural poor and their information-seeking and information-utilization behavior patterns, Volume III reported data collected in a pre-test, used to determine the awareness and utilization of seven anti-poverty programs. Low income rural residents (N=840) responded to questions about the following state and federal programs: (1) food stamps; (2) aid to the blind; (3) aid to the totally and permanently disabled; (4) aid to families with dependent children; (5) division of family services; (6) child nutrition; and (7) old age assistance. Eight questions were used to determine the knowledge about, need for, use of, and potential use of the programs. Data showed that information about these programs was reaching many of the low income people but revealed gaps between stated needs and receipt of assistance. In addition, the school was seen as the predominate and quite effective source of information about child nutrition programs. Nonrecipients were generally uninformed about locating information on available programs and eligibility requirements. (JD)

Identifiers—Constraints, Florida

Designed as Phase I of a project directed toward

the eventual establishment of multi-purpose, cooperative, local organizations concerned predominantly with the socio-economic development of low income rural families in northwest Florida, this survey project was conducted in six counties which were selected according to rurality, incidence of poverty, and racial composition. Identification was sought of the perceived institutional and individual incentives and constraints which affect the adoption of new ideas and economic practices by rural low income families. In order to develop profiles of psychosocio-economic resources of the target population, a 3-part pre-tested, questionnaire was used by trained field researchers in face-to-face interviews with 586 heads of households. Computerized analyses of the findings revealed 21 background, behavioral, attitudinal, and psychological characteristics which were typical of the low income population. Attitudes and receptivity of the population generally indicated a positive atmosphere for the introduction of new ideas and increased job opportunities. (JD)

The Delivery of Educational Services: The Small District Problem. A Review of the Literature.

Pub Date—8 Feb 80

Note—56p; Paper presented to the faculty of the Department of Educational Administration, University of Texas at Austin in partial fulfillment of the requirements for admission to candidacy.

Pub Type—Information Analyses (070)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Consolidated Schools, Curriculum Development, Delivery Systems, Educational Improvement, Educational Quality, Education Service Centers, Elementary Secondary Education, Rural Education, Rural Schools, Shared Services, Small Schools, Special Education, Teacher Education, Teacher Effectiveness, Vocational Education

Within the existing framework of public education in rural and small schools, educational leaders must always seek new ways for achieving substantive improvements in the delivery of educational services to their students. Although much of the official concern for rural/small schools has been directed toward consolidation and urbanization, small school leaders are showing an adeptness for identifying and implementing promising alternatives for educational improvement. The voluntary sharing of services, staff, and equipment demonstrates enormous potential. Although the problems are numerous, the opportunities for quality education in rural/small schools can be found in local resourcefulness, creativity, external assistance, cooperation and a willingness to provide the best possible educational program. The review of literature in this document is directed toward finding ways to improve the curriculum teaching quality, and overall quality of rural/small schools. Items included for review are: strengths and weaknesses of the school systems, teachers' problems, teacher training, vocational education, services for the handicapped and other disadvantaged students, educational aspirations and achievements of rural students, and opportunities for innovations and improvements in the delivery system. Descriptors—Education, Females, Hispanic Americans, Information Sources, Mexican Americans, Organizations (Groups), Politics, Puerto Ricans, Resource Materials

Identifiers—Chicanas, United States

The 70 citations in the annotated bibliography represent a selective sampling of resources focusing exclusively on Hispanic women (Mexican Americans, Chicanas, and Puerto Ricans) in the United States. The items cited are generally topical, of wide interest, readily accessible, inexpensive, and current

(some in-progress and forthcoming works are included). Literature, annotated bibliographies, research reports on a wide range of topics, and other materials are organized in four main categories: general, educational, cultural, and socio/political resources. Listings include title, author, publishing data, source, cost, and usually a one or two sentence annotation. In addition, a section of organizations and projects notes regional contact resources (in Colorado; California; Texas; Arizona; Washington, D.C.; and several northern states) which can provide information and assistance to individuals and groups concerned with issues relevant to Hispanic women. The title, address, telephone number, and contact person are given for each resource, along with a brief statement of its scope and focus. (Author/SB)

Descriptors—Adventure Education, Curriculum Development, Ecology, Environmental Education, Experiential Learning, History, Outdoor Education, Program Development, Resident Camp Programs

Fifty years of innovative programming in what has come to be called resident outdoor education are traced in this volume which examines the evolution of resident outdoor education from its early beginnings to the present. The several authors of this book are leaders in outdoor education who have been intimately involved in the development of programs and the teaching of other leaders. The various themes crystallize the essence of resident outdoor education as practiced in the United States from 1930-1980 and highlight the impact of this curriculum innovation on American education. Analyzing the impact that resident outdoor education has had on educational philosophy and practice, this book brings together numerous experiences in developing programs. Two aspects of outdoor education are prominent herein. The first (the central theme of the book) is that there is a need for direct contact with the environment, that some learning makes a deeper impact and is retained longer when a concept or an object is discovered, observed, sensed, and interpreted in the natural setting. The second aspect addresses learning to live with our fellow creatures. It is the intent of this volume to make possible a greater understanding of the outdoor education movement and of the need for extending its benefits throughout our school systems. (Author/AN)

The Bureau of Indian Affairs is Slow in Providing Special Education Services to All Handicapped Indian Children.

Comptroller General of the U.S., Washington, D.C. Pub Date—4 Sep 79

Note—21p.

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—American Indian Education, American Indians, Elementary Secondary Education, Federal Indian Relationship, Financial Support, Government Role, Handicap Identification, Resource Allocation, Special Education, Teacher Shortage

Identifiers—Bureau of Indian Affairs, Education for All Handicapped Children Act, Navajo Area Office Bureau of Indian Affairs AZ, Phoenix Area Office Bureau of Indian Affairs AZ

Many handicapped Indian children in Bureau of Indian Affairs (BIA) schools are not receiving the benefits of special education services due to problems caused by poor leadership and a lack of emphasis on the program. Because of the late and incomplete evaluation of students, too few special education teachers have been hired, and funds that should have been used for that purpose have been spent for other purposes. The Senate and House Committees on Appropriations should restrict the Bureau's fiscal year 1980 special education funds to hiring special education teachers and specialists. In

addition, the Secretary of the Interior should direct the Assistant Secretary for Indian Affairs to develop a plan to hire needed special education personnel as soon as possible and, further, to develop policies, guidelines, and realistic goals for the delivery of special education services to all handicapped children. The Navajo Area and Phoenix Area offices are used as examples throughout the report. (CM)

Descriptors—*Achievement Gains, *Basic Skills, *Bilingual Education, Elementary Education, English, *Language Proficiency, Mathematics, *Reading Skills, Spanish, *Spanish Speaking, Speech Skills

Identifiers—Austin School District TX, Elementary Secondary Education Act Title VII

Austin's 5-year Title VII project was intended to improve the achievement of elementary students in the following areas: oral language proficiency, knowledge of basic concepts, reading ability in Spanish, and proficiency in English reading and math. Results indicated that program participants gained in knowledge of basic concepts at the kindergarten level and, to some extent, in Spanish reading ability. Fifth grade project students showed greater achievement than their nonproject peers in English reading. However, in fifth grade math and fourth grade reading and math, project students and nonproject students did not differ in their rate of gains. The gap in achievement between Spanish-dominant or bilingual students and their English-dominant peers remained. The program raised several problems for consideration: (1) difficulty in locating appropriate instruments for measuring achievement objectives in bilingual programs; (2) difficulty in obtaining an appropriate sample of students; (3) personnel changes in both project staff and evaluation staff during the course of a project; and (4) lack of evaluation models applicable for longitudinal evaluations of achievement in bilingual programs. This final report on field testing of minicourses in undergraduate biology lists the objectives, procedures, applications, and conclusions of the project in which twelve schools utilizing minicourses, developed at Purdue University, were sampled. Data were collected and analyzed on student achievement, student attitude changes, and student reaction to the minicourse materials. The data were then used to revise and improve the minicourses where weaknesses in content or approach were detected during the field testing. A scale to measure student attitudes toward biology was developed by the project staff along with an instrument allowing students to record their feelings about various aspects of the minicourse. Descriptors—*Cognitive Development, *Elementary School Mathematics, Kindergarten, *Kindergarten Children, *Learning, Mathematical Concepts, Preschool Education, Pretend Play, *Role Playing, Sex Differences, Teaching Methods, Young Children

Identifiers—*Mathematics Education Research

Examining the effects of sociodramatic play and sex differences on mathematical learning and adult-observed playfulness in young children, several preliminary analyses were run of pre-test scores. Tests used were the Kindergarten Keys Mathematics Test and the Lieberman Playfulness Scale. The results of three 2(treatment) x 2(sex) analyses of variance indicated no significant main or interaction effects on receptive language I.Q., mathematical abilities, or adult-observed playfulness. The main analyses consisted of two 2(treatment) x 2(sex) analyses of covariance using pre and post measures on mathematical and adult-observed playfulness responses. The results showed that children in the sociodramatic group outperformed those in the control groups on mathematical and adult-observed playfulness abilities; there were no differences for main or interaction effects of sex resulting from the analyses. Descriptors—*Abstract Reasoning, College Science, Higher Education, *Metaphors, Models, Science Education, *Science Instruction

Identifiers—*Analogy

Analogical models can be powerful aids to reasoning, as when light is explained in terms of water waves; or they can be misleading, as when chemical processes are thought of in terms of life processes such as putrefaction. This paper proposes a structural characterization of good science analogy using a theoretical approach in which complex metaphors and analogies are treated as structure-mappings between domains. To delineate good from poor science analogy, a series of comparisons is made. First, metaphor and analogy are contrasted with literal similarity; then, explanatory-predictive analogy is contrasted with expressive metaphor; finally, within science, good explanatory analogy is contrasted with poor explanatory analogy. Analogies of historical importance are analyzed and empirical findings are discussed. (Author/CS)

A survey of Alabama and Mississippi high school science teachers was conducted in the spring of 1979 as an initial step in the Man and the Gulf of Mexico (MGM) marine education project. Most teachers surveyed had little or no formal coursework pertaining to the marine sciences. The teachers felt they did not have adequate knowledge for teaching most marine-related topics. Most familiar topics were rated as highest in importance. A variety of teaching strategies and approaches were identified as suitable for presenting marine education concepts. (Author/BW)

Energy: A Growing National Problem?
National Wildlife Federation, Washington, D. C.
Pub Date—78

Note—17p.
Available from—National Wildlife Federation, 1412 16th St., N.W., Washington, DC 20036 (single copy free, additional copies \$0.20 each).
Pub Type—Information Analyses (070) — Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Conservation (Environment), Conservation Education, *Energy, *Energy Conservation, *Environmental Education, Futures (of Society), *Natural Resources, Public Policy, *Resource Allocation, Science Education

This publication highlights information about the energy problem and indicates some possible solutions. Americans must find new energy sources and more efficient ways to utilize existing energy supplies. The National Wildlife Federation urges conservation of existing fuel supplies, exploration of new potential energy sources, adaption of some energy sources to lessen their negative affects, and adaption of personal living habits. Aurora City Schools Kindergarten Math Readiness Course of Study.

Aurora City Schools, Ohio.
Pub Date—79

Note—53p.
Pub Type—Guides - Classroom - Teacher (052)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—*Activity Units, Basic Skills, Cognitive Objectives, Course Descriptions, *Course Objectives, Educational Objectives, Elementary Education, *Elementary School Mathematics, *Kindergarten, Mathematics, *Mathematics Curriculum, Mathematics Education, Mathematics Instruction, *Program Descriptions, Resource Materials, Teaching Skills

The program goals and objectives for Kindergarten mathematics readiness in Aurora City Schools are listed and described. Consideration of Kindergarten Philosophy, the diverse population of students, the organizational design of adopted textbooks, child development and learning styles, are all assessed in establishing scope and sequence. The Kindergarten Mathematics Program is designed to incorporate the following facets: concrete or "hands-on" experiences for pupils; concept and language development for large group presentations; workbook activities; additional approaches for children with special learning difficulties; and materials for additional reinforcement or enrichment. The expected mathematical vocabulary and instructional objectives are listed. Detailed information for each objective given include the skills each child will master, affective and cognitive objectives, teacher and student resources, pupil activities, and evaluation methods. This document concludes with a listing of texts and materials recommended by the Kindergarten Math Adoption Committee in June 1979. (MP)

Quinn, Mary Ellen Kessler, Carolyn.
 Science Education and Bilingualism.

Pub Date—Apr 80

Note—21p.; Paper presented at the annual meeting of the National Association for Research in Science Teaching (53rd, Boston, MA, April 11-13, 1980).

Pub Type—Reports - Research (143) - Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Bilingualism, *Bilingual Students, Elementary Education, *Elementary School Science, *Hypothesis Testing, Learning Theories, Problem Solving, Science Education, Scientific Methodology
 Identifiers—*Piaget (Jean), *Science Education Research

Reported is a study to examine the effects of bilingualism on the ability to formulate scientific hypotheses or solutions to science problems by examining results of the same treatment motivating hypothesis formation given by the same teacher to classes of sixth-grade students ranging from monolingual English-speaking children to proficient bilingual Spanish-English speaking children. Results from these experimental groups were compared with control groups. The treatment given the experimental groups consisted of 12 science inquiry film sessions, and 6 discussion sessions, each 40 minutes in length, with all sessions for all groups taught by the same teacher in English. A significant difference was found between the experimental and control groups for both monolinguals and bilinguals when comparing the scopes for quality of scientific hypotheses, with the bilinguals scoring higher. Campbell, Clifton P.
 Associate Degree Curriculum for Engineering Technology.

Pub Date—80

Note—30p.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Engineering Education, *Engineering Technology, Higher Education, *Program Descriptions, *Science Curriculum, Science Education, *Science Programs, Two Year Colleges

Presented is a two-year associate degree curriculum for Engineering Technology. Specializations are provided in civil, electronics, and mechanical technology. The civil engineering technology specialization facilitates three major areas of study, and mechanical technology includes design and production options. Each curriculum was designed to include an adequate background and as much in-depth training as was considered reasonable in a two-year program. One of the advantages of these curricula is the almost common first year which permits greater flexibility for students in selecting an area of specialization. (Author/DS)

 The Programmable Calculator in the Classroom.
 Spons Agency—National Science Foundation, Washington, D.C.

Pub Date—23 Mar 79

Note—9p.; Contains occasional broken type.

Pub Type—Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Algorithms, *Calculators, Cognitive Processes, Computer Programs, Educational Technology, *Elementary Secondary Education, Instructional Materials, Learning Activities, *Mathematical Applications, *Mathematical Concepts, *Mathematical Logic, *Mathematics Education, *Mathematics Materials, Problem Solving
 Identifiers—*Programmable Calculators

The uses of programmable calculators in the mathematics classroom are presented. A discussion of the "microelectronics revolution" that has brought programmable calculators into our society is also included. Pointed out is that the logical or mental processes used to program the programmable calculator are identical to those used to program any computer. A list and description of thirteen mathematical- and computer-related concepts that students can learn by working with programmable calculators is presented. The report concludes with four additional uses of these electronic devices by teachers and pupils in the classroom. (MP)

Descriptors—Community Health Services, Elementary Secondary Education, *Environmental Education, *Health Education, Health Materials, Nutrition, *Overpopulation, *Population Education, Population Growth, Teaching Guides

This manual for home economics teachers contains eight sample lessons on health issues related to population growth. Among the topics treated are nutrition, family health, communicable diseases, causes of high mortality, and community health services. Lessons are designed for lower primary through high school students. A scope and sequence chart depicts how teachers can integrate population-related concerns into the health curriculum. These activities were adapted from materials prepared in several countries in Asia and Oceania. (WB)

This mathematics teacher's manual contains ten sample lessons on population growth and demography that were adapted from materials produced in several countries in Asia and Oceania. Among the mathematics concepts and skills students apply during these lessons are set theory, cardinal and ordinal numbers, frequency tallies, percentages, ratios, averages, inequalities, and the use of graphs and tables. Activities are designed for lower primary through high school students. Topics investigated include family size, fertility rates, age-sex pyramids, dependency ratios, and population projections. A scope and sequence chart illustrates how teachers can integrate population-related issues into the regular mathematics curriculum. (WB)

 Identifiers—*Computer Assisted Learning, *Mathematics Education Research

Computer Assisted Learning (CAL) is presented as a tool to assist with the teaching and learning of mathematics. Three types of learning are distinguished and the role of CAL within each of these areas is presented. The learning types described are the acquisition of concepts, the learning of relations and rules, and problem solving. Some CAL research and developmental studies in mathematics, along with applications, are reviewed. Sections also cover techniques of program and language design and how materials are used in order to achieve particular learning outcomes. This report concludes with some observations on the present requirements and future directions of CAL. (MP)

Descriptors—*Computer Assisted Instruction, *Computer Graphics, *Computer Managed Instruction, Computer Programs, Engineering, Engineering Education, Higher Education, *Instructional Materials, Mathematics Education

A program has been written for the interactive computer graphics facility at Rensselaer Polytechnic Institute that is designed to assist the user in learning the mathematical technique of convolving two functions. Because convolution can be represented graphically by a sequence of steps involving folding, shifting, multiplying, and integration, it is a natural candidate for computer-aided instruction. The program can be run in one of two modes depending on the experience and the user's needs. Detailed instructions and explanations are given at each step of the process. The running of the program is illustrated with samples of the graphics display and the experience gained by use in classes to date is summarized. (Author/DS)

The Meanings of Some Relational and Dimensional Terms in Children's Language.

Pub Date—Apr 79

Note—52p.; Paper presented at the Meeting of the National Conference on Diagnostic and Prescriptive Mathematics (6th, Tampa, FL, April 23, 1979). Contains occasional light and broken type.

Pub Type—Information Analyses (070) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Cognitive Development, *Cognitive Processes, Elementary Education, *Elementary School Mathematics, *Language Patterns, *Language Research, Learning Theories, *Mathematical Concepts, Mathematics Education, Preschool Education, *Spatial Perception, Student Characteristics

Identifiers—*Mathematics Education Research

Presented is a review of linguistic research on children's acquisition of more/less, same/different, big/little, long/short, and similar relational and dimensional terms. The review illustrates that children's meanings for words differ from adult meanings. The nature and findings of several research projects are discussed and it is concluded that while there are many limitations to the studies reported, there are several general and specific trends worth noting. Children's first meanings for terms can be viewed as incomplete and incorporating additional features as part of their meaning that are not part of adult meanings. Teachers of young children should be aware of the many diverse situations in which terms are used, and should listen more to children in natural language contexts where they exhibit spontaneous use of terms. The stated purpose of this paper is to emphasize the need for mathematics education research that focuses on linguistic variables as well as cognitive ones. (MP)

Arithmetic Disabilities: The Relation Between Arithmetic and Some Psychological Abilities. A Reanalysis.

Nijmegen Univ., The Netherlands.

Pub Date—Jan 80

Note—18p.; Paper presented at the International Congress on Early Childhood Education (Tel Aviv, Israel, January 1980).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Arithmetic, *Cognitive Measurement, *Cognitive Processes, Elementary Education, *Elementary School Mathematics, *Learning Disabilities, Learning Problems, Learning Theories, Mathematical Concepts, Mathematics Education, Problem Solving, *Student Characteristics

Identifiers—*Mathematics Education Research

This document notes that arithmetic disabilities can occur with an otherwise normal intelligence level. Two models of explanation are given. The first emphasizes the conditions under which children learn mathematics, the second views the identification of a number of factors in the "structure of intelligence" that appear to be strongly related with success in the teaching of mathematics. The starting point for this research is the question whether mathematics ability in primary schools is related with any

specific intellectual factors. Independent variables selected for study included intelligence, specific factors such as visual-spatial abilities, memory and fluency, and abilities in classification and seriation. One-hundred twenty pupils between the ages of 9 and 11 that were judged by their teachers to be one to two years behind in mathematics were selected for the study. The study concluded that, in general, arithmetic abilities are more dependent on verbal and non-verbal problem solving than on general mental ability. Addition and subtraction are distinguished from general mathematical ability as they appear to be dependent on different abilities. It is suggested that further research should aim at task-analysis of the different tasks. (MP)

Presented is part one of a training program designed to educate students and individuals in the importance of conserving energy and to provide for developing skills needed in the application of energy-saving techniques that result in energy efficient buildings. Alternatives are provided in this program to allow for specific instruction in energy-saving methods and procedures, or for integration with construction courses. It may also be used for self-paced instruction. The materials are divided into three parts: (1) Understanding and practicing energy conservation in buildings; (2) Determining amount of energy lost or gained in a building; and (3) Determining which practices are more efficient and installing materials. Major topics presented in part one include understanding the importance of energy, developing a concern for conserving energy, understanding the use of energy in buildings, care and maintenance of energy efficient buildings, and developing energy-saving habits. Descriptors—Air Conditioning Equipment, *Buildings, *Energy, *Energy Conservation, Independent Study, *Instructional Materials, Science Education, Secondary Education, Units of Study, *Vocational Education

Presented is part three of a training program designed to educate students and individuals in the importance of conserving energy and to provide for developing skills needed in the application of energy-saving techniques that result in energy efficient buildings. Alternatives are provided in this program to allow for specific instruction in energy-saving methods and procedures, or for integration with construction courses. It may also be used for self-paced instruction. The materials are divided into three parts: (1) Understanding and practicing energy conservation; (2) Determining amount of energy lost or gained in a building; and (3) Determining which practices are more efficient and installing materials. Major topics presented in each of these three parts include determining which practices are most efficient and economical, installing energy-saving materials, and improving efficiency of equipment. Identifiers—Environmental Problems, Environmental Quality

Presented in this guide are classroom and outdoor lessons intended to assist high school teachers in implementing environmental education objectives. Provided for each objective are background information, up to 15 related activities, and teacher questions designed to facilitate students' investigations. Among the learning strategies used are role-playing, field studies, library research, and interviews of local residents. Emphasis is upon data collection and discussion by students. The student's role in natural and social environments is stressed in most activities. (Author/WB)

Identifiers—*Aquatic Organisms, *Limnology

Described in this manual are two field investigations which utilize the natural environment to teach ecological principles to high school students. In groups of five to ten, students study two aquatic environments and then prepare a booklet which summarizes their work. The manual is divided into four parts: (1) teacher's guide; (2) student's guide;

(3) rivers, lakes, and ponds; and (4) sandy beaches. The teacher's guide describes goals and objectives, prerequisite student knowledge and skills, and stages of group growth. An overview of basic ecological principles and a discussion of the field study goals comprise the student's guide. The remaining two parts provide instructions for investigating a freshwater and a marine ecosystem. These activities consist primarily of transect and quadrat studies, chemical analysis, and species identification. Included in the appendix are some field procedures and a list of references. (WB)

Descriptors—*Basic Skills, *Elementary Education, *Environment, *Environmental Education, *Language Skills, *Outdoor Education, *Reading Games, *Reading Instruction, *Reading Skills, *Vocabulary Skills, *Writing Instruction, *Writing Skills

Described are over 100 activities designed to improve students' reading and writing skills by using the environment as a stimulus. The school, local community, family, and inner self serve as lesson topics. Learning strategies include word games, poetry, art projects, peer-produced mini-texts, and gardening. Also used are a word builder booklet and set of student reading cards, which can constitute complete lessons, supplementary lessons, or parts of other lessons. A graph for estimating reading level is provided so that teachers can adapt activities for students of different abilities. (WB)

Descriptors—*Conservation (Environment), *Conservation Education, *Elementary Education, *Elementary School Curriculum, *Energy, *Environmental Education, *Natural Resources, *Resource Materials, *Science Education, *Science Instruction

Recommendations for incorporating conservation education into the K-5 curriculum comprise this teacher's guide. Examined are eight natural resources: air, energy, forests and plant life, human resources, minerals, soil, water, and wildlife. Each of these topics is considered in two ways: (1) a chart depicts concepts basic to understanding the resource; and (2) a second chart lists related classroom activities. Both concepts and activities are indicated by grade level. Emphasized are local resources and concerns. (WB)

Environmental Education Curriculum.

Spons Agency—Florida State Dept. of Education, Tallahassee. Office of Environment Education.

Pub Date—Jun 77

Note—99p.; Contains occasional light and broken type. Guide prepared at the Glen Springs Elementary School, Gainesville, FL.

Pub Type—Guides - Classroom - Teacher (052)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—*Biological Sciences, *Botany, *Elementary Education, *Elementary School Curriculum, *Environmental Education, *Outdoor Education, *Resource Materials, *Science Education, *Science Instruction, *Soil Science, *Wildlife

Identifiers—*School Yards

Described is a K-5 curriculum developed by teachers for use in conjunction with an outdoor learning site adjacent to their school. A curriculum matrix depicts the sequence of organisms, habitats, and soil characteristics that students in each grade level should study. Also included is background information about the site for teachers. Organized by grades, each lesson plan includes objectives, a materials list, suggestions for student evaluation, and a brief outline of the activity. Among the learning strategies described are art projects, habitat stu-

dies, plays, and plant and animal identification. (WB)

An Analysis of the Impact of Public Participation

Activities in Water and Transportation Projects.

Pub Date—80

Note—350p.; Ph.D. Dissertation, The Ohio State University. Tables in Appendices contain small print and will not reproduce well.

Pub Type—Dissertations/Theses - Doctoral Dissertations (041) — Reports - Research (143)

EDRS Price - MF01/PC14 Plus Postage.

Descriptors—*Case Studies, *Citizen Participation, *Environmental Education, *Federal Government, *Federal Programs, *Natural Resources, *Public Agencies, *Public Opinion, *Public Relations, *Road Construction, *Water Resources

Identifiers—Resource Development Projects

Described is an analysis of variables potentially influential in public participation processes associated with Federally-funded projects in water resources, wastewater management, and highway construction. Methodology involved three phases: (1) a review of public participation literature to inductively identify variables present or recommended for presence in public participation activities; (2) organization of the 161 variables identified into sets describing potential elements and potential outcomes of public participation; and (3) analysis of 105 case studies of public participation for the presence and absence of the 161 variables. An analysis work sheet facilitated documentation of the occurrence of variables in each case study examined. The researcher used frequency and correlational computations to identify variables which merited further analysis. These variables were selected according to their frequency of documentation, frequency of significant correlations, and magnitude of correlations. Conclusions drawn from the examination of relationships among variables emphasized the importance of maintaining two-way communication between agency and participants and identified factors associated with undesired outcomes of public participation efforts. Scientific Literacy of High School Students.

Pub Date—Sep 80

Note—23p.; Paper presented at the Annual Conference of the Australian Science Teachers' Association (29th, Canberra, Australia, September 1-5, 1980).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Academic Achievement, *Foreign Countries, Grade 10, Grade 12, *Science Education, *Scientific Literacy, *Secondary Education, *Secondary School Science, *Student Evaluation

Identifiers—*Science Education Research

This investigation was undertaken in order to establish the status of scientific literacy among three groups of secondary school students in four Brisbane, Australia high schools, and to reduce the apparent reticence of science teachers to evaluate students' achievement in the various dimensions of scientific literacy by demonstrating appropriate evaluation techniques. Assessment of students' attainment of scientific literacy, as defined by Shwartz (1974), would require a battery of seven tests, each specifically developed to span one of the dimensions of scientific literacy. Baseline data presented here indicate that student achievement in science knowledge, problem solving, values underlying science, interrelationship of science and society, and interests in science, was low. While it is acknowledged that the low mean scores to some extent reflect the procedures adopted in constructing the test instruments, comparative data for year 10 (N=567) and year 12 (N=273) students show that differences in scores on the various test scales occur according to year, whether or not science was studied. (DS)

Descriptors—*Art Activities, *Ecology, Elementary Education, *Elementary School Science, *Environmental Education, Fundamental Concepts, Grade 2, Interdisciplinary Approach, Natural Resources, *Resource Materials, Science Education, Science Instruction

Presented are environmental education lessons adapted for use in the second-grade classes of Pinellas County, Florida. Many examples are drawn from local situations. Six conceptual schemes provide the guide's organizational framework: interrelationships, heredity and environment, change, effects of population growth, finite resources, and individual responsibility. Following a discussion of each scheme are outlines of related activities. These learning experiences include art projects, science experiments, class discussions, and three student workbooks. Also provided are illustrated test sheets with accompanying questions for the teacher to ask. (WB)

Descriptors—*Art Activities, *Ecology, Elementary Education, *Elementary School Science, *Environmental Education, Fundamental Concepts, Grade 3, Interdisciplinary Approach, Natural Resources, Outdoor Education, *Resource Materials, Science Education, Science Instruction

Presented are environmental education lessons adapted for use by third-grade teachers in Pinellas County, Florida. Six conceptual schemes provide the manual's organizational framework: interrelationships, heredity and environment, change, effects of population growth, finite resources, and environmental responsibility. Following a discussion of each scheme are outlines of related activities. These learning experiences utilize outdoor studies, class discussions, audiovisual materials, and games to help students understand some ecological concepts and environmental management problems. Several examples are drawn from local situations. (WB)

Where Are the Women Scientists: The Role of Parents, Teachers, and Friends in the Self-Concept Process.

Pub Date—Mar 79
Note—31p. Paper presented at Women & Society: A Symposium at St. Michael's College (Winooski, VT, March 23-25, 1979). Contains occasional marginal legibility.

Pub Type—Reports - Research (143) — Speeches - Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Academic Ability, *Females, *Longitudinal Studies, Science Education, Secondary Education, *Secondary School Science, *Self Concept, *Self Concept Measures

Identifiers—Michigan, *Science Education Research

Reported is a study to examine the relationship between parents', science teachers', and friends' evaluations of science ability - as seen by respondents - and the resulting self-concept of science ability held by eighth-grade females. Data were taken from first-year data of a five-year longitudinal study in progress among the eighth-grade population of the Grand Rapids, Michigan public schools. Only female respondents (N=856) were included in this research. Parent, teacher, and friend evaluations were independent variables; self-concept of science ability was the dependent variable. Information was taken from questionnaires from the Michigan State Self-Concept of Ability Scales. Data were analyzed with percentage tables, the Gamma Measure of Association, and a path model. Four variations of the path model controlling for race and socio-economic position of respondents were also drawn up. The major findings noted a positive relationship between the perceived evaluation of parents, teachers, and friends, and self-concept of science ability. The overall relationship was strongest for teachers, followed by friends; the effect of parental evaluation was the weakest. While parents and teachers were seen as attaching importance to doing well in science, many of them, on the other hand, were seen as evaluating respondents' science abilities as average. (Author/DS)

Energy Health and Safety Issues Need a Coordinated Approach. Report to the Congress by the Comptroller General of the United States.

Comptroller General of the U.S., Washington, D.C. Report No.—EMD-80-52
Pub Date—24 Jul 80

Note—42p.
Available from—Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (no price quoted).

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Accidents, *Energy, *Federal Programs, Federal Regulation, *Government Role, Health, *Health Programs, Public Agencies, *Safety

Recent energy-related accidents and growing attention to health problems resulting from the production and use of energy have heightened public concern about the effectiveness of government's role in energy health and safety. At least 20 Federal agencies are involved in energy health and safety, each operating independently of the other. A central focus upon energy health and safety issues is needed. The recommended means of accomplishing this goal is for Congress to establish a President's Commission on Energy Health and Safety. (Author/WB)

Descriptors—*Energy, *Energy Conservation, Environmental Education, *Federal Programs, Long Range Planning, *Program Evaluation, *Public Agencies, Public Policy, Resource Materials

Identifiers—Department of Energy, Energy Education

The United States Department of Energy (DOE) has not succeeded in establishing overall energy conservation goals or in developing and implementing a comprehensive, coordinated national energy conservation plan. These failures continue to perpetuate confusion over how much energy conservation is needed, how well the country is conserving energy, and what additional steps need to be taken in order to realize conservation's potential contribution.

tion towards solving national energy problems. The opportunity to develop an aggressive and effective energy conservation strategy should not be allowed to slip away. Accordingly, this report presents recommendations for developing a long-range national energy policy, establishing conservation goals, and formulating a comprehensive national conservation plan. Descriptors—*College Faculty, Engineering, Engineering Education, *Engineers, *Labor Demands, Models, *Prediction, Science Education, *Scientists

Presented are selected analytical papers from a Workshop of Specialists in Forecasts of Demand for Scientists and Engineers, convened in 1979 in Washington, D.C. This workshop was part of a study by the Commission on Human Resources of the National Research Council charged with evaluating existing projections of the demand for young faculty in the various fields of science and engineering, assessing the potential damage to the research enterprise that might result from declines in the representation of young persons on science and engineering faculties, and recommending to the NSF and other federal agencies appropriate policies to counteract such damaging effects. Topics of papers in this volume include an examination of alternative approaches to modeling the demand for faculty, an analysis of the demand of faculty in specific fields of science and engineering, a critical review of the literature on age and scientific productivity, and an overview of issues raised in the volume and an assessment of the present state of understanding of those issues. Descriptors—*Componential Analysis, Curriculum Development, Curriculum Problems, *Educational Change, Educational Philosophy, *Mathematics Curriculum, *Mathematics Education, Mathematics Instruction, Models, Trend Analysis

Identifiers—*Conceptual Analysis

Two concerns labeled as fundamental to the field of curriculum are identified: (1) the identification of educational content, and (2) the development of ways to make it available to young people. These factors are reviewed from the perspective of their influence on the mathematics curriculum, with note that the critical integral relationship between them is inadequately addressed by curriculum theorists. An eclectic approach to find the differences and commonalities among the disciplinary theories of knowledge is advocated. Besides suggesting that curriculum theorists reconsider the two fundamental concerns in relation to the mathematics curriculum, mathematics should illustrate points that apply to the other areas of subject matter. Integrating the selection of content and designing a presentation of that content is viewed as subject-matter or concept specific, while each factor separately can be

applied more directly to a variety of disciplines. (MP)

Course Goals in Biological and Physical Science, K-12.

Tri-County Goal Development Project, Portland, Ore.

Spons Agency—Office of Education (DHEW), Washington, D.C.; Oregon State Board of Education, Salem; Washington Office of the State Superintendent of Public Instruction, Olympia.

Pub Date—73

Note—887p.; Not available in hard copy due to copyright restrictions.

Available from—Commercial-Educational Distributing Services, P.O. Box 4791, Portland, OR 97208 (\$33.00).

Pub Type—Guides - Classroom - Teacher (052)

EDRS Price - MF06 Plus Postage. PC Not Available from EDRS.

Descriptors—Biological Sciences, Career Education, *Classification, *Elementary Secondary Education, Objectives, *Outcomes of Education, Physical Sciences, School Districts, Science Education, *Science Programs, Values Education

Presented are course goals which make explicit statements of possible science learning outcomes in grades K-12. These were prepared cooperatively by three school districts within the state of Oregon. Accompanying this list of course goals is a taxonomy which provides four sets of indexes for retrieving course goals in these areas: science program goals, career education program goals, knowledge and process classifications, and science subject matter taxonomy. Goals are additionally coded as to grade level, predominant concept/value words and index words. (CS)

Site Planning for Solar Access: A Guidebook for Residential Developers and Site Planners.

American Planning Association, Chicago, Ill.

Spons Agency—Department of Energy, Washington, D.C.; Department of Housing and Urban Development, Washington, D.C. Office of Policy Development and Research.

Report No.—HUD-PDR-481

Pub Date—Sep 79

Contract—H-2573

Note—146p.

Available from—Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (Stock No. 023-000-00545-0; \$4.75).

Pub Type—Guides - Non-Classroom (055)

EDRS Price - MF01/PC06 Plus Postage.

Descriptors—*Civil Engineering, Construction (Process), *Energy, *Housing, Landscaping, Resource Materials, Site Analysis, *Site Development, *Solar Radiation, Technical Education

This manual is intended to guide developers, site planners, and builders in designing residential developments so that access to sunlight is maintained for planned or potential solar collectors. Almost any housing development can be designed to facilitate the use of solar energy. Differences are not in costs but in planning. Described in this guidebook are the major elements of planning a housing site to protect solar access. These developments are: (1) site selection and analysis, (2) preliminary site planning, (3) general design approaches and techniques, (4) specific design strategies, (5) landscaping and plantings, and (6) covenants and easements. Also presented are two case studies which demonstrate the application of approaches and techniques discussed. Over 100 figures and tables supplement the written material. (WB)

Identifiers—*Energy Education

Presented are guidelines and recommendations

for establishing and implementing a school energy management program. An effective plan of action requires setting an achievable goal, establishing and maintaining communication, assigning actions, monitoring progress, and evaluating the entire process. Teachers, students, and staff should all be involved and energy education activities should be infused into regular classroom experiences. Each of these aspects of an energy management program is outlined in this manual. Included are sources of assistance in developing conservation measures and energy-related activities. (WB)

Martin, Ralph E., Jr.

Using Literature to "Teach" Science.

Pub Date—Nov 79

Note—11p.; Paper presented at the Annual Conference of the National Middle School Association (Dearborn, MI, November, 1979).

Pub Type—Guides - Classroom - Teacher (052) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Curriculum Development, Curriculum Enrichment, Elementary Secondary Education, *Interdisciplinary Approach, *Literature, *Science Activities, *Science Curriculum, Science Education

Described are several ways literature can be used to teach science. Literature can enhance the learning of science by providing students with more appealing materials which will motivate them to pursue their interests and explore real-life issues. Appealing materials increase student interests in science and stimulate higher-order thinking while increasing the levels at which students read, write, converse, and learn independently. Examples are given of literature integrated into science in the form of one-act plays, periodicals, bibliographies, science fiction, and non-fiction. Literature presents the human side of science and provides opportunities for students to experience issues which frequently confront scientists in real life. (Author/DS)

Described are some ideas for using photography in the elementary classroom. Justification for using photography in the classroom includes student interaction with the photography materials, building teacher-student rapport, the potential for integration into different areas of elementary curriculum, and support for the developmental theorists' viewpoints that learning takes place through direct experience with materials. Topics covered include: (1) Why use photography in the classroom; (2) Some projects that have been tried; (3) Other project ideas; (4) How to use a 35mm camera; (5) How to develop negatives; (6) How to print black and white pictures; (7) How to process your own color slides; and (8) Some books teachers and students might find helpful when working on a photography unit. Descriptors—*Conservation (Environment). Environmental Education. *Environmental Research. *Global Approach. International Organizations. *International Programs. Natural Resources. Physical Environment. *Program Descriptions. Program Evaluation. World Problems

Identifiers—Environmental Quality. United Nations Environment Programme

Described is the history of the United Nations Environment Programme (UNEP) since its formation in 1972. Also included is an examination of UNEP's major programs and projects, and an assessment of the organization's problems and future prospects. The function of UNEP is to coordinate the management and assessment of the world's environment by United Nations organizations and member nations. To illustrate how UNEP operates and to characterize the difficulties facing UNEP, this report highlights four program areas: Oceans, Arid Lands, the Global Environmental Monitoring System (GEMS), and Inforterra. Contributing to UNEP's past and future growth pains are: (1) the enormous scope of UNEP's mission; (2) external issues such as uncertain funding and political differences; and (3) internal management and operational concerns. An evaluation of the status of UNEP's 21 original goals concludes the report. (WB)

Descriptors—*Attribution Theory. Componential Analysis. Learning Theories. Mathematical Models. *Mathematics Education. *Models. *Statistical Analysis. *Student Characteristics

Identifiers—*Attribution Pattern Variable. *Mathematics Education Research

A two-year study that attempted to measure patterns of pupil attributions for success and failure in mathematics is reviewed. An attribution pattern variable (ATTPAT) was created to categorize individuals studied into three groups. The first group had an attribution pattern thought to lead to generalized low expectancies for success. Students classi-

fied as "high" were in the second level of ATTPAT, and pupils placed in the third level were those who could not be categorized within either of the first two groups. It was found that a student's perceptions about how others viewed him constituted important causal variables in both years of the study. Interest in and the rated importance of mathematics by students was heavily affected by performance in the second year of the study only. In general, the results and analysis indicated that notions about the functions of attribution patterns may need to be seriously revised. Factors identified as calling for further study include more explicit specification of hypotheses, models, and predictions about the causal role of attributions, with particular regard to the direction and magnitude of effects. Neither the grade level of the students nor the mathematics being studied is specified. (MP)

A Clinical Investigation of the Difficulties Experienced by Kindergarten Children in Developing "Models" for the Solution of Arithmetic Story Problems. Draft.

Pittsburgh Univ., Pa. Learning Research and Development Center.

Spons Agency—National Inst. of Education (DHEW), Washington, D.C.

Pub Date—Apr 80

Note—29p; Paper presented at the Annual Meeting of the American Educational Research Association (Boston, MA, April 7-11, 1980).

Pub Type—Reports—Research (143)—Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Arithmetic. Clinical Diagnosis. Clinical Experience. Cognitive Development. *Cognitive Processes. Elementary Education. *Elementary School Mathematics. Interviews. *Kindergarten Children. *Mathematical Models. *Problem Solving

Identifiers—*Mathematics Education Research. Spatial Ability

This investigation used a clinical interview technique to identify the difficulties of kindergarten children who are unable to develop models or representations of simple arithmetic story problems. It is hypothesized that effective human problem solvers first generate some type of "physical model" and use this model to create a mathematical one. Further, the development of a model requires children to make three types of abstractions from a story. These are: making an abstraction of the (1) objects described, (2) locations or possessors of the sets, and (3) operations or relationships described. The type of physical model involved in the study is "operations on sets." The focus of the research is on student attempts to answer addition and subtraction problems. Four components identified in tasks of abstraction are: set identity, set numerosity, operation on sets, and identity of answer set. The study results review each identified component, identify some pupil difficulties, and support several specific conclusions concerning pupil success with each aspect of abstraction. Also included are suggested steps for aiding students experiencing specific difficulties. (Author/MP)

The Relationship between Volume Conservation and a Volume Algorithm for a Rectangular Parallelepiped.

Pub Date—79

Note—230p; Ed.D. Dissertation. The University of British Columbia. Not available in hard copy due to marginal legibility of original document.

Pub Type—Dissertations/Theses—Doctoral Dissertations (041)—Reports—Research (143)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—Algorithms. *Cognitive Development. Cognitive Processes. Conservation (Concept). Elementary Education. *Elementary School Mathematics. Foreign Countries. Geometric Concepts. *Grade 6. Mathematical Concepts. Mathematics Education. Problem Solving. *Solid Geometry. *Student Characteristics

Identifiers—*Mathematics Education Research. Piaget (Jean). Spatial Ability. *Volume (Mathematics)

This study was designed to investigate the relationship between the level of conservation of displaced volume and the degree to which sixth-grade children learn the volume algorithm of a cuboid.

namely, volume equals weight times length times height. The problem chosen is based on an apparent discrepancy between the present school programs and Piaget's theory concerning the grade level at which the volume algorithm should be introduced. Subjects were chosen from three suburban schools in British Columbia and classified as conservers, partial conservers, and non-conservers, using a judgment-based test of volume conservation. The students were divided into three groups, two designated as experimental and one as a control group. One experimental group was taught the algorithm with the standard approach used in North America, with the second experimental group taught with a method emphasizing multiplication skills. Data showed that sixth graders could apply the volume algorithm to computation and comprehension questions regardless of their volume conservation level. There was also noted improvement of students' conservation levels regardless of their volume achievement scores or their treatments. (MP)

Identifiers—*Mathematics Education Research

This report reviews the Elementary Mathematics Testing Project of Alberta, Canada. The program attempted to determine the effectiveness of the elementary mathematics program using tests based on the program objectives. The project was carried out in Northern Alberta (Zone 1) during the 1978-79 school year. The revised mathematics curriculum, introduced in 1977, presents the mathematics content within five "strands" of Number, Operations and Properties, Measurement, Geometry, and Graphing, at all 6 elementary grade levels. Metric measurement, decimal fractions, and motion geometry are among the program's most prominent components. Criterion-referenced mathematics tests were designed to assess pupil understanding of specific content objectives, with the Zone One Testing Project centering on 5 specific questions related to the new mathematics program and applications of the test results. A variety of conclusions from the tests are given in this report, along with uses of student profile computer print-outs that were a product of the study. The paper concludes with implications of results of the study for the mathematics curriculum and several recommendations for further research. (MP)

Mentors Have Consequences and Reap Returns in Academic Biochemistry.

Pub Date—Apr 80

Note—18p.; Paper presented at the Annual Meeting of the American Educational Research Association (Boston, MA, April 7-11, 1980).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Biochemistry, Chemistry, *College Science, Higher Education, *Mentors, Professional Development, *Professional Recognition, *Research, Science Education, *Scientists

This paper explores the possible measurable effects of mentors (major professors) on the subsequent productivity of the mentor's students. Also asked is whether there are benefits to the productive scientist who acts as a mentor. Analysis is based on a population of male biochemists (N=66) who obtained their doctorates in 1957, 1958, 1962, and 1963. Various measures of departmental, mentor and/or student productivity and prestige were obtained. Sources included biographic information from American Men (and Women) of Science and productivity indications from the Science Citation Index and Chemical Abstracts. Results indicate no visible mentor effects, unless the postdoctoral context is one in which research productivity is encouraged. Other results indicate that the productivity of former students positively influences the research visibility of the mentor. (CS)

Descriptors—Attitudes, *Citizen Participation, *Conservation (Environment), Conservation Education, Federal Legislation, *Federal Programs, *Natural Resources, Public Agencies, Public Policy, Resource Materials, *Soil Conservation, Surveys, *Water Resources

The Soil and Water Resources Conservation Act of 1977 (RCA) directed the United States Department of Agriculture (USDA) to assess the country's nonfederal soil and water resources and to develop a program to conserve these and related natural resources. During this process, the USDA prepared and circulated for public comment a draft appraisal, draft program report, environmental impact statement, and summary document. Presented in this report is an analysis of the more than 65,000 responses received during the 60-day public review period in regard to these four publications. Topics addressed include status and condition of soil and

water resources, conservation objectives, alternative conservation strategies, the USDA and its current programs, and related resource conservation issues. Incorporated into the text are comments from the USDA-RCA public opinion survey conducted by Louis Harris and Associates. (WB)

Summarized in this compendium are approximately 500 ideas being used by colleges and universities in the United States to deal with the problem of energy conservation. These ideas range from suggestions that cost pennies to implement to sophisticated computer controls or the construction of new buildings which incorporate alternative energy sources. Generally, the ideas are simple and they can be easily adopted on other campuses. Among the successful energy-saving approaches reported are those that involve education, management, using waste energy, improving lighting practices, modifying ventilation systems, and installing insulation. Grouped according to problem area, each entry includes a short explanation of the procedure followed by a summary of costs and resulting benefits. Appendix tables list ideas by topic, institution, and geographic location. Also provided are names, addresses, and phone numbers of contact persons for each idea. (Author/WB)

Descriptors—Environmental Education, Environmental Standards, Land Use, *Pollution, *Public Administration, Public Agencies, *Public Policy, Resource Materials, *State Programs, *Waste Disposal, Wastes

Identifiers—Environmental Quality, *Toxic Substances

Presented are key issues to be addressed by state, regional, and local governments and agencies in creating effective hazardous waste management programs. Eight chapters broadly frame the topics which state-level decision makers should consider. These chapters include: (1) definition of hazardous waste; (2) problem definition and recognition; (3) principles of waste management; (4) transportation; (5) land use and related policy issues; (6) facility operations; (7) waste sampling and analysis, and leachate sampling; and (8) elements of state programs. Each chapter summarizes appropriate existing background information and relates it to the implementation issues facing state officials. Appendices include a model state hazardous waste management act and information regarding the disposal of particular categories of wastes. The guide does not preempt regulatory decisions still to be made at federal and state levels, since public input on these policies has not yet been solicited. (Author/WB)

Presented are recycling program alternatives, procedures for handling and marketing recyclable materials, and suggestions for financing and publicizing a recycling operation. This publication offers a general overview of the possibilities and potential pitfalls of recycling efforts, thereby serving as a catalyst and guide for organizations wishing to initiate recycling programs in their communities. Five chapters provide basic background information on: (1) markets; (2) models of operation; (3) handling, processing, equipment, and labor; (4) publicity and education; and (5) funding and business management. To demonstrate how the ideas and suggestions discussed can be put into operation, a case history of a Portland, Oregon recycling program is presented. In addition, a chapter on resources lists and briefly describes publications, films, and sources of information related to recycling. (WB)

This report is the result of a year of research on a number of options available to individuals who will ultimately find themselves responsible for dissemination of metric information to educators and consumers. This document was prepared by the American National Metric Council (ANMC), an organization founded in 1973 by representatives of private industry and designed to serve as the planning and coordinating forum for voluntary metric conversion in the United States. Sections in this report include: (1) a brief history of metrication in the United States; (2) information about metrication in Canada, Great Britain, and Australia, three countries in the process of converting to the metric system; (3) selected brief reports on consumer-oriented and education programs in this country, including brief recommendations by ANMC; (4) a summary of recommendations; and (5) a select bibliography. The 10 appendices include information about ANMC, an Advisory Committee membership roster, a media survey on metric coverage, project correspondence, Interstate Consortium on Metric Education (ICME) recommendations, and additional material related to the project. Summarized are responses to questionnaires prepared by the United States General Accounting Office (GAO) and mailed to state-level environmental agency administrators. Also included in this survey

are state program directors responsible for administering the Clean Air Act; the Federal Insecticide, Fungicide and Rodenticide Act; the Clean Water Act; the Resource Conservation and Recovery Act; and the Safe Water Drinking Act. Each section of this report contains a copy of the questionnaire together with a compilation of responses. These data are being used as the basis for a GAO report on the managerial obstacles that states face when implementing federal environmental programs. (Author/WB)

Identifiers—Environmental Protection, Environmental Quality

Identified and discussed in this report are the major obstacles administrators of state environmental programs perceive they face when implementing federal environmental laws. These findings are based upon a survey conducted by the United States General Accounting Office (GAO) in 1978. According to state officials, the greatest barriers to effective program management are: (1) delayed and inflexible regulations, (2) excessive Environmental Protection Agency (EPA) control over state programs, (3) inability to fill state staffing vacancies, and (4) delayed and uncertain federal funding. Because of these obstacles and the states' perception that they have been ignored by federal decision makers, the partnership envisioned by Congress between the EPA and the states for administering federal environmental programs has not materialized. Recommendations by the GAO for improving the EPA-state relationship are presented. (Author/WB)

Descriptors—Educational Improvement, *Educational Needs, Educational Quality, *Engineering Education, Engineers, Federal Aid, Federal Legislation, *Mathematics Education, *Science Education, Scientific Enterprise, *Scientific Literacy, Scientific Personnel, Scientists, *Technology

Prepared by the National Science Foundation and the Department of Education in response to a request by President Carter for information on the condition of science and engineering education in America, this document contains data showing a decline in the general understanding of science and technology among secondary school students. Although scientific and technical literacy are increasingly necessary in our society, high school students are dropping out of science and mathematics courses after the tenth grade, resulting in a citizenry lacking understanding of the increasingly technically complex world. While data from econometric projections indicate that, with a few exceptions, there should be adequate numbers of engineers and scientists at all degree levels to fill available positions in 1980, concern also needs to be given to the education of engineers, scientists, and technicians. Suggestions for actions to alleviate these and related problems and to refocus efforts for upgrading education for the citizen as well as for the specialist are included in this report. Positive action is needed so that all citizens have the scientific and technical understanding to participate in an increasingly complex society and so that technical and professional

personnel remain on the cutting edge of scientific and technical progress. (PB)

Basic Human Needs: A Framework for Action.

Houston Univ., Tex. Center for Integrative Studies. Spons Agency—United Nations Environment Program, New York, N.Y.

Pub Date—78

Note—249p.

Available from—Transaction Books, Rutgers-The State University, New Brunswick, NJ 08903 (\$5.95 paperback, \$19.95 clothbound)

Pub Type—Opinion Papers (120) — Books (010)

Document Not Available from EDRS.

Descriptors—Agriculture, *Change Strategies, Clothing, Developed Nations, Developing Nations, Development, Housing Deficiencies, Hunger, *Individual Needs, International Relations, *Needs Assessment, Physical Health, *Poverty, Quality of Life, Technological Advancement, *World Problems

The report presents quantitative assessments of basic human needs in the areas of food, health, education, shelter, and clothing and considers how these needs may be met in ways harmonious with environmental and developmental objectives. The target group consists of those who are below or just below poverty line. The book is presented in six chapters. Chapter I considers the dimensions of need. The chapter presents world statistics on undernourishment, literacy, income, life expectancy, and inadequate housing. It stresses that provision for psychosocial as well as physiological needs must be made. Chapter II suggests three lines of approach in assessing priority areas: the reference country, unit household, and life cycle methods. Chapter III discusses ways of establishing basic need levels, deficits, and targets. A review of population trends is included. Chapter IV considers alternatives in development and the needs/environment interaction. Chapter V discusses ways to meet needs deficiencies while considering environmental and developmental objectives within which needs would be met. Topics include food and agriculture, health services, education, shelter, and clothing. Chapter VI considers directions of technological development and the role of international trade in determining the degrees of self-reliance and interdependence of developing countries. Appendices include supplemental statistical data. (KC)

The book presents background papers and an overview of the proceedings of the American Association of Science Seminar on Women in Development held in Mexico City in June 1975. The objectives of the seminar were to show how and why development programs fail to reach women and to emphasize the waste of human potential that has resulted. An additional objective was to bring together researchers and developmental practitioners in order to bridge the gap between theory and practice. The book is divided into four parts. Part I presents 12 essays on selected issues which were prepared as background papers. They focus on women as being left out of the developmental process, particularly in various geographic and economic areas such as agriculture, urban life and labor, the family, the Moslem world, Latin America, southern African towns, and Yucatan. The concluding essays

discuss communications in relation to liberating women, women as co-managers, and the development approach to liberation. Part II offers an overview of the main concerns of the seminar and summaries of each of the five workshops, which covered food production, urban living and employment, education and communication, health and family planning, and women's formal and informal organizations. Part IV consists of three appendices. (CK)

Identifiers—International Womens Year

This annotated bibliography focuses on the effects of socioeconomic development and cultural change on women and on women's reactions to these changes. It is an expanded version of one which was prepared for the American Association of Science Seminar on Women in Development held in Mexico City in June 1975. The objectives were to disseminate this information more widely and to provide an overall view of the present status of research in the field. The introduction that precedes the bibliographic material summarizes some of the areas in which research is being done and suggests directions for further study. The 381 entries in the bibliography are divided into nine subject categories including general studies on women in development, the impact of society on women's roles and status, women's behavior patterns and customs, socioeconomic participation of rural women, education, work and economic development, health and family planning, women's informal and formal associations, and women, law, and politics. Each category is subdivided geographically. Information includes author, title, publisher, date, and abstract of the contents. Annexes list other bibliographies and annotate special issues of journals and periodicals devoted to women and development. (CK)

Descriptors—Annotated Bibliographies, Developing Nations, Developmental Programs, *Economic Development, *Females, Feminism, *Global Approach, *Sex Bias, Sex Role, Social Change, *Womens Studies

This bibliography, one major project of the New TransCentury Foundation's Secretariat for Women in Development, presents annotations of documents describing and analyzing the situation of women in the third world. The objective is to gather and make available papers on women and development having an action/programming orientation, papers prepared by and presenting the perspectives of third world women, and fugitive documents to be made available at the TransCentury Foundation. The document is presented in two parts. An overview explains the purpose and coverage of the bibliography and focuses on findings and recommendations concerning women in development. The 287 entries

are presented in ten broad topical sections which are subdivided geographically. These sections cover general material; women in their culture and society; socioeconomic participation; women and migration; formal and informal associations; education; rural development; health, nutrition, fertility, and family planning; communications; and impact of development and modernization. Each entry lists author, title, journal or publisher, date, and number of pages, as well as an abstract of the contents. An annex lists 27 bibliographies on women and development. (CK)

Pub Date—78

Note—37p.

Pub Type—Guides - Classroom - Learner (051) - Opinion Papers (120)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Definitions, Higher Education, Resource Materials, Scientific Methodology, *Sociology, *Theories

This monograph examines sociological perspectives and their applications. It is intended to help the college student coming to sociology for the first time to recognize that there are several perspectives within sociology and to disentangle the mass of terms associated with each. The first distinctive sociological perspective came from the work of Augustus Comte, who coined the word sociology from the Latin "socius" and the Greek "logos" in 1837. Comte's positivism, rather than examining the way individuals perceive the social world around them, assumes that society is an objective thing, "out there," waiting to be examined, analysed, and understood like the natural world. The functionalist perspective is rooted in the work of Emile Durkheim. Functionalism views society as an organism in which all the parts function in a way that ensures the continued well-being of the whole organism. The foundations of functionalism were built upon by later writers including Malinowski, Radcliffe-Brown, Parsons, and Merton. A conflict perspective offers us a view of society split into essentially two groups, aggregates, or classes whose interest conflict. The real foundations of the conflict theory are in the works of Marx and Engels. Other contributors include Weber and Dahrendorf. The monograph then turns to a discussion of phenomenology. Phenomenological approaches in sociology may be viewed in terms of a reaction against one of the major characteristics of traditional "mainstream" sociology. The sociological perspective known as symbolic interactionism is concerned primarily with the way that man interacts with his symbolic rather than his physical universe. The publication concludes with the statement that each perspective offers insights which illuminate each problem to some degree but, as yet, no one form of theorizing has overtaken all the others. Descriptors—Area Studies, Course Descriptions, Curriculum Development, Educational Strategies, *Global Approach, Graduate Study, Higher Education, Inservice Teacher Education, Interdisciplinary Approach, International Relations, *International Studies, *Masters Programs, Preservice Teacher Education, Program Descriptions, Social Sciences, Social Studies, Teacher Education, *World Problems

This paper presents models for integrating themes and concepts of international studies into an educational program for elementary and secondary teachers. The interdisciplinary program can be taken as preservice or inservice training. It was developed in response to the need for colleges to provide classroom teachers and administrators with new skills, cognitive information, and teaching strategies that are necessary to an understanding of our increasingly interdependent world. The master's degree

program described in this paper was developed by the Center for Teaching International Relations at the University of Denver. Students must complete 45 quarter hours which include 18 of education requirements, 10 in international studies, and 17 electives. Two courses (three quarter-hours each) were developed for the program: Curriculum Development Lab in International Studies and Comparative World Politics for Precollegiate Teachers. The first course introduces existing precollegiate curriculum in international studies and gives strategies for curriculum development, implementation, dissemination, and evaluation. It emphasizes skills of communication, participation, cooperation, organization, flexible response to different situations, and appreciation of historical precedents. Sample outlines for all three quarters are given. The second course is intended to help teachers develop sensitivity to world problems of resource scarcity, human rights, disarmament, and political freedom to; to increase their social science skills in research and analysis; and to encourage social participation skills. A sample syllabus for a module on resource scarcity is provided. (AV)

Development of Sextyping in Adolescent Females:

A Longitudinal Study.

Spons Agency—Iowa State Univ. of Science and Technology, Ames.

Pub Date—79

Grant—ISU-406-21-12

Note—13p.; Paper presented at Annual Meeting of the American Educational Research Association (San Francisco, CA, 1979).

Pub Type—Reports - Research (143) - Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Adolescents, *Androgyny, Attitude Change, Classification, Data Analysis, *Females, Research Methodology, Secondary Education, *Self Concept, *Sex Differences, *Sex Role, Sex Stereotypes, Social Science Research, Test Interpretation

This paper describes a longitudinal research study on the development of sextyping in adolescent females during their sophomore, junior, and senior years of high school. Each fall the test group of 65 females was administered the Bem Sex Role Inventory. Respondents whose self-perception was characterized as feminine demonstrated consistency across the sophomore and junior years of high school. Those who viewed themselves as androgynous also exhibited a consistent attitude with greatest variability during the sophomore year. The adolescent females who viewed themselves as possessing masculine characteristics at the outset exhibited a dramatic change in self-perception during the sophomore year. The authors discuss at length their use of two data analysis techniques in determining the results of the study. In one instance, the Bem t-test analysis was used as the dependent variable while in the second instance, the simple difference score recommended by R. Strahan was employed. This approach was undertaken in an attempt to determine the advantages of one approach over the other in a longitudinal analysis. (Author/AV)

Identifiers—Courses by Newspaper, *Energy Consumption, Energy Crisis

The guide presents teaching suggestions and lists resources to be used with the twelfth Course by Newspaper, "Energy and the Way We Live." Courses by Newspaper is a program presenting college-level courses to the public through the cooperation of newspapers and participating colleges. Other components of this course are the Article Booklet (SO 012 723) and the Reader/Study Guide (SO 012 724). The guide is divided into four sections. Section I describes how to use this course, including a list of national participating organizations, and a statement of objectives and needed planning. Section II offers teaching suggestions for 15 lessons focusing on our energetic lifestyle, the energy crisis, the history of energy use, waste, recent energy patterns, use in other countries, international politics relating to energy, nuclear and solar energy, synthetic fuels, and future choices and tradeoffs. Each lesson includes suggestions for background readings from the Reader/Study Guide, periodicals, and books, as well as discussion questions and activity suggestions. The activities make heavy use of experts as speakers and films, but also include making an ongoing rating chart, a questionnaire, and an energy index; debating; and making comparisons. Section III presents an annotated list of national organizations and their publications, while Section IV annotates the films suggested in the lessons. (CK)

The 15 articles in this booklet were written for the twelfth Course by Newspaper, "Energy and the Way We Live." Courses by Newspaper is a program presenting college-level courses to the public through the cooperation of newspapers and participating colleges. Other components of this course are the Reader/Study Guide (SO 012 724) and the Source Book (SO 012 722). The 1250-word articles, written by experts in the field and published in newspapers beginning in January 1980, focus on the nature and dimensions of our current energy dilemma, place it in historical perspective, and consider its implications for our way of life as individuals and as a nation. They also examine the potentials and limitations of alternative energy sources as well as moral, social, political, and economic issues involved in our energy choices. Specific topics are our energetic lifestyle, the nature of the energy crisis, ways energy was generated in the past, 19th and 20th century developments, waste, use of energy in other countries, international politics relating to energy, energy and the third world, conventional fuels in transition, nuclear and solar energy, synthetic fuels, effective energy use, and future choices and trade-offs. Authors include Dorothy K. Newman, S. David Freeman, Lynn White, Jr., John G. Burke, Daniel Bell, Norman Metzger, Joel Darmstadter, John K. Cooley, Kenneth E. Boulding, Don E. Kash, and others. (CK)

Identifiers—Courses by Newspaper, *Energy Consumption, Energy Crisis

This book of readings and a study guide on energy is part of the twelfth Course by Newspaper, "Energy and the Way We Live." Courses by Newspaper is a program presenting college-level courses to the public through the cooperation of newspapers and participating colleges. Other components of this course are the Source Book (SO 012 722) and the Article Booklet (SO 012 723). The book is divided into two parts consisting of 74 readings and a student study guide relating to the readings. The readings explore the wide-ranging dimensions of the U.S. energy debate by focusing on the nature and character of the energy crisis and its implications for our way of life. They are presented in four parts entitled the current energy dilemma, lessons from our past, energy and values, and alternative scenarios for our energy future. Appendices offer notes about the authors, suggestions for further reading, and a glossary. The study guide coordinates the readings with the newspaper articles in the Article Booklet and the lessons in the Source Book. Sections are divided into the same sections as the readings. Each section lists learning objectives, offers an overview of the lessons, defines key concepts and words, asks 25-75 factual review questions, and suggests 4-7 discussion questions. (CK)

Essential Map Concepts for Young Children.

Pub Date—9 Nov 79

Note—11p.; Paper presented at Annual Conference of the National Association for the Education of Young Children (Atlanta, GA, November 9, 1979).

Pub Type—Speeches/Meeting Papers (150) — Guides - Classroom - Teacher (052)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Class Activities, *Geographic Concepts, *Map Skills, Preschool Education, Primary Education, Symbolism

This paper discusses four key concepts to help preschool and primary grade children develop the ability to read and understand maps. Examples of student activities to develop each of the concepts are provided. The essential concepts are representation, symbolization, perspective, and scale. Representation is vital. Children must perceive that a map represents something else—a place. Block building provides an excellent opportunity for young children to develop an understanding of representation. By using non-thematic blocks, children can create with the blocks, the entity of their choice. Second, children need to know that a map is a symbol for a place that it uses other symbols such as colors for land and water and lines for roads and highways. Three activities to increase the understanding that a symbol represents a real or actual thing are "Lotto Match" in which children pair three dimensional items to two dimensional drawings of the same thing; having children write experience stories using pictures from magazines or drawings; and the game "Symbo" played like bingo in which children designate the correct sign for a river, desert, airport, school, and other map legend symbols. Perspective, the third essential, is difficult for young children and may not be fully developed until later. However, a foundation for future understanding can be provided. Children should be given many opportunities to view objects from above by taking field trips to tall buildings and observation towers. To help children discover that maps are drawn to show only the tops of things, not the vertical features, children can build towers and trace the shape of each block in the tower. In teaching the fourth essential, the concept of scale, emphasis should be placed on how maps show things as they are, only smaller. The scales of distance should be left to older children. Photographs of children can be displayed noting that pictures are just like the student, only not as large. (Author/RM)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—*Arbitration, *Change Strategies, *Civil Rights, *Consumer Protection, Disabilities

Identifiers—*Advocacy Planning

These two brief papers provide guidelines for consumers, parents, and advocates in the techniques of negotiation and whistleblowing ("speaking out against illegal, immoral, and otherwise wrong practices in human services, government, and other organizational settings"). Steps for preparing to negotiate with opposing groups involve proper timing of negotiation, obtaining backing of consumer groups, negotiating only with persons who have authority to make decisions, holding press conferences if the agency refuses to negotiate, and preparing strategies for negotiation. These strategies include controlling the session, presenting a united front with one spokesperson, understanding how people resist change, making a record of the meeting, and knowing what is or is not acceptable. The checklist for whistleblowers includes identifying issues carefully, reporting the problem to the immediate supervisor, speaking knowledgeably about the costs of inaction, identifying laws and regulations, developing private and public support, warning your family and friends that you may become the object of slander, knowing how much you are willing to compromise, and keeping a record of whistleblowing activities. Although intended for advocates of the disabled, the approaches are applicable for all negotiating and whistleblowing events. (Author/KC)

Pub Type—Guides - Non-Classroom (055)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—*Change Strategies, Civil Rights, Community Involvement, *Court Litigation, Definitions, *Disabilities, Federal Legislation, *Laws, Lobbying, Local Legislation, *Research Skills, State Legislation

Identifiers—*Advocacy Planning

This handbook, designed for advocates for disabled persons, focuses on understanding and researching the law. It is presented in seven chapters. Following the introduction (Chapter I), Chapter II provides a glossary of legal terms. The authors point out that in order for the law to serve as a tool for change, its language must be understood by those who advocate for change. Chapter III explains the system and interrelationships of laws at federal, state, and local levels. The four sources of law—constitutions, statutes, court decisions, and administrative regulations—are also discussed. Chapter IV provides an overview of the litigation process, specifically, what litigation is, who litigates, how, and where. Chapter V describes how to research the law. The intricacies of law libraries and indices and digests of laws are discussed. Chapter VI illustrates how to build a case on behalf of a client or constituency. An example based on an actual case is provided. Chapter VII addresses methods for systemic change and community organizing. Concepts discussed include power, reasons for inaction, and change strategies. The document concludes with a brief bibliography. (KC)

The Creative Use of Alienation.

Pub Date—Jul 80

Note—20p.; Paper presented at the Global Conference on the Future (1st. Toronto, Canada, July 20-25, 1980).

Pub Type—Speeches/Meeting Papers (150) — Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Alienation. Citizen Role. Creative Thinking. Cultural Influences. *Futures (of Society). *Global Approach. *Individual Needs. Long Range Planning. *Need Gratification. Social Influences. Social Values. *World Problems

The process of becoming a world citizen requires, as a first step, personal alienation from the cultural values and social arrangements of nation-states that stand in the way of such an effort. Three interrelated propositions underlie this thesis. First, prevailing cultural values and social arrangements severely limit opportunities for people to reach common agreement about the nature of and solution to significant problems. Second, to reach this common agreement, people must separate themselves from primary allegiance to nation-state interests and operate from a context of world citizenship. Third, learning how to operate from a context of world citizenship requires a participatory planning process which anticipates the future. Alienation occurs as a result of a discrepancy between basic human needs and socially structured opportunities to meet those needs. In Western society, social behavior based on competition, individualism, quantity, and technology perpetuates a system in which access to power and influence is unequal and where control of resources is exerted by upper layers in the hierarchy. These events contribute to alienation of people from their basic needs as human beings. The position of alienation can be used creatively; it distances the individual and allows for analysis of the alienating condition and establishment of a better connection with basic needs. However, it is necessary for the person to move beyond alienation and become involved in a different kind of social-cultural context. A global perspective requires conscious intentionality (purposeful behavior), freedom of choice, and collective effort. Creative work of people operating out of this context enables them to make their world different from what exists. (Author/KC)

Descriptors—Developed Nations. Developing Nations. Educational Policy. *Futures (of Society). *Global Approach. Information Processing. Information Science. *Information Systems. *Information Utilization. Postsecondary Education. Telecommunications. World Problems

Implications of the "Information Age" of telecommunications and microprocessing for global issues are examined. Presently, the Japanese, British, and French are leaders in the development of information software and in the creative fashioning of new institutional arrangements to use the new systems. In the West, the implications of an information age on global issues depend on whether information resources will be brought to bear on global issues and whether they will be used creatively to do so. A concerted effort to use telecommunications and microprocessing in creative ways is needed. Success depends on the evolution of the structure of the information software enterprise and the kind of learning that underlies usage of information systems. Relevant educational policies need to encompass in-school and out-of-school education, and should stress group anticipation rather than individual adaption. Another implication is that globally shared thinking still preserves cultural diversities. Because the planet is rapidly moving toward a three-world stereotype (countries in the information age; newly industrial, oil-rich, and socialist countries; and developing countries) it may become increasingly difficult to share the common learning and thinking processes which are necessary to build consensus. A solution to the information

gap problem lies in decentralizing the software functions of the information revolution. As many people as possible should be enabled to perform functions such as having access to data banks, contributing information, formulating computer programs to analyze information, and disseminating results.
